

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. PREFACE TO THE FIRST EDITION

OF THE

HISTORICAL SURVEY OF ST. DOMINGO.

(1796.)

SOON after I had published the History of the British Colonies in the West Indies, I conceived the design of compiling a general account of the settlements made by all the nations of Europe in that part of the New Hemisphere, but more particularly the French, whose possessions were undoubtedly the most valuable and productive of the whole Archipelago. This idea suggested itself to me on surveying the materials I had collected with regard to their principal colony in St. Domingo; not doubting, as the fortune of war had placed under the British dominion all or most of the other French islands, that I should easily procure such particulars of the condition, population, and culture of each, as would enable me to complete my design, with credit to myself, and satisfaction to the public. I am sorry to observe, that in this expectation I have hitherto found myself disappointed. The present publication, therefore, is confined wholly to St. Domingo; concerning which, having personally visited that unhappy country soon after the revolt of the negroes in 1791, and formed connections there, which have supplied me with regular communications ever since, I possess a mass of evidence, and important documents. My motives for going thither, are of little consequence to the public, but the circumstances which occasioned the voyage, the reception I met with, and the situation in which I found the wretched inhabitants, cannot fail of being interesting to the reader; and I flatter myself

that a short account of those particulars, while it confers some degree of authenticity on my labours, will not be thought an improper Introduction to my book.

In the month of September 1791, when I was at Spanish Town in Jamaica, two French gentlemen were introduced to me, who were just arrived from St. Domingo, with information, that the negro slaves belonging to the French part of that island, to the number, as was believed, of 100,000 and upwards, had revolted, and were spreading death and desolation over the whole of the northern province. They reported that the governor-général, considering the situation of the colony as a common cause among the white inhabitants of all nations in the West Indies, had despatched commissioners to the neighbouring islands, as well as to the States of North America, to request immediate assistance of troops, arms, ammunition, and provisions; and that themselves were deputed on the same errand to the Government at Jamaica: I was accordingly desired to present them to the Earl of Effingham, the commander in chief. Although the despatches with which these gentlemen were furnished, were certainly a very sufficient introduction to his lordship, I did not hesitate to comply with their request; and it is scarcely necessary to observe, that the liberal and enlarged mind which animated every part of Lord Effingham's conduct, needed no solicitation, in a case of beneficence and humanity. Superior to national prejudice, he felt, as a man and a christian ought to feel, for the calamities of *fellow men*; and he saw, in its full extent, the danger to which every island in the West Indies would be exposed from such an example, if the triumph of savage anarchy over all order and government should be complete. He therefore, without hesitation, assured the commissioners that they might depend on receiving from the government of Jamaica, every assistance and succour which it was in his power to give. Troops he could not offer, for he had them not; but he said, he would furnish arms, ammunition, and provisions, and he promised to consult with the distinguished Officer command-

ing in the naval department, concerning the propriety of sending up one or more of his Majesty's ships; the commissioners having suggested that the appearance in their harbours of a few vessels of war might serve to intimidate the insurgents, and keep them at a distance, while the necessary defences and intrenchments were making, to preserve the city of Cape François from an attack.

Admiral Affleck (as from his known worth and general character might have been expected) very cheerfully co-operated on this occasion with Lord Effingham; and immediately issued orders to the captains of the Blonde and Daphne frigates to proceed, in company with a sloop of war, forthwith to Cape François. The Centurion was soon afterwards ordered to Port au Prince. The Blonde being commanded by my amiable and lamented friend, Captain William Affleck, who kindly undertook to convey the French commissioners back to St. Domingo, I was easily persuaded to accompany them thither; and some other gentlemen of Jamaica joined the party.

We arrived in the harbour of Cape François in the evening of the 26th of September, and the first object which arrested our attention as we approached, was a dreadful scene of devastation by fire. The noble plain adjoining the Cape was covered with ashes, and the surrounding hills, as far as the eye could reach, every where presented to us ruins still smoking, and houses and plantations at that moment in flames. It was a sight more terrible than the mind of any man, unaccustomed to such a scene, can easily conceive.—The inhabitants of the town being assembled on the beach, directed all their attention towards us, and we landed amidst a crowd of spectators who, with uplifted hands and streaming eyes, gave welcome to their deliverers, (for such they considered us), and acclamations of *vivent les Anglois* resounded from every quarter.

The governor of St. Domingo, at that time, was the unfortunate General Blanchelande; a *marechal de camp* in the French

service, who has since perished on the scaffold. He did us the honour to receive us on the quay. A committee of the colonial assembly, accompanied by the governor's only son, an amiable and accomplished youth,* had before attended us on board the *Blonde*, and we were immediately conducted to the place of their meeting. The scene was striking and solemn. the hall was splendidly illuminated, and all the members appeared in mourning. Chairs were placed for us within the bar, and the Governor having taken his seat on the right hand of the President, the latter addressed us in an eloquent and affecting oration, of which the following is as literal a translation as the idiom of the two languages will admit:

“ We were not mistaken, Gentlemen, when we placed our
“ confidence in your generosity; but we could hardly enter-
“ tain the hope, that besides sending us succours, you would
“ come in person to give us consolation. You have quitted,
“ without reluctance, the peaceful enjoyment of happiness at
“ home, to come and participate in the misfortunes of stran-
“ gers, and blend your tears with our's. Scenes of misery
“ (the contemplation of which, to those who are unaccustom-
“ ed to misfortune, is commonly disgusting) have not suppress-
“ ed *your* feelings. You have been willing to ascertain the full
“ extent of our distresses, and to pour into our wounds the
“ salutary balm of your sensibility and compassion.

“ The picture which has been drawn of our calamities, you
“ will find has fallen short of the reality. That verdure with
“ which our fields were lately arrayed, is no longer visible;
“ discoloured by the flames, and laid waste by the devastations
“ of war, our coasts exhibit no prospect but that of desolation.
“ The emblems which we wear on our persons, are the tokens
“ of our grief for the loss of our brethren, who were surpri-
“ sed, and cruelly assassinated, by the revoltors.

* This young gentleman likewise perished by the guillotine under the tyranny of Robespierre. He was massacred at Paris, on the 20th July 1794, in the twentieth year of his age.

"It is by the glare of the conflagrations that every way surround us, that we now deliberate: we are compelled to sit armed and watchful through the night, to keep the enemy from our sanctuary. For a long time past our bosoms have been depressed by sorrow; they experience this day, for the first time, the sweet emotions of pleasure, in beholding you amongst us.

"Generous islanders! humanity has operated powerfully on your hearts; you have yielded to the first emotion of your generosity, in the hopes of snatching us from death; for it is already too late to save us from misery. What a contrast between *your* conduct, and that of other nations! We will avail ourselves of your benevolence; but the days you pre-serve to us, will not be sufficient to manifest our gratitude: our children shall keep it in remembrance.

"Regenerated France, unapprized that such calamities might befall us, has taken no measures to protect us against their effects: with what admiration will she learn, that, without your assistance, we should no longer exist as a dependency to any nation.

"The Commissioners deputed by us to the island of Jamaica, have informed us of your exertions to serve us.—Receive the assurance of our attachment and sensibility.

"The Governor-general of this island, whose sentiments perfectly accord with our own, participates equally in the joy we feel at your presence, and in our gratitude for the assistance you have brought us."

AT this juncture, the French colonists in St. Domingo, however they might have been divided in political sentiments on former occasions, seemed to be softened, by the sense of common suffering, into perfect unanimity. All descriptions of persons joined in one general outcry against the National Assembly, to whose proceedings were imputed all their disasters. This opinion was indeed so widely disseminated, and so deeply rooted, as to create a very strong disposition in the white

inhabitants of Cape François, to renounce their allegiance to the mother country. The black cockade was universally substituted in place of the tri-coloured one, and very earnest wishes were avowed in all companies, without scruple or restraint, that the British administration would send an armament to conquer the island, or rather to receive its voluntary surrender from the inhabitants. What they wished might happen, they persuaded themselves to believe was actually in contemplation; and this idea soon became so prevalent, as to place the author of this work in an awkward situation. The sanguine disposition observable in the French character, has been noticed by all who have visited them; but in this case their credulity grew to a height that was extravagant and even ridiculous. By the kindness of the Earl of Effingham, I was favoured with a letter of introduction to the Governor-general; and my reception, both by M. Blanchelande and the colonial assembly, was such as not only to excite the public attention, but also to induce a very general belief that no common motive had brought me thither. The suggestions of individuals to this purpose, became perplexing and troublesome. Assurances on my part, that I had no views beyond the gratification of curiosity, had no other effect than to call forth commendations on my prudence. It was settled, that I was an agent of the English ministry, sent purposely to sound the inclinations of the Colonists towards the Government of Great Britain, preparatory to an invasion of the country by a British armament; and their wishes and inclinations co-operating with this idea, gave rise to many strange applications which were made to me, some of them of so ludicrous a nature, as no powers of face could easily withstand.

This circumstance is not recorded from the vain ambition of shewing my own importance. The reader of the following pages will discover its application; and, perhaps, it may induce him to make some allowance for that confident expectation of sure and speedy success, which afterwards led to attempts, by the British arms, against this ill-fated country, with means that must otherwise have been thought at the time,—as in the

sequel they have unhappily proved,—altogether inadequate to the object in view.

The ravages of the rebellion, during the time that I remained at Cape François, extended in all directions. The whole of the plain of the Cape, with the exception of one plantation which adjoined the town, was in ruins; as were likewise the Parish of Limonade, and most of the settlements in the mountains adjacent. The Parish of Limbé was every where on fire; and before my departure; the rebels had obtained possession of the bay and forts at l'Acul, as well as the districts of Fort Dauphin, Dondon, and La Grand Riviere.

Destruction every where marked their progress, and resistance seemed to be considered by the whites, not only as unavailing in the present conjuncture, but as hopeless in future. To fill up the measure of their calamities, their Spanish neighbours in the same island, with a spirit of bigotry and hatred which is, I believe, without an example in the world, refused to lend any assistance towards suppressing a revolt, in the issue of which common reason should have informed them, that their own preservation was implicated equally with that of the French. They were even accused not only of supplying the rebels with arms and provisions; but also of delivering up to them to be murdered, many unhappy French planters who had fled for refuge to the Spanish territories, and receiving money from the rebels as the price of their blood. Of these latter charges, however, no proof was, I believe, ever produced; and, for the honour of human nature, I am unwilling to believe that they are true.

To myself, the case appeared altogether desperate from the beginning; and many of the most respectable and best informed persons in Cape François (some of them in high stations) assured me, in confidence, that they concurred in this opinion. The merchants and importers of European manufactures, apprehending every hour the destruction of the town, as much from incendiaries within, as from the rebels without, offered their goods for ready money at half the usual prices; and applications were made to Captain Affleck, by persons of all de-

scriptions, for permission to embark in the *Blonde* for Jamaica. The interposition of the colonial government obliged him to reject their solicitations; but means were contrived to send on board consignments of money to a great amount; and I know that other conveyances were found, by which effects to a considerable value were exported both to Jamaica, and the states of North America.

Under these circumstances, it very naturally occurred to me to direct my inquiries towards the state of the colony previous to the revolt, and collect authentic information on the spot, concerning the primary cause, and subsequent progress, of the widely extended ruin before me. Strongly impressed with the gloomy idea, that the only memorial of this once flourishing colony would soon be found in the records of history, I was desirous that my own country and fellow-colonists, in lamenting its catastrophe, might at the same time profit by so terrible an example. My means of information were too valuable to be neglected, and I determined to avail myself of them. The governor-general furnished me with copies of all the papers and details of office that I solicited, with a politeness that augmented the favour. The fate of this unhappy gentleman, two years afterwards, gave me infinite concern. Like his royal master, he was unfortunately called to a station to which his abilities were not competent; and in times when perhaps no abilities would have availed him.

The President of the colonial assembly, at the time of my arrival, was M. de Caducsh, who some time afterwards took up his residence, and held an important office, in Jamaica. He was a man of very distinguished talents, and withal strongly and sincerely attached to the British government, of which, if it were proper, I could furnish unquestionable proof.* This gentleman drew up, at my request, a short account of the origin and progress of the rebellion; and after my return to England, favoured me with his correspondence. Many im-

* He afterwards accompanied General Williamson back to St. Domingo, and was killed (or, as I have heard, basely murdered) in a duel at Port au Prince, by one of his countrymen.

portant facts, which are given in this work, are given on his authority.

To M. Delaire, a very considerable and respectable merchant in the town of the Cape, who has since removed to the state of South Carolina, I was indebted for a similar narrative, drawn up by himself in the English language, of which he is a very competent master. It is brief, but much to the purpose; displays an intimate knowledge of the concerns of the colony, and traces, with great acuteness, its disasters to their source.

But the friend from whose superior knowledge I have derived my chief information in all respects, is the gentleman alluded to in the note to page 116 of the following sheets; and I sincerely regret, that ill fortune has so pursued him as to render it improper in this work to express to him, *by name*, the obligations I owe to his kindness. After a narrow escape from the vengeance of those merciless men, Santhonax and Polverel, he was induced to return to St. Domingo, to look after his property; and, I grieve to say, that he is again fallen into the hands of his enemies. He found means, however, previous to his present confinement, to convey to me many valuable papers; and, among others, a copy of that most curious and important document, the dying deposition or testament of Ogé, mentioned in the fourth chapter, and printed at large among the additional notes and illustrations at the end of my work. Of this paper, (the communication of which, in proper time, would have prevented the dreadful scenes that followed), although I had frequently heard, I had long doubted the existence. Its suppression by the persons to whom it was delivered by the wretched sufferer, appeared to be an act of such monstrous and unexampled wickedness, that, until I saw the paper itself, I could not credit the charge. Whether M. Blanchelande was a party concerned in this atrocious proceeding, as my friend asserts, I know not. If he was guilty, he has justly paid the forfeit of his crime; and although, believing him innocent, I mourned over his untimely fate, I scruple not to avow my opinion, that if he had possessed a

thousand lives, the loss of them all had not been a sufficient atonement, in so enormous a case, to violated justice!

Such were the motives that induced me to undertake this Historical Survey of the French part of St. Domingo, and such are the authorities from whence I have derived my information concerning those calamitous events which have brought it to ruin. Yet I will frankly confess, that, if I have any credit with the public as an author, I am not sure this work will add to my reputation. Every writer must rise or sink, in some degree, with the nature of his subject; and on this occasion, the picture which I shall exhibit, has nothing in it to delight the fancy, or to gladden the heart. The prospects before us are all dark and dismal. Here is no room for tracing the beauties of unsullied nature. Those groves of perennial verdure; those magnificent and romantic landscapes, which, in tropical regions, every where invite the eye, and oftentimes detain it, until wonder is exalted to devotion, must now give place to the miseries of war, and the horrors of pestilence; to scenes of anarchy, desolation, and carnage. We have to contemplate the human mind in its utmost deformity: to behold savage man, let loose from restraint, exercising cruelties, of which the bare recital makes the heart recoil, and committing crimes which are hitherto unheard of in history; teeming

—— all monstrous, all prodigious things,

Abominable, unutterable, and worse

Than fables yet have feign'd, or fear conceiv'd!

MILTON.

All therefore that I can hope and expect is, that my narrative, if it cannot delight, may at least *instruct*. On the sober and considerate, on those who are open to conviction, this assemblage of horrors will have its effect. It will expose the lamentable ignorance of some, and the monstrous wickedness of others, among the reformers of the present day, who, urging onwards schemes of perfection, and projects of amendment in the condition of human life, faster than nature allows, are lighting up a consuming fire between the different classes of mankind, which nothing but human blood can extinguish.

To tell such men that great and beneficial modifications in the established orders of society, can only be effected by a progressive improvement in the situation of the lower ranks of the people, is to preach to the winds. In their hands reformation, with a scythe more destructive than that of time, mows down every thing, and plants nothing. Moderation and caution they consider as rank cowardice. Force and violence are the ready, and, in their opinion, the only proper application for the cure of early and habitual prejudice. Their practice, like that of other mountebanks, is bold and compendious; their motto is, *cure or kill*.

These reflections naturally arise from the circumstance which is incontrovertibly proved in the following pages, namely, that the rebellion of the negroes in St. Domingo, and the insurrection of the mulattoes, to whom Ogé was sent as ambassador, had one and the same origin. It was not the strong and irresistible impulse of human nature, groaning under oppression, that excited either of those classes to plunge their daggers into the bosoms of unoffending women and helpless infants. They were driven into those excesses—reluctantly driven—by the vile machinations of men calling themselves philosophers, (the proselytes and imitators in France, of the old Jewry associates in London), whose pretences to philanthropy were as gross a mockery of human reason, as their conduct was an outrage on all the feelings of our nature, and the ties which hold society together!

It is indeed true, that negro-rebellions have heretofore arisen in this and other islands of the West Indies, to which no such exciting causes contributed:—but it is equally certain, that those rebellions always originated among the newly-imported negroes only; many of whom had probably lived in a state of freedom in Africa, and had been fraudulently, or forcibly, sold into slavery by their chiefs. That cases of this kind do sometimes occur in the slave trade, I dare not dispute, and I admit that revolt and insurrection are their natural consequences.

But, in St. Domingo, a very considerable part of the insurgents were, not Africans, but, Creoles, or natives. Some of the leaders were favoured domestics among the white inhabitants, born and brought up in their families. A few of them had even received those advantages, the perversion of which, under their philosophical preceptors, served only to render them pre-eminent in mischief; for having been taught to read, they were led to imbibe, and enabled to promulgate, those principles and doctrines which led, and always will lead, to the subversion of all government and order.

Let me not be understood, however, as affirming that nothing is to be attributed on this occasion to the slave-trade. I scorn to have recourse to concealment or falshood. Unquestionably, the vast annual importations of enslaved Africans into St. Domingo, for many years previous to 1791, had created a black population in the French part of that island, which was, beyond all measure, disproportionate to the white; ✓ the relative numbers of the two classes being as sixteen to one. Of this circumstance the leaders of the rebels could not be unobservant, and they doubtless derived encouragement and confidence from it. Here too, I admit, is a warning and an admonition to ourselves. The inference has not escaped me: —it constitutes my parting words with the reader, and I hope they are not urged in vain.

Having thus pointed out the motives which induced me to write the following narrative; the sources from whence my materials are derived, and the purposes which I hope will be answered by the publication; nothing farther remains but to submit the work itself to the judgment of my readers, which I do with a respectful solicitude.

ADVERTISEMENT.

(1800.)

IN presenting the present edition of the *Historical Survey of St. Domingo* to the public, it is incumbent on me to acknowledge, that the many important corrections and improvements it has received in those chapters which relate to the constitution and political state of the French colony, under the ancient system, are chiefly derived from the very intelligent and interesting work of M. LABORIE, intituled, *The Coffee Planter of St. Domingo*.

On this occasion also I hope I may be allowed, as well in justice to myself, as from a sense of gratitude and respect towards the memory of my lamented friend, SIR ADAM WILLIAMSON, to boast that I had the honour and advantage of *his* assistance in that part of my work, which details the proceedings and operations of the British army in this ill-fated country, most of the sheets having been revised by him, as they came from the press, and corrected by his own pen in many places. Motives of prudence and delicacy (which no longer exist) induced me to suppress this acknowledgement in the lifetime of my friend. Some errors and omissions which (perhaps unavoidably) escaped his notice, have since been corrected and supplied by a British officer of noble birth, and considerable rank in the army, who served on the spot; and whose name, if I were permitted to disclose it, would stamp indisputable authority on the communications he has kindly furnished. That many mistakes and oversights however still remain, I am too conscious of my own insufficiency to doubt; nor in truth could the greatest precaution on my part have enabled me, at all times, to guard against misre-

presentation from some of the various persons whom the necessity of the case compelled me to consult. Thus, in giving an account of the French colonists;—their disposition towards the English, and their conduct towards each other;—to whom could I look for authentic information, but to some of themselves? Experience however has convinced me, that no great dependance can be placed on the charges and accusations which men raise against their fellow-citizens in times of civil commotion, and amidst the tumult of conflicting passions. A remarkable instance of the truth of this observation occurs in the case of a very respectable gentleman, formerly an inhabitant of Cape François: I mean M. AUGUSTUS DE GRASSE, (son of the late gallant admiral COUNT DE GRASSE), to whom I now think myself bound in honour to make a public reparation. In a paper formerly transmitted to me from St. Domingo, and annexed to the eighth chapter of my work, intituled, *Notes sur l'Evenement du Cap*, this gentleman was unjustly charged with having been present at the destruction of that town by the rebel negroes, aiding, abetting, and co-operating with their chiefs. I am now convinced that this atrocious charge is altogether groundless, and I cannot sufficiently express the concern I feel on reflecting, that I was made the instrument of conveying it to the press.—I have therefore, in this edition, not only reprinted the sheet, and omitted the calumny; but I insert in this place, with great satisfaction, the following certificate, which M. DE GRASSE has transmitted to me, in a very polite letter, from South Carolina, dated the 22d of October 1799.

“ Nous soussignés, habitans de la ville du Cap et des ses dépendances, présent au pillage, au massacre et à l'incendie de cette ville, les 19, 20, 21 Juin 1793, et jours suivans, certifions et attestons, sous la foy du serment, et pour rendre homage à la verité, Que M. Alexandre François Auguste de Grasse, habitant de la dépendance du Port de Paix, département du Cap, isle St. Domingue, fils du feu Comte de Grasse, &c. &c. étoit dans la ville du Cap avant et pendant le pillage, le massacre et l'incendie de cette ville, en qualité d'adjudant général de l'armée des blancs en activité contre les noirs insurgés; qu'après ce funeste événement'il fut persécuté par les commissaires civiles, et mis par leur

ordres aux arrêts au haut du Cap, sous la garde des negres armés, comme soupçonne d'avoir agi contre eux avec le général Galbaud, mais, qu'après s'être justifié, il fut réintégré dans ses fonctions, et chargé immédiatement du commandement des casernes; où il a protégé avec les troupes blanches, qui y étaient sous ses ordres, les hommes, femmes et enfans, échappés au fer et aux flâmes, qui s'y étaient réfugiés. Et qu'enfin, forcé, comme une partie des soussignés, à fuir les dangers qui menaçaient encore les tristes débris de la population blanche, il s'est embarqué avec sa femme, un enfant et quelques uns des soussignés, le 28 Juillet 1793, sur le brig le Thomas de Boston, destiné pour Charleston, Caroline du Sud, où il est arrivé et réside depuis le 14 Aout 1793, après avoir été, ainsi qu' environ 150 malheureux fugitifs, barbaement pillés par le corsaire Anglais la Susanna, de Nassau, Cap. Tucker, (qui n'auroit pas dû les considérer ni les traiter comme des ennemis, etans d'ailleurs sur un bâtiment neutre, qui ne contenoit uniquement que des passagers et leurs effets,) non seulement des negres domestiques qui les avaient volontairement suivis, mais encore du peu d'argent, de bijoux et de veselle d'argent qu'ils avaient sauvés du pillage par le secours de ces mêmes domestiques, (ce second pillage eut tien à la Grande Inague des Isles Caiques, où le corsaire Anglais retint notre vaisseau deux jours, pour compléter cet exploit.) Certifions et attestons parciillement, que M. De Gfasse arrivé à St. Domingue avant la révolution, n'a jamais cessé, du moment que ses effets se sont manifestés dans cette infortunée colonnie jusqu'à celui de son départ, d'être uni authentiquement avec les habitans blancs et en qualité de chef, élu par eux mêmes, soit au Port de Paix soit au Cap, pour repousser les dangers aux quels leurs vies et leurs propriétés étoient journellement exposés par les noirs insurgés, et enfin, qu'aucunes circonstances, pendant le cours des funestes événemens de St. Domingue, n'ont jamais donné lieu à former contre lui la moindre suspicion contraire aux interets et à la sureté individuelle de la population blanche de St. Domingue.

En foy de quoi nous avons signés, a Charleston, Caroline du Sud, Le 25 Octobre 1799.

(Signed by twenty respectable persons.)

Having thus made all the reparation in my power to this injured gentleman, I have farther to remark, in justice to myself, that my observations concerning the indisposition of the planters of St. Domingo towards the English, on the arrival of the first armament, appear, from a conversation I have had with some of them, to have been greatly misunderstood. Surely it reflects no dishonour on such of those gentlemen as had

no concern in, or knowledge of, the invitation made to General Williamson, to say that they were not, in the first instance, very cordially disposed towards their invaders—especially too, as those invaders came with a force by no means sufficient to give them certain and permanent protection. Whatever might have been the sentiments of certain individuals among them on this occasion, and how strongly soever the inhabitants of *Cape François* had, two years before, in a moment of irritation, expressed a wish for a British invasion, it seems to me that the chief planters, throughout the colony were altogether unacquainted with the English, and entertain no very favourable opinion of their laws, government, or manners. What then was their situation on the first arrival of the British troops? assailed, on the one hand, by a desperate and unprincipled faction of republicans and anarchists, whose principles they abhorred, and, on the other, called upon to co-operate with an insignificant foreign armament, which came, on the invitation of a few obscure Frenchmen,—not to restore the country to the loyal inhabitants, but distinctly and avowedly to conquer and annex it to the British dominion! In this dilemma, the majority of the planters acted as conscientious men might be expected to act. A great many of them left the country, and went into honourable poverty and exile in a distant land. Others, who were unable to follow their example, remained in silent obscurity, in different parts of the Island, waiting patiently (and I grieve to say, without effect) for better times. If all this be duly considered, I trust I shall be no longer told, that I have calumniated the French planters, merely because, as an impartial historian, I have represented them to have acted, as any other body of men, attached to their country, and faithful to their allegiance, would probably have acted, in similar circumstances.

BAHAMA ISLANDS.

CHAP. I.—General Description of	331
CHAP. II.—Turks Islands.—Origin of this name.—The process of making salt.—Dispute relative to the colonial government of these Islands	335
CHAP. III.—The Caicos	339
CHAP. IV.—Hmegas	341
CHAP. V.—Hogsties.—Ragged Island.—Mayaguana.—French Keys	342
CHAP. VI.—Crooked Island.—Castle Island.—The author lands at Portland Harbour.—Description of the beach and salt-pond.—General view of the country.—Pitt's Town.—Journey across Crooked Island.—Some account of its natural productions	347
CHAP. VII.—Acklin's Island.—Description of the country.—A cotton Plantation.—Mr. Eve's new gin.—Birds on Acklin's Island.—The flamingo.—Temperature of the climate.—Departure from Acklin's. 351	
CHAP. VIII.—The author leaves Crooked Island, and passed by long Island and Exuma; of which Islands, as also of Ram Key and Watling Island, a short account is given	366
CHAP. IX.—St. Salvador.—Landing of Columbus.—Present state of the Island.—The Author proceeds by the Keys (on one of which he lands), and over the Great Bahama Bank, to New Providence. 370	
CHAP. X.—Description of the harbour and Town of Nassau—its Trade.—Government of the Bahama Islands.—Judicial establishment.—Agricultural Society of the Bahamas.—Causes of the failure of cotton.—General description of the country	376
CHAP. XI.—Historical account of New Providence—Black Beard the Pirate.—Governor Woodes Rogers.—Colonel De Veaux's conquest of the Island from the Spaniards in 1783	386
CHAP. XII.—The Author proceeds from New Providence—passes the Berry Islands.—Short description of Andros.—Bimini Islands.—Eleuthera and Harbour Island.—Their discovery and settlement.—The course taken by Columbus through the Bahama Islands.—Abaco.—Great Bahama Islands. Some account of the Aborigines.—The Florida Stream.—Arrival at Charleston in North America.	395

AN
HISTORICAL SURVEY
OF
ST. DOMINGO, &c.

CHAP. I.

Political State of St. Domingo previous to the Year 1789.

THE inhabitants of the French part of St. Domingo, as of all the West Indian Islands, were composed of three great classes: 1st, pure whites. 2d. People of colour, and blacks of free condition. 3d. Negroes in a state of slavery. The reader is apprized that the class which, by a strange abuse of language, is called *people of colour*, originates from an intermixture of the whites and the blacks. The genuine offspring of a pure white with a negro is called a mulatto; but there are various casts, produced by subsequent connexions, some of which draw near to the whites, until all visible distinction between them is lost; whilst others fall retrograde to the blacks. All these were known in St. Domingo by the term *sang mêlés*, or

gens de couleur, (in familiar conversation they are collectively called *mulattoes*), and it must be attributed, I presume, to the greater discountenance which the married state receives from the national manners, that in all the French islands these people abound in far greater proportion to the whites than in those of Great Britain. In Jamaica, the whites out-number the people of colour as three to one. In St. Domingo, the whites were estimated at 30,000, the mulattoes at 24,000; of whom 4,700 were men capable of bearing arms, and accordingly, as a distinct people, actuated by an *esprit de corps*, they were very formidable. Of the policy which it was thought necessary in St. Domingo to maintain towards this unfortunate race, I shall presently treat; but it seems proper, in the first place, to give some account of the subordination in which, before the revolution of 1789, the parent state thought fit to hold the colony at large.

The laws of the mother country, as far as they were applicable, (as well the unwritten law, or *customs of Paris*, as the general laws of the king), were laws of St. Domingo. These had been introduced without formal promulgation, being supposed to attach to all the subjects of France, whether abroad or at home; and the king issued, from time to time, colonial edicts, which were received with entire submission. Even mandatory letters written by the minister, in the king's name, were considered and obeyed as laws in the colony.

The government was exercised by a Governor General, and an officer called Intendant, both of whom were nominated by the crown, on the recommendation of the minister of the marine, and generally considered as established in their respective offices for three years. Their powers in some cases were administered jointly; in others, they possessed separate and distinct authority, which each of them exercised without the concurrence or participation of the other.

In their joint administration they were empowered to enact such regulations as the existing exigencies of the country required; and their provisional decrees had the force of laws, until revoked by the king. The grants of unclaimed lands and rivers; the erection of public works and buildings; the opening public roads and repairing bridges; the regulation and police of the several ports of shipping; the provisional appointment of the members of the superior councils or courts of justice in cases of vacancy, and the absolute nomination of the subordinate officers of those courts, were concerns of joint authority. With the consent of the king's attorney, the governor and intendant had power to stay execution in cases of capital conviction, until the king's pleasure should be known; and they were commissioned to try and condemn to capital punishment defrauders of the public revenue, calling to their assistance five judges of the superior councils. The government of the clergy, the regulation of church establishments, and the erection of pa-

ishes, fell likewise under their joint cognizance; and they were empowered, in times of public necessity (of which they were the judges) to suspend, in certain respects, the laws of navigation, by admitting importations of flour and bread, and allowing the exportation of colonial produce in foreign vessels. Against abuses in the exercise of these various powers the people had no certain protection. Fortunately, it was rare that the governor and intendant agreed in opinion on the exercise of their joint authority, which therefore became necessarily relaxed; and the inhabitants derived some degree of security from the disputes and dissensions of the contending parties. In all such cases, however, the greatest weight of authority and right of deciding devolved on the governor. He was, in truth, an absolute prince, whose will, generally speaking, constituted law. He was authorized to imprison any person in the colony, for causes of which he alone was the judge; and having at the same time the supreme command of both the naval and military force, he had the means of exercising this power whenever he thought proper. On the other hand, no arrest, by any other authority, was valid without the governor's approbation. Thus he had power to stop the course of justice, and to hold the courts of civil and criminal jurisdiction in a slavish dependance on himself.

The peculiar province of the intendant, besides that of regulating the public revenues or finances of the colony, was the administration of justice. His

powers and functions were expressed in his title, *Intendant of justice, police, finance, war, and navy*. The collectors and receivers of all duties and taxes were subject to his inspection and control. He passed or rejected their accounts, and made them such allowances as he alone thought proper. The application of all the public monies in expenditures of all kinds for the army, the navy, fortifications, and public hospitals, rested entirely with the intendant;—a province which created such temptation to himself as no virtue could resist, and furnished such means of corruption, as overcame all opposition from others.

The taxes and duties were laid and modified, as occasion required, by a court composed of the governor-general, the intendant, the presidents of the provincial councils, the attorney-general, the commissioner of the navy, (*ordonnateur*), and the several commandants of the militia. This court was dignified by the title of the *Colonial Assembly*, although the colonists had not a single delegate in it. It ought not however to be suppressed that the taxes, were on the whole, very moderate. The total expenditure, comprehending all the contingencies of the colonial government, seldom exceeded £.50,000 sterling per annum.*

* The colonial taxes were called *Octroi*, and consisted principally of duties on the exportation of the chief articles of produce. The latest assessment previous to the revolution was made in 1776. There was, besides those duties, a direct tax of $2\frac{1}{2}$ per cent. on the rents of houses in the towns, and a poll-tax of three dollars on slave servants

For the better administration of justice, and the easier collection of the revenues, the colony was divided into three provinces, (which were distinguished, from their relative situation, by the names of the Northern, the Western, and Southern), and subdivided into ten districts. In each of those provinces resided a deputy governor, or commander *en second*, and in each district was established a subordinate court of justice, for the trial of causes both civil and criminal. Appeals however were allowed to the superior councils; of which there were two; one at *Cape François* for the Northern province, the other at *Port au Prince* for the Western and Southern. They were composed of the governor-general, the intendant, the deputy governors, the king's lieutenants,* a president, and twelve coun-

or artificers belonging to estates or manufactures, the products of which were not exportable, as provision plantations, lime and brick kilns, &c. This system of taxing their exported produce is justified by Mons. Laborie on the following ground: "The difference of soil in St. Domingo" (he observes) "is such, that a plantation of double the extent of land, and with twice the number of negroes and cattle, and managed with equal skill, shall often yield much less than another with half the same advantages: a tax therefore on the produce, is more equal and proportionate than either a land-tax or a poll-tax upon the negroes." Exterior expenses, such as the navy, and extraordinaries of all kinds, were paid by the crown out of the duties which were levied on the produce of the colony imported into the mother country.

* These king's lieutenants were military officers residing in the several towns, commonly with the rank of colonel. There were also in each town *majors* and *aides-major*. All these officers were wholly independent of the civil power, and owned no superior but the govern-

sellors, four *assesseurs*, or assistant judges, together with the attorney general and register. In these councils, or courts of supreme jurisdiction, as in the parliaments of France, the king's edicts, and those of the governor and intendant, were registered. Seven members constituted a quorum, but an appeal lay to the king in the last resort.

In most of the towns was a municipal establishment called *officers of the police*; consisting of inspectors, exempts, brigadiers, and sergeants. They were authorized to proceed summarily in quelling of riots; to arrest persons guilty of assault and battery, and thieves taken with *mainour*. They were appointed by the courts of justice, and were distinguished by a badge.

Another corps of nearly the same description, but of more extensive use, and of a more military character, was called the *maréchaussée*. It was partly composed of cavalry; and its functions were to watch over the general tranquillity; to protect travellers on the public highways; to arrest negroes wandering without passports, and malefactors of all descriptions; to enforce the prompt execution of

or-general, who could dismiss them at pleasure. It may be proper to observe too, that the counsellors held their seats by a very uncertain tenure. One of the governors (the Prince de Rohan) sent the whole number state prisoners to France. They were seized on their seats of justice, and put on board a ship in irons, and in that condition conveyed to Paris, and shut up for a long time in the Bastile, without trial or hearing.

civil and criminal process, and lastly, to assist in the collection of the public taxes.

The number of the king's troops on the colonial establishment was commonly from 2 to 3,000 men, composing two regiments of foot, and a brigade of artillery recruited from France; and each of the 51 parishes into which the colony was divided raised one or more companies of white militia, a company of mulattoes, and a company of free blacks. The whole number was reckoned between seven and eight thousand. The officers, both of the regular troops and the militia, were commissioned provisionally by the governor-general, subject to the king's approbation; but the militia received no pay of any kind.

From this recapitulation it is evident, that the peace and happiness of the people of St. Domingo depended very much on the personal qualities and native disposition of the governor-general, who was commonly selected from the navy or army. At the same time it must be honestly admitted, that the liberality and mildness, which of late years have dignified and softened the military character among all the nations of Europe, had a powerful influence in the administration of the government in the French colonies. It must be allowed also, that the manifest importance to which, as mankind become divested of ancient prejudices, the commercial part of the community, even among the French, has imperceptibly risen, insured to the wealthy and

opulent planters a degree of respect from persons in power, which, in former times, attached only to noble birth and powerful connexions; while the lower orders among the whites derived the same advantage from that unconquerable distinction which nature herself has legibly drawn between the white and black inhabitants; and from their visible importance, in a country where, from the disproportion of the whites to the blacks, the common safety of the former class depends altogether on their united exertions.

To contend, as some philosophers have idly contended, that no natural superiority can justly belong to any one race of people over another, to Europeans over Africans, merely from a difference of colour, is to waste words to no purpose, and to combat with air. Among the inhabitants of every island in the West Indies, it is the colour, with some few exceptions, that distinguishes freedom from slavery: so long therefore as freedom shall be enjoyed exclusively by one race of people, and slavery be the condition of another, contempt and degradation will attach to the colour by which that condition is generally recognized, and follow it, in some degree, through its varieties and affinities. We may trace a similar prejudice among the most liberal and enlightened nations of Europe. Although nothing surely ought to reflect greater lustre on any man than the circumstance of his having risen by industry and virtue above the disadvantages of mean birth and indigent parentage, there are,

nevertheless, but few persons in the world who delight to be reminded of this species of merit. There is a consciousness of something disgraceful in the recollection; and it seems therefore reasonable to conclude, that if nature had made the same distinction in this case as in the other, and stamped, by an indelible mark, the condition and parentage on the forehead, the same, or nearly the same effect would have resulted from it, as results from the difference of colour in the West Indies. I mean however only to account for, in some degree, not to defend altogether, the conduct of the whites of St. Domingo towards the coloured people; whose condition was in truth much worse than that of the same class in the British colonies, and not to be justified on any principle of example or reason.

In many respects their situation was even more degrading and wretched than that of the enslaved negroes in any part of the West Indies; all of whom have masters that are interested in their preservation, and many of whom find in those masters powerful friends and vigilant protectors. Although released from the dominion of individuals, yet the free men of colour in all the French islands were still considered as the property of the public, and as public property they were obnoxious to the caprice and tyranny of all those whom the accident of birth had placed above them. By the colonial governments they were treated as slaves in the strictest sense; they are liable, on attaining the age of manhood, to serve three years in the military establishment called the

maréchaussée, and on the expiration of that term they were compelled to serve in the militia of the parish or quarter to which they belonged, without pay or allowance of any kind, and in the horse or foot, at the pleasure of the commanding officer; and obliged also to supply themselves, at their own expense, with arms, ammunition, and accoutrements. The rigour with which the king's lieutenants, majors, and aides-major, enforced their authority over these people, had degenerated into the basest tyranny.

They were forbidden to hold any public office, trust, or employment, however insignificant; they were not even allowed to exercise any of those professions, to which some sort of liberal education is supposed to be necessary. All the naval and military departments, all degrees in law, physic, and divinity, were appropriated exclusively by the whites. A mulatto could not be a priest, nor a lawyer, nor a physician, nor a surgeon, nor an apothecary, nor a schoolmaster. He could not even assume the surname of the white man to whom he owed his being. Neither did the distinction of colour terminate, as in the British West Indies, with the third generation. The privileges of a white person were not allowed to any descendant from an African, however remote the origin. The taint in the blood was incurable, and spread to the latest posterity. Hence no white man, who had the smallest pretensions to character, would ever think of marriage with a negro or mulatto woman: such

a step would immediately have terminated in his disgrace and ruin.

Under the pressure of these accumulated grievances, hope itself, too frequently the only solace of the wretched, was denied to these unfortunate people; for the courts of criminal jurisdiction adopting the popular prejudices against them, gave effect and permanency to the system. A man of colour being prosecutor (a circumstance in truth which seldom occurred) must have made out a strong case indeed, if at any time he obtained the conviction of a white person. On the other hand, the whites never failed to procure prompt and speedy justice against the mulattoes. To mark more strongly the distinction between the two classes, the law declared that if a free man of colour presumed to strike a white person of whatever condition, his right hand should be cut off; while a white man, for a similar assault on a free mulatto, was dismissed on the payment of an insignificant fine.

In extenuation of this horrible detail, it may be said with truth, that the manners of the white inhabitants softened, in some measure, the severity of their laws: thus, in the case last mentioned, the universal abhorrence which would have attended an enforcement of the penalty, made the law a dead letter. It was the same with the Roman law of the Twelve Tables, by which a father was allowed to inflict the punishment of death on his

own child:—manners, not law, prevented the exertion of a power so unnatural and odious.

But the circumstance which contributed most to afford the coloured people of St. Domingo protection, was the privilege they possessed of acquiring and holding property to any amount. Several of them were the owners of considerable estates; and having happily the means of gratifying the venality of their superiors, these were secure enough in their persons; although the same circumstance made them more pointedly the objects of hatred and envy to the lower orders of the whites.

The next and lowest class of people in the French islands were the negroes in a state of slavery; of whom, in the year 1789, St. Domingo contained no less than 480,000. It was in favour of this class that Louis XIV. in the year 1685, published the celebrated edict, or code of regulations, which is well known to the world under the title of the *Code Noir*; and it must be allowed, that many of its provisions breathe a spirit of tenderness and philanthropy which reflects honour on the memory of its author;—but there is this misfortune attending this, and must attend all other systems of the same nature, that most of its regulations are inapplicable to the condition and situation of the colonies in America. In countries where slavery is established, the leading principle on which government is supported, is *fear*; or a sense of that absolute coercive necessity, which leaving no choice of action, supersedes all question

of *right*. It is in vain to deny that such actually is, and necessarily must be, the case in all countries where slavery is allowed. Every endeavour therefore to extend positive rights to men in this state, as between one class of people and the other, is an attempt to reconcile inherent contradictions, and to blend principles together which admit not of combination. The great and, I am afraid, the only certain and permanent security of the enslaved negroes, is the strong circumstance that the interest of the master is blended with, and in truth, altogether depends on, the preservation, and even on the health, strength, and activity of the slave. This applies equally to all the European colonies in America; and accordingly, the actual condition of the negroes in all those colonies, to whatever nation they belong, is I believe nearly the same. Of that condition I have given an account in another place:* I have therefore only to observe in this, that in all the French islands, the general treatment of the slaves is neither much better nor much worse, as far as I could observe, than in those of Great Britain. If any difference there is, I think that they are better clothed among the French, and allowed more animal food among the English. The prevalent notion, that the French planters treat their negroes with greater humanity and tenderness than the British, I know to be groundless; yet no candid person, who has had an opportunity of seeing the negroes in the French islands, and of contrasting

* Vol. II. Book 4. C. 1.

their condition with that of the peasantry in many parts of Europe, will think them, by any means, the most wretched of mankind.

On the whole, if human life, in its best state, is a combination of happiness and misery, and we are to consider that condition of political society as relatively good, in which, notwithstanding many disadvantages, the lower classes are easily supplied with the means of healthy subsistence; and a general air of cheerful contentedness, animates all ranks of people,—where we behold opulent towns, plentiful markets, extensive commerce, and increasing cultivation—it must be pronounced that the government of the French part of St. Domingo (to whatever latent causes it might be owing) was not altogether so practically bad, as some of the circumstances that have been stated might give room to imagine. With all the abuses arising from the licentiousness of power, the corruption of manners, and the system of slavery, the scale evidently preponderated on the favourable side; and, in spite of political evils and private grievances, the signs of public prosperity were every where visible.

Such were the condition and situation of the French colony in St. Domingo in the year 1788—an eventful period; for the seeds of liberty which, ever since the war between Great Britain and her transatlantic possessions, had taken root in the kingdom of France, now began to spring up with a rank luxuriance in all parts of her extensive do-

minions; and a thousand circumstances demonstrated that great and important changes and convulsions were impending. The necessity of a sober and well-digested arrangement for correcting inveterate abuses, both in the mother country and the colonies, was indeed apparent; but, unhappily, a spirit of subversion and innovation, founded on visionary systems inapplicable to real life, had taken possession of the public mind. Its effects in St. Domingo are written in colours too lasting to be obliterated; for the pride of power, the rage of reformation, the contentions of party, and the conflict of opposing interests and passions, produced a tempest that swept every thing before it.

CHAPTER II.

From the Revolution of 1789, to the Meeting of the First General Colonial Assembly.

ON the 27th of December 1788, the court of France came to the memorable determination to summon the States General of the kingdom; and resolved that the representation of the *tiers état* (or commons) should be equal to the sum of the representation of the other two orders.

This measure, as might have been foreseen, proved the basis of the great national revolution that followed; and it operated with immediate and decisive effect in all the French colonies. The governor of the French part of St. Domingo, at that period, was Mons. Duchilleau, who was supposed secretly to favour the popular pretensions. He was allowed therefore to continue unmolested in the seat of government; but the king's sceptre dropped from his hand; for when he attempted to prevent the parochial and provincial meetings, which were every where summoned, from assembling, his proclamations were treated with indignity and contempt: the meetings were held in spite of the governor, and resolutions passed declaratory of the right

of the colonists to send deputies to the States General. Deputies were accordingly elected for that purpose, to the number of eighteen, (six for each province), who forthwith, without any authority either from the French ministry or the colonial government, embarked for France, as the legal representatives of a great and integral part of the French empire.

They arrived at Versailles the latter end of June, about a month after the States General had declared themselves the national assembly. But neither the minister nor the national assembly were disposed to admit the full extent of their claims. The number of eighteen deputies from one colony was thought excessive; and it was with some difficulty that six of them only were admitted to verify their powers, and seat themselves among the national representatives.

There prevailed at this time throughout the cities of France, a very strong and marked prejudice against the inhabitants of the Sugar Islands, on account of the slavery of their negroes. It was not indeed supposed, nor even pretended, that the condition of this people was worse at this juncture than in any former period: the contrary was known to be the truth. But declamations in support of personal freedom, and invectives against despotism of all kinds, had been the favourite topics of many eminent French writers for a series of years: and the public indignation was now artfully raised against

the planters of the West Indies, as one of the means of exciting commotions and insurrections in different parts of the French dominions. This spirit of hostility against the inhabitants of the French colonies, was industriously fomented and aggravated by the measures of a society, who called themselves *Amis des Noirs* (Friends of the Blacks); and it must be acknowledged, that the splendid appearance, and thoughtless extravagance, of many of the French planters resident in the mother country, contributed by no means to divert the malice of their adversaries, or to soften the prejudices of the public towards them.

The society in France called *Amis des Noirs* was, I believe, originally formed on the model of a similar association in London, but the views and purposes of the two bodies had taken a different direction. The society in London *professed* to have nothing more in view than to obtain an act of the legislature for prohibiting the further introduction of African slaves into the British colonies. They disclaimed all intention of interfering with the government and condition of the negroes already in the plantations; publicly declaring their opinion to be, that a general emancipation of those people, in their present state of ignorance and barbarity, instead of a blessing, would prove to them a source of misfortune and misery. On the other hand, the society of *Amis des Noirs*, having secretly in view to subvert the ancient despotism of the French government, loudly clamoured for a general and immediate

abolition, not only of the slave trade, but also of the slavery which it supported. Proceeding on abstract reasoning, rather than on the actual condition of human nature, they distinguished not between civilized and uncivilized life, and considered that it ill became them to claim freedom for themselves, and withhold it at the same time from the negroes: it is to be lamented that a principle so plausible in appearance, should, in its application to this case, be visionary and impracticable.

At this juncture, a considerable body of the mulattoes from St. Domingo and the other French islands, were resident in the French capital. Some of these were young people sent thither for education: others were men of considerable property, and many of them, without doubt, persons of intelligence and amiable manners. With these people the society of *Amis des Noirs* formed an intimate connexion; pointed out to them the wretchedness of their condition; filled the nation with remonstrances and appeals on their behalf; and poured out such invectives against the white planters, as bore away reason and moderation in the torrent. Unhappily, there was too much to offer on the part of the mulattoes. Their personal appearance too, excited pity, and, co-operating with the temper of the times, and the credulity of the French nation, raised such an indignant spirit in all ranks of people against the white colonists, as threatened their total annihilation and ruin.

In this disposition of the people of France towards the inhabitants of their colonies in the West Indies, the national assembly, on the 20th day of August, voted the celebrated *declaration of rights*; and thus, by a revolution unparalleled in history, was a mighty fabric (apparently established by every thing that was secure and unassailable) overturned in a moment. Happy had it been for the general interests of the human race, if, when the French had gone thus far, they had proceeded no farther! Happy for themselves, if they had then known—what painful experience has since taught them—that the worst of all governments is preferable to the miseries of anarchy!

Perhaps a diligent observer might have discovered, even in the first proceedings of this celebrated assembly, the latent seeds of that violence, injustice, and confusion, which have since produced such a harvest of crimes and calamities. Many of the doctrines contained in the declaration of rights seem to have been introduced for no other purpose than to awaken a mischievous spirit of contention and cavil, and to destroy all subordination in the lower ranks of the people. Such, for instance, was the position, that “all men are born, and continue, free and equal as to their rights;” according to which, there ought to be no distinctions in society, nor (if the possession of property is *a right*) can any man have a right to possess or acquire any thing to the exclusion of others; a position not only false, but pernicious, and unfit for every condition of civilized life.

To promulgate such lessons in the colonies as the declared sense of the supreme government, was to subvert the whole system of their establishments. Accordingly, a general ferment prevailed among the French inhabitants of St. Domingo, from one end of the colony to the other. All that had passed in the mother country concerning the colonists,—the prejudices of the metropolis towards them,—the efforts of the society of *Amis des Noirs* to emancipate the negroes,—and the conduct of the mulattoes,—had been represented to them through the medium of party, and perhaps with a thousand circumstances of exaggeration and insult, long before the declaration of rights was received in the colony; and this measure crowned the whole. They maintained that it was calculated to convert their peaceful and contented negroes into implacable enemies, and render the whole country a theatre of commotion and bloodshed.

In the meanwhile, the French government, apprehensive that disorders of a very alarming nature might arise in the colonies from the proceedings in France, had issued orders to the governor general of St. Domingo, to convoke the inhabitants, for the purpose of forming a legislative assembly for interior regulation. These orders, however, being unaccountably delayed, the people had anticipated the measure. The inhabitants of the Northern district had already constituted a provincial assembly, which met at Cape François, and their example was followed in November in the Western and Southern

provinces; the Western assembly met at Port-au-Prince, the Southern at *Les Cayes*. Parochial committees were, at the same time, every where established, for the sake of a more immediate communication between the people and their representatives.

A recital of the conduct and proceedings of these provincial assemblies, would lead me too much into detail. They differed greatly on many important questions; but all of them concurred in opinion concerning the necessity of a full and speedy colonial representation; and they unanimously voted, that if instructions from the king for calling such an assembly should not be received within three months thenceforward, the colony should take on itself to adopt and enforce the measure;—their immediate safety and preservation being, they said, an obligation paramount to all others.

During this period of anxiety and alarm, the mulattoes were not inactive. Instructed by their brethren in the metropolis in the nature and extent of their rights, and apprized of the favourable disposition of the French nation towards them, they became, throughout the colony, actuated by a spirit of turbulence and sedition; and disregarding all considerations of prudence, with regard to time and seasons, determined to claim, without delay, the full benefit of all the privileges enjoyed by the whites. Accordingly, large bodies of them appeared in arms in different parts of the country; but

acting without sufficient concert, or due preparation, they were easily overpowered. It is said, that the temper of the provincial assemblies at this juncture,—how much soever inflamed against the instigators and abettors of these people in the mother country,—was not averse to moderation and concession towards the mulattoes themselves. Thus, when the party which had taken arms at Jacmel was defeated, and their chiefs imprisoned, the assembly of the West interposed with effect in favour of the whole number; and at Artibonite, where the revolt was much more extensive and alarming, a free and unconditional pardon was also cheerfully granted on the submission of the insurgents.

Against such of the whites as had taken any part in these disturbances, in favour of the people of colour, the rage of the populace knew no limits. Mons. *Dubois*, deputy *procureur general*, had not only declared himself an advocate for the mulattoes, but, with a degree of imprudence which indicated insanity, sought occasions to declaim publicly against the slavery of the negroes. The Northern assembly arrested his person, and very probably intended to proceed to greater extremities; but the governor interposed in his behalf, obtained his release, and sent him from the country.

Mons. *Ferrand de Beaudierre*, who had formerly been a magistrate at Petit Goave, was not so fortunate. This gentleman was unhappily enamoured of a woman of colour, to whom, as she possessed a

valuable plantation, he had offered marriage, and being a man of a warm imagination, with little judgment, he undertook to combat the prejudices of the whites against the whole class. He drew up, in the name and behalf of the mulatto people, a memorial to the parochial committee, wherein, among other things, they were made to claim, in express words, the full benefit of the national declaration of rights. Nothing could be more ill-timed or injudicious than this proceeding: it was evident, that such a claim led to consequences of which the mulattoes themselves (who certainly at this juncture had no wish to enfranchise the slaves) were not apprized. This memorial therefore was considered as a summons to the negroes for a general revolt. The parochial committee seized the author, and committed him to prison; but the populace took him from thence by force, and in spite of the magistrates and municipality, who exerted themselves to stop their fury, put him to death.

The king's order for convoking a general colonial assembly was received in St. Domingo early in the month of January 1790. It appointed the town of Leogane, in the Western province, for the place of meeting; and instructions accompanied the order, concerning the mode of electing the members. These instructions, however, being considered by the provincial assemblies as inapplicable to the circumstances of the colony, were disapproved; and another plan, better suited, as they conceived, to the wealth, territory, and population of the inhabitants,

was adopted. They resolved, also, to hold the assembly at the town of St. Marc instead of Leogane, and the 25th of March was fixed for the time of its meeting. It was afterwards prorogued to the 16th of April.

In the meanwhile intelligence was received in France of the temper of St. Domingo towards the mother country. The inhabitants were very generally represented as manifesting a disposition either to renounce their dependency, or to throw themselves under the protection of a foreign power; and the planters of Martinico were said to be equally discontented and disaffected. The trading and manufacturing towns took the alarm; and petitions and remonstrances were presented from various quarters, imploring the national assembly to adopt measures for composing the minds of the colonists, and preserving to the French empire its most valuable dependencies.

On the 8th of March 1790, the national assembly entered into the consideration of the subject, with a seriousness and solemnity suited to its importance; and, after full discussion, a very large majority voted, “ That it never was the intention of the assembly, to comprehend the interior government “ of the colonies in the constitution which they had “ framed for the mother country, or to subject them “ to laws which were incompatible with their local “ establishments; they therefore authorize the inhabitants of each colony to signify to the national

“ assembly, their sentiments and wishes concerning
“ that plan of interior legislation and commercial
“ arrangement, which would be most conducive to
“ their prosperity.” It was required, however,
that the plan to be offered should be conformable
to the principles which had connected the colonies
with the metropolis, and be calculated for the pre-
servation of their reciprocal interests.—To this de-
cree was annexed a declaration, “ That the national
“ assembly would not cause any innovation to be
“ made, directly or indirectly, in any system of com-
“ merce in which the colonies were already con-
“ cerned.”

Nothing could equal the clamour which this de-
cree occasioned among the people of colour resident
in the mother country, and the philanthropic society
of *Amis des Noirs*. The declaration concerning
commerce was interpreted into a tacit sanction for
the continuance of the slave trade; and it was even
contended, that the national assembly, by leaving
the adjustment of the colonial constitutions to the
colonists themselves, had discharged them from
their allegiance. It was said that they were no
longer subject to the French empire, but mem-
bers of an independent state.

Nevertheless, if the circumstances of the times,
and the disposition of the French colonists at this
juncture, be taken into the account, candour must
acknowledge, that it was a decree not only justifi-
able on the motives of prudence and policy, but was

founded also on the strong basis of moral necessity. The arguments that were urged against it seem to imply, that the benefits of the French revolution were intended only for the people residing in the realm, in exclusion of their fellow subjects in the plantations. After that great event, to suppose that the inhabitants of those colonies (with the successful example too of the English Americans recent in their memories) would have submitted to be governed and directed in their local concerns, by a legislature at the distance of 3,000 miles from them, is to manifest a very slender acquaintance with human nature. How little inclined the colonial assembly was to such submission, their proceedings, from the first day of their meeting, to their final dissolution, will demonstrate.—Of those proceedings I shall endeavour to furnish a brief account in the next chapter.

CHAPTER III.

Proceedings of the General Colonial Assembly until its final Dissolution, and Embarkation of the Members for France, August 1790.

THE General Assembly of St. Domingo met on the 16th of April, at the town of St. Marc. It was composed of 213 members, of whom the city of Cape François elected twenty-four, Port au Prince sixteen, and Les Cayes eight. Most of the other parishes returned two representatives each; and it is allowed that, on the whole, the colony was fairly, fully, and most respectably represented. The provincial assemblies, however, continued in the exercise of their functions as before, or appointed committees to act during their intermission.

The session was opened by a discourse from the president, wherein, after recounting various abuses in the constitution and administration of the former colonial government, he pointed out some of the many great objects that seemed to require immediate attention: among others, he recommended the case of the mulattoes, and a melioration of the slave laws. The assembly concurred in sentiment with

the orator; and one of their first measures was to relieve the people of colour from the hardships to which they were subject under the military jurisdiction. It was decreed, that in future, no greater duty should be required of them in the militia than from the whites; and the harsh authority, in particular, which the king's lieutenants, majors, and aides major, commanding in the towns, exercised over those people, was declared oppressive and illegal. These acts of indulgence were certainly meant as the earnest of greater favours, and an opening to conciliation and concession towards the whole class of the coloured people.

The general assembly proceeded, in the next place, to rectify some gross abuses which had long prevailed in the courts of judicature, confining themselves however to such only as called for immediate redress, their attention being chiefly directed to the great and interesting object of preparing the plan for a new constitution, or system of colonial government; a business which employed their deliberations until the 28th of May.

M. Peynier was now governor general, from whom the partizans and adherents of the ancient despotism secretly derived encouragement and support. The whole body of tax-gatherers, and officers, under the fiscal administration, were of this number. These, therefore, began to recover from the panic into which so great and sudden a revolution had thrown them, and to rally their united strength. Nothing

could be more opposite to their wishes, than the success of the general assembly in the establishment of order and good government throughout the colony. Nor were these the only men who beheld the proceedings of this body with an evil eye. All the persons belonging to the courts of civil and criminal jurisdiction (and their numbers were considerable) who were interested in the maintenance of those abuses which the assembly had corrected, were filled with indignation and envy. To these were added most of the men who held military commissions under the king's authority. Habituated to the exercise of command, they indignantly beheld the subversion of all that accustomed obedience and subordination which they had been taught to consider as essential to the support of government, and offered themselves the willing instruments of the governor general in subverting the new system.

Such were the persons that opposed themselves to the new order of things in the colony, when the Chevalier Mauduit, colonel of the regiment of Port au Prince, arrived at St. Domingo. He had not come directly from France, but circuitously by way of Italy; and at Turin had taken leave of the Count d'Artois, to whose fortunes he was strongly attached. He was a man of talents; brave, active, and enterprising; zealous for his party, and full of projects for a counter-revolution. By his dexterity and address, he soon acquired an ascendancy over the feeble and narrow genius of Peynier, and governed the

colony in his name. His penetration easily made him discover that, in order effectually to disturb the new settlement, it was absolutely necessary to prevent a coalition of interests between the colonial assembly, and the free people of colour. He therefore proclaimed himself the patron and protector of the mulattoes, and courted them on all occasions, with such assiduity and success, as gained over the whole body.

It seems however extremely probable that the peace of the country would have been preserved, notwithstanding the machinations of Peynier and Mauduit, if the planters, true to their own cause, had remained united among themselves. But unfortunately, the provincial assembly of the North was induced, through misrepresentation or envy, to counteract, by all possible means, the proceedings of the general assembly at St. Marc. Thus, discord and dissention every where prevailed; and appearances seemed to indicate an approaching civil war, even before the plan for the new constitution was published. This was contained in the famous decree of the general colonial assembly of the 28th of May; a decree, which having been the subject of much animadversion, and made the ostensible motive, on the part of the executive power, for commencing hostilities, it is proper to state it at large.

It consisted of ten fundamental positions, which are preceded by an introductory discourse or pre-

amble (as usual in the French decrees) wherein among other considerations, it is stated, as an acknowledged principle in the French constitution, that the right in the crown to confirm the acts of the legislature, is a prerogative, inherent and *incommunicable*: of course that it cannot be delegated to a colonial governor, whose authority is precarious and subordinate. The articles are then subjoined, in the order and words following:

“ 1. The legislative authority, in every thing which relates to the internal concerns of the colony (*regime interieur*), is vested in the assembly of its representatives, which shall be called *the General Assembly of the French Part of St. Domingo*.

2. No act of the legislative body, in what relates to the internal concerns of the colony, shall be considered as a *law definitive*, unless it be made by the representatives of the French part of St. Domingo, freely and legally chosen, and confirmed by the king.

3. In cases of urgent necessity, a legislative decree of the general assembly, in what relates to the internal concerns of the colony, shall be considered as a *law provisional*. In all such cases, the decree shall be notified forthwith to the governor general, who, within ten days after such notification, shall cause it to be published and enforced, or transmit to the general assembly his observations thereon.

4. The necessity of the case on which the execution of such provisional decree is to depend, shall be a separate question, and be carried in the affirmative by a majority of two-thirds of the general assembly; the names and numbers being taken down. (*Prises par l'appel nominal.*)

5. If the governor-general shall send down his observations on any such decree, the same shall be entered in the journals of the general assembly, who shall then proceed to revise the decree, and consider the observations thereon in three several sittings. The votes for confirming or annulling the decree shall be given in the words *Yes* or *No*, and a minute of the proceedings shall be signed by the members present, in which shall be enumerated the votes on each side of the question; and if there appears a majority of two-thirds for confirming the decree, it shall be immediately enforced by the governor-general.

6. As every law ought to be founded on the consent of those who are to be bound by it, the French part of St. Domingo shall be allowed to propose regulations concerning commercial arrangements, and the system of mutual connexion (*rapports commerciaux, et autres rapports communs*), and the decrees which the national assembly shall make in all such cases *shall not be enforced in the colony, until the general assembly shall have consented thereto.*

7. In cases of pressing necessity, the importation of articles for the support of the inhabitants shall not be considered as any breach in the system of commercial regulations between St. Domingo and France; provided that the decrees to be made in such cases by the general assembly, shall be submitted to the revision of the governor-general, under the same conditions and modifications as are prescribed in articles 3 and 5.

8. Provided also, that every legislative act of the general assembly, executed provisionally, in cases of urgent necessity, shall be transmitted forthwith for the royal sanction. And if the king shall refuse his consent to any such act, its execution shall be suspended, as soon as the king's refusal shall be legally notified to the general assembly.

9. A new general assembly shall be chosen every two years, and none of the members who have served in the former assembly shall be eligible in the new one.

10. The general assembly decree that the preceding articles, as forming part of the constitution of the French colony in St. Domingo, shall be immediately transmitted to France for the acceptance of the national assembly, and the king. They shall likewise be transmitted to all the parishes and districts of the colony, and be notified to the governor-general."

That a decree of such comprehensiveness and magnitude should have excited very general disquisition in the colony, and have produced misrepresentation and clamour, even among men of very opposite sentiments and tempers, is no way surprising. It must be allowed, that some of the articles are irreconcilable to every just principle of colonial subordination. The refusing to allow a negative voice to the representative of the king, is repugnant to all the notions which an Englishman is taught to entertain of a monarchical government, however limited: and the declaration that no decree of the national assembly concerning the colony, in cases of exterior regulation, should be in force until confirmed by the colonial assembly, was such an extravagant assumption of imperial authority, in a subordinate part of the French empire, as I believe is without a precedent.

All that can be urged in extenuation seems to be, that the circumstances of the case were novel, and the members of the colonial assembly unexperienced in the business of legislation. That they had any serious intention of declaring the colony an independent state, in imitation of the English American provinces, it is impossible to believe. Nevertheless, the decree was no sooner promulgated, than this notion was industriously propagated by their enemies from one end of the colony to the other; and when this report failed to gain belief, it was pretended, that the colony was sold to the English, and that the members of the general assembly

had received and divided among themselves forty millions of livres as the purchase money.

If recent events had not demonstrated the extreme credulity and jealous temper of the French character, it would be difficult to believe that charges, thus wild and unsupported, could have made an impression on the minds of any considerable number of the people. So great however was the effect produced by them, as to occasion some of the Western parishes to recal their deputies; while the inhabitants of Cape François took measures still more decisive: they renounced obedience to the general assembly, and presented a memorial to the governor, requesting him to dissolve it forthwith; declaring that they considered the colony as lost, unless he proceeded with the utmost vigour and promptitude in depriving that body of all manner of authority.

M. Peynier received this address with secret satisfaction. It seemed, indeed, to be the policy of both parties to reject all thoughts of compromise by negotiation; and there occurred at this juncture a circumstance which would probably have rendered all negotiation abortive, had it been attempted. In the harbour of Port au Prince lay a ship of the line, called the *Leopard*, commanded by M. Galissoniere. This officer, co-operating in the views of Peynier and Mauduit, made a sumptuous entertainment for the partisans of those gentlemen; and by this, or some other parts of his conduct, gave offence

to his sailors. Whether these men had felt the influence of corruption, (as asserted by one party), or were actuated solely by one of those unaccountable freaks to which seamen are particularly subject, the fact certainly is, that they withdrew their obedience from their proper officer, and declared themselves to be in the interests of the colonial assembly! Their conduct became at length so turbulent and seditious, as to induce M. Galisoniere to quit the ship; whereupon the crew gave the command to one of the lieutenants. The assembly, perceiving the advantages to be derived from this event, immediately transmitted a vote of thanks to the seamen for their patriotic conduct, and required them, in the name of the law and the king, to detain the ship in the road, and await their further orders. The sailors, gratified with this acknowledgment, promised obedience, and affixed the vote of thanks on the main-mast of the ship. Some partisans of the assembly, about the same time, took possession of a powder magazine at Leogane.

A civil war seemed now to be inevitable. Two days after the vote of thanks had been transmitted from St. Marc's to the crew of the Leopard, M. Peynier issued a proclamation to dissolve the general assembly. He charged the members with entertaining projects of independency, and asserted that they had treacherously possessed themselves of one of the king's ships by corrupting the crew. He pronounced the members, and all their adherents, traitors to their country, and enemies to the nation

and the king: declaring, that it was his intention to employ all the force he could collect to defeat their projects, and bring them to condign punishment; and he called on all officers, civil and military, for their co-operation and support.

His first proceedings were directed against the committee of the Western provincial assembly.— This body held its meetings at Port au Prince, and in the exercise of its subordinate functions, during the intermission of that assembly, had manifested such zealous attachment to the general assembly at St. Marc, as exposed its members to the resentment of the governor and his party. It was determined therefore, at a council held the same day, to arrest their persons the following night, and M. Mauduit undertook to conduct the enterprize. Having been informed that this committee held consultations at midnight, he selected about one hundred of his soldiers, and formed a scheme to seize the members at their place of meeting. On arriving however at the house, he found it protected by four hundred of the national guards.* A skirmish ensued; but the circumstances attending it are so variously related, that no precise account can be given of the particulars; nor is it ascertained which party gave the first fire. Nothing further is certainly known, than that two men were killed on the part of the assembly,—

* The troops in St. Domingo called the National Guards, were originally nothing more than the colonial militia. They were new organized in 1789, on the model of the national guards in the mother-country, and bore the same colours, and assumed the same name.

that several were wounded on both sides, and that M. Mauduit returned without effecting any purpose but that of seizing, and bearing away in triumph, the national colours;—a circumstance which afterwards (as will be seen in the sequel) cost him his life.

The general assembly, on receiving intelligence of this attack, and of the formidable preparations that were making for directing hostilities against themselves, summoned the people, from all parts of the colony, to hasten, properly armed, to protect their representatives; and most of the inhabitants of the neighbouring parishes obeyed the summons. The ship *Leopard* was brought from Port au Prince to St. Marc's for the same purpose. On the other hand, the Northern provincial assembly joined the party of the governor, and sent to his assistance a detachment from the regular troops in that quarter, which was joined by a body of two hundred people of colour. A much greater force was collected at the same time in the Western province by M. Mauduit, and the preparations on both sides threatened an obstinate and bloody conflict; when, by one of those wonderful eccentricities in the human mind which are seldom displayed except in times of public commotion, a stop was put to the immediate shedding of blood, by the sudden and unexpected determination of the general assembly to undertake a voyage to France, and justify their conduct to the king and the national assembly in person. Their motives were thought the more laudable, as great part of the Western and Southern provinces gave a

decided approbation of their conduct, and armed in a very short time two thousand men in their defence; which were in full march for Port au Prince. Their resolution however was fixed, and accordingly, of about one hundred members, to which the colonial assembly was reduced by sickness and desertion, no less than eighty-five (of whom sixty-four were fathers of families) actually embarked on board the *Leopard*, and on the 8th of August, took their departure for Europe:—a proceeding which created as much surprise in the governor and his party, as admiration and applause among the people at large. Persons of all ranks accompanied the members to the place of embarkation, pouring forth prayers for their success, and shedding tears of sensibility and affection for a conduct which was very generally considered as a noble proof of self-denial, and as signal an instance of heroic virtue and christian forbearance as any age has exhibited. A momentary calm followed this event:—the parties in arms appeared mutually disposed to submit their differences to the wisdom and justice of the king and the national assembly, and M. Peynier resumed, though with a trembling hand, the reins of government.

Such was the issue of the first attempt to establish a free constitution in the French part of St. Domingo, on the system of a limited monarchy; and it affords occasion for some important reflections. That the general colonial assembly, in their decree of the 28th of May, exceeded the proper boundary of their constitutional functions, has been frankly

admitted. This irregularity, however, might have been corrected without bloodshed or violence; but there is this misfortune attending every deviation from the rule of right, that, in the conflict of contending factions, the excesses of one party are ever considered as the fullest justification for the outrages of the other. For some parts of their conduct an apology may be offered. The measure of securing to their interests the crew of the *Leopard*, and the seizure of the magazine at *Leogane*, may be vindicated on the plea of self-defence. It cannot be doubted that *M. Peynier* had long meditated how best to restore the ancient despotic system, and that, jointly with *M. Mauduit* and others, he had made preparations for that purpose. He had written to *M. Luzerne*, the minister in France, that he never intended to suffer the colonial assembly to meet; and let it be told in this place, in justice to the French ministry, that the answer which he received contained a tacit disapprobation of his measures; for *M. Luzerne* recommended moderate and conciliatory councils. The governor proceeded notwithstanding in the same career, and distrustful perhaps of the fidelity of the French soldiers, he made application (as appeared afterward) to the governor of the *Havanna* for a reinforcement of Spanish troops from Cuba. It is evident, therefore, that he concurred entirely in the plans of *Mauduit* for effectuating a counter revolution; and hence it is reasonable to conclude, that the discord and distrust which prevailed among the inhabitants; and above all, the fatal dissensions that alienated the provincial assem-

bly of the North, from the general assembly at St. Marc's, were industriously fomented and encouraged by M. Peynier and his adherents. Concerning the members of the colonial assembly, their prompt and decisive determination to repair to France, and surrender their persons to the supreme government, obviates all impeachment of their loyalty. Their attachment to the mother-country was indeed secured by too many ties of interest and self-preservation to be doubted,

Of their reception by the national assembly, and the proceedings adopted in consequence of their arrival in Europe, I shall hereafter have occasion to speak. A pause in this place seems requisite;—for I have now to introduce to the reader the mournful history of an unfortunate individual, over whose sad fate, (however we may condemn his rash and ill-concerted enterprize),

“ One human tear may drop, and be forgiven !”

CHAPTER IV.

Rebellion and Defeat of James Ogé, a free Man of Colour.

FROM the first meeting of the general assembly of St. Domingo, to its dissolution and dispersion, as related in the preceding chapters, the coloured people resident within the colony remained on the whole more peaceable and orderly than might have been expected. The temperate and lenient disposition manifested by the assembly towards them, produced a beneficial and decisive effect in the Western and Southern provinces, and although three hundred of them from these provinces, had been persuaded by M. Mauduit to join the force under his command, they very soon became sensible of their error, and, instead of marching towards St. Marc, as Mauduit proposed, they demanded and obtained their dismissal, and returned quietly to their respective habitations. Such of the mulatto people however as resided at that juncture in the mother-country, continued in a far more hostile disposition; and they were encouraged in their animosity towards the white colonists by parties of very different descriptions. The colonial decree of the 28th of May, 1790, was no sooner made known in

France, than it excited universal clamour. Many persons who concurred in nothing else, united their voices in reprobating the conduct of the inhabitants of St. Domingo. The adherents of the ancient government were joined on this occasion by the partisans of democracy and republicanism. To the latter, the constitution of 1789 was even more odious than the old tyranny; and these men, with the deepest and darkest designs, possessed all that union, firmness, and perseverance, which were necessary to their purposes; and which, as the world has beheld, have since rendered them irresistible. These two factions hoped to obtain very different ends by the same means; and there was another party who exerted themselves with equal assiduity in promoting public confusion: these were the discordant class of speculative reformers, whom it was impossible to reconcile to the new government, because, every man among them had probably formed a favourite system in his own imagination, which he was eager to recommend to others. I do not consider the philanthropic society, called *Amis des Noirs*, as another distinct body, because it appears to me that they were pretty equally divided between the democratic party, and the class last mentioned. Strengthened by such auxiliaries, it is not surprising, that the efforts of this society should have operated powerfully on the minds of those, who were taught to consider their personal wrongs as the cause of the nation, and have driven some of them into the wildest excesses of fanaticism and fury,

Among such of these unfortunate people resident in France as were thus inflamed into madness, was a young man, under thirty years of age, named *James Ogé*: he was born in St. Domingo, of a mulatto woman, who still possessed a coffee plantation in the Northern province, about thirty miles from Cape François, whereon she lived very creditably, and found means out of its profits to educate her son at Paris, and even to support him there in some degree of affluence, after he had obtained the age of manhood. His reputed father, a white planter of some account, had been dead several years.

Ogé had been introduced to the meetings of the *Amis des Noirs*, under the patronage of Gregoire, Brissot,* La Fayette, and Robespierre,† the leading members of that society; and was by them initiated into the popular doctrine of *equality*, and *the rights of man*. Here it was that he first learnt the miseries of his condition; the cruel wrongs and contumelies to which he and all his mulatto brethren were exposed in the West Indies, and the monstrous injustice and absurdity of that prejudice, “ which, (said Gregoire), estimating a man’s merit by the colour of his skin, has placed at an immense distance from each other the children of the same parent; a prejudice which stifles the voice of nature, and breaks the bands of fraternity asunder.”

* Guillotined 31 October, 1793.

† Guillotined 28 July, 1794.

That these are great evils must be frankly admitted, and it would have been fortunate if such men as Brissot and Gregoire, instead of bewailing their existence and magnifying their extent, had applied their talents in considering of the best practicable means of redressing them.

But these persons had other objects in view:—their aim, as I have shewn, was not to reform, but to destroy; to excite convulsions in every part of the French empire; and the ill-fated Ogé became the tool, and was afterwards the victim, of their guilty ambition.

He had been led to believe, that the whole body of coloured people in the French islands were prepared to rise up as one man against their oppressors; that nothing but a discreet leader was wanting, to set them into action; and, fondly conceiving that he possessed in his own person all the qualities of an able general, he determined to proceed to St. Domingo by the first opportunity. To cherish the conceit of his own importance, and animate his exertions, the society procured him the rank of lieutenant-colonel in the army of one of the German electors.

As it was found difficult to export a sufficient quantity of arms and ammunition from France, without attracting the notice of the government, and awakening suspicion among the planters resident in the mother country, the society resolved to pro-

cure those articles in North America, and it was recommended to Ogé to make a circuitous voyage for that purpose. Accordingly being furnished with money and letters of credit, he embarked for New England in the month of July 1790.

But notwithstanding the caution that was observed in this instance, the whole project was publicly known at Paris previous to Ogé's embarkation; and notice of the scheme, and even a portrait of Ogé himself, were transmitted to St. Domingo, long before his arrival in that island. He secretly landed there from an American sloop, on the 12th of October 1790, and found means to convey undiscovered the arms and ammunition which he had purchased, to the place which his brother had prepared for their reception.

The first notice which the white inhabitants received of Ogé's arrival, was from himself. He despatched a letter to the governor (Peynier) wherein, after reproaching the governor and his predecessors with the non-execution of the *Code Noir*, he demands, in very imperious terms, that the provisions of that celebrated statute should be enforced throughout the colony; he requires that the privileges enjoyed by one class of inhabitants (the whites) should be extended to all persons without distinction: declares himself the protector of the mulattoes, and announces his intention of taking up arms in their behalf, unless their wrongs should be redressed.

About six weeks had intervened between the landing of Ogé, and the publication of this mandate; in all which time, he and his two brothers had exerted themselves to the utmost in spreading disaffection, and exciting revolt among the mulattoes. Assurances were held forth, that all the inhabitants of the mother country were disposed to assist them in the recovery of their rights, and it was added, that the king himself was favourably inclined to their cause. Promises were distributed to some, and money to others. But, notwithstanding all these efforts, and that the temper of the times was favourable to his views, Ogé was not able to allure to his standard above two hundred followers; and of these, the major part were raw and ignorant youths, unused to discipline, and averse to all manner of subordination and order.

He established his camp at a place called *Grande Riviere*, about fifteen miles from Cape François, and appointed his two brothers, together with one Mark Chavane, his lieutenants. Chavane was fierce, intrepid, active, and enterprising; prone to mischief, and thirsty for vengeance. Ogé himself, with all his enthusiasm, was naturally mild and humane: he cautioned his followers against the shedding innocent blood; but little regard was paid to his wishes in this respect: the first white man that fell in their way they murdered on the spot: a second, of the name of Sicard, met the same fate; and it is related, that their cruelty towards such persons of their own complexion as refused to join in the revolt was extreme. A mulatto man of some property being urged to follow them, pointed to his wife and six children, assigning the largeness of

his family as a motive for wishing to remain quiet. This conduct was considered as contumacious, and it is asserted, that not only the man himself, but the whole of his family, were massacred without mercy.

Intelligence was no sooner received at the town of Cape François of these enormities, than the inhabitants proceeded, with the utmost vigour and unanimity, to adopt measures for suppressing the revolt. A body of regular troops, and the Cape regiment of militia, were forthwith despatched for that purpose. They soon invested the camp of the revolters, who made less resistance than might have been expected from men in their desperate circumstances. The rout became general; many of them were killed, and about sixty made prisoners; the rest dispersed themselves in the mountains. Ogé himself, one of his brothers, and Chavane his associate, took refuge in the Spanish territories. Of Ogé's other brother no intelligence was ever afterwards obtained.

After this unsuccessful attempt of Ogé, and his escape from justice, the disposition of the white inhabitants in general towards the mulattoes, was sharpened into great animosity. The lower classes in particular, (those whom the coloured people call *les petits blancs*), breathed nothing but vengeance against them; and very serious apprehensions were entertained, in all parts of the colony, of a proscription and massacre of the whole body.

Alarmed by reports of this kind, and the appearances which threatened them from all quarters, the mulattoes

flew to arms in many places. They formed camps at Artibonite, Petit Goaves, Jeremie, and Les Cayes. But the largest and most formidable body assembled near the little town of *Verette*. The white inhabitants collected themselves in considerable force in the neighbourhood, and Colonel Mauduit, with a corps of two hundred men from the regiment of Port au Prince, hastened to their assistance; but neither party proceeded to actual hostility. M. Mauduit even left his detachment at the port of St. Marc, thirty-six miles from *Verette*, and proceeding singly and unattended to the camp of the mulattoes, had a conference with their leaders. What passed on that occasion was never publicly divulged. It is certain, that the mulattoes retired to their habitations in consequence of it; but the silence and secrecy of M. Mauduit, and his influence over them, gave occasion to very unfavourable suspicions, by no means tending to conciliate the different classes of the inhabitants to each other. He was charged with having traiterously persuaded them not to desist from their purpose, but only to postpone their vengeance to a more favourable opportunity; assuring them, with the utmost solemnity and apparent sincerity, that the king himself, and all the friends of the ancient government, were secretly attached to their cause, and would avow and support it whenever they could do it with advantage; and that the time was not far distant, &c. He is said to have pursued the same line of conduct at Jeremie, Les Cayes, and all the places which he visited. Every where he held secret consultations with the chiefs of the mulattoes, and those people every where immediately dispersed. At Les Cayes, a skirmish had happened before his

arrival there, in which about fifty persons on both sides had lost their lives, and preparations were making to renew hostilities. The persuasions of M. Maucluit effected a truce; but Rigaud, the leader of the mulattoes in that quarter, openly declared that it was a transient and deceitful calm, and that no peace would be permanent, until one class of people had exterminated the other.

In November 1790, M. Peynier resigned the government to the lieutenant-general, and embarked for Europe;—a circumstance which proved highly pleasing to the major part of the planters:—and the first measure of M. Blanchelande,* the new commander-in-chief, was considered as the earnest of a decisive and vigorous administration. He made a peremptory demand of Ogé and his associates from the Spaniards; and the manner in which it was enforced, induced an immediate compliance therewith. The wretched Ogé, and his companions in misery, were delivered over, the latter end of December, to a detachment of French troops, and safely lodged in the jail of Cape François, with the prisoners formerly taken; and a commission was soon afterwards issued to bring them to trial.

Their examinations were long and frequent; and in the beginning of March 1791, sentence was pronounced. Twenty of Ogé's deluded followers, among them his own brother, were condemned to be hanged. To Ogé himself, and his lieutenant Chavane, a more

* Guillotined at Paris, 1793.

terrible punishment was allotted:—they were adjudged to be broken alive, and left to perish in that dreadful situation, on the wheel.

The bold and hardened Chavane met his fate with unusual firmness, and suffered not a groan to escape him during the extremity of his torture: but the fortitude of Ogé deserted him altogether. When sentence was pronounced, he implored mercy with many tears, and an abject spirit. He promised to make great discoveries if his life was spared, declaring that he had an important secret to communicate. A respite of twenty-four hours was accordingly granted; but it was not made known to the public, at that time, that he divulged any thing of importance. His secret, if any he had, was believed to have died with him.

It was discovered, however, about nine months afterward, that this most unfortunate young man had not only made a full confession of the facts that I have related, but also disclosed the dreadful plot in agitation, and the miseries at that moment impending over the colony. His last solemn declarations and dying confession, sworn to and signed by himself the day before his execution, were actually produced; wherein he details at large the measures which the coloured people had fallen upon to excite the negro slaves to rise into rebellion. He points out the chiefs by name, and relates that, notwithstanding his own defeat, a general revolt would actually have taken place in the month of February preceding, if an extraordinary flood of rain, and consequent inundation from the rivers, had not prevented it. He declares that the ringleaders

still maintained the same atrocious project, and held their meetings in certain subterranean passages, or caves, in the parish of La Grande Riviere, to which he offers, if his life might be spared, to conduct a body of troops, so that the conspirators might be secured.

The persons before whom this confession and narrative were made, were the commissioners appointed for the purpose of taking Ogé's examination, by the superior council of the Northern province, of which body they were also members.* Whether this court (all the members of which were devotedly attached to the ancient system), determined of itself to suppress evidence of such great concern to the colony, or was directed on this occasion by the superior officers in the administration of the government, has never been clearly made known. Suppressed it certainly was, and the miserable Ogé hurried to immediate execution; seemingly to prevent the further communication, and full disclosure of so weighty a secret!

Christian charity might lead us to suppose, that the commissioners by whom Ogé's examination was taken, disregarded and neglected (rather than suppressed) his information; considering it merely as the shallow artifice of a miserable man to obtain a mitigation of the dreadful punishment which awaited him, and utterly unworthy of credit. It does not appear, however, that the commissioners made this excuse for themselves; and the caution, circumspection, and se-

* Their names were Antoine Etienne Ruotte, and Francois Joseph de Vertierres.

crecy which marked their conduct, leave no room for such a supposition. The planters at large scrupled not to declare, that the royalists in the colony, and the philanthropic and republican party in the mother-country, were equally criminal; and themselves made victims to the blind purposes, and unwarrantable passions, of two desperate and malignant factions.

Of men who openly and avowedly aimed at the subversion of all good order and subordination, we may easily credit the worst; but it will be difficult to point out any principle of rational policy, by which the royalists could have been influenced to concur in the ruin of so noble and beautiful a part of the French empire: Their conduct therefore remains wholly inexplicable, or we must admit they were guided by a spirit of Machiavelian policy—a principle of refined cunning, which always defeats its own purpose. They must have encouraged the vain and fallacious idea, that scenes of bloodshed, devastation, and ruin, in different parts of the French dominions, would induce the great body of the people to look back with regret to their former government, and lead them by degrees to co-operate in the scheme of effecting a counter-revolution, regarding the evils of anarchy, as less tolerable than the dead repose of despotism. If such were their measures, we can only ascribe them to that infatuation with which Providence (as wise men have observed, and history evinces), *blinds a people devoted to destruction*

CHAPTER V.

Proceedings in France.—Massacre of Colonel Mauduit in St. Domingo—and fatal Decree of the National Assembly of the 15th May, 1791.

IN detailing the tragical story of the miserable Ogé, I have chosen to continue my narrative unbroken: but it is now time to call the reader homewards, and direct his attention to the measures adopted by the national assembly, in consequence of advices received from all parts of St. Domingo, concerning the proceedings of the colonial assembly which met at St. Marc's.

The eighty-five members, whose embarkation for France has already been noticed, arrived at Brest on the 13th of September 1790. They were received on landing by all ranks of people, and even by men in authority, with congratulation and shouts of applause. The same honours were shewn to them as would have been paid to the national assembly. Their expenses were defrayed, and sums of money raised for their future occasions by a voluntary and very general subscription; but these testimonies of respect and kindness, served only to increase the disappointment which they soon afterwards experienced in the

capital; were a very different reception awaited them. They had the mortification to discover that their enemies had been beforehand with them. Deputies were already arrived from the provincial assembly of the North, who joining with the agents of Peynier and Mauduit, had so effectually prevailed with M. Barnave,* the president of the committee for the colonies, that they found their cause prejudged, and their conduct condemned, without a hearing. The national assembly had issued a peremptory order, on the 21st of September, directing them to attend at Paris, and wait there for further directions. Their prompt obedience to this order procured them no favour. They were allowed a single audience only, and then indignantly dismissed from the bar. They solicited a second, and an opportunity of being confronted with their adversaries: the national assembly refused their request, and directed the colonial committee to hasten its report concerning their conduct. On the 11th of October this report was presented by M. Barnave. It comprehended a detail of all the proceedings of the colonial assembly, from its first meeting at St. Marc's, and censured their general conduct in terms of great asperity; representing it as flowing from motives of disaffection towards the mother-country, and an impatience of subordination to constitutional authority and good government. The report concluded by recommending, "that all the pretended decrees and acts of "the said colonial assembly, should be reversed, and "pronounced utterly null and of no effect; that the said

* Guillotined December 1, 1793.

“ assembly should be declared dissolved, and its members rendered ineligible and incapable of being delegated in future to the colonial assembly of St. Domingo; that testimonies of approbation should be transmitted to the Northern provincial assembly, to Colonel Mauduit and the regiment of Port au Prince, for resisting the proceedings at St. Marc's; that the king should be requested to give orders for the forming a new colonial assembly on the principles of the national decree of the 8th of March 1790, and instructions of the 28th of the same month; finally, that the *ci-devant* members, then in France, should continue in a state of arrest, until the national assembly might find time to signify its further pleasure concerning them.” A decree to this effect was accordingly voted on the 12th of October, by a very large majority; and the king was requested, at the same time, to send out an augmentation of force, both naval and military, for the better supporting the regal authority in St. Domingo.

It is not easy to describe the surprise and indignation which the news of this decree excited in St. Domingo except among the partisans of the former government. By *them* it was regarded as the first step towards the revival of the ancient system; by most other persons it was considered as a dereliction by the national assembly of all principle; and the orders for electing a new colonial assembly were so little regarded, that many of the parishes positively refused to choose other deputies until the fate of their former members, at that time in France, should be decided; declaring, that they still considered those persons as the legal representatives of the colony. One immediate and appa-

rent effect of this decree was, to heighten and inflame the popular resentment against Mauduit and his regiment. The reader has already been made acquainted with some particulars concerning this officer, and to what has been said of his general character, and his intemperate zeal for the re-establishment of the regal authority in its fullest extent, it may be added, that he was the more dangerous, because he was generous in his disposition, and even profuse in his bounty, towards his soldiers. In return, the attachment of his regiment towards his person appeared to exceed the usual limits of obedience and duty.*

The massacre of this man by those very troops, a short time after the notification of the aforesaid decree, affords so striking an instance of that cruel and ungovernable disposition, equally impetuous and inconstant, which prevailed, and I am afraid still continues to prevail, amongst the lower classes of the people throughout all the French dominions, that I conceive a brief recital of the circumstances attending his murder will not be thought an unnecessary digression.

I have, in a former place,† given some account of the proceedings of M. Peynier, the late governor, against certain persons who composed what was called the committee of the Western provincial assembly, and of the attempt by M. Mauduit to seize by force the individuals who composed that committee. This

* After his example they had rejected the national cockade, and wore a white feather in their hats, the symbol, or avowed signal, of the royal party.

† Chapter iii.

happened on the 29th of July, 1790; and I observed, that the circumstance of M. Mauduit's carrying off the colours from a detachment of the national guards on that occasion, ultimately terminated in his destruction.

The case was, that not only the detachment from whom their ensign was taken, but the whole of the national guards throughout the colony, considered this act, as the most outrageous and unpardonable insult that could possibly be offered to a body of men who had sworn fidelity to the new constitution; and nothing but the dread of the superior discipline of the veterans composing the Port au Prince regiment, (which Mauduit commanded), prevented them from exercising exemplary vengeance on the author of their disgrace. This regiment, therefore, being implicated in the crime of their commanding officer, was regarded by the other troops with hatred and detestation.

On the 3d of March 1791, two ships of the line, *Le Fougueux* and *Le Borée*, arrived from France, with two battalions of the regiments of Artois and Normandy; and when it is known, that these troops had been visited by the crew of the *Leopard*, it will not appear surprising that, on their landing at Port au Prince, they should have manifested the same hostile disposition towards Mauduit's regiment, as was shewn by the national guards. They refused all manner of communication or intercourse with them, and even declined to enter into any of their places of resort. They considered, or affected to consider them, as enemies to the colony, and traitors to their country. This conduct

in the new-comers towards the ill-fated regiment, soon made a wonderful impression on the minds of both officers and privates of the regiment itself; and mutual reproach and accusation spread through the whole corps. The white feather was indignantly torn from their hats, and dark and sullen looks towards their once-loved commander, indicated, not only that he had lost their confidence, but also that he was the object of meditated mischief. Mauduit soon perceived the full extent of his danger, and fearing to involve the governor (M. Blanchelande) and his family, in the ruin which awaited himself, he advised them to make the best of their way to Cape François, while they could do it with safety; and Blanchelande, for which he was afterwards much censured, followed this advice. Mauduit then harrangued his grenadiers, to whom he had always shewn great kindness, and told them, that he was willing, for the sake of peace, to restore to the national troops the colours which he had formerly taken from them; and even to carry them, with his own hands, at the head of his regiment, and deposit them in the church in which they had been usually lodged: but he added, that he depended on their affection and duty to protect him from personal insult, while making this ample apology. The faithless grenadiers declared they would protect him with their lives.

The next day the ceremony took place, and Mauduit restored the colours, as he had promised, before a vast croud of spectators. At that moment, one of his own soldiers cried aloud, *that he must ask pardon of the national troops on his knees*; and the whole regiment applauded the proposal. Mauduit started back with indignation, and offered his bosom to their

swords:—it was pierced with a hundred wounds, all of them inflicted by his own men, while not a single hand was lifted up in his defence. The spectators stood motionless, either through hatred to the man, or surprise at the treachery and cowardice of the soldiers. Such, indeed, was the baseness of these wretches, that no modern language can describe, but in terms which would not be endured, the horrible enormities that were practised on the dead body of their wretched commander. It was reserved for the present day, to behold for the first time, a civilized nation exceeding in feats of cruelty and revenge the savages of North America. I grieve to add, that many other dreadful instances might be recited in confirmation of this remark.*

While these shameful enormities were passing in St. Domingo, the society of *Amis des Noirs* in the mother-country, were but too successfully employed in devising projects which gave birth to deeds of still greater horror, and produced scenes that transformed

* The following anecdote, though shocking to humanity, I have thought too extraordinary to omit. It was communicated to me by a French gentleman who was at St. Domingo at the time, and knew the fact; but decency has induced me to veil it in a learned language. MAUDUITO vix mortuo, unus de militibus, dum cadaver calidum, et cruore adhuc fluente madidum, in pavimentum ecclesie episcopalis jacuit, fscam distringens, genitalia coram populo abscidit, et membra truncata in cistam componens ad feminam nobilem, quam amicam Mauduito statuit, ut legatum de mortuo attulit. It may afford the reader some consolation to find, that the murder of their commanding officer by his own regiment, excited in all the other troops no other sentiments than those of indignation against his murderers. They were compelled to lay down their arms, and were sent prisoners to France; but I fear they escaped the punishment due to their crimes.

the most beautiful colony in the world into a field of desolation and carnage.

Although it must have occurred to every unprejudiced mind, from the circumstances that have been related concerning the behaviour of the mulattoes resident in the colony, that the general body of those people were by no means averse to conciliation with the whites, yet it was found impossible to persuade their pretended friends in Europe to leave the affairs of St. Domingo to their natural course. Barnave alone (hitherto the most formidable opponent of the prejudices and pretensions of the colonists) avowed his conviction, that any further interference of the mother-country in the question between the whites and the coloured people, would be productive of fatal consequences. Such an opinion was entitled to greater respect, as coming from a man who, as president of the colonial committee, must be supposed to have acquired an intimate knowledge of the subject; but he was heard without conviction. There are enthusiasts in politics as well as in religion, and it commonly happens with fanatics in each, that the recantation of a few of their number serves only to strengthen the errors, and animate the purposes of the rest. It was now resolved by Gregoire, La Fayette, Brissot, and some other pestilent reformers, to call in the supreme legislative authority of the French government to give effect to their projects; and that the reader may clearly understand the nature and complexion of the mischief that was meditated, and of those measures to which the ruin of the French part of St. Domingo is immediately to be attributed, it is necessary, in the first place, to recal his atten-

tion to the national decree of the 8th of March 1790, of which an account was given in the second chapter.

By that decree, as the reader must have remembered, the national assembly, among other things, disclaimed all right of interference in the local and interior concerns of the colonies; and it cannot be doubted, that if this declaration had been faithfully interpreted and acted upon, it would have contributed, in a very eminent degree, to the restoration of peace and tranquillity in St. Domingo. To render it therefore of as little effect as possible, and to add fuel to the fire which perhaps would otherwise have become extinguished, it had been insidiously proposed in the national assembly, within a few days after the decree of the 8th of March had passed, to transmit with it, to the governor of St. Domingo, a code, or chapter of instructions, for its due and punctual observance and execution. Accordingly, on the 28th of the same month, instructions which were said to be calculated for that purpose, were presented and decreed. They consisted of eighteen articles, and contained, among other things, a direction "that every person of the " age of twenty-five and upwards, possessing property, or having resided two years in the colony, and " paid taxes, should be permitted to vote in the formation of the colonial assembly."

The friends of the colonists having at that time seats in the national assembly opposed the measure, chiefly on the ground of its repugnancy to the decree of the 8th; it being evidently, they urged, an interference in the local arrangements and interior regulations of the colonial government. It does not appear (notwithstanding what has since been asserted to the contrary)

that they entertained an idea that the mulatto people were directly or indirectly concerned. The framers and supporters of the measure pretended that it went only to the modification of the privilege of voting in the parochial meetings, which it was well known, under the old government, had been constituted of white persons only. The coloured people had in no instance attended those meetings, nor set up a claim, or even expressed a desire, to take any part in the business transacted thereat. But these instructions were no sooner adopted by the national assembly, and converted into a decree, than its framers and supporters threw off the mask, and the mulattoes resident in the mother-country, as well as the society of *Amis des Noirs*, failed not to apprize their friends and agents in St. Domingo, that the people of colour, not being excepted, were virtually comprised in it. These, however, not thinking themselves sufficiently powerful to enforce the claim, or, perhaps, doubting the real meaning of the decree, sent deputies to France to demand an explanation of it from the national assembly.

In the beginning of May 1791, the consideration of this subject was brought forward by Abbé Gregoire, and the claim of the free mulattoes to the full benefit of the instructions of the 28th of March 1790, and to all the rights and privileges enjoyed by the white inhabitants, citizens of the French colonies, was supported with all that warmth and eloquence for which he was distinguished. Unfortunately, at this juncture, the news of the miserable death of Ogé arrived at Paris, and raised a storm of indignation in the minds of all ranks of people which the planters resident in France were unable to resist. Nothing was heard in

all companies but declamations against their oppression and cruelty. To support and animate the popular outcry against them, a tragedy or pantomime, formed on the story of Oge, was represented on the public theatres. By these, and other means, the planters were become so generally odious, that for a time they dared not to appear in the streets of Paris. These were the arts by which Gregoire, Condorcet, La Fayette, Brissot, and Robespierre disposed the public mind to clamour for a new and explanatory decree, in which the rights of the coloured people should be placed beyond all future doubts and dispute. The friends and advocates of the planters were overpowered and confounded. In vain did they predict the utter destruction of the colonies if such a proposal should pass into a law. "Perish the colonies," said Robespierre, "rather than sacrifice one iota of our principles." The majority reiterated the sentiment, and the famous decree of the 15th of May 1791, was pronounced amidst the acclamation and applause of the multitude.

By this decree it was declared and enacted, "that the people of colour resident in the French colonies, born of free parents, were entitled to, as of right, and should be allowed the enjoyment of, all the privileges of French citizens, and, among others, to those of having votes in the choice of representatives, and of *being eligible to seats both in the parochial and colonial assemblies.*" Thus did the national assembly sweep away in a moment, all the laws, usages, prejudices, and opinions concerning these people, which had existed in the French colonies from their earliest settlement, and tear up by the roots the first principle of a free constitution:—a principle founded on the clearest

dictates of reason and justice, and expressly confirmed to the inhabitants of the French West Indies by the national decree of the 8th of March 1790; I mean, *the sole and exclusive right of passing laws for their local and interior regulation and government*. The colonial committee, of which M. Barnave was president, failed not to apprize the national assembly of the fatal consequences of this measure, and immediately suspended the exercise of its functions. At the same time, the deputies from the colonies signified their purpose to decline any further attendance. The only effect produced by these measures however, on the national assembly, was an order, that the three civil commissioners who had been appointed in February preceding, for regulating the affairs of the colonies on the spot, should immediately repair thither, and see the national decrees duly enforced. The consequences in St. Domingo will be related in the following chapter.*

* It has been confidently asserted, that La Fayette, in order to secure a majority on this question, introduced into the national assembly no less than eighty persons who were not members, but who sat and voted as such. This man had formerly been possessed of a plantation at Cayenne, with seventy negro slaves thereon, which he had sold, without any scruple or stipulation concerning the situation of the negroes, the latter end of 1789, and from that time enrolled himself among the friends of the blacks. The mere English reader, who may be personally unacquainted with the West Indies, will probably consider the clamour which was raised on this occasion by the French planters as equally illiberal and unjust. The planters in the British West Indies will perhaps bring the case home to themselves; and I have no hesitation in saying, that, supposing the English parliament should pass a law declaring, for instance, the free mulattoes of Jamaica to be eligible into the assembly of that island, such a measure would prove there, as it proved in St. Domingo, the declaration of civil war. On mere abstract reasoning this may appear strange and unjustifiable; but we must take mankind as we find them, and few instances occur in which the prejudices of habit, education, and opinion, have been corrected by force.

CHAPTER VI.

Consequences in St. Domingo of the Decree of the 15th of May.—Rebellion of the Negroes in the Northern Province, and Enormities committed by them.—Revolt of the Mulattoes at Mirebalais—Concordat or Truce between the Inhabitants of Port au Prince and the Men of Colour of the 11th of September.—Proclamation by the National Assembly of the 20th of September.

I AM now to enter on the retrospect of scenes, the horrors of which imagination cannot adequately conceive nor pen describe. The disputes and contests between different classes of French citizens, and the violences of malignant factions towards each other, no longer claim attention. Such a picture of human misery;—such a scene of woe, presents itself, as no other country, no former age has exhibited. Upwards of one hundred thousand savage people, habituated to the barbarities of Africa, avail themselves of the silence and obscurity of the night, and fall on the peaceful and unsuspecting planters, like so many famished tygers thirsting for human blood. Revolt, conflagration, and massacre, every where mark their progress; and death, in all its horrors, or cruelties and outrages, compared to which immediate death is mercy, await alike the old and the young, the matron, the virgin, and the helpless infant. No condition, age, or sex is spared. All the shocking and shameful enormities, with which

the fierce and unbridled passions of savage man have ever conducted a war, prevailed uncontrolled. The rage of fire consumes what the sword is unable to destroy, and, in a few dismal hours, the most fertile and beautiful plains in the world are converted into one vast field of carnage;—a wilderness of desolation!

There is indeed too much reason to believe, that these miseries would have occurred in St. Domingo, in a great degree, even if the proceedings of the National Assembly, as related in the latter part of the preceding chapter, had been more temperate, and if the decree of the 15th of May had never passed into a law. The declarations of the dying Ogé sufficiently point out the mischief that was meditated, long before that obnoxious decree was promulgated. But it may be affirmed, with truth and certainty, that this fatal measure gave life and activity to the poison. It was the brand by which the flames were lighted, and the combustibles that were prepared set into action. Intelligence having been received of it at Cape François on the 30th of June, no words can describe the rage and indignation which immediately spread throughout the colony; and in no place did the inhabitants breathe greater resentment than in the town of the Cape, which had hitherto been foremost in professions of attachment to the mother-country, and in promoting the spirit of disunion and opposition in the colonial assembly. They now unanimously determined to reject the civic oath, although great preparations had been made for a general federation on the 14th of July. The news of this decree seemed to unite the most discordant interests. In the first transports of indignation it was proposed to seize all the ships, and confiscate the

effects of the French merchants then in the harbour. An embargo was actually laid, and a motion was even made in the provincial assembly to pull down the national colours, and hoist the British standard in their room. The national cockade was every where trodden under foot, and the governor-general, who continued a sorrowful and silent spectator of these excesses, found his authority, as representative of the parent country, together with every idea of colonial subordination in the people, annihilated in a moment.

The fears and apprehensions which the governor felt on this occasion have been well described by that officer himself, in a memorial which he afterwards published concerning his administration. "Acquainted (he observes) with the genius and temper of the white colonists, by a residence of seven years in the Windward Islands, and well informed of the grounds and motives of their prejudices and opinions concerning the people of colour, I immediately foresaw the disturbances and dangers which the news of this ill-advised measure would inevitably produce; and not having it in my power to suppress the communication of it, I lost no time in apprizing the king's ministers of the general discontent and violent fermentation which it excited in the colony. To my own observations, I added those of many respectable, sober, and dispassionate men, whom I thought it my duty to consult in so critical a conjuncture; and I concluded my letter by expressing my fears that this decree would prove the death-warrant of many thousands of the inhabitants. The event has mournfully verified my predictions!"

On the recommendation of the provincial assembly of the Northern department, the several parishes throughout the colony now proceeded, without further hesitation, to the election of deputies for a new general colonial assembly. These deputies, to the number of one hundred and seventy-six, met at Leogane, and on the 9th of August declared themselves *the General Assembly of the French part of St. Domingo*. They transacted, however, but little business, but manifested great unanimity and temper in their proceedings, and resolved to hold their meetings at Cape François, whither they adjourned for that purpose, appointing the 25th of the same month for opening the session.

In the mean-while, so great was the agitation of the public mind, M. Blanchelande found it necessary not only to transmit to the provincial assembly of the North, a copy of the letter which he mentions to have written to the king's ministers, but also, to accompany it with a solemn assurance, pledging himself *to suspend the execution of the obnoxious decree, whenever it should come out to him properly authenticated*; a measure which too plainly demonstrated that his authority in the colony was at an end.

Justly alarmed at all these proceedings, so hostile towards them, and probably apprehensive of a general proscription, the mulattoes throughout the colony began to collect in different places in armed bodies; and the whites, by a mournful fatality, suffered them to assemble without molestation. In truth, every man's thoughts were directed towards the meeting of the new colonial assembly, from whose deliberations and proceedings the extinction of party, and the full and

immediate redress of all existing grievances, were confidently expected. M. Blanchelande himself declares, that he cherished the same flattering and fallacious hopes. "After a long succession of violent storms, I fondly expected, (he writes), the return of a calm and serene morning. The temperate and conciliating conduct of the new assembly, during their short sitting at Leogane, the characters of most of the individual members, and the necessity, so apparent to all, of mutual concession and unanimity on this great occasion, led me to think, that the colony would at length see the termination of its miseries; when, alas, the storm was ready to burst, which has since involved us in one common destruction!"

It was on the morning of the 23d of August, just before day, that a general alarm and consternation spread throughout the town of the Cape. The inhabitants were called from their beds by persons who reported, that all the negro slaves in the several neighbouring parishes had revolted, and were, at that moment, carrying death and desolation over the adjoining large and beautiful plain to the North-east. The governor, and most of the military officers on duty, assembled together; but the reports were so confused and contradictory, as to gain but little credit; when, as day-light began to break, the sudden and successive arrival, with ghastly countenances, of persons who had with difficulty escaped the massacre, and flown to the town for protection, brought a dreadful confirmation of the fatal tidings.

The rebellion first broke out on a plantation called *Noé*, in the parish of *Acul*, nine miles only from the city. Twelve or fourteen of the ringleaders, about the middle of the night, proceeded to the refinery, or sugar-house, and seized on a young man, the refiner's apprentice, dragged him to the front of the dwelling-house, and there hewed him into pieces with their cutlasses: his screams brought out the overseer, whom they instantly shot. The rebels now found their way to the apartment of the refiner, and massacred him in his bed. A young man lying sick in a neighbouring chamber, was left apparently dead of the wounds inflicted by their cutlasses: he had strength enough, however, to crawl to the next plantation, and relate the horrors he had witnessed. He reported, that all the whites of the estate which he had left were murdered, except only the surgeon, whom the rebels had compelled to accompany them, on the idea that they might stand in need of his professional assistance. Alarmed by this intelligence, the persons to whom it was communicated immediately sought their safety in flight. What became of the poor youth I have never been informed.

The revoltors (consisting now of all the slaves belonging to that plantation), proceeded to the house of a Mr. Clement, by whose negroes also they were immediately joined, and both he and his refiner were massacred. The murderer of Mr. Clement was his own postilion, a man to whom he had always shewn great kindness. The other white people on this estate contrived to make their escape.

At this juncture, the negroes on the plantation of M. Flaville, a few miles distant, likewise rose and murdered five white persons, one of whom (the *procureur* or attorney for the estate had a wife and three daughters. These unfortunate women, while imploring for mercy of the savages on their knees, beheld their husband and father murdered before their faces. For themselves, they were devoted to a more horrid fate, and were carried away captives by the assassins.

The approach of day-light served only to discover sights of horror. It was now apparent that the negroes on all the estates in the plain acted in concert, and a general massacre of the whites took place in every quarter. On some few estates indeed the lives of the women were spared, but they were reserved only to gratify the brutal appetites of the ruffians; and it is shocking to relate, that many of them suffered violation on the dead bodies of their husbands and fathers!

In the town itself, the general belief for some time was, that the revolt was by no means an extensive, but a sudden and partial insurrection only. The largest sugar plantation on the plain was that of Mons. Gallifet, situated about eight miles from the town, the negroes belonging to which had always been treated with such kindness and liberality, and possessed so many advantages, that it became a proverbial expression, among the lower white people, in speaking of any man's good fortune, to say *il est heureux comme un nègre de Gallifet*, (he is as happy as one of Gallifet's negroes). M. Odeluc, the attorney, or agent, for this plantation, was a member of the general assembly, and

being fully persuaded that the negroes belonging to it would remain firm in their obedience, determined to repair thither to encourage them in opposing the insurgents; to which end, he desired the assistance of a few soldiers from the town-guard, which was granted him. He proceeded accordingly, but on approaching the estate, to his surprise and grief he found all the negroes in arms on the side of the rebels, and (horrid to tell!) *their standard was the body of a white infant, which they had recently impaled on a stake!* M. Odeluc had advanced too far to retreat undiscovered, and both he, and a friend that accompanied him, with most of the soldiers, were killed without mercy. Two or three only of the patrol, escaped by flight; and conveyed the dreadful tidings to the inhabitants of the town.

By this time, all or most of the white persons that had been found on the several plantations, being massacred, or forced to seek their safety in flight, the ruffians exchanged the sword for the torch. The buildings and cane-fields were every where set on fire; and the conflagrations, which were visible from the town, in a thousand different quarters, furnished a prospect more shocking, and reflections more dismal, than fancy can paint, or the powers of man describe.

Consternation and terror now took possession of every mind: and the screams of the women and children, running from door to door, heightened the horrors of the scene. All the citizens took up arms, and the general assembly vested the governor with the command of the national guards, requesting him to

give such orders as the urgency of the case seemed to demand.

One of the first measures was to send the white women and children on board the ships in the harbour; and very serious apprehensions being entertained concerning the domestic negroes within the town, a great proportion of the ablest men among them were likewise sent on shipboard and closely guarded.

There still remained in the city a considerable body of free mulattoes, who had not taken, or affected not to take, any part in the disputes between their brethren of colour and the white inhabitants. Their situation was extremely critical; for the lower class of whites, considering the mulattoes as the immediate authors of the rebellion, marked them for destruction; and the whole number in the town would undoubtedly have been murdered without scruple, if the governor and the colonial assembly had not vigorously interposed, and taken them under their immediate protection. Grateful for this interposition in their favour, (perhaps not thinking their lives otherwise secure), all the able men among them offered to march immediately against the rebels, and to leave their wives and children as hostages for their fidelity. Their offer was accepted, and they were enrolled in different companies of the militia.

The assembly continued their deliberations throughout the night, amidst the glare of the surrounding conflagrations; and the inhabitants, being strengthened by a number of seamen from the ships, and brought into some degree of order and military subordination,

were now desirous, that a detachment should be sent to attack the strongest body of the revolvers. Orders were given accordingly; and M. de Touzard, an officer who had distinguished himself in the service of the North Americans, took the command of a party of militia and troops of the line. With these he marched to the plantation of a M. Latour, and attacked a body of about four thousand of the rebel negroes. Many were destroyed, but to little purpose; for Touzard finding the number of revolvers to increase in more than a centuple proportion to their losses, was at length obliged to retreat; and it cannot be doubted, that if the rebels had forthwith proceeded to the town, defenceless as it then was towards the plain, they might have fired it without difficulty, and destroyed all its inhabitants, or compelled them to fly to the shipping for refuge.

Sensible of this, the governor, by the advice of the assembly, determined to act for some time solely on the defensive; and as it was every moment to be apprehended, that the revolvers would pour down upon the town, the first measure resorted to was to fortify the roads and passes leading into it. At the eastern extremity, the main road from the plain is intersected by a river, which luckily had no bridge over it, and was crossed in ferry boats. For the defence of this passage, a battery of cannon was raised on boats lashed together; while two small camps were formed at proper distances on the banks. The other principal entrance into the town, and contiguous to it towards the south, was through a mountainous district, called *le Haut du Cap*. Possession was immediately taken of these heights, and considerable bodies of troops,

with such artillery as could be spared, were stationed thereon. But these precautions not being thought sufficient, it was also determined to surround the whole of the town, except the side next the sea, with a strong palisade and *chevaux de frize*; in the erecting and completing of which, all the inhabitants laboured without distinction or intermission. At the same time, an embargo was laid on all the shipping in the harbour; a measure of indispensable necessity, calculated as well to obtain the assistance of the seamen, as to secure a retreat for the inhabitants in the last extremity.

To such of the distant parishes as were open to communication either by land or by sea, notice of the revolt had been transmitted within a few hours after advice of it was received at the Cape; and the white inhabitants of many of those parishes had therefore found time to establish camps, and form a chain of posts, which for a short time seemed to prevent the rebellion spreading beyond the Northern province.* Two of those camps however, one at *Grande Riviere*, the other at *Dondon*, were attacked by the negroes, (who were here openly joined by the mulattoes), and forced with great slaughter. At Dondon the whites maintained the contest for seven hours; but were overpowered by the infinite disparity of numbers, and compelled to give way, with the loss of upwards of one hundred of their body. The survivors took refuge in the Spanish territory.

* It is believed that a general insurrection was to have taken place throughout the colony on the 25th of August, (St. Louis's day); but that the impatience and impetuosity of some negroes on the plain, induced them to commence their operations two days before the time.

These two districts therefore; the whole of the rich and extensive plain of the Cape, together with the contiguous mountains, were now wholly abandoned to the ravages of the enemy; and the cruelties which they exercised, uncontrolled, on such of the miserable whites as fell into their hands, cannot be remembered without horror, nor reported in terms strong enough to convey a proper idea of their atrocity.

They seized Mr. Blen, an officer of the police, and having nailed him alive to one of the gates of his plantation, chopped off his limbs, one by one, with an axe.

A poor man named *Robert*, a carpenter by trade, endeavouring to conceal himself from the notice of the rebels, was discovered in his hiding-place; and the savages declared *that he should die in the way of his occupation*; accordingly they bound him between two boards, and deliberately sawed him asunder.

M. Cardineau, a planter of *Grande Riviere*, had two natural sons by a black woman. He had manumitted them in their infancy, and bred them up with great tenderness. They both joined in the revolt; and when their father endeavoured to divert them from their purpose, by soothing language and pecuniary offers, they took his money, and then stabbed him to the heart.

All the white, and even the mulatto children whose fathers had not joined in the revolt, were murdered without exception, frequently before the eyes, or clinging to the bosoms, of their mothers. Young women of all ranks were first violated by a whole

troop of barbarians, and then generally put to death. Some of them were indeed reserved for the further gratification of the lust of the savages, and others had their eyes scooped out with a knife.

In the parish of *Limbé*, at a place called the Great Ravine, a venerable planter, the father of two beautiful young ladies, was tied down by a savage ring-leader of a band, who ravished the eldest daughter in his presence, and delivered over the youngest to one of his followers: their passion being satisfied, they slaughtered both the father and the daughters.

Amidst these scenes of horror, one instance however occurs of such fidelity and attachment in a negro, as is equally unexpected and affecting. Mons. and Madame Baillon, their daughter and son-in-law, and two white servants, residing on a mountain plantation about thirty miles from Cape François, were apprized of the revolt by one of their own slaves, who was himself in the conspiracy, but promised, if possible to save the lives of his master and his family. Having no immediate means of providing for their escape, he conducted them into an adjacent wood; after which he went and joined the revolvers. The following night, he found an opportunity of bringing them provisions from the rebel camp. The second night he returned again, with a further supply of provisions; but declared that it would be out of his power to give them any further assistance. After this, they saw nothing of the negro for three days; but at the end of that time he came again; and directed the family how to make their way to a river which led to Port Margot, assuring them they would find a canoe on a part of the river

which he described. They followed his directions, found the canoe, and got safely into it; but were over-set by the rapidity of the current, and after a narrow escape, thought it best to return to their retreat in the mountains. The negro, anxious for their safety, again found them out, and directed them to a broader part of the river, where he assured them he had provided a boat; but said it was the last effort he could make to save them. They went accordingly, but not finding the boat, gave themselves up for lost, when the faithful negro again appeared like their guardian angel. He brought with him pigeons, poultry, and bread; and conducted the family, by slow marches in the night, along the banks of the river, until they were within sight of the wharf at Port Margot; when telling them they were entirely out of danger, he took his leave for ever, and went to join the rebels. The family were in the woods nineteen nights.*

Let us now turn our attention back to the town of the Cape; where, the inhabitants being at length placed, or supposed to be placed, in some sort of security, it was thought necessary by the governor and assembly, that offensive operations against the rebels should be renewed, and a small army, under the command of M. Rouvray, marched to the eastern part of the plain, and encamped at a place called *Roucrou*. A very considerable body of the rebel negroes took possession, about the same time, of the large buildings on the plantation of M. Gallifet, and mounted some

* This account was communicated by Madame Baillon herself to a friend of the author who was with him at St. Domingo, and who spoke French like a native: from that friend I received it the same day, and immediately committed the particulars to writing.

heavy pieces of artillery on the walls. They had procured the cannon at different shipping places and harbours along the coast, where it had been placed in time of war by the government, and imprudently left unprotected; but it was a matter of great surprise by what means they obtained ammunition.* From this plantation they sent out foraging parties, with which the whites had frequent skirmishes. In these engagements, the negroes seldom stood their ground longer than to receive and return a single volley, but they appeared again the next day; and though they were at length driven out of their intrenchments with infinite slaughter, yet their numbers seemed not to diminish:—as soon as one body was cut off, another appeared, and thus they succeeded in the object of harassing and destroying the whites by perpetual fatigue, and reducing the country to a desert.

To detail the various conflicts, skirmishes, massacres, and scenes of slaughter, which this exterminating war produced, were to offer a disgusting and frightful picture;—a combination of horrors;—wherein we should behold cruelties unexampled in the annals of mankind; human blood poured forth in torrents; the earth blackened with ashes, and the air

* It was discovered afterwards, that great quantities of powder and ball were stolen by the negroes in the town of Cape François from the king's arsenal, and secretly conveyed to the rebels. Most of the fire-arms at first in their possession were supposed to have been part of *Ogé's* importation. But it grieves me to add, that the rebels were afterwards abundantly supplied, by small vessels from North America; the masters of which felt no scruple to receive in payment sugar and rum, from estates of which the owners had been murdered by the men with whom they trafficked.

tainted with pestilence. It was computed that, within two months after the revolt first began, upwards of two thousand white persons, of all conditions and ages, had been massacred;—that one hundred and eighty sugar plantations, and about nine hundred coffee, cotton, and indigo settlements had been destroyed, (the buildings thereon being consumed by fire), and one thousand two hundred Christian families reduced from opulence, to such a state of misery, as to depend altogether for their clothing and sustenance on public and private charity. Of the insurgents, it was reckoned that upwards of ten thousand had perished by the sword or by famine; and some hundreds by the hands of the executioner;—many of them, I am sorry to say, under the torture of the wheel;—a system of revenge and retaliation, which no enormities of savage life could justify or excuse.*

Hitherto, my narrative has applied chiefly to transactions in the Northern province; I grieve to relate,

* Two of these unhappy men suffered in this manner under the window of the author's lodgings, and in his presence, at Cape Francois, on Thursday, the 28th of September, 1791. They were broken on two pieces of timber placed crosswise. One of them expired on receiving the third stroke on his stomach, each of his legs and arms having been first broken in two places; the first three blows he bore without a groan. The other had a harder fate. When the executioner, after breaking his legs and arms, lifted up the instrument to give the finishing stroke on the breast, and which (by putting the criminal out of his pain) is called *le coup de grace*, the mob, with the ferociousness of cannibals, called out *arretez!* (stop!), and compelled him to leave his work unfinished. In that condition, the miserable wretch, with his broken limbs doubled up, was put on a cart-wheel, which was placed horizontally, one end of the axle-tree being driven into the earth. He seemed perfectly sensible, but uttered not a groan. At the end of forty minutes, some English seamen, who were spectators of the tragedy, strangled him in mercy.

that the flames of rebellion soon began to break forth also in the Western division. Here, however, the insurgents were chiefly men of colour, of whom upwards of two thousand appeared in arms in the parish of Mirebalais. Being joined by about six hundred of the negro slaves, they began their operations by burning the coffee plantations in the mountains adjacent to the plain of Cul-de-Sac. Some detachments of the military which were sent against them from Port au Prince were repulsed; and the insurgents continued to ravage and burn the country through an extent of thirty miles, practising the same excesses and ferocious barbarities towards such of the whites as fell into their hands, as were displayed by the rebels in the North. They had the audacity at length to approach Port au Prince, with intention, as it was believed, to set it on fire; and so defenceless was the state of that devoted town, that its destruction seemed inevitable. Many of the mulatto chiefs, however, finding that their attempts to gain over the negro slaves on the sugar plantations in this part of the country, were not attended with that success which they expected, expressed an unwillingness to proceed to this extremity; declaring that they took up arms not to desolate the colony, but merely to support the national decree of the 15th of May, and that they were not averse to a reconciliation. These sentiments coming to the knowledge of M. de Jumecourt, a planter of eminence, he undertook the office of mediator, and through his well-timed and powerful interposition, a truce or convention, called the *concordat*, was agreed upon the 11th of September, between the free people of colour, and the white inhabitants of Port au Prince, of which the

chief provisions were an oblivion of the past, and an engagement on the part of the whites, to admit in full force the national decree of the 15th of May, so often mentioned ;—certainly the ostensible, though perhaps not the sole and original cause of the rebellion.*

Instructed by this example, and softened, it may be presumed, by the loyal and temperate conduct of the free mulattoes in the town of Cape François, as before related, the general assembly, by a proclamation of the 20th of September, declared, that they would no longer oppose the operation of the same decree. They even went further, and announced an intention to grant considerable indulgences towards such free people of colour as were not comprehended in it, meaning those who were born of enslaved parents. They voted at the same time the formation of certain free companies of mulattoes, wherein the men of colour of all descriptions, possessed of certain qualifications, should be allowed to serve as commissioned officers.

These concessions, at an earlier period, would have operated with powerful effect in the salvation of the colony; but they now came too late, and produced only a partial truce, a temporary and fallacious ces-

* It should also have been observed, that the condemnation and execution of Ogé is pronounced, in this *concordat*, "infamous, and to be held in everlasting execration." These expressions were literally copied from a letter of Abbé Gregoire. I am obliged to the author of the History of Europe in the Annual Register for 1792, (Rivington's edit.) for reminding me of this circumstance.

sation of miseries. The wounds that had been inflicted were yet green and bleeding; and the dark and sullen passions of disappointed pride, anger, malice, hatred and revenge, were secretly burning in the gloomy minds of all parties. The flames were smothered, not extinguished; soon to break out again, with aggravated violence and greater fury than ever.

CHAPTER VII.

Of the motives which induced the People of colour to join the revolted Negroes.—Conduct of the British Association for the Abolition of the Slave Trade, and of the Society in Paris called Les Amis des Noirs—Letter from Abbé Gregoire to the People of Colour—Repeal of the Decree of the 15th May 1791—Effects of that Measure—Civil War with the Mulattoes renewed—Port au Prince destroyed by Fire—Cruelties exercised by both Parties—Arrival at Cape Francois of the Civil Commissioners.

BEFORE I proceed to a renewal of those disgusting scenes of devastation, slaughter, and ruin, which my duty, as a faithful historian, calls upon me to describe, (happy if they serve as an impressive lesson to other nations!), it seems necessary to remove some difficulties which may possibly have arisen in the mind of the reader, concerning the original and primary cause of the junction and co-operation of so large a number of the negro slaves, in this rebellion, with the men of colour. That the whole body of the latter in St. Domingo had solid ground of complaint and dissatisfaction, cannot be denied. There is a point at which oppression sometimes arrives, when forbearance under it ceases to be a virtue; and I should readily have admitted, that the actual situation and condition of the mulattoes in the French islands would have made resistance a duty, if it did not ap-

pear, from what I have already related, that the redress of their grievances occupied the very first deliberations of the first general assembly of representatives that ever met in St. Domingo. Certainly, then, no justification can be offered for those pestilent reformers, who could persuade these unfortunate people to seek that relief by rebellion and massacre, which was offered to them by the supreme power of the country, as a spontaneous and voluntary concession;—the homage of enlightened reason on the altar of humanity. Concerning the enslaved negroes, however, it does not appear that the conduct of the whites towards them was in general reprehensible. I believe, on the whole, it was as lenient and indulgent as was consistent with their own safety. It was the mulatto people themselves who were the hard-hearted taskmasters to the negroes. The same indignities which they received from the whites, they directed without scruple towards the blacks; exercising over the latter every species of that oppression which they loudly and justly complained of, when exercised on themselves;—and this is a true picture of human nature. By what means, then, it will be asked, were the negroes induced to forget their resentments, and join with those who were the constant objects both of their envy and hatred?

In order to reply to this question, with as much accuracy and precision as the subject will admit, it is necessary to recur to the proceedings of the two associations, of which mention was made in the Second Chapter of this History; namely, the British association for the abolition of the slave trade, which held its meetings in the Old Jewry in London; and the

society called *Les Amis des Noirs* in Paris. A short review of the conduct of these societies will serve, not only to lessen the surprise which may be felt at the revolt of the negroes of St. Domingo, but also raise a considerable degree of astonishment that the enslaved negroes in the British islands had not given them the example.

I have observed, that the society in London *professed* to have nothing more in view than to obtain an act of the legislature for prohibiting the further introduction of African slaves into the British colonies. I have said, that “they disclaimed all intention of interfering with the government and condition of the negroes already in the plantations; publicly declaring their opinion to be, that a general emancipation of those people, in their present state of ignorance and barbarity, instead of a blessing, would prove to them the source of misfortune and misery.” But although such were their ostensible declarations as a public body, the leading members of the society, in the same moment, held a very different language; and even the society itself (acting as such), pursued a line of conduct directly and immediately repugnant to their own professions. Besides using every possible endeavour to inflame the public of Great Britain against the planters, they distributed at a prodigious expense throughout the colonies, tracts and pamphlets without number, the direct tendency of which was to render the white inhabitants odious and contemptible in the eyes of their own slaves, and excite in the latter such ideas of their natural rights and equality of condition, as should lead them to a general struggle for freedom through rebellion and bloodshed. In many of those

writings, arguments are expressly adduced, in language which cannot be misunderstood, to urge the negroes to rise up and murder their masters without mercy.—“Resistance,” say they, “is always justifiable where force is the substitute of right: *nor is the commission of a civil crime possible in a state of slavery.*” These sentiments are repeated in a thousand different forms; and in order that they might not lose their effect by abstract reasoning, a reverend divine of the church of England, in a pamphlet addressed to the chairman or president of the society, pours forth the most earnest prayers, in the most undisguised expressions, that the negroes would destroy all the white people, men, women, and children, in the West Indies: “Should we not, (he exclaims), approve their conduct in their violence? Should we not crown it with eulogium, if they exterminate their tyrants with fire and sword! *Should they even deliberately inflict the most exquisite tortures on those tyrants, would they not be excusable in the moral judgment of those who properly value those inestimable blessings, rational and religious liberty?*”*

Besides distributing pamphlets of this complexion *gratis*, at the doors of all the churches and places of worship in the kingdom, and throughout the colonies, the society, or persons in their name, caused a

* This is a fair extract from a letter addressed to Granville Sharp, Esq. Chairman of the Society in the Old Jewry, by the Reverend Percival Stockdale, A. M. Of such writers the planters may well exclaim, “*Forgive them, they know not what they do!*” The same ejaculation I applied to the learned and pious Samuel Johnson, who possessed a negro servant, and before whom he frequently gave as a toast, “*A speedy rebellion of the negroes in Jamaica, and success to them!*”

medal to be struck, containing the figure of a naked negro, loaded with chains, and in the attitude of imploring mercy; thousands of which also were dispersed among the negroes in each of the sugar islands, for the instruction, I presume, of such of them as could not read; but, unhappily, this instance of provident caution was not requisite; for so many negro domestics return annually from Europe to the West Indies, as constantly furnish a sufficient number of living instructors; and certain it is, (I pronounce it from my own knowledge respecting Jamaica), that the labours of the society on their behalf, as well as many of the most violent speeches in the British parliament, wherein the whole body of planters were painted as a herd of blood-thirsty and remorseless tyrants, were explained to the negro slaves, in terms well adapted to their capacities, and suited, as might have been supposed, to their feelings. It will be difficult to say, what other measures the Old Jewry associates could have taken to excite a rebellion, except that of furnishing the objects of their solicitude with fire-arms and ammunition.

Hitherto, this society had served as a model and exemplar to that of Paris; but a disposition to stop at half measures constitutes no part of the French character; and the society of *Amis des Noirs* resorted, without scruple, to those measures which their fellow labourers in London still hesitated to adopt: beginning with the class of free mulattoes, because they found many of them in France who became the willing instruments of their purposes; and who undertook to interpret to the negroes in the French colonies the wishes and good intentions towards them of their

friends in the mother country. Thus, an opening was made towards conciliation and union between the two classes. The negroes, believing that it was only through the agency of the mulattoes, and the connexions of those people in France, they could obtain a regular supply of arms and ammunition, forgot or suspended their ancient animosities; and the men of colour, sensible that nothing but the co-operation of the enslaved negroes (docile, as they supposed them to be, from their ignorance, and irresistible from their numbers) could give success to their cause, courted them with such assiduity, as gained over at least nine-tenths of all the slaves in the Northern province of St. Domingo.

There seems, however, to have been some apprehensions entertained by the leading men among the *Amis des Noirs*, that the decree of the national assembly of the 15th of May, confined as the benefits of it were to the people of colour exclusively, (and of those, to such only as were born of free parents), might give rise to jealousies and suspicions, destructive of that unanimity between the different classes, the maintenance of which was an object of the last importance. To obviate any misapprehensions on this account, as well as to keep the mulattoes firm to their purpose, the Abbé Gregoire wrote and published his celebrated circular letter;—a performance which, if the intentions of the writer had been as pure as his expressions are eloquent, would have reflected lustre on his abilities.* What effect this distinguished piece of ora-

* The reader will find a translation of this letter at the end of the present Chapter.

tory may have had on the rugged and unenlightened minds of savage people, I pretend not to ascertain. It is certain, that the Abbé Gregoire was considered by the negroes in St. Domingo as their great advocate and patron; a sort of guardian angel or tutelary deity; of the good effects of whose benevolent interposition and friendly offices their masters unjustly deprived them, and on whose support and assistance they might confidently rely, in the attempt, through rebellion and murder, to obtain justice for themselves.

Both classes of people being thus instructed and prepared, the decree of the 15th of May was the signal of revolt, the war-whoop of massacre. From the clamour which it excited amongst all orders of the whites in St. Domingo, (the lower classes especially), the people of colour as I have shewn, had reason to apprehend, that mischiefs of an extensive and alarming nature were meditated against them. They were thus furnished with a plausible, and, had they meant to have acted solely on the defensive, a justifiable cause for resorting to arms; but, unhappily, the strong tide of popular prejudice which prevailed in the mother country against the planters, and the great majority which voted for the fatal decree in the national assembly, were circumstances that inspired them with so dangerous a confidence in their own resources, as overpowered all considerations of prudence, policy, and humanity.

It must be considered, at the same time, that the enslaved negroes (ignorant and depressed as we suppose them to be) could not possibly be unobservant of these combined and concurring circumstances.

They beheld the coloured people in open hostility against the whites. They were assured, that the former had the fullest support and encouragement from the supreme legislature of the mother country. They were taught to believe, that themselves, also, were become the objects of the paternal solicitude of the king and the national assembly, who wished to rescue them from the dominion of their masters, and invest them with their estates. It appeared from indisputable evidence, that assurances of this nature were held out to the enslaved negroes;—assurances which could not but excite their attention, awaken their faculties, and rouse them to action. Whoever shall calmly deliberate on these, and the other facts that have been stated, will find no difficulty in accounting for the dreadful extent of this insurrection; or in assigning it to its proper cause, and tracing to the fountain-head those rivers of blood which still continue to flow in this unfortunate and devoted colony!*

* In September 1791, when the author was at Cape Francois, he dined with a large company on board the frigate *la Prudente*, commanded by Mons. *Joyeuse* (at present a distinguished admiral in the service of the new republic, by the name of *Villaret*), when, in the midst of the entertainment, a loud exclamation from the crew announced *that the gunner was returned*. This man, who had been missing some weeks, was immediately brought forward, and gave the following account of the cause of his absence. He said that, having gone on shore to collect green meat for the pigs, he was surrounded by the rebel negroes, who were about putting him to death, when Jean Francois, the chief, finding that he was an officer in the king's service, ordered that his life should be spared, alleging *that the king was their friend*. They detained him however as a prisoner, and compelled him to load and point their artillery in the attack at M. Gallifet's plantation before mentioned. On the defeat of the rebels in that engagement, he fortunately made his escape from them. Some of the shocking enormities and cruelties inflicted by the rebels on their white prisoners, as related in the preceding pages, were committed in this man's presence.

But it is now time to advert to the proceedings which occurred in France, where we left *Gregoire*, *La Fayette*, *Robespierre*, and the rest of the society of *Amis des Noirs*, exulting in the triumph they had obtained on the 15th of May; and perhaps waiting, in the ardent hope and expectation, that their obnoxious decree of that date, would produce those very evils which actually resulted from it. It was not until the beginning of September, that information arrived at Paris concerning the reception which the account of this decree had met with in St. Domingo. The tumults, disorders, and confusions that it produced there, were now represented in the strongest colouring, and the loss of the colony to France was universally apprehended. At this time, however, no suspicion was entertained concerning the enslaved negroes; but a civil war, between the whites and the mulattoes, was believed to be inevitable. The commercial and manufacturing towns, predicting the ruin of their trade and shipping, and the loss of their capitals from existing dangers, presented remonstrances and petitions to the national assembly, urging the necessity of an immediate repeal of all the decrees by which the rights of the planters were invaded; that of the 15th of May especially. The constituent national assembly was now on the point of dissolution, and perhaps wished to leave every thing in peace. At the same time, the tide of popular prejudice, which had hitherto ran with such violence against the colonists, was beginning to turn. Most of those members whose opinions in colonial concerns, a few months before, had guided the deliberations of the national assembly were now either silently disregarded, or treated with outrage;—a strong and striking proof of the lightness and versatility of the

French character. At length, a motion was made to annul the obnoxious decree, and (strange to tell), on the 24th of September its repeal was actually voted by a large majority!—At this remarkable change of sentiment in the supreme legislature, it is necessary to pause, and remind the reader of what was doing at the same time in St. Domingo; where, as we have seen, on the 11th of that very month, the *concordat*, or truce, took place between the people of colour and the white inhabitants of Port au Prince; and on the 20th, the colonial assembly at Cape François published the proclamation mentioned in the latter part of the preceding Chapter. Thus, almost in the very moment when the justice and necessity of the decree were acknowledged, and its faithful observance promised, by the colonial assembly, its repeal was pronounced by the national legislature in the mother-country!

To such repugnancy and absurdity must every government be driven that attempts to regulate and direct the local concerns of a country three thousand miles distant. Of the two measures that have been mentioned, it is difficult to say which produced the greatest calamities; the decree of the 15th of May in the first instance; or its unexpected repeal at the time and in the manner related! Doubts had already arisen in the minds of the mulattoes concerning the sincerity and good faith of the white people, with respect to the *concordat*. Their suspicions and apprehensions had indeed grown to such a height, as to induce them to insist on a renewal and confirmation of its provisions; which were accordingly granted them, by a new instrument, or treaty, of the 11th of

October, and a supplementary agreement of the 20th of the same month: but no sooner was authentic information received of the proceedings in France, in the repeal of the decree, than all trust and confidence, and every hope of reconciliation and amity between the two classes, vanished for ever. It was not possible to persuade the mulattoes that the planters in the colony were innocent, and ignorant of the transaction. They accused the whites of the most horrid duplicity, faithlessness and treachery; and publicly declared that one party or the other, themselves or the whites, must be utterly destroyed and exterminated:—There was no longer, they said, an alternative.

In this disposition, exasperated to frenzy, the coloured people throughout the Western and Southern provinces flew to arms. In the Southern province, a body of them became masters of Port St. Louis; but the inhabitants of Port au Prince having been reinforced, a short time before, by the arrival of some troops from Europe, were better prepared, and drove the revolvers from the city with great slaughter. They took post in the parish of *Croix des Bouquets*; but found means, however, before their retreat, to set fire to the city, and a dreadful conflagration ensued, in which more than one-third of the buildings were consumed.

Open war, and war in all its horrors, was now renewed. All the soft workings of humanity—what our great dramatic poet calls the *compunctious visitings of nature*—were now absorbed in the raging and insatiable thirst of revenge, which inflamed each class alike. It was no longer a contest for mere victory, but a dia-

bolical emulation which party could inflict the most abominable cruelties on the other. The enslaved negroes in the district called *Cul-de-Sac* having joined the mulattoes, a bloody engagement took place, in which the negroes, being ranged in front, and acting without any kind of discipline, left two thousand of their number dead on the field. Of the mulattoes about fifty were killed, and several taken prisoners. The whites claimed the victory; but for want of cavalry were unable to improve it by a pursuit, and contented themselves with satiating their revenge on their captives. Every refinement in cruelty that the most depraved imagination could suggest, was practised on the persons of those wretched men. One of the mulatto leaders was unhappily among the number: him the victors placed on an elevated seat in a cart, and secured him in it by driving large spiked nails through his feet into the boards. In this condition he was led a miserable spectacle through the city. His bones were afterwards broken, and he was then thrown alive into the flames!

The mulattoes scorned to be outdone in deeds of vengeance, and atrocities shameful to humanity. In the neighbourhood of *Jeremie* a body of them attacked the house of M. Sejourné, and secured the persons both of him and his wife. This unfortunate woman (my hand trembles while I write) was far advanced in her pregnancy. The monsters, whose prisoner she was, having first murdered her husband in her presence, ripped her up alive, and threw the infant to the hogs.—They then (how shall I relate it) sewed up the head of the murdered husband in ———!!!—Such are thy triumphs, Philanthropy!

With these enormities terminated the disastrous year 1791. Just before Christmas the three civil commissioners nominated by the national assembly for St. Domingo, arrived at Cape François. Much was expected from their appointment by the friends of peace and good order; but the sequel will shew that they effected very little towards restoring the peace of the country.

Translation of the Letter of ABBE GREGOIRE, Bishop of the Department of Loire and Cher, Deputy of the National Assembly, to the Citizens of Colour in the French West Indies, concerning the Decree of the 15th of May 1791.

FRIENDS!

YOU *were* MEN;—you *are* now CITIZENS. Reinstated in the fulness of your rights, you will, in future, participate of the sovereignty of the people. The decree which the national assembly has just published respecting you, is not a *favour*; for a favour is a *privilege*: and a privilege to one class of people is an injury to all the rest.—They are words which will no longer disgrace the laws of the French.

In securing to you the exercise of your political rights, we have acquitted ourselves of a *debt*:—not to have paid it, would have been a crime on our part, and a disgrace to the constitution. The legislators of a free nation certainly could not do less for you than our ancient despots have done.

It is now above a century ago that Louis XIV. solemnly acknowledged and proclaimed your rights; but of this sacred inheritance you have been defrauded by pride and avarice, which have gradually increased your burthens, and imbittered your existence.

The regeneration of the French empire opened your hearts to hope, whose cheering influence has alleviated the weight of your miseries:

miseries of which the people of Europe had no idea. While the white planters resident among us were loud in their complaints against *ministerial* tyranny, they took especial care to be silent *as to their own*. Not a hint was suggested concerning the complaints of the unhappy people of mixed blood; who, notwithstanding, are their own children. It is *we*, who, at the distance of two thousand leagues from you, have been constrained to protect those children against the neglect, the contempt, the unnatural cruelty of their fathers!

But it is in vain that they have endeavoured to suppress the justice of your claims. Your groans, notwithstanding the extent of the ocean which separates us, have reached the hearts of the European Frenchmen; —for *they* have hearts.

God Almighty comprehends all men in the circle of his mercy. His love makes no distinction between them, but what arises from the different degrees of their virtues. Can laws then, which ought to be an emanation of eternal justice, encourage so culpable a partiality? Can that government, whose duty it is to protect alike all the members of the same great family, be the mother of one branch, and the step-mother only of the others?

No, gentlemen :—you could not escape the solicitude of the national assembly. In unfolding to the eyes of the universe the great charter of nature, your titles were traced. An attempt had indeed been made to expunge them; but happily they are written in characters as indelible as the sacred image of the Deity, which is graven on your countenances.

Already had the national assembly, in the instructions which it prepared for the government of the colonies, on the 28th of March 1790, comprized both the whites and people of colour under one common denomination. Your enemies, in asserting the contrary, have published a falsehood. It is incontestibly true, that when I demanded you should be expressly named, a great number of members, among whom were several planters, eagerly exclaimed, that you were already comprehended under the general words contained in those instructions. M. Barnave himself, upon my repeated appeals to him on that head, has at length acknowledged, before the whole assembly, that this was the fact. It now appears how much reason I had to apprehend that a false construction would be put upon our decree!

New oppressions on the part of your masters, and new miseries on yours, until at length the cup of affliction is filled even to the brim, have but too well justified my apprehensions. The letters which I have received from you upon this head, have forced tears from my eyes. Posterity will learn, with astonishment and indignation, that a cause like yours, the justice of which is so evident, was made the subject of debate for no less than five days successively. Alas! when humanity is obliged to struggle so long against vanity and prejudice, its triumph is dearly obtained.

It is a long time that the society of *Amis des Noirs* have employed themselves in finding out the means to soften your lot, as well as that of the slaves. It is difficult—perhaps impossible—to do good with entire impunity. The meritorious zeal of this society has drawn upon them much obloquy. Despicable writers have lanced their poisonous shafts at them, and impudent libels have never ceased to repeat objections and calumnies, which have been a hundred times answered and refuted. How often have we been accused of being sold to the English, and of being paid by them for sending you inflammatory writings and arms? You know, my friends, the weakness and wickedness of these charges. We have incessantly recommended to you attachment to your country, resignation and patience, while waiting the return of justice! Nothing has been able to cool our zeal, or that of your brethren of mixed blood who are at Paris. M. Raimond, in particular, has devoted himself most heroically to your defence. With what transport would you have seen this distinguished citizen, at the bar of the national assembly, of which he ought to be a member, laying before it the affecting picture of your miseries, and strenuously claiming your rights! If that assembly had sacrificed them, it would have tarnished its glory. It was its duty to decree with justice, to explain itself clearly, and cause its laws to be executed with firmness: it has done so; and if (which God forbid!) some event, hidden in the womb of futurity, should tear our colonies from us, would it not be better to have a loss to deplore, than an injustice to reproach ourselves with?

CITIZENS! raise once more your humiliated countenances, and to the dignity of men, associate the courage and nobleness of a free people. The 15th of May, the day in which you recovered your rights, ought to be for ever memorable to you and to your children. This epoch will periodically awaken in you sentiments of gratitude towards the Supreme Being; and may your accents ascend to the vault of heaven, towards

which your grateful hands will be extended ! At length you have a country. Hereafter you will see nothing above you but the law ; while the opportunity of concurring in the framing it, will assure to you that indefeasible right of all mankind, the right of obeying yourselves only.

You have a country : and it will no longer be a land of exile, where you meet none but tyrants on the one hand, and companions in misfortune on the other ; the former distributing, and the latter receiving, contempt and outrage. The groans of your afflictions were punished as the clamours of rebellion ; and situated between the uplifted poinard, and certain death, those unhappy countries were often moistened with your tears, and sometimes stained with your blood.

You have a country : and happiness will shine on the seat of your nativity. You will now enjoy in peace the fruits of the fields which you have cultivated without compulsion. Then will be filled up that interval, which, placing, at an immense distance from each other, the children of the same father, has suppressed the voice of nature, and broke the bands of fraternity asunder. Then will the chaste enjoyments of conjugal union take place of those vile sallies of debauchery, by which the majesty of moral sentiment has been insulted. By what strange perversion of reason can it be deemed disgraceful in a white man to marry a black or mulatto woman, when it is not thought dishonourable in him to be connected with her in the most licentious familiarity !

The less real worth a man possesses, the more he seeks to avail himself of the appearances of virtue. What can be more absurd than to make the merit of a person to consist in different shades of the skin, or in a complexion more or less sallow ? The man who thinks at all must sometimes blush at being a man, when he sees his fellow-creatures blinded by such ridiculous prejudices ; but as unfortunately pride is one of those failings we most unwillingly part with, the empire of prejudice is the most difficult to subvert : man appears to be unable to arrive at truth, until he has exhausted his strength in travelling through the different paths of error.

This prejudice against the mulattoes and negroes has however no existence in our Eastern colonies. Nothing can be more affecting than the eulogium made on the people of colour by the inhabitants of that part of the world, in the instructions given by them, to those they have appointed their deputies to the national assembly. The members of the

academy of sciences pride themselves in reckoning a mulatto of the Isle of France in the number of their correspondents. Among ourselves, a worthy negro is a superior officer of the district of St. Hypolite, in the department of Gard. We do not conceive that a difference of colour can be the foundation of different rights among members of the same political society. It is therefore we find no such despicable pride among our brave national guards, who offer themselves to embark for the West Indies to insure the execution of our decrees. Perfectly concurring in the laudable sentiments manifested by the inhabitants of Bordeaux, they acknowledge with them, that the decree respecting the people of colour, framed under the auspices of prudence and wisdom, is an homage rendered to reason and justice. While the deputies from the colonies have endeavoured to calumniate your intentions, and those of the mercantile part of the nation, the conduct of those deputies is perfectly contradictory. Ardently soliciting their own admission among us at Versailles: swearing with us in the Tennis Court not to separate from us, until the constitution should be established, and then declaring, when the decree of the 15th of May was passed, that they could no longer continue to sit with us! This desertion is a desertion of their principles, and a breach of their solemn oaths.

All those white inhabitants of the colonies who are worthy the name of Frenchmen, have hastened to abjure such ridiculous prejudices, and have promised to regard you in future as brothers and friends. With what delightful sensations do we cite the words of the citizens of Jacmel. "We swear to obey, without reserve, the decrees of the national assembly respecting our present and future constitution, and even such of them as may substantially change it!" The citizens of Port au Prince tell the national assembly the same thing, in different words. "Condescend, gentlemen," say they, "to receive the oath which the municipality has taken to you, in the name of the commons of Port au Prince, punctually to obey and execute all your decrees, and never to swerve from them in any respect whatsoever."

Thus has philosophy enlarged its horizon in the new world, and soon will absurd prejudices have no other supporters than a few inferior tyrants, who wish to perpetuate in America, the reign of that despotism which has been abolished in France.

What would these men have said, if the people of colour had endeavoured to deprive the whites of *their* political advantages? With what

energy would they not have exclaimed at such an oppression? Inflamed into madness at finding that your rights have been pointed out to you, their irritated pride may perhaps lead them to make every effort to render our decrees ineffectual. They will probably endeavour to raise such disturbances, as, by wresting the colonies from the mother country, will enable them to defraud their creditors of their just debts. They have incessantly alarmed us with threats that St. Domingo will be lost, if justice be rendered to you. In this assertion we have found nothing but falsehood: we please ourselves in the belief, that our decree will draw the bands still closer which unite you to the mother country. Your patriotism, your interest, and your affections, will concur in inducing you to confine your commercial connexions to France only; and the reciprocal tributes of industry will establish between her and her colonies a constant interchange of riches and good offices. If you act unfaithfully towards France, you will be the basest and most abandoned of the human race. But no! generous citizens, you will not become traitors to your country: you shudder at the idea. Rallied with all other good Frenchmen, around the standard of liberty, you will defend our glorious constitution. The day shall arrive, when the representatives of the people of colour will cross the ocean to take their seats with us, and swear to live and die under our laws. The day shall arrive among you when the sun will shine on none but freemen: when the rays of light shall no longer fall on the fetters of slavery. It is true, the national assembly has not yet raised the condition of the enslaved negroes to a level with your situation; because suddenly granting the rights, to those who are ignorant of the duties of citizens, might perhaps have been a fatal present to them: but forget not, that they, like yourselves, are born to freedom and perfect equality. It is in the irresistible course of things that all nations, whose liberty has been invaded, shall recover that precious portion of their indefeasible inheritance!

You are accused of treating your slaves much worse than the whites: but, alas! so various have been the detractions with which you have been aspersed, that it would be weakness in us to credit the charge. If, however, there be any foundation for what has been advanced on this head, so conduct yourselves in future as to prove it will be a shameful calumny hereafter.

Your oppressors have heretofore endeavoured to hide from their slaves the light of Christianity, because the religion of mildness, equality, and liberty, suits not with such blood-thirsty men. May *your* conduct be

the reverse of *theirs*. Universal love is the language of the Gospel; your pastors will make it heard among you. Open your hearts to receive this divine system of morality. We have mitigated *your* misfortunes, alleviate, on your part, those of the unhappy victims of avarice, who moisten your fields with their sweat, and often with their tears. Let the existence of your slaves be no longer their torment; but by your kind treatment of them, expiate the crimes of Europe!

By leading them on progressively to liberty, you will fulfil a duty: you will prepare for yourselves the most comfortable reflections: you will do honour to humanity, and insure the prosperity of the colonies. Such will be your conduct towards your brethren, the negroes; but what ought it to be towards your fathers, the whites? Doubtless you will be permitted to shed tears over the ashes of *Ferrand de Baudiere*, and the unfortunate *Ogé*, assassinated under the forms of law, and dying on the wheel for having wished to be free! But may he among you perish, who shall dare to entertain an idea of revenge against your persecutors! They are already delivered over to the stings of their own consciences, and covered with eternal infamy. The abhorrence in which they are held by the present race of mankind, only precedes the execration of posterity. Bury then in eternal oblivion every sentiment of hatred, and taste the delicious pleasure of conferring benefits on your oppressors. Repress even too marked expressions of your joy, which, in causing them to reflect on their own injustice towards you, will make their remorse still more pungent.

Strictly obedient to the laws, teach your children to respect them. By a careful education, instruct them in all the duties of morality; so shall you prepare for the succeeding generation, virtuous citizens, honourable men, enlightened patriots, and defenders of their country!

How will their hearts be affected when, conducting them to your shores, you direct their looks towards France; telling them, "beyond those seas is your parent country; it is from thence we have received justice, protection, happiness, and liberty. There dwell our fellow citizens, our brethren, and our friends: to them we have sworn an eternal friendship. Heirs of our sentiments, and of our affections, may your hearts and your lips repeat our oaths! Live to love them; and, if necessary, die to defend them!"

Signed,

GREGOIRE.

Paris, 8th June, 1791.

Vol. IV.

14

CHAPTER VIII.

Reception and Proceedings of the Civil Commissioners and their Return to France—National Decree of the 4th of April 1792—Appointment of a new Governor (Mons. Desparbes) and three other Commissioners (Santhonax, Polverel, and Ailhaud)—Their Embarkation and Arrival, with a select Body of Troops—Their violent Proceedings—Appointment, by the Executive Council, of M. Galbaud as Chief Governor, in the Room of Desparbes—His Arrival, and Dispute with the Commissioners—Both Parties proceed to hostilities—The revolted Negroes called in to the Assistance of the Commissioners—A general Massacre of the White Inhabitants, and Conflagration of the Town of Cape François.

THE civil commissioners who were to restore peace and subordination in St. Domingo, and whose arrival there was noticed in the last Chapter, were named Mirbeck, Roome, and St. Leger. Mirbeck and Roome had formerly been known as advocates in the parliaments of Paris; and St. Leger, who was a native of Ireland, had practised many years in France as a surgeon. Although the confusion of the times had elevated these men to power, not one of them was distinguished for extraordinary abilities, and their rank in life was not such as to command any great degree of consideration from the planters. They were received however, from respect to their appointment, with politeness and submission, both by the governor and the inhabitants. Military honours were

shewn them, and they were led in public procession to the cathedral, where the blessing of the Almighty was devoutly implored for success to their mission.

Their first proceeding, after announcing the new constitution and form of government for the mother country, as confirmed by the king, was to publish the decree of the 24th of September 1791, by which the fatal decree of the 15th of May was annulled. So far all was well: but a few days afterwards, they took upon them to proclaim a general amnesty and pardon to such people, of all descriptions, as should lay down their arms, and come in, within a certain prescribed time, and take the oaths required by the new constitution. This measure lost them the confidence of all the white inhabitants: a general amnesty to the men of colour and revolted slaves, was considered as a justification of the most horrible enormities, and as holding out a dangerous example to such of the negroes as preserved their fidelity; and it lost its effect on the mulattoes, by being accompanied with a repeal of their favourite decree. With what contempt and indignity it was received by the latter, the following circumstance will demonstrate. At *Petit Goave*, the mulattoes were masters, and held in close confinement thirty-four white persons, whom they reserved for vengeance. On the publication of this amnesty, they led them to execution: but instead of putting them to immediate death, they caused each of them to be broken alive; and in the midst of their tortures, read to them, in a strain of diabolical mockery, the proclamation aloud; affecting to consider it as a pardon for the cruelties they had just committed.

The unlimited and indefinite authority which the commissioners seemed to claim, alarmed the colonial assembly, who desired to be informed of the nature and extent of their powers. To this request no satisfactory answer being given, the commissioners lost ground in the public opinion daily; and their personal conduct, as individuals, contributed by no means to acquire them respect. Mirbeck spent the greatest part of his time in the practice of low debauchery, giving indulgence to his vicious propensities without restraint or decency. St. Leger considered his appointment as an authority to exact money, in which he was little scrupulous, and laid the few mulatto people who remained faithful, under a most unmerciful contribution. Roome alone conducted himself without reproach: he was a well-meaning inoffensive man, and attempted, though without effect, to act the part of a mediator between the different factions which desolated the country. This praise at least was given him—that if he did no good, he did no harm.

After a short stay at Cape François, the commissioners visited other parts of the colony; but finding themselves every where very lightly regarded, and having no troops to support their authority, they returned separately to France in the months of March and April.

Troops however, as I have observed, had arrived from France to the number, in the whole, of about four thousand; but, in the spirit of the times, they manifested very little obedience either to the civil commissioners, or the governor of the colony; yet they served as a check to the revolvers, who would otherwise, in

all probability, before this time, have become masters both of Cape François and Port au Prince. In the Northern province, the rebel negroes, indeed, were supposed to be considerably reduced by disease and famine. Having destroyed all the provision grounds, and devoured the cattle of all kinds on the plain of the Cape, they had now taken possession of the surrounding mountainous districts, and were compelled by their chief leader, *Jean Francois*, a negro of great sagacity, to plant provisions for their future subsistence; a measure which has kept the flames of rebellion alive to the present hour.

In the meantime, the state of public affairs in the mother country was tending to a great and ominous change. Ever since the flight and seizure of their unhappy king, in the month of June 1791, the faction was hourly increasing in numbers which was soon to lay the kingdom in ruins, and bring the monarch himself to the scaffold. The Jacobin party, headed by a blood-thirsty triumvirate,* were becoming all-powerful; and the society of *Amis des Noirs* had once more acquired a fatal ascendancy in the legislative body. On the 29th of February, one of them, named *Garan de Coulon*, after a long and inflammatory harangue against the planters in general, proposed the form of a decree for abrogating that of the 24th of September, declaring a general amnesty throughout all the French colonies; and enacting, that new colonial assemblies should be formed, which should transmit their sentiments not only on the subject of the internal government of the colonies, *but also on the best method of effecting the abolition of negro slavery* IN TOTO.

* Danton, Robespierre, and Marat.

Frantic as the new legislature* had shewn itself on many occasions since its first meeting, a majority could not at this time be found to vote for so senseless and extravagant a proposition; but in about two months afterwards, this assembly passed the famous decree of the 4th of April 1792, of which it is necessary the reader should be furnished with a copy at large; and it is conceived in the words following:

“The national assembly acknowledges and declares, that the people of colour and free negroes in the colonies ought to enjoy an equality of political rights with the whites; in consequence of which it decrees as follows:

Article 1st. Immediately after the publication of the present decree, the inhabitants of each of the French colonies in the Windward and Leeward Islands, shall proceed to the re-election of colonial and parochial assemblies, after the mode prescribed by the decree of the 8th of March 1790, and the instructions of the national assembly of the 28th of the same month.

2d. The people of colour and free negroes shall be admitted to vote in all the primary and electoral assemblies, and shall be eligible to the legislature and all places of trust, provided they possess the qualifications prescribed by the 4th article of the aforesaid instructions.

* The former assembly is generally known by the name of the *Constituent Assembly*. The new one met the 1st of October 1791, and called itself the *First Legislative Assembly*.

3d. Three civil commissioners shall be named for the colony of St. Domingo, and four for the islands of Martinico, Guadaloupe, St. Lucia, and Tobago, to see this decree enforced.

4th. The said commissioners shall be authorized to dissolve the present colonial assemblies; to take every measure necessary for accelerating the convocation of the primary and electoral assemblies, and therein to establish union, order, and peace: as well as to determine provisionally (reserving the power of appeal to the national assembly), upon every question which may arise concerning the regularity of convocations, the holding of assemblies, the form of elections, and the eligibility of citizens.

5th. They are also authorized to procure every information possible, in order to discover the authors of the troubles in St. Domingo, and the continuance thereof, if they still continue; to secure the persons of the guilty, and to send them over to France, there to be put in a state of accusation, &c.

6th. The said civil commissioners shall be directed for this purpose to transmit to the national assembly minutes of their proceedings, and of the evidence they may have collected concerning the persons accused as aforesaid.

7th. The national assembly authorizes the civil commissioners to call forth the public force whenever they may think it necessary, either for their own protection, or for the execution of such orders as they may issue by virtue of the preceding articles.

8th. The executive power is directed to send a sufficient force to the colonies, to be composed chiefly of national guards.

9th. The colonial assemblies, immediately after their formation, shall signify, in the name of each colony respectively, their sentiments respecting that constitution, those laws, and the administration of them, which will best promote the prosperity and happiness of the people; conforming themselves nevertheless to those general principles by which the colonies and mother country are connected together, and by which their respective interests are best secured, agreeably to the decree of the 8th of March 1790, and instructions of the 28th of the same month.

10th. The colonial assemblies are authorized to send home delegates for the purposes mentioned in the preceding article, in numbers proportionate to the population of each colony; which proportion shall be forthwith determined by the national assembly, according to the report which its colonial committee is directed to make.

11th. Former decrees respecting the colonies shall be in force in every thing not contrary to the present decree."

It may be supposed that the men, who (rejecting all pretensions to consistency, and despising the lessons of experience) first proposed this decree, and finally prevailed in carrying it through the legislative assembly, had duly considered of the means for ensuring its execution in the colonies, and were provided with fit

instruments for that purpose. The new commissioners nominated for St. Domingo were Messrs. Santhonax, Polverel, and Ailhaud, all of them among the most violent of the Jacobin faction; and it was resolved to furnish them with such a force, as (if properly employed) would, it was alleged, not only establish their authority, but put a speedy end to all the disturbances which had so long afflicted and desolated the colony. Six thousand men, selected with great circumspection, from the national guards, with officers whose principles were well known to their employers, were accordingly ordered to embark forthwith for St. Domingo. M. Blanchelande, the governor-general, was recalled, and a new commission of commander in chief given to a Mons. Desparbes.

Thus appointed, and provided, the civil commissioners and the new governor, accompanied by a fleet of thirty transports, took their departure from France in the month of July, probably in much the same disposition of mind towards the colonists, as was manifested by the Duke D'Alva and his Spanish and Italian troops in 1568 towards the inhabitants of the Low Countries. Inflamed like them with a spirit of avarice, fanaticism, and revenge, they meditated on nothing but on the benefits to arise from seizure and confiscation; on schemes of mischief and projects of vengeance.

They landed at Cape François on the 13th of September, and finding M. Blanchelande at great variance with the colonial assembly, the commissioners took the shortest course possible to terminate the dispute, by forthwith dissolving the assembly and sending the

unfortunate Blanchelande a state prisoner to France, where, as to be accused was to be condemned, he soon afterwards perished by the guillotine.*

Dismay and terror now prevailed throughout the colony. Delegates were sent to the civil commissioners from all quarters, to demand an exposure and explanation of their views and intentions. Suspicions were already gone forth concerning the project, which the commissioners afterwards avowed, of declaring a general emancipation of the negro slaves; and all parties, as well among the republicans as the royalists, concurred on this occasion, in reprobating the folly and iniquity of the measure. So general was the clamour on this account, that if a firm and extensive coalition of interests among the planters could at this time have been effected, it is probable the commissioners might have found, that all the force they had brought with them would have proved insufficient for the purposes which they meditated. Dissimulation therefore was thought necessary for the present. They declared (and confirmed the declaration with the solemnity of an oath), that they had no wish nor intention to make any change in the system of colonial government concerning the slaves; avowing the fullest conviction that the emancipation of those people, under the then existing circumstances, was impracticable.—Their views, they said, extended no farther than to see the decree of the 4th of April, in favour of the free people of colour, properly enforced; to reduce the slaves in rebellion to obedience, and to settle the future government and tranquillity of the colony on a solid and permanent foundation.

* 7th April 1793.

These, and similar declarations, silenced, though they did not satisfy the white inhabitants; who soon perceived, with unavailing indignation, that the commissioners held secret communications with the chiefs of the mulattoes in all parts of the colony. By the co-operation of those people, the commissioners soon found their strength sufficient to avow themselves, openly, the patrons and protectors of the whole body of the free negroes and mulattoes: and they now made no scruple of seizing the persons and effects of all such of the whites as opposed their projects; sending great numbers of them in a state of arrest to Europe, to answer before the national assembly to the accusations which they pretended to transmit against them. Among the persons thus imprisoned and transported to France, were comprehended the colonel, lieutenant-colonel, and many other officers of the Cape regiment.

The white inhabitants now called aloud for the election of a new colonial assembly, and hoped, that the necessity of levying taxes would induce the commissioners to issue orders for that purpose; but instead of complying with the public request, they substituted what was called *une commission intermediaire*, by nominating twelve persons, six of whom had been members of the last assembly, to act as a sort of legislative council; the other six were mulattoes. To this motley board, the commissioners delegated authority to raise money from the inhabitants; reserving to themselves, however, the right of appropriating and expending it, as they alone should think proper.

In the meanwhile, the new governor (Desparbes), began to manifest some signs of dissatisfaction and

impatience. He complained that he was considered as a mere cypher in the government, or rather as an instrument in the commissioners' hands. His complaints were answered by a resolution to arrest his person; and he avoided the fate of his predecessor, Mons. Blanchelande, only by a speedy flight from the colony.

Two members out of the six whites that composed a moiety of the *commission intermediaire*, met with similar treatment. They ventured to offer their opinion on a measure of finance, in opposition to that of M. Santhonax. The commissioners commended their frankness, and M. Santhonax invited them to a supper. The invitation was accepted; but at the hour appointed, they found themselves surrounded by a detachment of the military, which conveyed them to a very sorry entertainment in the hold of a ship, and there left them as state prisoners.*

The commissioners, in the next place, fell out among themselves; and Santhonax and Polverel determined to get quit of their associate Ailhaud. Prudently judging, however, that the public degradation of one of their own body would reflect some degree of ignominy on them all, they persuaded him to be content with a proportion of the common plunder, and silently quit the country. Ailhaud submitted with a good grace to what he could not avoid.

* To one of these gentlemen I am indebted for more valuable and extensive information than I have been able to collect through any other channel. In his voyage to Europe, the ship in which he was confined was (fortunately for him) captured by an English frigate, which brought him to England, where I had the happiness to render him some acceptable service.

By these, and other means, above all by the practice of bestowing largesses on the troops, and the acquisition of a desperate band of auxiliaries, composed of some of the revolted slaves, and vagabonds of all colours and descriptions, mostly collected from the jails, Santhonax and Poverel, in the beginning of the year 1793, found themselves absolute masters of the colony. The lives and properties of all the white inhabitants lay at their mercy, and the dreadful scenes which were at that time passing in the mother country, enabled these men to prosecute their purposes, and gratify their vindictive and avaricious passions without notice or control from any superior.

But the tragedy which was acting in France was no sooner brought to its catastrophe, by the foul murder of their amiable and unoffending sovereign, and war declared against Great Britain and Holland, than the persons who composed what was called the executive council, thought it necessary to pay some little attention to the safety of St. Domingo. Not having however leisure or inclination to enter into a full investigation of the complaints received from thence, they declined to revoke the powers exercised by the civil commissioners, and contented themselves with appointing a new governor, in the room of M. Desparbes. Their choice fell on Mons. Galbaud, an officer of artillery, and a man of fair character, whom they directed to embark for his new government without delay, in one of the national frigates, and put the colony into the best state of defence against a foreign enemy.

Galbaud, with his suite of attendants, landed at Cape François on the 7th of May, 1793, to the great joy of the white inhabitants. At that period, the civil commissioners, with most of their troops, were employed in the Western province, endeavouring to quell an insurrection there which their tyranny had created; so that Galbaud was received with acclamations and submission by the municipality of the town of the Cape; to whose place of meeting he repaired with his attendants, took the necessary oaths, and entered on his government without opposition. He declared, at the same time, that he was not dependant on the civil commissioners, nor bound to execute, at all events, their proclamations.

A very quick interchange of letters took place between the new governor and the commissioners. He desired them to repair immediately to the Cape; that he might communicate the instructions he had received from the executive council. They answered that he was an entire stranger to them; that they had seen no decree of the national convention by which they themselves were superseded, and that being vested with authority to suspend or appoint a governor, as they alone might think proper, he could only be considered as an agent subordinate to themselves:—They added, that they were then assembling an army to suppress a rebellion in the town and neighbourhood of Port au Prince; but as soon as that business was at an end, they would repair to the Cape, and examine into the validity of his pretensions.

On the 10th of June the civil commissioners, having reduced Port au Prince and Jacmel, arrived at

the Cape. The streets were lined with troops, and they were received by Galbaud with attention and respect. A very serious altercation, however, immediately took place between them, highly disadvantageous to the governor. There existed, it seems, a decree of the ancient government, unrepealed by the national assembly, enacting, that no proprietor of an estate in the West Indies should hold the government of a colony wherein his estate was situated, and M. Galbaud was possessed of a coffee-plantation in St. Domingo. When, therefore, he was asked why he had not acquainted the executive council with this circumstance, he was utterly disconcerted and had no reply to make.

On the 13th, the commissioners ordered M. Galbaud to embark forthwith on board the sloop of war *La Normande*, and return to France. At the same time they sent instructions to Mons. de la Salle, whom they had left commandant at Port au Prince, to repair to the Cape, and receive from them, in the name of the French republic, the command of the colony.

The seven following days were spent on both sides in intrigues, and preparations for hostilities. Galbaud's brother, a man of spirit and enterprise, had collected from among the inhabitants, the Cape militia, and the seamen in the harbour, a strong party to support the governor's authority. On the 20th, the two brothers landed at the head of one thousand two hundred sailors, and being joined by a considerable body of volunteers, immediately marched in array towards the government house, in which the com-

missioners were stationed. The latter were defended by the people of colour, a body of regulars, and one piece of cannon. The conflict was fierce and bloody. The volunteers manifested great firmness, but the seamen getting possession of a wine cellar, soon became intoxicated and ungovernable; and the column was obliged to retire to the royal arsenal, where they remained the ensuing night unmolested.

The next morning many skirmishes took place in the streets, with various success, in one of which Galbaud's brother was taken prisoner by the commissioners' troops; and in another, the seamen that were fighting on the part of Galbaud made captive Polverel's son; and now an extraordinary circumstance occurred. The governor sent a flag proposing that his brother might be exchanged for the commissioner's son; but Polverel rejected the proposal with indignation; declaring in answer, that his son knew his duty, and was prepared to die in the service of the republic.

But a scene now opens, which, if it does not obliterate, exceeds at least, all that has hitherto been related of factious anarchy, and savage cruelty, in this unfortunate colony. On the first approach of Galbaud with so large a body of seamen, the commissioners despatched agents to call into their assistance the revolted negroes; offering them an unconditional pardon for past offences, perfect freedom in future, and the plunder of the city. The rebel generals, *Jean Francois* and *Biasson*, rejected their offers; but on the 21st, about noon, (just after that Galbaud and most of his adherents, finding their cause hopeless, had retired to the ships, a negro chief called *Macaya*, with upwards

of three thousand of the revolted slaves, entered the town, and began an universal and indiscriminate slaughter of men, women, and children. The white inhabitants fled from all quarters to the sea-side, in hopes of finding shelter with the governor on board the ships in the harbour; but a body of the mulattoes cut off their retreat, and a horrid butchery ensued, which continued with unremitting fury from the 21st, to the evening of the 23d; when the savages, having murdered all the white inhabitants that fell in their way, set fire to the buildings; and more than half the city was consumed by the flames. The commissioners themselves, either terrified at beholding the lamentable and extensive mischief which they had occasioned, or afraid to trust their persons with their rebel allies, sought protection under cover of a ship of the line. The proclamations which they published from time to time in palliation of their conduct, manifest a consciousness of guilt which could not be suppressed, and form a record of their villanies, for which the day of retribution awaits, but still lingers to overtake them.*

Such was the fate of the once flourishing and beautiful capital of St. Domingo!—a city which, for trade, opulence, and magnificence, was undoubtedly among the first in the West Indies,—perhaps in the new world: and here I shall close for the present, the disgusting detail of conspiracies, rebellions, crimes, cruelties, and conflagrations (a uniformity of horrors!)

* When this was written, the author did not know that Santhonax alone survives. Polverel died in 1794. Santhonax has lately appeared before the national assembly, and been pronounced *guiltless*!

through which the nature of my work has compelled me to travel;—rejoicing that I have at last

Escap'd the Stygian pool, tho' long detain'd
In that obscure sojourn;—

MILTON.

And have the pleasing task to perform, of rendering due homage to the gallant and enterprising spirit of my countrymen in their noble—but alas! hitherto un-availing—endeavours to restore peace, subordination, and good government on this theatre of anarchy and bloodshed. Previous to which, however, it will be a relief and satisfaction to the reader, to be presented with a picture or state of the colony as it existed in the days of its prosperity;—its culture, population, and produce; its growing importance and commercial value. Hitherto, we have contemplated nothing but scenes of desolation.—We shall now behold a pleasing contrast in the blessings of regular government: due subordination, social order, extensive commerce, peaceful industry, increasing cultivation, smiling plenty, and general happiness! The conclusions to be drawn from the contemplation of scenes so different in their nature, are of importance to all mankind.

The Account given above of the Destruction of the City of Cape François, was drawn up with as much Caution as the Case seemed to require, from Information transmitted to the Author by Persons in Jamaica and St. Domingo, some of whom differed in many essential Circumstances from others. He had afterwards an Opportunity of conversing personally on the Subject with a Gentleman of St. Domin-

go, on whose Veracity and Honour he could place the fullest Dependence, by whom he was favoured with the following Notes or Memoranda in Writing, which he thinks best to lay before his Readers verbatim.

NOTES SUR L'ÉVÉNEMENT DU CAP.

LE General Galbaud avait mandé au Cap les commissaires Santhonax et Polverel, de la maniere la plus imperieuse; les commissaires se sont déterminés a s'y rendre par terre de S. Marc, d'où ils sont partis le 8 Juin, accompagnés de 400 mulâtres et 200 blancs, et compris leurs coupe tête les dragons d'Orleans. Ils ont fait leur entrée au Cap d'une maniere assez audacieuse pour en imposer.

Galbaud avait deja indisposé les habitans du Cap par une adresse, ou proclamation, qui ordonnait une contribution de 450 mille livres, dont la perception a été faite de la façon la plus violente, et qui tenait plus du pillage que d'une contribution.

Le General Galbaud n'avait fait aucune disposition pour se preserver des resolutions et des entreprises des commissaires, qui entrèrent cependant d'une maniere menaçante.

A la premiere entrevue des General Galbaud et des commissaires, en la maison de la commission (le gouvernement) apres les premiers complimens, il y eut explication sur les pouvoirs du general; les commissaires lui opposerent un decret qui defendait qu'aucun propriétaire dans la colonie pût y commander ni y avoir d'autorité; et accuserent M. Galbaud d'avoir dissimulé au conseil executif qu'il avait des propriétés.

Pendant ce demêlé, qui dura près de deux jours, les agents des commissaires préparaient les esprits a les laisser faire, et a ne point se mêler de la discussion, dans laquelle Santhonax prenait cependant une grande preponderance.

Galbaud, voyant que personne ne s'empressait a le soutenir, et prevoyant sans doute une chute humiliante, demanda aux commissaires de s'en retourner en France, préférant la retraite, a des pouvoirs contestés; ce qui lui fut accordé sur le champ, et il s'embarqua le 14.

Le 17 Galbaud réunit tous les matelots de la rade et ceux des vaisseaux de guerre, et projette de descendre à la ville du Cap; il fait son débarquement le 18, et marche au gouvernement, où logeaient les commissaires, qui instruits des mouvemens de Galbaud, réunirent les troupes qui leurs étaient dévouées, et particulièrement les mulâtres, et les embusquerent derrière les murs du gouvernement, dans toutes les issues, sur les terrasses, &c. Aussitôt que les matelots furent à portée de pistolet, on fit des décharges, qui en tuèrent et blessèrent un grand nombre, néanmoins les mulâtres furent ébranlés deux fois; mais le désordre dans les matelots détermina le General Galbaud à faire sa retraite à l'arsenal; là, il fit une proclamation pour inviter les bons citoyens à se réunir à lui, pour chasser les commissaires, qui voulaient usurper le gouvernement. Dès-lors les commissaires réunirent aux mulâtres tous les nègres de la ville, qui avaient déjà pris parti dans l'action en assassinant dans la ville, toutes les troupes qui leurs avaient servis à leur expedition, et les placèrent par pelotons à chaque coin des rues, et dès qu'un blanc voulait sortir de chez lui, ou paraissait aux fenêtres, il était fusillé.

Pendant ce tems; et dès que les commissaires eurent appris les mouvemens de Galbaud, ils avaient depeché des exprès aux chefs des brigands, pour les engager à venir à leur secours, et leurs offraient le pillage de la ville.

Le 19 Galbaud capitule à l'arsenal, et se rend abord: il y est mis en état d'arrestation, ainsi que l'Amiral Cambis, et le Contre-Amiral Sercey, qui sont dépouillés de leur commandement.

Une proclamation des commissaires avait précédemment à cet événement, mis à contribution 37 negociants, ou riches particuliers, pour une somme de 675 mille livres, qui paraît avoir été exigée et payée sur l'heure. Le 19, au soir, le 20, le 21, les brigands entrent de toutes parts dans la ville du Cap, ayant à leur tête leurs chefs, et on assure que M. de Grasse s'y est trouvé aussi. Le pillage, les massacres, les flammes deviennent effroyables; les hommes, les femmes, les enfans sont assassinés, massacrés, et éprouvent toutes les horreurs imaginables. Ils ont eu la barbarie de renfermer et de brûler dans une maison plus de 300 personnes toutes vives.

Les malheureux de tout sexe, de tout âge, qui cherchaient à se sauver en gagnant des embarcations, où à la nage, étaient fusillés même dans l'eau.

Il paraît que dans le massacre les nègres ont frappés indistinctement tous les partis, blancs, mulâtres, et que les blancs se sont défendus contre tous avec un grand acharnement ; néanmoins il paraît certain, que la population blanche a été entièrement détruite, et qu'il n'a pas resté un seul blanc au Cap ; on estime, que, s'il s'est sauvé 12 à 1500 personnes abord, c'est plus qu'on n'ose l'espérer.

Le convoi est sorti du Cap le 23 pour l'Amerique, la majeure partie ayant très peu de vivres, très peu d'eau, et plusieurs sans être préparés à ce voyage, sans mats ni voiles, & ceux qui ont reçu les malheureux qui se sont sauvés abord, n'y auront trouvé aucune subsistance.

La ville incendiée, détruite, ses habitans massacrés, on assure qu'il ne reste que le gouvernement, une partie des casernes, l'arsenal, et les maisons du Petit Carenage ;—l'église et les fontaines détruites.

Les commissaires ont resté spectateurs tranquilles pendant le carnage et le massacre ; dans leur maison on a vu Santhonax serrer et presser dans ses bras les chefs des brigands, les appeller ses sauveurs, et leur témoigner sa reconnaissance.

Le 23 proclamation des commissaires, qui invite et appelle tous les bons citoyens à se réunir autour d'eux, et de laisser partir les scélérats, qui vont aller subir le juste chatiment de leurs crimes ; le convoi est parti le jour même, & la ville fumait encore.

CHAPTER IX.

Situation, Extent, and general Description of St. Domingo—Origin of the French Colony, and Topographical Description of the several Provinces into which the French Possessions were divided—Their Population, and Produce—Shipping and Exports—Compared with the Returns of Jamaica.

THE island of St. Domingo is situated in the Atlantic Ocean, about three thousand five hundred miles from the lands's end of England; the eastern point lying in north latitude $18^{\circ} 20'$, and in longitude $68^{\circ} 40'$ W. from Greenwich. The island extends about one hundred and forty miles in the broadest part, from north to south, and three hundred and ninety from east to west. In a country of such magnitude, diversified with plains of vast extent, and mountains of prodigious height, is probably to be found every species of soil which nature has assigned to all the tropical parts of the earth. In general, it is fertile in the highest degree; every where well watered, and producing almost every variety of vegetable nature, for use and beauty, for food and luxury, which the lavish hand of a bountiful Providence has bestowed on the richest portion of the globe; and the liberality of nature was laudably seconded by the industry of the inhabitants. Until those ravages and devastations which I have had the painful task of recording, deformed and destroyed, with undistinguishing barbarity,

both the bounties of nature, and the labours of art; the possessions of France in this noble island were considered as the garden of the West Indies; and for beautiful scenery, richness of soil, salubrity and variety of climate, might justly be deemed *the Paradise of the New World*.

Of the territories which remained exclusively in possession of the original conquerors, the Spaniards, my information is very imperfect. I shall hereafter give the best account I have been able to collect concerning them. On the southern coast, more especially in the neighbourhood of the ancient city from which the island derives its present name, the lands are said to be among the best, and without doubt, a very large proportion of the remainder requires only the hand of the cultivator to become very productive. The interior country contains extensive savannahs, or plains, many of them occupied only by wild swine, horses, and horned cattle; for the Spaniards having exterminated the simple and unoffending natives, supplied their place with herds of domestic animals, which running wild, soon multiplied beyond computation. Thus does the tyranny of man convert the fruitful habitations of his fellow-creatures into a wilderness for beasts! In the present case, however, the crime brought down its own punishment;—a punishment which almost revenged the wrongs of the helpless Americans;—and who does not wish that avarice, ambition, and cruelty, may be thus always entangled in their own projects?

The reader is doubtless apprized that I here allude to the establishment in St. Domingo, of that daring

and desperate band of adventurers, the *Bucaniers*;—an association constituted of men of all countries and descriptions, but of whom it may truly be said, that if self-preservation be a law of nature, the hostilities which they maintained for upwards of fifty years against their oppressors, were more justifiable and legitimate in their origin, than all the wars which the pride and ambition of kings and nations have occasioned, from the beginning of the world to the present hour. As the cruelty of the Spaniards first compelled these men, from a sense of common danger, to unite their strength, so the blind policy of stocking with cattle a country of such extent, became their support; for the flesh of those animals supplied them with food, and they purchased arms, ammunition and clothing with the skins.

Of the rise of these people, and the primary cause of their combining together to make reprisals on the Spanish settlements, a short account may be necessary: I have elsewhere treated the subject more at large.*—They consisted originally of a body of French and English planters, whom, in the year 1629, a Spanish armament had expelled from the island of St. Christopher, with circumstances of outrageous barbarity. Driven from thence, by a force which they could not resist, as the only alternative of escaping from slaughter or slavery, they fled in open boats with their families, and possessed themselves of the small unoccupied island of *Tortuga*, situated within a few miles of the northern coast of St. Domingo. Here they were joined by a considerable number of Dutch

* Vol. I. Book ii. C. 2.

emigrants from *Santa Cruz*, whom the avarice and cruelty of the Spaniards had compelled, in like manner, to roam over the ocean for shelter, after having witnessed the massacre of many of their number, even to the women and children. Companions in adversity, these poor exiles learnt mutual forbearance from their common sufferings; for, although they were composed of three different nations, they appeared to have lived for some years in perfect harmony with each other. Their mode of life contributed to produce the same beneficial effect: finding a country of immeasurable extent in their neighbourhood abounding in cattle, their time was chiefly occupied in hunting; an employment which left no leisure for dissention, and afforded them both exercise and food. The plains of St. Domingo were considered, however, merely as their hunting grounds: Tortuga continued their home, and place of retreat. Here their women and young people cultivated small plantations of tobacco, (an herb, of which, in hot and moist climates, the practice of inhaling the smoke, seems to be pointed out by nature); and as the coast was rugged, and of difficult approach, they fondly hoped that their obscurity would protect them from further persecution.

If the government of Spain had been actuated at this time by motives of wisdom, it would indeed have left these poor people to range over the wilderness unmolested. It ought to have known, that the occupation of hunting diverted them from projects of vengeance, and deeds of greater enterprize; but tyranny is without foresight, and the restless and remorseless bigotry of the Spanish nation allowed the fugitives no respite. An armament was collected,

and preparations made to effect their utter extermination; the commanders of which, taking occasion when the ablest of the men had resorted to the larger island in their usual pursuit, landed a body of soldiers at Tortuga, and making captives of the women and children, the old and infirm, caused them all to be massacred without mercy.

It does not appear, that the miserable people who were thus pursued to destruction like beasts of prey, had been guilty of any outrages or depredations on the ships or subjects of Spain, which called for such exemplary vengeance. Neither was it imputed to them as a crime that they had possessed themselves of Tortuga, or that they roamed about the deserts of St. Domingo in pursuit of cattle which had no owners. Their guilt consisted in the circumstance of being born out of the Spanish territories, and presuming, nevertheless, to venture into any part of the New World; for the arrogant presumption and extravagant selfishness of this bigotted nation, led them to appropriate all the countries of America to themselves. They claimed even the sole and exclusive right of sailing on any such part of the main ocean as, in their judgment, constituted a portion of the newly discovered hemisphere; and strict orders were issued to all their commanders, by sea and land, to seize the ships and subjects of all other people that should be found within the boundaries which they had prescribed, and to punish the intruders with slavery or death.—We have seen in what manner those orders were executed.

It is evident, therefore, that no alternative remained to the occupiers of Tortuga, but to turn on their pur-

suers, and wage offensive war on those who would allow of no peace with them. If the justice of their cause be still a question, let the records of time be consulted; let an appeal be made to that rule of conduct, which (to use an eloquent expression of Lord Coke) *is written by the finger of God on the heart of man*; and let history and reason determine, whether any instance of hostility, in the annals of mankind, can be defended on better grounds. To such men, in such a cause, no dangers were too formidable, no obstacles too great. Inured by their mode of life, to the vicissitudes of the climate, united among themselves, and animated by all the motives and passions which can inflame the human mind to great exertion, they became the most formidable antagonists which the Spaniards had ever encountered, and displayed such deeds of valour and successful enterprize, as (all circumstances considered) have never been equalled before or since.

From a party of these adventurers, (chiefly natives of Normandy), the French colony in St. Domingo derived its origin. By what means they were induced to separate from their associates in danger, to relinquish the gratification of revenge and avarice, and exchange the tumults of war for the temperate occupations of husbandry, it is neither within my province nor ability to explain. Many of them, without doubt, were men who had been driven from Europe by indigent circumstances and desperate fortunes; some, by the cruelty of creditors; and others, perhaps by the consciousness of their crimes. Captivated by the renown, and allured by the wealth of the Bucaniers, they joined in their expeditions against the Spaniards

from no better motives than those of plunder and rapine; and to such men must be imputed those outrages and excesses which have stamped the proceedings of the whole association with infamy.* But there is a time for all things; and the change of life in these men confirms the observation of an elegant writer, that “as there is no soil which will not shew itself

* I conceive, however, that these have been wonderfully magnified and exaggerated. The narrative called *The History of the Bucaniers*, published toward the latter end of the last century, which has been quoted by writers of all descriptions ever since as of unquestionable authority, was originally written in Dutch, by one John Esquemeling, who confesses that he had been one of the Bucaniers, and was expelled from their society. The reports of such a writer ought to have been received with great caution; but there is a still stronger circumstance to excite suspicion; and it is this: The English work is not taken from the Dutch original, but from a *Spanish translation*; and to suppose that a Spaniard would speak favourably of the Bucaniers is the very excess of human credulity. Not having the original book to refer to, I cannot pronounce with certainty; but I am of opinion, that many of the tragical stories concerning the torture of the Spanish prisoners, and the violation of the women, are interpolations of the Spanish translator. I form this conclusion from the malignity displayed towards the character of the famous Sir Henry Morgan. If we may believe the account given of this gallant commander, he was the most inhuman monster that ever existed. Yet this very man, (who by the way acted under a regular commission and letters of reprisal from government), after he had quitted the sea, was recommended by the earl of Carlisle to be his successor in the government of Jamaica, and was accordingly appointed lieutenant-governor in the earl's absence. He afterwards received the honour of knighthood from King Charles II. and passed the remainder of his life on his plantation in Jamaica. By the kindness of a friend in that island, I have had an opportunity of perusing some of Sir Henry Morgan's original private letters; and this I will say, that they manifest such a spirit of humanity, justice, liberality, and piety, as prove that he has either been grossly traduced, or that he was the greatest hypocrite living;—a character ill-suited to the frank and fearless temper of the man.

“grateful to culture, so there is no disposition, no character in mankind, which may not, by dexterous management, be turned to the public advantage.”† It was a happy circumstance in the infancy of their establishment, that while they were too obscure for the notice of the government, they had no check given to their industry by the chill influence of poverty. To a fortunate exemption from the hand of power, and the facility with which they were supplied with the common necessities of life, they were indebted for their preservation and prosperity. A mediocrity of condition, and equal freedom, excited the spirit of emulation among them; but oppression would have produced discouragement; and sloth, not industry, is the offspring of wretchedness.

Of the progressive pursuits of these people in extending the footing which they had obtained, until the French government accepted their submission, acknowledged them as faithful subjects, and availed itself of their labours,—and the final cession to France of the Western part of St. Domingo, by the peace of Ryswick, the reader will find an ample account in the history of this island by Pere Charlevoix. It is therefore unnecessary for me to detail what an author so well informed in the ancient transactions of the colony, has written. All that my English reader will expect, is an account of the political and topographical state of the colony; its population, produce, and exports at the time my History commences; and these particulars will be found in what remains of the present Chapter.

† European Settlements, Vol. II. p. 109.

The possessions of the French in St. Domingo, as I have elsewhere observed, were divided into three great departments, called the Northern, the Western, and the Southern Provinces. The Northern Province comprehended a line of sea-coast extending about forty leagues, from the river Massacre, to Cape St. Nicholas, and contained (including Tortuga) twenty-six parishes. Its population, in the beginning of 1790, consisted of 11,996 white inhabitants of all ages, and 164,656 negro slaves. The number of sugar plantations was 288, of which 258 made what is called *clayed*, or soft white sugar, and 30 *muscovado*, or raw sugar. It reckoned 2,009 plantations of coffee, 66 of cotton, 443 of indigo, and 215 smaller establishments, such as provision-grounds, cacao-groves, tan-pits, potteries, brick-kilns, &c.

Of the towns and harbours in the Northern Province, the chief were those of Cape François, Fort Dauphin, Port De Paix, and Cape St. Nicholas. I shall treat only of the first and the last.

The town of Cape François (which in time of war was the seat of the French government) would have ranked, for beauty and regularity, among the cities of the second class in any part of Europe. It consisted of between eight and nine hundred houses of stone and brick, many of them handsome and commodious, besides shops and warehouses; and it contained two magnificent squares, ornamented each with a public fountain. The chief public buildings were the church; the government-house (formerly a convent belonging to the Jesuits); a superb barrack for troops; a royal arsenal; a prison; a play-house; and two hospitals. The

number of free inhabitants of all colours, was estimated at eight thousand, exclusive of the king's troops and sea-faring people. The domestic slaves were said to be about twelve thousand. The situation of the town, however, was not to be commended. It was built at the foot of a very high mountain, called *Le Morne du Cap*, which abounds indeed with springs of excellent water, and furnished a great supply of garden vegetables, but it intercepted the land-wind, and reverberated the rays of the sun. The town arose to opulence chiefly from the commodiousness of its harbour, and the extreme fertility of the plain adjoining it to the east, a district fifty miles in length, and twelve in breadth, appropriated solely to the cultivation of sugar, (the plantations of which were divided from each other only by hedges of citrons and limes), and yielding greater returns than perhaps any other spot of the same extent in the habitable globe.

The town of Cape St. Nicholas consists of about 250 houses, which are chiefly built of American wood. It is sheltered by a high bluff, called the *Mole*; and having been a free-port, was a place of considerable trade, and particularly resorted to by the ships of America. It is chiefly known, however, for the safety and extent of its harbour, which is justly called the key of the Windward passage; and the fortifications towards the sea are reckoned among the strongest in the West Indies. On the side of the land they are overlooked by the surrounding heights, and hence it is concluded, that although it might be difficult to take the place by an invading armament, it would be still more difficult to retain it afterwards, unless possession was obtained also of the interior country.

The Western Province began at Cape St. Nicholas, and extending along the line of coast which forms the bight of Leogane, for upwards of one hundred leagues, terminated at Cape Tiburon. It contained sixteen parishes, and four chief towns, namely, Port au Prince, St. Marc, Leogane, and Petit Goave; besides villages, of which those of Gonaives, Arcahaye, and Croix des Bouquets, are not inconsiderable. The only good harbours in this great extent of coast are those of Port au Prince and Gonaives. All the other shipping-places are open roads, sometimes much exposed.

Port au Prince (except in time of war, when the Governor-General was directed to remove to Cape François) was considered as the metropolis of the colony. In 1790 it consisted of about 600 houses, and contained 2,754 white inhabitants.* The situation is low and marshy, and the climate, in consequence, very unhealthy. It is surrounded moreover by hills, which command both the town and the harbour; but both the hills and the vallies are abundantly fertile. To the east is situated the noble plain of Cul de Sac, extending from thirty to forty miles in length by nine in breadth, and it contained one hundred and fifty sugar-plantations, most of which were capable of being watered in times of drought, by canals admirably contrived and disposed for that purpose. The circumjacent mountains were at the same time clothed with plantations of coffee, which extended quite to the Spanish settlements.

* The free people of colour were estimated at 4,000, and the enslaved negroes at about 8,000; but being comprehended in the general return for the whole district, they are no where ascertained with precision.

The population and state of agriculture in the Western Province were as follow: white inhabitants of all ages 12,798; negroes in a state of slavery 192,961; plantations of clayed sugar 135, of muscovado 222. Plantations of coffee 894, of cotton 489, of indigo 1,952, besides 343 smaller settlements.

The Southern Province, extending upwards of sixty leagues from Cape Tiburon, along the southern coast of the island to L'Ance a Pitre, contained twelve parishes, and three chief towns, Les Cayes, Jeremie, and Jacmel; places of which I shall hereafter have occasion to speak. It possesses no safe harbours, and its roads are dangerous. The shipping that load at Les Cayes take refuge, during the hurricane season, at La Baye des Flamands,

The population in this department was composed of 6,037 whites, and 76,812 negro slaves. Its establishments consisted of 38 plantations of white sugar, and 110 of muscovado; 214 coffee-plantations, 234 of cotton, 765 of indigo, and 119 smaller settlements.

The quantity of land in cultivation throughout all the parishes was 763,923 carreaux,* equal to 2,289,480

* The carreau of land in St. Domingo is 100 paces square, of $3\frac{1}{2}$ French feet each; the superficies 122,500 feet. The Paris foot is divided into twelve inches, and each into twelve lines; wherefore, if we suppose each line to be divided into 310 parts, the Paris foot will be 1440 parts, the London 1350. These proportions were settled by the Royal Academy of Sciences. The Jamaica acre contains 43,560 English feet superficial measure; which being multiplied by 1,350, and the total divided by 1,440, gives $40,837\frac{1}{2}$, or about one-third part of the carreau of St. Domingo.

English acres, of which about two-thirds were situated in the mountains; and that the reader may have a state of the agriculture at one view, I shall subjoin a summary of the preceding accounts, from whence it will appear that the French colony contained, the beginning of 1790,

431	plantations of clayed sugar,
362	- - - of muscovado.

Total 793 plantations of sugar,

3,117	- - of coffee,
789	- - of cotton,
3,160	- - of indigo,
54	- - of cacao, or chocolate,
623	smaller settlements, chiefly for raising grain, yams, and other vegetable food.

Making 8,536 establishments of all kinds throughout the colony.

The population in 1790, on a like summary, appears to have been 30,831 whites of both sexes and all ages (exclusive of European troops and sea-faring people), and 434,429 negro slaves. In this account, however, the domestic slaves, and negro mechanics employed in the several towns, are not comprehended. They amounted to about 46,000, which made the number of negro slaves throughout the colony 480,000.

Of the free people of colour, no very accurate account was obtained. Mons. Marbois, the intendant,

reported them in 1787 at about 20,000. In 1790, the general opinion fixed them at 24,000.

The exterior appearance of the colony, as I have observed in another place, every where demonstrated great and increasing prosperity. Cultivation was making rapid advances over the country. The towns abounded in warehouses, which were filled with the richest commodities and productions of Europe, and the harbours were crowded with shipping. There were freighted in 1787, for Europe alone, 470 ships, containing 112,253 tons, and navigated by 11,220 seamen. Many of them were vessels of very large burden; and the following is an accurate account, from the intendant's return, of the general exports, on an average of the years 1787, 1788, and 1789; viz.

AVERAGE EXPORTS FROM THE FRENCH PART OF
ST. DOMINGO, BEFORE THE REVOLUTION.

		Livres.
Clayed sugar lbs.	58,642,214 . .	41,049,549
Muscovado sugar	86,549,829 . .	34,619,931
Coffee	71,663,187 . .	71,663,187
Cotton	6,698,858 . .	12,397,716
Indigo hhds.	951,607 . .	8,564,463
Mellasses	23,061 . .	2,767,320
An inferior sort of rum, called taffia }	2,600 . .	312,000
Raw hides N°	6,500 . .	52,000
Tanned ditto N°	7,900 . .	118,500

The total value at the ports of shipping, in livres of St. Domingo, was } 171,544,666

being equal to £4,956,780 sterling money of Great Britain; and if all the smuggled articles were added, together with the value of mahogany and other woods, the whole amount would probably exceed five millions of pounds sterling.*

If this statement be compared by the rule of proportion with the exports from Jamaica, the result will be considerably in favour of St. Domingo, *i. e.* it will be found that the planters of Jamaica receive smaller returns from the labours of their negroes, in proportion to their numbers, than the planters of St. Domingo have received from theirs. For this difference various causes have been assigned, and advantages allowed, and qualities ascribed to the French planters, which I venture to pronounce, on full inquiry, had no existence. The true cause arose, undoubtedly, from the superior fertility of the soil, and the prodigious benefit which resulted to the French planters from the system of watering their sugar-lands in extreme dry weather. This is an advantage which nature has denied to the lands in Jamaica, except in a very few places; but has freely bestowed on many parts of St. Domingo; and the planters there availed themselves of it with the happiest success.†

* Vide Appendix, Table No. 2, from whence it will appear that the exports for 1793, greatly exceeded the average above given, both in quantities and value.

† Having made diligent inquiry into the average produce of the French sugar-lands in St. Domingo, while on the spot, I venture to give the following estimate, as nearly founded in truth as the subject will admit.

In the North, the districts of Ounaminthe, Maribaroux, and Quartier Dauphin, generally yielded from six to seven thousand pounds

And such, in the days of its prosperity, was the French colony in the island of St. Domingo. I have now presented to my readers both sides of the medal. To Great Britain, above all other nations of the earth, the facts which I have related, may furnish an important lesson; and it is such a one as requires no comment!

weight of muscovado sugar for each carreau in canes; the average is

Jaquizi	6,500	
Limonade	7,000	
Quartier Morin	9,000	
Plaine du Nord, Limbé, Petite Anse	6,000	
	5,000	
		33,500

The average of the whole is 6,700 lbs. each carreau.—

This part of St. Domingo was not watered.

In the West—St. Marc, L'Artibonite, and Gonaives, each carreau yielded	8,500	
Vazes, Arcahayé, Boucassin	10,000	
Cul de Sac	9,000	
Leogane.	6,500	
		34,000

The average is 8,500 lbs. the carreau.—All these districts were watered.

In the South—the districts of Grand Goave, Les Cayes, Plaine du Fond, L'Islet, &c. which likewise were watered, yielded . . . 7,500

The general average, on the whole, is 7,500 lbs. from each carreau in canes; to which add $8\frac{1}{2}$ per cent. for the difference between the English and French weights, the total is 8,137 lbs. for every three acres English, or 2,712 lbs. per acre; being nearly two-thirds more than the general yielding of all the land in canes throughout Jamaica.

CHAPTER X.

Emigrations—Overtures to the British Government accepted—Situation and Strength of the Republican Party in St. Domingo, and Disposition of the Inhabitants—Negro Slavery abolished by the French Commissioners—Armament allotted for the Invasion of the Country—Surrender of Jeremie and the Mole at Cape St. Nicholas—Unsuccessful Attempt on Cape Tiburon—Further Proceedings of the British Army until the Arrival of General Whyte—Capture of Port au Prince.

THE destruction of the beautiful city of Cape François, and the massacre of most of the white inhabitants, were the sad events which terminated our historical detail at the close of the eighth Chapter. It was observed, however, that M. Galbaud and his partisans, among whom were comprehended many respectable families, had fortunately embarked on board the ships in the harbour, just before the revolted negroes entered the town. Happy to fly from a country devoted to ruin, they directed their course to the United States of North America; and to the honour of the human character (debased as we have beheld it in other situations), they found there, what great numbers of their unhappy fellow-citizens had found before them, a refuge from the reach of persecution, and an asylum from the pressure of poverty.

Emigrations from all parts of St. Domingo had indeed prevailed to a very great extent, ever since the revolt of the negroes in the Northern province. Many of the planters had removed with their families to the neighbouring islands: some of them had taken refuge in Jamaica; and it was supposed that not less than ten thousand had transported themselves, at various times, to different parts of the continent of America. Most of these were persons of peaceable tempers, who sought only to procure the mere necessities of life in safety and quiet. The principal among the planters, having other objects in view, had repaired to Great Britain. It is a circumstance within my own knowledge, that so early as the latter end of 1791, (long before the commencement of hostilities between France and England), many of them had made application to the King's ministers, requesting that an armament might be sent to take possession of the country for the King of Great Britain, and receive the allegiance of the inhabitants. They asserted (—I am afraid with much greater confidence than truth—) that all classes of the whites wished to place themselves under the English dominion, and that, on the first appearance of a British squadron, the colony would surrender without a struggle. To these representations no attention was at that time given; but at length, after the national assembly had thought proper to declare war against Great Britain, the English ministry began to listen, with some degree of complacency, to the overtures which were again made to them, to the same effect, by the planters of St. Domingo. In the summer of 1793, a M. Charmilly (one of those planters) was furnished with despatches from the

secretary of state to General Williamson, the lieutenant-governor and commander in chief of Jamaica, signifying the king's pleasure, (with allowance of great latitude however to the governor's discretion), that he should accept terms of capitulation from the inhabitants of such parts of St. Domingo as solicited the protection of the British government; and for that purpose the governor was authorised to detach, from the troops under his command in Jamaica, such a force as should be thought sufficient to take and retain possession of all the places that might be surrendered, until reinforcements should arrive from England. M. Charmilly, having thus delivered the orders and instructions with which he was intrusted, sent an agent without delay to *Jeremie*,* a small port and town in the district of *Grand Ance*, to which he belonged, to prepare the loyal inhabitants for a visit from their new allies and protectors the English.

But, before we proceed to detail the operations which followed this determination of the British cabinet, it seems necessary, as well for the satisfaction of the reader, as in justice to the gallantry and good conduct of the officers and men who were afterwards sent to St. Domingo, that some account should be given of the difficulties which were to arise, and the force that was to be encountered in this attempt to annex so great and valuable a colony to the British dominion. I am well apprized that I am here treading on tender ground; but if it shall appear, as unhappily it will, that the persons at whose instance and entreaty the project was adopted, either meant

* It is situated just within the Bight of *Leogane*,

to deceive, or were themselves grossly deceived, in the representations which they had made to the English government on this occasion, it is my province and my duty to place the failure which ensued to its proper account. The historian who, in such cases, from fear, favour, or affection, suppresses the communication of facts, is hardly less culpable than the factious or venal writer, who sacrifices the interests of truth and the dignity of history, to the prejudices of party.

The republican commissioners, as the reader has been informed, had brought with them from France six thousand chosen troops; which, added to the national force already in the colony, and the militia of the country, constituted a body of fourteen or fifteen thousand effective men; to whom were joined a motley but desperate band of all complexions and descriptions, chiefly slaves which had deserted from their owners, and negroes collected from the jails. All these, amounting in the whole to about twenty-two thousand effectives, were brought into some degree of order and discipline; were well armed, and, what is of infinite importance, were, in a considerable degree, inured to the climate.* Being necessarily dispersed,

* The following detail was given me by a member of the colonial assembly.

<i>"Troops in St. Domingo on the arrival of Santhonax and Polverel, viz."</i>	
Troops of the line which arrived with the commissioners . . .	6,000
The regiment of Cape Francois	700
The regiments of Artois and Normandy	1,000
Stipendary troops enlisted and paid for by the colony	1,200
The colonial militia, including free people of colour	7,000
	<hr/>
	15,900
Black companies raised by the authority of the commissioners .	6,000
	<hr/>
Total .	21,900

however, in detachments throughout the different provinces, they were become on that account less formidable to an invading enemy. Aware of this circumstance, the commissioners, on the first intimation of an attack from the English, resorted to the most desperate expedient to strengthen their party, that imagination can conceive. They declared by proclamation all manner of slavery abolished, and pronounced the negro slaves to be from thenceforward a free people, on condition of resorting to their standard. From this moment it might have been foreseen that the colony was lost to Europe; for though but few of the negroes, in proportion to the whole, joined the commissioners, many thousands choosing to continue slaves as they were, and participate in the fortunes of their masters, yet vast numbers in all parts of the colony (apprehensive, probably, that this offer of liberty was too great a favour to be permanent), availed themselves of it to secure a retreat to the mountains, and possess themselves of the natural fastnesses which the interior country affords. Successive bodies have since joined them, and have established themselves, in those recesses, into a sort of savage republic, like that of the black Charaibes of St. Vincent, where they subsist on the spontaneous fruits of the earth, and the wild cattle which they procure by hunting; prudently declining offensive war, and trusting their safety to the rocky fortresses which nature has raised around them, and from which, in my opinion, it will be no easy undertaking to dislodge them.*

* The proclamation alluded to, was issued at Port au Prince the latter end of August, and was signed by Polverel alone, Santhonax being at that time in the Northern province. It begins by declaring, that neither himself nor Santhonax are recalled or disgraced. That, in order to en-

Of the revolted negroes in the Northern province, many had perished of disease and famine; but a desperate band, amounting as it was supposed to upwards of 40,000, inured to war, and practised in devastation and murder, still continued in arms. These were ready to pour down, as occasion might offer, on all nations alike; and instead of joining the English on their landing, would rejoice to sacrifice both the victors and the vanquished, the invaders and the invaded, in one common destruction.

Concerning the white proprietors, on whom alone our dependance was placed, a large proportion, as we have seen, perhaps more than nine-tenths of the whole, had quitted the country. Of those that remained, *some* there were, undoubtedly, who sincerely wished for the restoration of order, and the blessings of regular government; but the greater part were persons of a different character: they were desperate adven-

courage the negro slaves to assist in opposing the meditated invasion of the English, all manner of slavery is abolished; and the negroes are thenceforward to consider themselves as free citizens. It then expatiates upon the necessity of labour, and tells the negroes that they must engage to work as usual, from year to year; but that they are at liberty to make choice of their respective masters. That one-third of the crop shall be appropriated annually to the purchase of clothing and provisions for their maintenance; and that in the month of September in each year they are at liberty to make a new choice, or to confirm that of the preceding year. Such, to the best of my remembrance, (for I speak from memory), are the chief provisions of this celebrated proclamation, which I think extended only to the Western and Southern provinces; Santhonnax being empowered to make what other regulations he might think proper for the Northern province. The whole appears to have been a matchless piece of absurdity; betraying a lamentable degree of ignorance concerning the manners and dispositions of the negroes, and totally impracticable in itself.

turers who had nothing to lose, and every thing to gain, by confusion and anarchy: not a few of them had obtained possession of the effects and estates of absent proprietors. From people of this stamp, the most determined opposition was necessarily to be expected; and unfortunately, among those of better principle, I am afraid but a very small number were cordially attached to the English. The majority seem to have had nothing in view but to obtain by any means the restoration of their estates and possessions. Many of them, under their ancient government, had belonged to the lower order of *noblesse*, and being tenacious of titles and honours, in proportion as their pretensions to real distinction were disputable; they dreaded the introduction of a system of laws and government, which would reduce them to the general level of the community. Thus, as their motives were selfish, and their attachment feeble, their exertions in the common cause were not likely to be very strenuous or efficacious. I do not find that the number of French in arms, who joined us at any one period, (I mean of white inhabitants), ever exceeded two thousand. It were unjust, however, not to observe, that among them were some distinguished individuals, whose fidelity was above suspicion, and whose services were highly important.*

* A few men of colour also distinguished themselves in the common cause; viz. Monsieur *Le Point*, Lieutenant-colonel of the St. Marc's legion, who, with about 300 Mulattoes under his command, kept the parish of L'Archaye in complete subjection for a considerable time. 2. *Beucquet*, Major of the *Milice Royale* of Varettes, a person much attached to the English. 3. *Charles Savery*, who commanded a very important post in the plain of Artibonite, upon the river D'Esterre. Great confidence was placed in this man by Colonel Brisbane, and it was never

From this recapitulation it is evident, that the invasion of St. Domingo was an enterprize of greater magnitude and difficulty than the British government seem to have imagined. Considering the extent and natural strength of the country, it may well be doubted, whether all the force which Great Britain could have spared, would have been sufficient to reduce it to subjection, and restore it at the same time to such a degree of order and subordination, as to make it a colony worth holding. The truth seems to have been, that General Williamson, to whom, as hath been observed, the direction and distribution of the armament was intrusted, and whose active zeal in the service of his country was eminently conspicuous, was deceived, equally with the King's ministers, by the favourable accounts and exaggerated representations of sanguine and interested individuals, concerning the disposition of their countrymen, the white planters remaining in St. Domingo. Instead of the few hundreds of them which afterwards resorted to the British standard, the Governor had reason to expect the support and co-operation of at least as many thousands. In this fatal confidence, the armament allotted for this important expedition was composed of only the 13th regiment of foot, seven companies of the 49th, and a detachment of artillery, altogether amounting to about eight hundred and seventy, rank and file, fit for duty. Such was the force that was to annex to the crown of Great Britain, a country nearly equal in extent, and in natural

abused. All these men were well educated, and nourished deep resentment against the French planters, on account of the indignities which the class of coloured people had received from them. At Cape Tiburon, three or four hundred blacks were embodied very early, under a black general named Jean Kina, who served well and faithfully.

strength infinitely superior, to Great Britain itself! Speedy and effectual reinforcements from England were, however, promised, as well to replace the troops which were removed from Jamaica, as to aid the operations in St. Domingo.

In the meantime, the first division, consisting of six hundred and seventy-seven rank and file, under the command of Lieutenant-Colonel Whitelocke, sailed from Port-Royal the 9th of September, and arrived at Jeremie on the 19th of the same month. They were escorted by Commodore Ford, in the Europa, accompanied by four or five frigates.

As the propositions, or terms of capitulation, had been previously adjusted between the people of Jeremie, by their agent Mr. Charmilly, and General Williamson, it only remained for the British forces to take possession of the town and harbour. Accordingly, the troops disembarked early the next morning; the British colours were hoisted at both the forts, with royal salutes from each, which were answered by the Commodore and his squadron, and the oaths of fidelity and allegiance were taken by the resident inhabitants, with an appearance of great zeal and alacrity.

At the same time information was received, that the garrison at the Mole of Cape St. Nicholas, were inclined to surrender that important fortress in like manner. As this was a circumstance not to be neglected, the Commodore immediately directed his course thither, and, on the 22d, took possession of the fortress and harbour, and received the allegiance of the officers and privates. The grenadier company of the

13th regiment, was forthwith despatched from Jeremie to take the command of the garrison; which was soon afterwards strengthened by the arrival of the second division of the armament ordered from Jamaica, consisting of five companies of forty men each.

The voluntary surrender of these places raised expectations in the people of England, that the whole of the French colony in St. Domingo would submit without opposition; but the advantages hitherto obtained, seem to have been greatly overvalued. The town of Jeremie is a place of no importance.—It contains about one hundred very mean houses, and the country in the vicinage is not remarkably fertile; producing nothing of any account but coffee. At the Mole of Cape St. Nicholas, the country is even less productive than in the neighbourhood of Jeremie; but the harbour is one of the finest in the new world, and the fortifications vie with the strongest in the West Indies. Unfortunately, from the elevation of the surrounding heights, the place is not tenable against a powerful attack by land. The garrison consisted only of the regiment of Dillon, which was reduced by sickness or desertion to about one hundred and fifty men. The town itself, was in the highest degree hostile: most of the inhabitants, capable of bearing arms, left the place on the arrival of the English, and joined the republican army.

Zealous, however, to promote the glory of the British name, Colonel Whitelocke determined that his little army should not continue inactive at Jeremie. It was represented to him, that the acquisition of the neighbouring post of Tiburon would prove of the ut-

most importance towards the security of Grand-Ance, and a M. Duval pledging himself to raise five hundred men to co-operate in its reduction, an expedition was undertaken for that purpose, and Colonel Whitelocke, with most of the British force from Jeremie, arrived in Tiburon Bay on the 4th of October.

But, on this occasion, as on almost every other, the English had a melancholy proof, how little dependance can be placed on French declarations and assurances. Duval never made his appearance, for he was not able to collect more than fifty whites; the enemy's force was found to be far more formidable than had been represented, and the gallantry of our troops proved unavailing against superiority of numbers. They were compelled to retreat, with the loss of about twenty men killed and wounded.*

The defeat and discouragement sustained in this attack were the more grievously felt, as sickness soon afterwards began to prevail to a great extent in the army. The season of the year was unfavourable in the highest degree for military operations in a tropical climate. The rains were incessant; and the constant and unusual fatigue, and extraordinary duty to which the soldiers, from the smallness of their number, were necessarily subject, co-operating with the state of the weather, produced the most fatal consequences. That never-failing attendant on military expeditions in the West Indies, the yellow or pestilential fever, raged with dreadful virulence, and so many, both of the

* This Duval being afterwards suspected of corresponding with the enemy, was ordered to quit the island, and he went to America.

seamen and soldiers, perished daily, that the survivors were stricken with astonishment and horror at beholding the havoc made among their comrades!

General Williamson, with his usual humanity, exerted himself to give them all the relief in his power. Unhappily he had no alternative but either to withdraw the troops altogether from St. Domingo, leaving our allies and new subjects, the French planters who had sworn allegiance to our government, to the mercy of their enemies, or to send, from an already exhausted army, a small reinforcement of men, to perish, probably, in the same manner as those had done whose numbers they were scarcely sufficient to replace.

The latter measure was adopted: in truth, the circumstances of the case admitted of no other. The remainder of the 49th regiment, the 20th, and the royals, amounting altogether to seven or eight hundred men, were therefore despatched with all possible expedition; and the safety of Jamaica was at length intrusted to less than four hundred regular troops.

The sudden appearance in St. Domingo of a reinforcement, though small in itself, produced however a considerable effect among the French planters, by inducing a belief, that the British government was now seriously resolved to follow up the blow. In the beginning of December, the parishes of Jean Rabel, St. Marc, Archaye, and Boucassin, surrendered on the same conditions as had been granted to Jeremie; and

their example was soon afterwards followed by the inhabitants of Leogane. All the former parishes are situated on the north side of the Bight: Leogane on the south.

The British commanders now directed their views once more towards the capture of Tiburon. The defeat which our troops had sustained in the late attack of that important post, served only to animate them to greater exertions; but a considerable time unavoidably elapsed before the expedition took place; the interval being employed in securing the places which had surrendered. On the 21st of January, however, the Commodore touched at Jeremie with the squadron, and received the troops on board; and the whole arrived off Cape Tiburon on the evening of the first of February.

The enemy appeared in considerable force, and seemed to wait the arrival of the British with great resolution; but a few broadsides from the ships soon cleared the beach. They came forward however again, as the flank companies approached the shore, and directed a general discharge of musquetry at the boats; but our troops landed and formed in an instant, routed their line with great slaughter, and immediately took possession of the post. The gallantry of Major Spencer who commanded, and of the officers and men who composed, the flank companies, was particularly conspicuous. It seems, indeed, to have been a spirited and well conducted enterprize throughout; and it was happily effected with the loss of only three of the English killed, and seven wounded. Of the enemy, one hundred and fifty surrendered prisoners

of war; and their magazines were found replete with ammunition.*

By the possession of this post on the south, and that of the Mole at Cape St. Nicholas on the north-western part of the island, the British squadron commanded the navigation of the windward passage, and the whole of that extensive bay which forms the Bight of Leogane; and the capture of the forts, shipping, and town of Port au Prince, (the metropolis of the French colony), seemed more than probable, on the arrival of a large armament now daily expected, with much anxiety, from England.

* I have since been informed by an officer of rank, who took a distinguished part in this enterprize, that the real number of British killed and wounded was twenty-five. This gentleman was himself among the wounded. The generous gallantry of a common sailor, named Allen, belonging to the Penelope, deserves to be recorded in this place. Instead of returning to his ship with the boats, according to orders, after the troops were landed, the sailor jumped on shore, and seizing the firelock of a wounded soldier, *swore that he too would have a dash at the Brigands.* But it was necessary the troops should follow up their success, and it being found impossible to take all the wounded men along with them, many of those would have been left on the beach, in a dark night, liable to be massacred by a savage enemy; which honest Jack perceiving, he declared it was a more pleasing task to save the lives of these poor suffering men, than to kill half a score of rebels. He therefore plunged into the water, the boats having pushed off, and by hard swimming reached the Hound Sloop, laying near a mile from the shore, and from her was sent to his own ship. Captain Rowley being by this means informed of the situation of the wounded men, manned his barge, and brought them all off himself; and with a very commendable attention towards such of them as died in the removal, ordered the lieutenant to read the funeral service over them, by the light of a lanthorn, before their bodies were committed to the deep. Allen, the sailor, was reprimanded for his breach of discipline, but rewarded with five pounds for his humanity.

In the meanwhile, it was determined, (now that the season was favourable), in order that the troops might not continue inactive, as well as to facilitate the meditated reduction of Port au Prince, to attack *L'Acul*, an important fortress in the vicinity of Leogane. Accordingly, on the 19th of February, the flank companies, a detachment of the royal artillery, and of the 13th regiment, with some colonial troops, having two five half-inch howitzers and two four-pounders, marched from thence under the command of Colonel Whitelocke, at four in the morning. Baron de Montalembert, with about two hundred colonial troops, and a few of the British artillery, were previously embarked in transports, and ordered to land and attack the fort at an hour appointed. Captain Vincent, with the light infantry of the 49th, and about eighty of the colonial troops, took a mountain road, while Colonel Whitelocke moved forward on the great road, and took post just out of cannon shot, waiting the united attacks of the Baron and Captain Vincent's detachments. The enemy began to cannonade about seven o'clock, and continued it with intervals till eleven, when Colonel Whitelocke ordered Captain Smith, with the howitzers and cannon, to advance and fire upon the fort, supported by the light infantry of the royals and 13th regiments, under the command of Major Spencer, in order to give time for the Baron's people to land. Unfortunately, from the mismanagement of one of the transports, the troops under the orders of the Baron de Montalembert could not be landed. Colonel Whitelocke, therefore, finding he had nothing to expect from them, the day being considerably advanced, now came to the determination of attacking the fort by storm; and detached Major

Spencer, with the grenadiers of the 49th regiment, and the light infantry of the 13th, to join Captain Vincent, and approach the fort by the mountain road, while he himself marched by the great road for the same purpose. At five o'clock, the two columns moved forward, and the moment the enemy discovered the march of Colonel Whitelocke's division, they commenced a very heavy fire of cannon and musquetry. Orders were immediately given for the column to advance and gain the fort, which orders were gallantly and rapidly executed. At this instant, Lieutenant M'Kerras of the engineers, and Captain Hutchinson of the royals, were both wounded; but they continued their exertions, notwithstanding, till the fort was in quiet possession of the victors. Our loss was not great; but Captain Morshead (who had before received a shot in the body, when gallantly mounting the hill) with Lieutenant Tinlin of the 20th grenadiers, Lieutenant Caulfield of the 62d regiment, and some privates, were unfortunately blown up by an explosion after the fort was taken; for the officer who commanded, finding he could no longer defend it, placed a quantity of powder and other combustibles in one of the buildings, which was fired by an unfortunate brigand, who perished in the explosion. Captain Morshead died the next day, and was interred with military honours, attended by the British garrison; Lieutenant Caulfield lingered some time longer, and then followed him to the grave; but Lieutenant Tinlin recovered.*

* I am indebted to the gentleman who favoured me with the information conveyed in the note to p. 155. for the following corrections and observations on the account, which I have given above, of the attack of Acul. " Our loss, that day (the 19th February), was thirty-four

The next enterprize of our gallant little army had a less favourable termination. It was directed against a strong post and settlement at a place called *Bom-pard*, about eight miles from Cape St. Nicholas, where a hardy race of people, chiefly a colony of Germans, had established themselves, and lived in unambitious poverty. A detachment of two hundred men, from the different corps, were ordered on this service, in two divisions, one of which was commanded by Major Spencer, the brave and active officer already mentioned, the other by Lieutenant-Colonel Markham. Of their proceedings during the attack, and their retreat afterwards, I have not been furnished with the particulars. All that is known to the public with certainty is, that our troops were repulsed by superior numbers, with the loss of forty men, but without any diminution of the national character. It was allowed, even by the enemy, that they fought bravely. They were defeated, not dismayed, by circumstances which probably they did not foresee, and against which human prudence could not provide.

This afflicting loss was but ill compensated, by the very distinguished honour which was soon afterwards acquired by the few British troops that had been left in possession of Cape Tiburon, under the command of Captain Harlyman, of the 13th regiment, who were attacked on the 16th of April by an army of brigands, amounting to upwards of two thousand. The enemy's force was led on by Andrew Rigaud, a man of colour, who commanded at Les Cayes, and was com-

“ killed and wounded, amongst whom were six English officers, and
 “ ten Frenchmen. Lieutenant Lord Aylmer was wounded in the thigh,
 “ while advancing in Major Spencer's division to the attack.”

posed of revolted negroes, and desperadoes of all descriptions, rapacious after plunder, and thirsting for blood. This savage horde surrounded the fort about three o'clock in the morning. It was defended with much spirit until a quarter before nine, when the besieged, quitting the fort, assailed the assailants, and routed the besiegers with great slaughter, one hundred and seventy of their number being left dead on the field; but when it was discovered that no less than twenty-eight of our gallant soldiers had lost their lives, and that one hundred and nine others were severely wounded in this bloody contest, the shouts of triumph were suppressed by gloomy reflections on the forlorn condition of the army, it being mournfully evident that a few more such victories would annihilate the victors!

The defence of Fort L'Acul, early in the same month, is also deserving particular notice. Captain Napier had the command; and he was ably supported by Lieutenant Bambridge, of the artillery, and Lieutenant M'Kellan, of the royals. The latter was stationed in the adjoining block-house.

The enemy, on this occasion, conducted their operations with such secrecy and concert, that it was supposed they must have lain concealed, a considerable part of the night, in the ditch; as the first notice the garrison had of their approach, was from a loud yell which they uttered in endeavouring to enter the embrasures.

The firing of our morning gun was their signal of attack; but they seem not to have been apprized that

previous thereto, by a full hour, it was the constant practice of the British officers to have their men at the out-posts under arms.

Being twice repulsed from the fort and block-house, the enemy rallied, and made a third attempt; an instance of persevering bravery unobserved until that time in their warfare. They were, however, finally driven off; and were afterwards pursued with great slaughter by a party of French royalists, under the command of the Baron de Montalembert, who had just arrived from Leogane.

The whole of the British force at this time in all parts of St. Domingo, did not, I believe, amount to nine hundred effective men, a number by no means sufficient to garrison the places in our possession; and the rapid diminution which prevailed among them, could not fail to attract observation among all classes of the French inhabitants; to dispirit our allies, and encourage our enemies. Such of the planters as had hitherto stood aloof, now began to declare themselves hostile; and desertions were frequent from most of the parishes that had surrendered. At Jean Rabel, a place which, a few months before, had voluntarily declared for the British government, the garrison, consisting of two hundred and fifty of our supposed allies, rose on their officers, and compelled them to deliver up the post to Lavaux, the French general, and it was greatly apprehended that, unless a very powerful reinforcement should speedily arrive to strengthen the British army, many other places would follow their example.

Eight months had now elapsed since the surrender of Jeremie, and in all that interval, not a soldier had arrived from Great Britain; and the want of camp equipage, provisions, and necessaries was grievously felt. The army seemed devoted to inevitable destruction, and disappointment and dismay were strongly marked in the countenance of every man. At length, however, on the 19th of May, when expectation was nearly lost in despair, it was announced that his Majesty's ships the *Bellicieux* and the *Irresistible*, with the *Fly* sloop, had cast anchor in the harbour of Cape St. Nicholas, having a fleet of transports under their convoy, with the battalion companies on board of the 22d, 23d, and 41st regiments of infantry, under the command of Brigadier General Whyte. This event, as may well be imagined, afforded infinite relief and satisfaction to the harassed and worn-out troops on shore; and their animation on this occasion was heightened by the confident hope and expectation that Port au Prince would be the object of an immediate attack. It was known that its harbour was crowded with ships, most of which were supposed to be laden with the richest productions of the colony; and although the regiments newly arrived did not exceed sixteen hundred men in the whole, (of whom two hundred and fifty were sick and convalescent), the deficiency of numbers was no longer the subject of complaint. Every one anticipated to himself the possession of great wealth from the capture; and justly concluded that his share of the prize money would augment or diminish in an inverse proportion to the number of captors.

The belief that Port au Prince would be the first object of attack, was well founded; and the road of Arcahaye was fixed on as a place of rendezvous for the men of war and transports. Accordingly, General Whyte, having landed his sick at Cape St. Nicholas, and taken one hundred and fifty of the garrison in their room, proceeded on the 23d to the place appointed, to concert measures with Commodore Ford, and receive on board such of the colonial troops as were to co-operate with the British in this enterprize. On the 30th the squadron sailed from Arcahaye, and cast anchor off Port au Prince on the evening of the same day. It was composed of four ships of the line, the Europa, the Bellicieux, the Irresistible, and the Sceptre, three frigates, and four or five smaller vessels; the whole under the immediate command of Commodore Ford; and the land forces, under the orders of General Whyte, consisted of 1,465 rank and file fit for duty.

The whole force being thus collected, and the necessary preparations made, a flag was sent, early the next morning, to demand the surrender of the place; but the officer charged with the despatch, was informed that no flag would be admitted, and the letter was returned unopened. It was now determined to commence operations by the cannonade of Fort Bizotton, a fortress situated on a commanding eminence, well adapted to guard the approach to the harbour, and defended by five hundred men, eight pieces of heavy cannon, and two mortars. Two line of battle ships were ordered to attack the sea front, and a frigate was stationed close to the shore, to flank a ravine to the eastward. From these vessels a brisk and

well-directed fire was maintained for several hours; but no great impression appearing to be made, Major Spencer, with three hundred British, and about five hundred of the colonial troops, was put on shore in the evening, within a mile of the fort, with orders to commence an attack on the side towards the land. On their arrival at a small distance from the scene of action, about eight o'clock at night, a most tremendous thunder-storm arose, accompanied with a deluge of rain, of which, as it overpowered the sound of their approach, the advanced guard, commanded by Captain Daniel, of the 41st, determined to take advantage. These brave men, sixty only in number, accordingly rushed forward, and finding a breach in the walls, entered with fixed bayonets, and became instantly masters of the fortress; the besieged every where throwing down their arms, and calling for mercy. So rapid were the movements of this gallant band, and so unexpected was their success, that Major Spencer, the commander, had his fears for the safety of the whole party, of whose situation he was unapprized for some hours. I grieve to add, that Captain Daniel, who so gallantly led the advanced guard on this occasion, received a severe wound in the attack, while his brave associate, Captain Wallace, the second in command, was most unfortunately killed on the glacis.

The possession of Fort Bizotton determined the fate of the capital, which was evacuated by the enemy on the 4th of June; and the British commanders were so fortunate as to preserve, not only the town itself, but also the shipping in the harbour, from conflagration, although the republican commissioners had given orders and made preparations for setting fire to

both. The commissioners themselves, with many of their adherents, among whom was the Mulatto Montbrun, commandant of their troops, made their escape over the mountains to Jacmel, carrying with them, it is said, money and effects to a great amount.

Thus was achieved the conquest of Port au Prince; an event which has proved not less profitable than honourable to such of the officers and soldiers by whom it was effected, as have lived to enjoy the fruits of their victory; for there were captured in the harbour, two-and-twenty top-sail vessels, fully laden with sugar, indigo, and coffee, of which thirteen were from three to five hundred tons burthen, and the remaining nine, from one hundred and fifty to three hundred tons; besides seven thousand tons of shipping in ballast; the value of all which, at a moderate computation, could not be far short of £.400,000 sterling.*

* Three days after the surrender of Port au Prince, the enemy made a second attempt on the British post at Tiburon; at that time under the command of Captain (now Lieutenant Colonel) Bradshaw. This attack took place on the 7th of June; but the assailants were prevented bringing their artillery to bear on the fort, by a heavy and well-directed fire from the Success Frigate, (Captain Roberts), stationed off the point, close to which the cannon must have been conveyed; about midnight, therefore, the enemy, from the covert of an adjoining wood, began a general discharge of small arms, and continued to fire very vigorously for several hours, but with little execution; the fort having been made proof against musquetry. During this attack, as the great guns of the fort could not be pointed towards the enemy with any certainty of effect, Captain Bradshaw directed his men to remain quiet. By this judicious conduct the enemy were completely deceived; for interpreting the silence and inactivity of the garrison to proceed from the effects of terror and the loss of men, they were encouraged, about six in the morning, to attempt, in full force, to storm. The consequences were fatal to them; Captain Bradshaw allowed them to approach within a small distance of

CHAPTER XI.

Sickness among the Troops, and the causes thereof.—Reinforcement.—Dreadful Mortality.—General Whyte is succeeded by Brigadier General Horneck.—Leogane taken by the Rebels.—Temporary Successes of Lieutenant-Colonel Brisbane at Artibonite.—Revolt of the Mulattoes at St. Marc.—Attack of Fort Bizotton.—Preparations by Rigaud for another Attempt on Tiburon.—The Post attacked on Christmas Day, and carried.—Gallant Defence and escape of the Garrison, and melancholy Fate of Lieutenant Baskerville.—Lieutenant-Colonels Brisbane and Markham killed.—Observations and Strictures on the Conduct of the War.

FROM the success which attended the British arms in the conquest of Port au Prince, it might have been hoped that we were now to enter on the survey of brighter prospects than those which have hitherto presented themselves to our contemplation; but a melancholy reverse of fortune was soon to await the conquerors; for, immediately after possession was

the walls, when he opened so tremendous a fire, both from artillery and small arms, as instantly laid nearly one half of their number breathless, and compelled the remainder to retreat in the utmost confusion. A sortie being, at the same time, made from the garrison, a great many were killed in the pursuit, and their discomfiture was decisive.

✂ The circumstances here related were unfortunately omitted in the first edition of the Historical Survey of St. Domingo.

taken of the town, the same dreadful scourge—disease, exasperated to contagion, which had been so fatally prevalent among our troops, in the preceding autumn, renewed its destructive progress; and, on this occasion, it is not difficult to trace the proximate causes of so terrible a calamity. The situation of the town of Port au Prince has already been noticed. Unhealthy in itself, it is surrounded by fortified heights, which command both the lines and the harbour; and these heights are again commanded by others. Here, the enemy, on their retreat from the town, made their stand, in the well-founded confidence of receiving regular supplies of men, ammunition, and necessaries, from Les Cayes, a sea-port on the southern coast, distant only from Port au Prince, by a very easy road, about forty miles.* No part of St. Domingo possesses a more ready communication with the French Islands to windward, or with the states of America, than the port last mentioned; and from both those sources, reinforcements were actually received, and constantly poured into the enemy's camp. On this account the British commanders found it indispensably necessary to strengthen the lines, and raise additional intrenchments and works on that side of the town which fronts the mountains. Thus a most severe and unusual bur-

* The harbour of Les Cayes was guarded by two small forts, each of which was furnished with only six pieces of cannon, and a smaller battery, which mounted only five pieces. The number of white inhabitants belonging to the town were computed at eight hundred; but the people of colour had taken possession of it in the latter end of 1792, and Andrew Rigaud, a Mulatto, was made commander in chief and governor-general of the south side of the French part of St. Domingo. His power was absolute, and his brother, of the same cast, was appointed next in command. These men were invested with this authority by the two commissioners, Polverel and Santhonax.

then was imposed on the soldiers. They were compelled, with but little intermission, to dig the ground in the day, and to perform military duty in the night; exposed, in the one case, to the burning rays of the sun; in the other, to the noxious dews and heavy rains of the climate. Such extraordinary and excessive labour imposed on men, most of whom had been actually confined six months on ship-board, without fresh provisions or exercise, co-operating with the malignancy of the air, produced its natural consequences. They dropt like the leaves in autumn, until at length the garrison became so diminished and enfeebled, that deficiencies of the guards were oftentimes made up from convalescents, who were scarcely able to stand under their arms.*

It is true, that a reinforcement came from the Windward Islands soon after the surrender of the town;—but, by a mournful fatality, this apparent augmentation of the strength of the garrison, contributed in an eminent degree to the rapid increase and aggravation of its miseries. On the 8th of June, eight flank companies belonging to the 22d, 23d, 35th, and 41st regiments, arrived at Port au Prince, under the command of Lieutenant-Colonel Lenox. They consisted, on their embarkation, of about seventy men each, but the aggregate number, when landed, was not quite three hundred. The four grenadier companies, in particular, were nearly annihilated. The frigate in which they were conveyed, became a *house of*

* It was fortunate for the British army, that the French troops suffered by sickness almost as much as our own: Port au Prince would otherwise have been but a short time in our possession.

pestilence. Upwards of one hundred of their number were buried in the deep, in the short passage between Guadaloupe and Jamaica, and one hundred and fifty more were left in a dying state at Port Royal. The wretched remains of the whole detachment discovered, on their landing at Port au Prince, that they came—not to participate in the glories of conquest, but—to perish themselves within the walls of an hospital! So rapid was the mortality in the British army, after their arrival, that no less than forty officers and upwards of six hundred rank and file met an untimely death, without a contest with any other enemy than sickness, in the short space of two months after the surrender of the town!

General Whyte, his health much impaired, and hopeless, it may be presumed, of further triumphs with an army thus reduced and debilitated, now solicited and obtained permission to return to Europe. He was succeeded in the chief command by Brigadier-General Horneck, who arrived from Jamaica about the middle of September: and if the requisite qualifications for such a station—firmness without arrogance, and conciliating manners without weakness, could always ensure success to the possessor, General Horneck would have brought good fortune with him. But the difficulties which the former commander would have had to encounter, had he remained in his station, devolved with aggravated weight on his successor. The only reinforcement which followed General Horneck, consisted of fifty men from Jamaica. Whatever troops were promised or expected from Great Britain, none arrived, until the expiration of seven months after General Horneck had taken the

command. Instead, therefore, of attempting new achievements, he was compelled, by irresistible necessity, to act chiefly on the defensive. The rebel Mulattoes, under Rigaud, even became masters of Leogane, and satiated their vengeance by putting to death all such of the French planters, our allies, as unfortunately fell into their power.

On the other hand, the judicious exertions and rapid successes of Lieutenant-Colonel Brisbane on the plain of Artibonite, had been for some time the subject of much applause, and had given birth to great expectation. The French inhabitants of the town and neighbourhood of St. Marc, had been all along more heartily disposed to co-operate with the English, than any of their countrymen. Colonel Brisbane had not above fourscore British under his command. The rest of his little army was composed of the remains of Dillon's regiment, the St. Marc's legion, the militia of the neighbouring parishes, and a body of about three hundred reluctant Spaniards from Verette; the whole not exceeding twelve hundred men in arms. With this force, properly distributed, he had routed the republican troops and rebel negroes in every quarter; and even brought the negro chiefs to solicit permission to capitulate. Eight or ten thousand of these deluded wretches, had actually submitted unconditionally, and many returned, of their own accord, to the plantations of their masters. But these promising appearances were of short continuance. While Colonel Brisbane was following up his successes in a distant part of Artibonite, the men of colour in the town of St. Marc, finding the town itself without troops, had violated their promises of neutrality, and

on the 6th of September, taken up arms on the part of the republic; putting to death every man that fell in their way, whom they considered as an enemy to the French commissioners.—The garrison, consisting of about forty British convalescents, threw themselves into a small fort on the sea-shore, which they gallantly defended for two days, when a frigate came to their relief from the Mole of Cape St. Nicholas, and took them off.—The triumph of the Mulattoes, however, was transient. Colonel Brisbane returning in force, attacked them on the side of the land, and recovered the town; making upwards of three hundred of the insurgents prisoners, and driving the rest over the Artibonite river; but the advantages which he had obtained on the plain, were lost in the interim. The negro chiefs no longer offered to capitulate, but appeared in greater force than ever. Being joined by the fugitive Mulattoes, they soon repassed the river; and having procured in the mean time, plenty of arms and ammunition, they threatened so formidable an attack on the town of St. Marc, early in October, as to excite the most serious apprehensions for its safety.

Such was the situation of affairs in the western parts of St. Domingo about the period of General Horneck's arrival. The northern province (the Mole St. Nicholas and the town of Fort Dauphin excepted) was entirely in possession of the rebel negroes; and unhappily, in all other parts of the colony, the weakness of the British was so apparent, as not only to invite attacks from the enemy, but also to encourage revolt and conspiracy in the posts in our possession.*

* Colonel Brisbane had scarcely driven the Mulattoes from St. Marc, and restored order and tranquillity in the town, before a dark conspiracy

Rigaud, who commanded in the south, now determined to make a bold effort for the recovery of Fort Bizotton. The fort was attacked early in the morning of the 5th of December, by three columns of the enemy, amounting in the whole to about two thousand men; but they were defeated with great slaughter on their part, and with little loss on ours. Captain Grant, however, and both his lieutenants, Clunes and Hamilton, were severely wounded early in the attack; yet they continued their efforts, and nobly succeeded; and General Williamson bore testimony to their good conduct and valour.

Baffled in this attack, Rigaud resolved to make another, and a more formidable attempt, for the recovery of Tiburon. His intentions were known and his project might have been defeated, if any one English ship of war could have been spared to watch his motions off the harbour of Les Cayes where Rigaud commanded, and from whence he conveyed his artillery, ammunition, and provisions. He proceeded, however, without interruption, in his preparations for the attack; and his armament sailed from Les Cayes on the 23d of December. His naval force consisted of

was agitated among some of the French inhabitants, under the British protection, to cut him off; but it was happily discovered and defeated before it broke out into action. This happened the beginning of January 1795; and a still more daring and dangerous plot was carried on, a month afterwards, in Port au Prince, to seize on the garrison, and put all the English to death. This conspiracy also was fortunately discovered, and twenty of the conspirators being brought to trial before a council of war, composed of the principal commanders by sea and land, (among whom were five French field officers), they were all adjudged to suffer death, and fifteen of them were accordingly shot on the 18th of February.

one brig of sixteen guns, and three schooners of fourteen guns each, and he had collected a body of three thousand men, of all colours and descriptions, eight hundred of which were troops of the line. The attack commenced on Christmas-day. The harbour was defended with infinite spirit, by the sloop King Gray, until a red hot shot from the enemy took her magazine, and caused her to blow up. The garrison, consisting of only four hundred and fifty men, made a vigorous defence for four days, when, having lost upwards of three hundred of their number, and finding the post no longer tenable, the survivors, with unexampled bravery, fought their way for five miles through the enemy, and got safe to Irois. On this occasion, the British acknowledged themselves much indebted to the gallantry and good conduct of Monsieur de Sevré, commandant of the French troops. M. du Plessis, the Lieutenant Colonel, and two other officers of the south legion were killed in the fort. The loss of du Plessis was greatly felt and lamented. Lieutenant Baskerville was the only British officer who, by some unfortunate circumstance, was unable to join his companions in their retreat; and this high-spirited young man, with a resolution which, though a Christian must condemn it, a Roman would have approved, to defeat the triumph of his savage enemy, who would probably have made him suffer a shameful death, put a period to his own existence, as Rigaud entered the fort.

With this disastrous occurrence terminated the year 1794,* and here I shall close my account of the

* Major General Williamson, the latter end of the year, was ap-

military transactions of the British army in St. Domingo; for, although hostilities are still continued in this ill-fated country, it is, I think, sufficiently apparent, that all hopes and expectations of ultimate success are vanished for ever! The historian who shall recount the events of 1795, will have to lament the mournful and untimely deaths of many brave and excellent young men who perished in this fruitless contest. Among the foremost of these was Lieutenant Colonel Thomas Brisbane, of whom honourable notice is taken in the foregoing pages, and whose gallantry and good conduct were not more the subject of universal admiration, than his untimely fate of universal regret. He was killed on a reconnoitring party in February. By his death, his country was deprived, at a most critical juncture, of an able, indefatigable, and intelligent officer, who had gained the affections of most of the various descriptions of people under his command by his kindness, and the confidence of all by his courage.* The same fate, a month afterwards, awaited Lieutenant-Colonel Markham, who perished in attacking an out-post of the enemy's forces which were, at that time, laying siege to Fort Bizotton. He fell as the detachment was rapidly advancing to the charge. His survivor in command (the hon. Captain Colville), proceeded however with equal animation: the out-post was carried; the colours of the enemy, and five pieces of their cannon, were taken, and some hundreds of their number slain

pointed Governor General of St. Domingo. He arrived at Port au Prince in May 1795.

* He was a captain in the 49th regiment, and lieutenant colonel of the colonial corps called the St. Marc's Legion.

on the spot; but the victory was dearly obtained by the loss of so enterprising and accomplished a leader. Yet it affords some consolation to reflect, that these brave young men, though cut off in the bloom of life, fell in the field of glory, nobly exerting themselves in the cause of their country, and dying amidst the blessings and applauses of their compatriots. Alas, how many of their youthful associates, in this unhappy war, might have envied them so glorious an exit! What numbers have perished—not in the field of honour—but on the bed of sickness!—not amidst the shouts of victory—but the groans of despair!—condemned to linger in the horrors of pestilence; to fall without a conflict, and to die without renown!*

* The disease of which so many gallant men have perished, is commonly known by the name of the *yellow fever*. Two writers of great ability, (Dr. RUSH of Philadelphia, and Dr. BENJ. MOSELY of Pall Mall, London), have treated fully of this dreadful calamity. The picture which the latter has given of an unhappy patient of his in the West Indies, a young officer of great merit, in the last stage of this disease, after four days illness, is drawn by the hand of a master. "I arrived at the lodgings of this much esteemed young man, (says the doctor), about four hours before his death. When I entered the room, he was vomiting a black muddy cruor, and was bleeding at the nose. A bloody ichor was oozing from the corners of his eyes, and from his mouth and gums. His face was besmeared with blood, and, with the dulness of his eyes, it presented a most distressing contrast to his natural visage. His abdomen was swelled, and inflated prodigiously. His body was all over of a deep yellow, interspersed with livid spots. His hands and feet were of a livid hue. Every part of him was cold excepting about his heart. He had a deep strong hiccough, but neither delirium or coma; and was, at my first seeing him, as I thought, in his perfect senses. He looked at the changed appearance of his skin, and expressed, though he could not speak, by his sad countenance, that he knew life was soon to yield up her citadel, now abandoning the rest of his body. Exhausted with vomiting, he at last was suffocated with the blood he was endeavouring to bring up, and expired."

Mosely on Tropical Diseases, 3d edit. p. 459.

These reflections, and the observations which I have made in the preceding pages, on the insufficiency of the means to the objects in view, are not written in the spirit of accusation against men in authority; nor (if I know myself) is there any bias of party zeal on my judgment. I am far from asserting, that the situation and resources of Great Britain were such as to afford a greater body of troops for service in St. Domingo, at the proper moment, than the number that was actually sent thither. I presume not to intrude into the national councils, and am well apprized that existing alliances and pre-engagements of the state, were objects of important consideration to his Majesty's ministers. Neither can I affirm, that the delays and obstructions, which prevented the arrival at the scene of action of some of the detachments, until the return of the sickly season, were avoidable. A thousand accidents and casualties continually subvert and overthrow the best laid schemes of human contrivance. We have seen considerable fleets detained by adverse winds, in the ports of Great Britain for many successive months, and powerful armaments have been driven back by storms and tempests, after many unavailing attempts to reach the place of their destination. Thus much I owe to candour; but, at the same time, I owe it also to truth, to avow my opinion, that in case no greater force could have been spared for the enterprise against St. Domingo, the enterprise itself ought not to have been undertaken. The object of the British ministers was avowedly to obtain possession of the whole of the French part of the country. That they placed great dependance on the co-operation of the French inhabitants, and were grossly deceived in this expectation, I believe and ad-

mit; but they ought surely to have foreseen, that a very formidable opposition was to be expected from the partisans and troops of the republican government; and they ought also to have known, that no considerable body of the French planters could be expected to risk their lives and fortunes in the common cause, but in full confidence of protection and support. In my own judgment, all the force which Great Britain could have sent thither, would not have been sufficient for the complete subjugation of the colony. It is asserted by competent judges, that no less than six thousand men were necessary for the secure maintenance of Port au Prince alone; yet I do not believe that the number of British, in all parts of St. Domingo, at any one period previous to the month of April 1795, exceeded two thousand two hundred, of whom, except at the capture of Port au Prince, not one half were fit for active service; and during the hot and sickly months of August, September, and October, not one third.*

Perhaps the most fatal oversight in the conduct of the whole expedition, was the strange and unaccountable neglect of not securing the little port of Jacmel on the south side of the Island, previous to the attack of Port au Prince. With that post on the one side of the peninsula, and the post of Acul in our possession on the other, all communication between the southern and the two other provinces would have been cut off; the navigation from the Windward Islands to Jamaica would have been made secure, while the possession of the two Capes which form the entrance into the Bight of Leogane (St. Nicholas and Tiburon) would have protected the homeward trade in its course through the Windward Passage. All this might have been accomplished; and I think it is all that, in sound policy, ought to have been attempted. As to Port au Prince, it would have been fortunate if the works had been destroyed, and the town evacuated immediately after its surrender.

The retention by the enemy of Jacmel and Les Cayes, not only enabled them to procure reinforcements and supplies, but also most amply to revenge our attempts on their coasts, by reprisals on our trade. It is known, that upwards of thirty privateers, some of them of considerable force, have been fitted out from those ports, whose rapacity and vigilance scarce a vessel bound from the Windward Islands to Jamaica could escape. The prizes which they made, in a few short months, abundantly compensated for the loss of their ships at Port au Prince.*

* The following is a list of vessels bound to Jamaica, which were taken and carried into Les Cayes, between June 1794, and June 1795,

After all, though I have asserted nothing which I do not believe to be true, I will honestly admit, that many important facts and circumstances, unknown to me, very probably existed, an acquaintance with which is indispensably necessary, to enable any man to form a correct judgment of the measures which were pursued on this occasion. To a writer, sitting with composure in his closet, with a partial display of facts before him, it is no difficult task to point out faults and mistakes in the conduct of public affairs; and even where mistakes are discovered, the wisdom of after-

most of them laden with dry goods, provisions, and plantation stores, and many of them of great value.

knowledge is very cheaply acquired. It is the lot of our nature, that the best concerted plans of human policy are subject to errors which the meanest observer will sometimes detect. "The hand (says an eminent writer), that cannot build a hovel, may demolish a palace."

But a new scene now opens for contemplation and reflection, arising from intelligence received since I began my work, that the Spanish government has formally ceded to the republic of France the whole of this great and noble island in perpetual sovereignty! So extraordinary a circumstance will doubtless give birth to much speculation and inquiry, as well concerning the value and extent of the territories ceded, as the present disposition and general character of the Spanish inhabitants. Will they relish this transfer of their allegiance from a monarchical to a republican government, made, as it confessedly is, without their previous consent or knowledge; or may reasonable expectations be encouraged, that they will now cordially co-operate with the English, in reducing the country to the British dominion? Will such assistance effect the re-establishment of subordination and good government among the vast body of revolted negroes? These are deep questions, the investigation of which will lead to inquiries of still greater magnitude; for, whether we consider the possession, by an active and industrious people, of so vast a field for enterprize and improvement on the one hand, or the triumph of successful revolt and savage anarchy on the other, it appears to me, that the future fate and profitable existence of the British territories in this part of the world are involved in the issue. On all these, and

various collateral subjects, I regret that I do not possess the means of giving much satisfaction to the reader. Such information, however, as I have collected on some of the preceding inquiries, and such reflections as occur to me on others, will be found in the ensuing chapter, which concludes my work.

CHAPTER XII.

Ancient State of the Spanish Colony.—The Town of St. Domingo established by Bartholomew Columbus in 1498.—Pillaged by Drake in 1586.—Conjectures and Reflections concerning its present Condition, and the State of Agriculture in the interior Country.—Numbers and Character of the present Inhabitants.—Their Animosity towards the French Planters, and Jealousy of the English.—Conjectures concerning the future Situation of the whole Island ; and some concluding Reflections.

THE Spanish colony in Hispaniola (the name St. Domingo being properly applicable to the chief city only) was the earliest establishment made by the nations of Europe in the New World; and unhappily, it is too notorious to be denied, that it was an establishment founded in rapacity and cemented with human blood! The sole object of the first Spanish adventurers was to ransack the bowels of the earth for silver and gold; in which frantic pursuit, they murdered at least a million of the peaceful and inoffensive natives! As the mines became exhausted, a few of the more industrious of the Spaniards entered on the cultivation of cacao, ginger, and sugar; but the poverty of the greater part of the inhabitants, and the discovery of new mines in Mexico, occasioned a prodigious emigration;—the experience of past disappointments not proving sufficiently powerful to cure the rage for acquiring wealth by a shorter course than that of patient

industry. In less than a century, therefore, Hispaniola was nearly deserted, and nothing preserved it as a colony, but the establishment of archiepiscopal government in its chief city, St. Domingo; and its being for many years the seat of civil and criminal jurisdiction, in cases of appeal, from all the territories of Spain in this part of the world.*

The settlement of the French in the western part of the island, of the origin of which I have already given an account, though the primary cause of hereditary and irreconcilable enmity between the two colonies, was however productive of good even to the Spaniards themselves. As the French settlers increased in number, and their plantations became enlarged, they wanted oxen for their markets, and horses for their mills. These, their neighbours were able to supply without much exertion of labour; and thus an intercourse was created, which has continued to the present day; the Spaniards receiving, through the French, the manufactures of Europe, in exchange for cattle. The example too, before their eyes, of successful industry and growing prosperity, was not wholly without its effect. The cultivation of sugar, which had diminished nearly to nothing, was revived in different parts of the Spanish territory, and plantations were established of cacao, indigo, ginger, and tobacco. The quantity of sugar exported in the beginning of the present century, is said to have amounted yearly to 15,000 chests, each of 7 cwt.

* The administration of justice throughout Spanish America is at present divided into twelve courts of *audience*, one only of which is at St. Domingo.

The country itself being evidently more mountainous in the central and eastern than in the western parts, it is probable, that the Spanish territory is, on the whole, naturally less fertile than that of the French; but much the greater portion of the island remained, until the late treaty, under the Spanish dominion; and of that, by far the major part continues at this hour an unproductive wilderness. On the northern coast, the line of division began at the river Massacre, and, crossing the country somewhat irregularly, terminated on the southern side, at a small bay called Les Ances à Pitre; leaving nearly two-thirds of the whole island in the possession of Spain. Proceeding eastward along the shore from the boundary on the north, the first place of note is Monte Christi, a town which formerly grew to importance by contraband traffic with North America, but is now reduced to a miserable village, the abode of a few fishermen; and the surrounding country exhibits a melancholy prospect of neglect and sterility. The river St. Jago runs into the sea at this place; on the banks of which, at some distance inland, are grazing farms of considerable extent. From the mouth of this river, for the space of fifteen leagues, to Punta Isabella, (the site of the first settlement established by Christopher Columbus), the soil, though capable of improvement, exhibits no sign of cultivation. From Isabella to old Cape François, (with the exception of Puerto de Plata), the coast seems entirely deserted; nor, after passing the bay of Samana, does a much better prospect offer, until coasting round the eastern extremity, we reach a vast extent of level country called Llos Llanos, or the Plains; at the west end of which, on the banks of the river Ozama, stands the metropolis.

This city, which was long the most considerable in the new world, was founded by Bartholomew Columbus, in the year 1498, and named, after a saint of great renown in those days, St. Dominick. There is preserved in Oviedo, a Spanish historian, who resided here about thirty years after its first establishment; his account of its state and population at that period, which being equally authentic and curious, I shall present to the reader at length.

“ But nowe, (says the historian), to speake sum-
 “ what of the principall and chiefe place of the islande,
 “ whiche is the citie of *San Domenico*: I saye, that as
 “ touchynge the buildynges, there is no citie in
 “ Spaine, so much for so-muche (no not *Barsalona*,
 “ which I have oftentimes seene) that is to bee pre-
 “ ferred before this generallye. For the houses of
 “ San Domenico are for the moste parte of stone, as
 “ are they of *Barsalona*. The situation is much bet-
 “ ter tha that of *Barsalona*, by reason that the streates
 “ are much larger and playner, and without compary-
 “ son more directe and strayght furth. For beinge
 “ buylded nowe in our tyme, beside the commoditie
 “ of the place of the foundation, the streates were
 “ also directed with corde, compase and measure;
 “ wherein it excelleth al the cities that I have sene,
 “ It hath the sea so nere, that of one syde there is no
 “ more space between the sea and the citie, then the
 “ waules. On the other parte, hard by the syde and
 “ at the foote of the houses, passeth the ryver *Ozama*,
 “ whiche is a marveyulous porte; wherein laden
 “ shyppes ryse very nere to the lande, and in manner
 “ under the house wyndowes. In the myddest of
 “ the citie is the fortresse and castle; the port or ha-

“ven also, is so fayre and commodious to defraight
 “or unlade shypes, as the lyke is founde but in fewe
 “places of the worlde. The chymineis that are in
 “this citie are about syxe hundreth in number, and
 “such houses as I have spoken of before; of the which
 “sum are so fayre and large that they maye well re-
 “ceave and lodge any lorde or noble manne of Spayne,
 “with his trayne and familie; and especially that
 “which Don *Diego Colon*, vicéroy under your ma-
 “jestie, hath in this citie, is suche that I knowe no
 “man in Spayne that hath the lyke, by a quarter, in
 “goodnesse, consyderynge all the commodities of the
 “same. Lykewyse the situation thereof as beinge
 “above the sayde porte, and altogither of stone, and
 “havyng many faire and large roomes, with as good-
 “ly a prospect of the lande and sea as may be devysed,
 “seemeth unto me so magnifical and princelyke, that
 “your majestie may bee as well lodged therein as
 “in any of the moste exquisite builded houses of
 “Spayne. There is also a cathedrall church buyld-
 “ed of late, where, as well the byshop accordyng to
 “his dygnitie, as also the canones, are wel indued.
 “This church is well buylded of stone and lyme, and
 “of good workemanshype.* There are further-
 “more three monasteries bearyng the names of Saynt
 “Dominike, Saynt Frances, and Saynt Mary of Mer-
 “cedes; the whiche are well buylded, although not
 “so curioslye as they of Spayne. There is also a
 “very good hospitall for the ayde and succour of pore
 “people, whiche was founded by Michaell Passamont,

* To this cathedral were conveyed, from the Carthusian Monastery
 in Seville, the remains of Christopher Columbus, who expired at Valla-
 dolid on the 20th of May 1506. It was his dying request, that his body
 should be interred in St. Domingo.

"threasurer to your majestie. To conclude, this citie
 "fro day to day increaseth in welth and good order,
 "as wel for that the sayde admyrall and viceroy,
 "with the lorde chaunceloure and counsayle ap-
 "poynted there by your majestie, have theyr conti-
 "nuall abydynage here, as also that the rychest men
 "of the ilande resort hyther, for thyre moste com-
 "modious habitation and trade of such merchaundies
 "as are eyther brought owt of Spayne, or sent thyther
 "from this iland, which now so abundeth in many
 "thynges, that it serveth Spayne with many commo-
 "dities, as it were with usury requityng such bene-
 "fites as it fyrst receaved from thense."*

It is probable that St. Domingo had now attained
 the summit of its prosperity. About sixty years af-
 terwards (1st January 1586), it was attacked by Sir
 Francis Drake; a narrative of whose expedition, by
 an eye-witness, is preserved in Hakluyt's Collection;
 from which it appears, that it was, even then, a city
 of great extent and magnificence; and it is shocking
 to relate, that, after a month's possession, Drake
 thought himself authorized, by the laws of war, to
 destroy it by fire. "We spent the early part of the
 mornings (says the historian of the voyage), in firing
 the outmost houses; but they being built very mag-
 nificently of stone, with high loftes, gave us no small
 travell to ruin them. And albeit, for divers dayes
 together, we ordeined ech morning by day-break,
 until the heat began at nine of the clocke, that two
 hundred mariners did nought els but labour to fire

* From a translation by Richard Eden, printed, London 1555, in
 black letter.

and burn the said houses, whilst the souldiers in a like proportion, stood forth for their guard; yet did we not, or could not, in this time, consume so much as one third part of the towne; and so in the end, wearied with firing, we were contented to accept of five and twenty thousand ducats, of five shillings and sixpence the peece, for the ransome of the rest of the towne."*

Of the present condition of this ancient city, the number of its inhabitants, and the commerce which

* The following anecdote, related by the same author, is too striking to be overlooked. I shall quote his own words: During the stay of the English army in the city, "it chanced that the general sent on a message to the Spanish governor, a negro boy with a flag of white, signifying truce, as is the Spaniards ordinarie manner to do there, when they approach to speak to us; which boy unhappily was first met withall by some of those who had been belonging as officers for the king in the Spanish galley, which, with the towne, was lately fallen into our hands, who, without all order or reason, and contrary to that good usage wherewith wee had intertained their messengers, furiously strooke the poor boy thorow the body, with which wound the boy returned to the general, and, after he had declared the manner of this wrongfull crueltie, died forthwith in his presence; wherewith the generall being greatly passion'd, commanded—the provost martiall to cause a couple of friers, then prisoners, to be carried to the same place where the boy was stroken, and there presently to be hanged; despatching, at the same instant, another poor prisoner, with the reason wherefore this execution was done, and with this further message, that until the party who had thus murdered the general's messenger, were delivered into our hands to receive condigne punishment, there should no day passe wherein there should not two prisoners be hanged, until they were all consumed which were in our hands. Whereupon the day following, hee that had been captaine of the king's galley, brought the offender to the towne's end, offering to deliver him into our hands; but it was thought to be a more honourable revenge to make them there, in our sight, to performe the execution themselves, which was done accordingly."

they support, I can obtain no account on which I can depend. That it hath been long in its decline, I have no doubt; but that it is wholly depopulated and in ruins, as Raynal asserts, I do not believe. The cathedral and other public buildings are still in being, and were lately the residence of a considerable body of clergy and lawyers. The city continued also, while under the Spanish government, the diocese of an archbishop, to whom, it is said, the bishops of St. Jago in Cuba, Venezuela in New Spain, and St. John's in Porto Rico, were suffragans. These circumstances, have hitherto saved St. Domingo from entire decay, and may possibly continue to save it. With this very defective information the reader must be content. As little seems to be known concerning the state of agriculture in the Spanish possessions in this island, as of their capital and commerce. A few planters are said to cultivate cacao, tobacco, and sugar, for their own expenditure; and, perhaps some small quantities of each are still exported for consumption in Spain. The chief article of exportation, however, continues to be, what it always has been since the mines were abandoned, *the hides of horned cattle*; which have multiplied to such a degree, that the proprietors are said to reckon them by thousands; and vast numbers (as I believe I have elsewhere observed), are annually slaughtered solely for the skins.*

It seems therefore extremely probable, that the cultivation of the earth is almost entirely neglected throughout the whole of the Spanish dominion in this

* It is said that a Company was formed at Barcelona in 1757, with exclusive privileges, for the re-establishment of agriculture and commerce in the Spanish part of St. Domingo: I know not with what success.

island; and that some of the finest tracts of land in the world, once the paradise of a simple and innocent people, are now abandoned to the beasts of the field, and the vultures which hover round them.*

Of this description, probably, is the country already mentioned, called Llos Llanos, which stretches eastward from the capital, upwards of fourscore British miles in length, by twenty or twenty-five in width; and which, abounding in rivers throughout, may be supposed adapted for the growth of every tropical production: It seems capable also of being artificially flooded in dry weather.

Next to Llos Llanos in magnitude, but superior, it is believed, in native fertility, is the noble valley to the north, called Vega Real; through the middle of which flows the river Yuna, for the space of fifty miles, and disembogues in Samana bay to the east. Perhaps it were no exaggeration to say, that this and the former districts are alone capable of producing more sugar, and other valuable commodities, than all the British West Indies put together.

These plains, however, though in contiguity the largest, are not the only parts of the country on which nature has bestowed extraordinary fertility. Glades abundantly rich, easy of access, and obvious to cultivation, are every where found even in the bosom of the mountains; while the mountains themselves

* The *Gallinazo*, or American vulture, a very ravenous and filthy bird that feeds on carrion. These birds abound in St. Domingo, and devour the carcasses of the cattle as soon as the skins are stripped off by the hunters.

contribute to fertilize the vallies which they encircle.

Proceeding westward along the southern coast, from the capital to the river Nieva, the country is said to be subject to excessive droughts; but here too, the beneficence of nature has provided a remedy for this inconvenience, in a thousand beautiful rivulets, which, descending from the distant mountains, intersect the low lands in various directions. Of this never-failing resource, even the aboriginal natives, ignorant as we suppose them to have been, knew how to avail themselves by flooding their lands therefrom in the dry season;*—and it is probable that some of the earliest of the Spanish settlers followed their example; for it is evident that many spots in this great tract were formerly covered with plantations, both of sugar and indigo; their sites being marked out by the ruins of ancient buildings, which could have been erected only for the manufacture of those articles. Amidst the wilderness of thickets and weeds, which now deform and encumber the ground, are discovered many valuable growths in a state of wild luxuriance, such as the *cactus* of several varieties, the indigo plant, a species of cotton, of which the wool is reddish, and some others; pointing out to the present slothful possessors, that line of cultivation which would turn to profitable account, even in spots to which water could not easily be conducted. With this auxiliary there is no reason to doubt that every production of the tropics might be raised throughout this district, in the utmost plenty and perfection.

* Vide vol. i. p. 86.

By much the greatest part of this extensive range, however, remains as Nature originally created it; covered with woods of immense growth and luxuriant foliage, with very little underwood. The mahogany, the cedar, the guaiacum, the bitter-ash, the fustic, and a thousand others, here flourish, and die unmolested. In some places are vast groves of the latanier or thatch-palm, the sight of which always gives pleasure to the beholder, not more from the singular conformation and beauty of the tree itself, than from the circumstance that it indicates, with unerring certainty, a rich and deep soil underneath.

The great obstacle to the re-establishment of towns and settlements on the southern coast, arises from the insufficiency of its ports and harbours;—many of the shipping places being nothing more than open bays, which, in the autumnal months, lie exposed to the fury of storms and hurricanes. The harbour of St. Domingo, which was formerly supposed to be commodious and secure, has become, in the course of years, too shallow to admit ships of large burthen;—but its loss might be happily supplied, at the distance of fourteen leagues to the westward, in the bay of Ocoa; a capacious inlet, comprehending two most safe and commodious ports, named *Caldera* and *Puerto Rico*. The very advantageous position of this great bay, in the centre of the southern part of the island;—in the track, and almost in sight, of ships bound to Jamaica, and the Mexican gulph;—the safety and security which it offers at all seasons of the year, in the two subordinate ports before mentioned;—all these are circumstances of importance; and they will, without doubt, attract the notice of the French

government, whenever it shall hereafter attempt to form any considerable establishment in the late Spanish part of this great country.*

Thus scanty and uninteresting is the best account I have to give of the territory itself; nor is my information much more perfect concerning the number and condition of the people by whom it is at present inhabited. The earliest detachments from Old Spain were undoubtedly numerous. Herrera, an accurate and well-informed historian, reckons that there were, at one period, no less than 14,000 Castillians in Hispaniola. Such was the renown of its riches, that men of all ranks and conditions resorted thither, in the fond expectation of sharing in the golden harvest. Its mines, indeed, were very productive. Robertson relates, that they continued for many years to yield a revenue of 460,000 pesos.† In contrasting this fact, with an anecdote which I have elsewhere ‡ recorded, that the inhabitants, at the time of Drake's invasion, were so wretchedly poor, as to be compelled to use, in barter among themselves, *pieces of leather* as a substitute for money, we are furnished with a

* Most of what is given in the above, and the preceding page, is added since the former edition. The author derived his information from a letter to the French directory, written in 1798, by certain commissioners employed to examine the eastern part of St. Domingo, and report to the Directory concerning its agriculture and production. This letter, which is one only of a large series, having been sent by a vessel that was captured by a British cruiser, was put into the hands of the author, and, as far as it goes, is very intelligent and satisfactory. It is to be hoped the remainder of the correspondence will some time or other be made public, as the writers appear to be men of science and observation.

† Upwards of £. 100,000 sterling.

‡ Vol. i. book 2d.

striking proof, that the true way to acquire riches, is not by digging into the bowels, but by improving the surface, of the earth. Not having any manufactures, nor the productions of agriculture, to offer in exchange for the necessaries and conveniences of life, all their gold had soon found its way to Europe; and when the mines became exhausted, their penury was extreme; and sloth, depopulation, and degeneracy, were its necessary consequences.*

The introduction into this island of negroes from Africa, of which I have elsewhere traced the origin and cause,† took place at an early period. This resource did not, however, greatly contribute to augment the population of the colony; for such of the whites as removed to the continent in search of richer mines and better fortune, commonly took their negroes with them; and the small pox, a few years afterwards, destroyed prodigious numbers of others. In 1717, the whole number of inhabitants under the Spanish dominion, of all ages and conditions,

* The gross ignorance of considering gold and silver as *real* instead of *artificial* wealth, and the folly of neglecting agriculture for the sake of exploring mines, have been well exposed by Abbé Raynal; who compares the conduct of the Spaniards in this respect, to that of the dog in the fable, dropping the piece of meat which he had in his mouth, to catch at the shadow of it in the water.

† Book iv. c. 2. A curious circumstance was, however, omitted. When the Portuguese first began the traffic in negroes, application was made to the Pope to sanctify the trade by a bull, which his Holiness issued accordingly. In consequence of this permission and authority, a very considerable slave-market was established at Lisbon, inasmuch, that about the year 1539, from 10 to 12,000 negroes were sold there annually.

enslaved and free, were no more than 18,410, and since that time, I conceive, they have rather diminished than increased. Of pure whites, (in contradistinction to the people of mixed blood), the number is undoubtedly very inconsiderable; perhaps not 3,000 in the whole.

The hereditary and inextinguishable animosity between the Spanish and French planters on this island, has already been noticed. It is probable, however, that the knowledge of this circumstance created greater reliance on the co-operation of the Spaniards with the British army, than was justified by subsequent events. At the earnest and repeated solicitations of Lieutenant-Colonel Brisbane, in 1794, orders were indeed transmitted from the city of St. Domingo to the commandant at Verettes, Don Francisco de Villa Nueva, to join the English with the militia of that part of the country; the British garrison at St. Marc undertaking to supply them with provisions and ammunition: but these orders were ill obeyed. Not more than three hundred men were brought into the field, and even those were far from being hearty in the common cause. The French loyalists appeared in greater numbers in the neighbourhood of St. Marc than in any other district; and the Spaniards detested the French colonists of all descriptions. It was evident, at the same time, that they were almost equally jealous of the English; betraying manifest symptoms of discontent and envy, at beholding them in possession of St. Marc, and the fertile plains in its vicinity. They proceeded, however, and took the town and harbour of Gonaïve; but their subsequent conduct manifested the basest treachery, or the rankest cow-

ardice. The town was no sooner attacked by a small detachment from the revolted negroes, than the Spaniards suffered themselves to be driven out of it, in the most unaccountable manner; leaving the French inhabitants to the fury of the savages, who massacred the whole number, (as their comrades had done at Fort Dauphin), and then reduced the town itself to ashes.*

On the whole, there is reason to suppose that a great proportion of the present Spanish proprietors in St. Domingo are a debased and degenerate race; a motley mixture from European, Indian, and African

* In the northern province of the French colony, the inhabitants of Fort Dauphin, a town situated on the Spanish borders, having no assistance from the English, and being apprehensive of an attack from the rebel negroes, applied for protection, and delivered up the town to the Spanish government. The Spanish commandant, on accepting the conditions required, which were chiefly for personal safety, issued a proclamation, importing, that such of the French planters as would seek refuge there, should find security. Seduced by this proclamation, a considerable number repaired thither; when, on Monday the 7th of July 1794, Jean François, the negro general, and leader of the revolt in 1791, entered the town with some thousands of armed negroes. He met not the smallest resistance, either at the advanced posts, or at the barriers occupied by the Spanish troops; the inhabitants keeping their houses, in the hope of being protected by the commandant. In an instant, every part of the city resounded with the cry of "Long live the king of Spain! Kill all the French; but offer no violence to the Spaniards;" and a general massacre of the French commenced, in which no less than 771 of them, without distinction of sex or age, were murdered on the spot: the Spanish soldiers standing by, spectators of the tragedy. It is thought, however, that if the Spaniards had openly interposed, they would have shared the fate of the French. It is said that Mont-Calvos, commander of the Spanish troops, moved by compassion towards some French gentlemen of his acquaintance, admitted them into the ranks, dressing them in the Spanish uniform for their security; others were secretly conveyed to the fort, and sent off in the night to Monte Christi, where they got on board an American vessel belonging to Salem.

ancestry; and the observation which has been made in another place,* concerning the Spanish inhabitants of Jamaica, at the conquest of that island in 1655, will equally apply to these. They are neither polished by social intercourse, nor improved by education; but pass their days in gloomy languor, enfeebled by sloth, and depressed by poverty. From such men, therefore, great as their antipathy is to the French nation, and however averse they may be to a change of laws and government, I am afraid that no cordial co-operation with the British can ever be expected. The best families among them, rather than submit to the French dominion, will probably remove to Cuba, or seek out new habitations among their countrymen on the neighbouring continent; while those which remain will necessarily sink into the general mass of coloured people, French and Spanish; a class that, I think, in process of time, will become masters of the towns and cultivated parts of the island on the sea-coast; leaving the interior country to the revolted negroes. Such, probably, will be the fate of this once beautiful and princely colony; and it grieves me to say, that the present exertions of Great Britain on this blood-stained theatre, can answer no other end than to hasten the catastrophe!

I might here expatiate on the wonderful dispensations of Divine Providence, in raising up the enslaved Africans to avenge the wrongs of the injured aborigines: I might also indulge the fond but fallacious idea, that as the negroes of St. Domingo have been eye-witnesses to the benefits of civilized life

among the whites;—have seen in what manner, and to what extent, social order, peaceful industry, and submission to laws, contribute to individual and general prosperity, (advantages which were denied to them in their native country;) some superior spirits may hereafter rise up among them, by whose encouragement and example they may be taught, in due time, to discard the ferocious and sordid manners and pursuits of savage life; to correct their vices, and be led progressively on to civilization and gentleness, to the knowledge of truth, and the practice of virtue. This picture is so pleasing to the imagination, that every humane and reflecting mind must wish it may be realized; but I am afraid it is the mere creation of the fancy—"the fabrick of a vision!" Experience has demonstrated, that a wild and lawless freedom affords no means of improvement, either mental or moral. The Charaibes of St. Vincent, and the Maroon negroes of Jamaica, were originally enslaved Africans; and *what they now are*, the freed negroes of St. Domingo *will hereafter be*—savages in the midst of society; without peace, security, agriculture, or property; ignorant of the duties of life, and unacquainted with all the soft and endearing relations which render it desirable; averse to labour, though frequently perishing of want; suspicious of each other, and towards the rest of mankind revengeful and faithless, remorseless and bloody minded; pretending to be free, while groaning beneath the capricious despotism of their chiefs, and feeling all the miseries of servitude, without the benefits of subordination!

If what I have thus—not hastily, but—deliberately predicted, concerning the fate of this unfortunate

country, shall be verified by the event, all other reflections must yield to the pressing consideration, how best to obviate and defeat the influence which so dreadful an example of successful revolt and triumphant anarchy may have in our own islands. This is a subject which will soon force itself on the most serious attention of Government; and I am of opinion, that nothing less than the co-operation of the British parliament with the colonial legislatures can meet its emergency. On the other hand, if it be admitted that the object is infinitely too important, and the means and resources of France much too powerful and abundant, to suffer a doubt to remain concerning the ultimate accomplishment of her views, in seizing on the whole of this extensive country: if we can suppose that (convinced at length, by painful experience, of the monstrous folly of suddenly emancipating barbarous men, and placing them at once in all the complicated relations of civil society), she will finally succeed in reducing the vast body of fugitive negroes to obedience; and in establishing security, subordination, and order, under a constitution of government suited to the actual condition of the various classes of the inhabitants—if such shall be her good fortune, it will not require the endowment of prophecy to foretel the result. The middling, and who are commonly the most industrious class of Planters, throughout every island in the West Indies, allured by the cheapness of the land and the superior fertility of the soil, will assuredly seek our settlements in St. Domingo; and a West Indian empire will fix itself in this noble island, to which, in a few short years, all the tropical possessions of Europe will be found subordinate and tributary. Placed in the centre of British and Spanish

America, and situated to windward of those territories of either nation which are most valuable, while the commerce of both must exist only by its good pleasure, all the riches of Mexico will be wholly at its disposal. Then will the vassal Spaniard lament, when it is too late, the thoughtless and improvident surrender he has made, and Great Britain find leisure to reflect, how deeply she is herself concerned in the consequences of it. The dilemma is awful, and the final issue known only to that omniscient Power, in whose hand is the fate of empires! But whatever the issue may be,—in all the varieties of fortune,—in all events and circumstances, whether prosperous or adverse,—it infinitely concerns both the people of Great Britain, and the inhabitants of the British colonies,—I cannot repeat it too often,—to derive admonition from the story before us. To Great Britain I would intimate, that if, disregarding the present example, encouragement shall continue to be given to the pestilent doctrines of those hot-brained fanatics, and detestable incendiaries, who, under the vile pretence of philanthropy and zeal for the interests of suffering humanity, preach up rebellion and murder to the contented and orderly negroes in our own territories, what else can be expected, but that the same dreadful scenes of carnage and desolation, which we have contemplated in St. Domingo, will be renewed among our countrymen and relations in the British West Indies? May God Almighty, of his infinite mercy, avert the evil! To the resident Planters I address myself with still greater solicitude; and, if it were in my power, would exhort them, “with more than mortal voice,” to rise above the foggy atmosphere of local prejudices, and, by a generous surrender of temporary advantages, do that, which the Parliament of

Great Britain, in the pride and plenitude of imperial dominion, cannot effect, and ought not to attempt. I call on them, with the sincerity and the affection of a brother, of themselves to restrain, limit and finally abolish the further introduction of enslaved men from Africa; not indeed by measures of sudden violence and injustice, disregarding the many weighty and complicated interests which are involved in the issue; but by means which, though slow and gradual in their operation, will be sure and certain in their effect. The Colonial Legislatures, by their situation and local knowledge, are alone competent to this great and glorious task: and this example of St. Domingo, and the dictates of self-preservation, like the hand-writing against the wall, warn them no longer to delay it! Towards the poor negroes over whom the statutes of Great Britain, the accidents of fortune, and the laws of inheritance, have invested them with power, their general conduct for the last twenty years (notwithstanding the foul calumnies with which they have been loaded), may court inquiry, and bid defiance to censure. A perseverance in the same benevolent system, progressively leading the objects of it to civilization and mental improvement, preparatory to greater indulgence, is all that humanity can require; for it is all that prudence can dictate. Thus will the Planters prepare a shield of defence against their enemies, and secure to themselves that serenity and elevation of mind, which arise from an approving conscience; producing assurance in hope, and consolation in adversity. Their persecutors and slanderers in the mean time will be disregarded or forgotten; for calumny, though a great, is a temporary evil, but truth and justice will prove triumphant and eternal!

TO THE

The following TABLES were drawn up by order of the Legislative Assembly of FRANCE, which met the first of October 1791, and seem to have been framed in the view of ascertaining the actual state of the Colony, and its Commerce, immediately before the breaking out of the rebellion of the Negroes in the month of August of that year. The totals will be found to differ, in some of the particulars, from the statement which has been given in the preceding pages. The difference arises partly from the actual change of circumstances in the course of two years which intervened between the periods when each statement was made up, and partly, I am afraid, from errors and omissions of my own.

CHAPTER IV. p. 53.

It was discovered, however, about nine months afterwards, that this most unfortunate young man (Ogè) had made a full confession. His last solemn declaration, sworn to, and signed by himself the day before his execution, was actually produced, &c.

THE FOLLOWING IS A COPY OF THIS IMPORTANT DOCUMENT.

TESTAMENT DE MORT D'OGE.

Extrait des minutes du Conseil Supérieur du Cap, l'an mil sept cent quatre-vingt-onze et le neuf mars, nous Antoine-Etienne Ruotte, conseiller du roi, doyen au Conseil Supérieur du Cap, et Marie-François Pourcheresse de Vertieres, aussi conseiller du roi au Conseil Supérieur du Cap, commissaires nommés par la cour, à l'effet de faire exécuter l'arrêt de la dite cour, du 5 du présent mois, portant condamnation de mort contre le nommé Jacques Ogé, dit Jacquot, quarteron libre; lequel, étant en la chambre criminelle, et après lecture faite du dit arrêt, en ce qui le concerne, a dit et déclaré, pour la décharge de sa conscience, serment préalablement par lui prêté, la main levée devant nous, de dire vérité.

QUE dans le commencement du mois de février dernier, si les rivières n'avoient pas été débordées, il devoit se faire un attroupement de gens de couleur, qui devoient entraîner avec eux les ateliers, et devoient venir fondre sur la ville du Cap en nombre très considérable; qu'ils

étaient même déjà réunis au nombre de onze mille hommes; que le débordement des rivières est le seul obstacle qui les a empêchés de se réunir; cette quantité d'hommes de couleur étant composée de ceux du Mirebalais, de l'Artibonite, du Limbe, d'Ouanaminthe, de la Grande Rivière, et généralement de toute la Colonie. Qu'à cette époque, il étoit sorti du Cap cent hommes de couleur pour se joindre à cette troupe. Que l'accusé est assuré que les auteurs de cette révolte sont les Declains, nègres libres de la Grande Rivière, accusés au procès; Dumas, n. l.; Yvon, n. l.; Bitozin, m. l. espagnol; Pierre Godard et Jean-Baptiste, son frère, n. l. de la Grande Rivière; Legrand Mazeau et Toussaint Mazeau, n. l.; Pierre Mauzi, m. l.; Ginga Lapaire, Charles Lamadieu, les Sabourins, Jean Pierre Goudy, Joseph Lucas, mulâtres libres; Maurice, n. l.; tous accusés au procès.

Que les grands moteurs, au bas de la côte, sont les nommés Daguin, accusé au procès; Rebel, demeurant au Mirebalais; Pinchinat, accusé au procès; Labastille, également accusé au procès; et que l'accusé, ici présent, croit devoir nous déclarer être un des plus ardens partisans de la révolte, qui a mu en grande partie celle qui a éclaté dans les environs de Saint-Marc, et qui cherche à en exciter une nouvelle; qu'il y a dans ce moment plusieurs gens de couleur, dans differens quartiers, bien résolus à tenir à leurs projets, malgré que ceux qui tremperoient dans la révolte perdroient la vie; que l'accusé, ici présent, ne peut pas se ressouvenir du nom de tous; mais qu'il se rappelle que le fils de Laplace, q. l.; dont lui accusé a vu la sœur dans les prisons, a quitté le Limbé pour aller faire des recrues dans le quartier d'Ounaminthe; et que ces recrues et ces soulèvemens de gens de couleur sont soutenus ici par la présence des nommés Fleury et l'Hirondelle Viard, députés des gens de couleur auprès de l'assemblée nationale; qui lui accusé, ici présent, ignore si les députés se tiennent chez eux; qu'il croit que le nommé Fleury se tient au Mirebalais, et le nommé l'Hirondelle Viard dans le quartier de la Grande Rivière.

Que lui accusé, ici présent, déclare que l'insurrection des revoltés existe dans les souterrains qui se trouvent entre la Crête à Marcan et le Canton du Giromon; paroisse de la Grande-Rivière; qu'en conséquence, si lui accusé pouvoit être conduit sur les lieux, il se feroit fort de prendre les chefs des revoltés; que l'agitation dans laquelle il se trouve, relativement à sa position actuelle, ne lui permet pas de nous donner des détails plus circonstanciés; qu'il nous les donnera par la suite, lorsqu'il sera un peu plus tranquille; qu'il lui vient en ce moment

à l'esprit que le nommé Castaing, mulâtre libre de cette dépendance; ne se trouve compris en aucune manière dans l'affaire actuelle; mais que lui accusé, nous assure que si son frère Ogé eût suivi l'impulsion du dit Castaing, il se seroit porté à de bien plus grandes extrémités; qui est tout ce qu'il nous a dit pouvoir nous déclarer dans ce moment, dont lui avons donné acte, qu'il a signé avec nous et le greffier.

Signé à la minute J. OGE', RUOTTE, POURCHERESSE DE VERTIERES, et LANDAIS, greffier.

Extrait des minutes du grèffe du Conseil Supérieur du Cap, l'an mil sept cent quatre-vingt-onze, le dix mars, trois heures de relevée, en la chambre criminelle, nous Antoine-Etienne Ruotte, conseiller du roi, doyen du Conseil Supérieur du Cap, et Marie François-Joseph de Vertières, aussi conseiller du roi au dit Conseil Supérieur du Cap, commissaires nommés par la cour, suivant l'arrêt de ce jour, rendu sur les conclusions du procureur général du roi de la dite cour, à l'effet de procéder au recolement de la déclaration faite par le nommé Jacques Ogé, q. l.; lequel, après ferment par lui faite, la main levée devant nous de dire la vérité, et après lui avoir fait lecture, par le greffier, de la déclaration du jour d'hier, l'avons interpellé de nous déclarer si la dite déclaration contient vérité, s'il veut n'y rien ajouter, n'y diminuer, et s'il y persiste.

A répondu que la dite déclaration du jour d'hier contient vérité, qu'il y persiste, et qu'il y ajoute que les deux Didiers frères, dont l'un plus grand que l'autre, mulâtres ou quarterons libres, ne les ayant vu que cette fois; Jean-Pierre Gerard, m. l. du Cap, et Caton, m. l. aussi du Cap, sont employés à gagner les ateliers de la Grande-Rivière, qu'ils sont ensemble de jour, et que de nuit ils sont dispersés.

Ajoute encore que lors de sa confrontation avec Jacques Lucas, il a été dit par ce dernier, que lui accusé, ici présent, l'avoit menacé de le faire pendre; à quoi, lui accusé, a répondu au dit Jacques Lucas, qu'il devoit savoir pourquoi que le dit Jacques Lucas, n'ayant pas insisté, lui accusé n'a pas déclaré le motif de cette menace, pour ne pas perdre le dit Jacques Lucas; qu'il nous déclare les choses comme elles se sont passées; que le dit Lucas lui ayant dit qu'il avoit soulevé les ateliers de M. Bonamy et de divers autres habitants de la Grande-Rivière, pour aller égorger l'armée chez M. Cardineau; qu'au premier coup de corne, il étoit sûr que ces ateliers s'attrouperoit et se joindroient à la troupe des gens de couleur; alors lui accusé, tenant aux blancs, fut révolté de cette barbarie, et dit au nommé Jacques Lucas, que l'auteur d'un

pareil projet méritoit d'être pendu; qu'il eût à l'instant à faire rentrer les nègres qu'il avoit apposté dans différens coins avec des cornes; que lui accusé, ici présent, nous déclare qu'il a donné au dit Lucas trois pomponelles de tafia, trois bouteilles de vin et du pain; qu'il ignoroit l'usage que le dit Lucas en faisoit; que la troisième fois que le dit Lucas en vint chercher; lui accusé, ici présent, lui ayant demandé ce qu'il faisoit de ces boissons et vivres; le dit Lucas répondit que c'étoit pour les nègres qu'il avoit dispersé de côté et d'autre; que ce qui prouve que le dit Lucas avoit le projet de soulever les nègres esclaves contre les blancs, et de faire égorger ces derniers par les premiers; c'est la proposition qu'il fit à Vincent Ogé, frère de lui accusé, de venir sur l'habitation de lui Jacques Lucas, pour être plus à portée de se joindre aux nègres qu'il avoit débauché; que si lui accusé n'a pas révélé ces faits à sa confrontation avec le dit Jacques Lucas, c'est qu'il s'est aperçu qu'ils n'étoient pas connus, et qu'il n'a pas voulu le perdre; qu'il a du moins la satisfaction d'avoir détourné ce crime horrible et cannibale; qu'il s'étoit réservé de révéler en justice, lors de son élargissement; que ce même Lucas est celui qui a voulu couper la tête à deux blancs prisonniers, et notamment au sieur Belisle, pour lui avoir enlevé une femme; que Pierre Roubert ôta le sabre des mains de Jacques Lucas, et appella Vincent Ogé, frère de lui accusé, ici présent, qui fit des rémontrances audit Lucas; que cependant ces prisonniers ont déclarés en justice que c'étoit lui accusé qui avoit eu ce dessein; que même à la confrontation ils le lui ont soutenu; mais que le fait s'étant passé de nuit, les dits prisonniers sont pris, lui accusé, pour le dit Lucas, tandis que lui accusé n'a cessé de les combler d'honnêtetés; qu'à la confrontation, lui accusé a cru qu'il étoit suffisant de dire que ce n'étoit pas lui, et d'affirmer qu'il n'avoit jamais connu cette femme; mais qu'aujourd'hui il se croyoit obligé, pour la décharge de sa conscience, de nous rendre les faits tels qu'ils sont, et d'insister à jurer qu'il ne l'a jamais connue.

Ajoute l'accusé que le nommé Fleury et Perisse, le premier, l'un des députés des gens de couleur près de l'assemblée nationale, sont arrivés en cette Colonie par un bâtiment Bordelais avec le nommé l'Hirondelle Viard; que le capitaine a mis les deux premiers à Acquin, chez un nommé Dupont, homme de couleur; et le nommé l'Hirondelle Viard, également député des gens de couleur, au Cap. Ajoute encore l'accusé, qu'il nous avoit déclaré, le jour d'hier, que le nommé Laplace, dont le père est ici dans les prisons, faisant des recrues à Ouanaminthe, est du nombre de ceux qui ont marché du Limbé contre le Cap; que pour

Éloigner les soupçons, il est allé au Port-Margot, où il s'est tenu caché plusieurs jours, feignant d'avoir une fluxion ; que le dit Laplace père a dit, à lui accusé, qu'il étoit sûr que son voisin, qui est un blanc, ne déposera pas contre lui, malgré qu'il sache toutes ses démarches ; qu'il étoit assuré que le nommé Girardeau, détenu en prison, ne déclareroit rien, parce qu'il étoit trop son ami pour le découvrir ; qu'ensuite, s'il le dénonçoit, il seroit forcé d'en dénoncer beaucoup d'autres, tant du Limbé que des autres quartiers.

Observe l'accusé que lorsqu'il nous a parlé des moyens employés par Jacques Lucas pour soulever les nègres esclaves, il a omis de nous dire que Pierre Maury avoit envoyé une trentaine d'esclaves chez Lucas ; que lui accusé, avec l'agrément d'Ogé le jeune, son frère, les renvoya, ce qui occasionna une plainte générale, les gens de couleur disant que c'étoit du renfort ; que lui accusé eut même à cette occasion une rixe avec le plus grand des Didiers, avec lequel il manqua de se battre au pistolet, pour vouloir lui soutenir qu'étant libre et cherchant à être assimilé aux blancs, il n'étoit pas fait pour être assimilé aux nègres esclaves ; que d'ailleurs soulevant les esclaves, c'étoit détruire les propriétés des blancs, et qu'en les détruisant, ils détruisoient les leurs propres ; que depuis que lui accusé étoit dans les prisons, il a vu un petit billet écrit par ledit Pierre Maury à Jean-François Tessier, par lequel il lui marque qu'il continue à ramasser, et que le nègre nommé Coquin, alla à la dame veuve Castaing aînée, armé d'une paire de pistolets garnis en argent et d'une manchette que le dit Maury lui a donnée, veille à tout ce qui se passe, et rend compte tous les soirs audit Maury ; qui est tout ce que l'accusé, ici présent, nous déclare, en nous conjurant d'être persuadés que, s'il lui étoit possible d'obtenir miséricorde, il s'exposeroit volontiers à tous les dangers pour faire arrêter les chefs de ces révoltés ; et que dans toutes les circonstances, il prouvera son zèle et son respect pour les blancs.

Lecture à lui faite de sa déclaration, dans laquelle il persiste pour contenir vérité, lui en donnons acte, qu'il a signé avec nous et le greffier.

Signé à la minute J. OGE', RUOTTE, POUCHERESSES DE VERTIERES, et LANDAIS, greffier.

Pour expedition collationée, signé, LANDAIS, greffier,

A Copy of the preceding document, the existence of which I had often heard of, but very much doubted, was transmitted to me from St. Do-

mingo in the month of July 1795, inclosed in a letter from a gentleman of that island, whose attachment to the British cannot be suspected, and whose means for information were equal to any: This Letter is too remarkable to be omitted, and I hope, as I conceal his name, that the writer will pardon its publication: It here follows.

Je vous envoie ci joint, le testament de Jaques Ogé exécuté au Cap le 9 Mars 1791. Voici mes réflexions sur les dates et les faits :

1°. Jacques Ogé dépose le projet connu depuis long tems par les Brissotins dont il étoit un des Agents. Il nomme les chefs des Mulâtres, qui dans toutes les parties de la Colonie devoient exécuter un plan digne des Suppôts de l'enfer.

2°. Il dépose que l'abondance des pluies et les cruës des rivières avoient empêché l'exécution du projet au mois de Février.

3°. Il déclare que si on veut lui accorder miséricorde, il s'exposera aux dangers de faire arrêter les chefs.

Ogé est exécuté, avec vingt de ses complices, le 9 Mars 1791. Son testament est gardé secret jusqu'à la fin de 1791 (après l'incendie générale de la partie du Nord) qu'un arrêté de l'Assemblée Coloniale oblige impérieusement le Greffier du Conseil du Cap à en délivrer des copies. Que conclure? Hélas, que les coupables sont aussi nombreux qu'atroces et cruels!

iers. Coupables: Les hommes de couleur nommés par la déposition d'Ogé.

2. (et au moins autant s'ils ne sont plus.) Le Conseil du Cap, qui a osé faire exécuter Ogé, et qui a gardé le secret sur ses dépositions si intéressantes.

3. Le Général Blanchelande et tous les chefs militaires qui n'ont pas fait arrêter sur le champ toutes les personnes de Couleur nommées par Ogé et ne les ont pas confrontées avec leur accusateur. Mais non: on a précipité l'exécution du malheureux Ogé; on a gardé un secret dont la publicité sauveroit la Colonie. On a laissé libres tous les chefs des révélés; on les a laissé pour suivre leurs projets destructifs.

Si les Chefs militaires, le conseil, les magistrats civils, avoient fait arrêter au mois de Mars 1791, les Mulâtres Pinchinat, Castaing, Viard, et tous les autres, ils n'auroient pas pu consommer leur crime le 25 Août suivant. Les Régimens de Normandie et d'Artois qui venoient d'arriver de France, étoient assez forts pour arrêter tous les gens de couleur coupables, et s'ils ne l'avoient pas été, et que ce fut le motif, qui eut empêché Blanchelande d'agir, pourquoi Blanchelande envoyait-il, au mois de Mai 1791, des troupes de ligne que lui envoyoit de la Martinique, M. de Behague?

La série de tous ces faits prouve évidemment la coalition des contre révolutionnaires avec les Mulâtres, dont ils ont été la dupe, et la victime après l'arrivée des Commissaires Polverel et Santhonax.

CHAPTER VI. p. 35.

A truce or convention called the CONCORDAT was agreed upon the 11th of September between the free people of colour and the white inhabitants of Port-au-Prince, &c. The following is a true copy of this curious and important document :

CONCORDAT de MM. les citoyens blancs du Port-au-Prince avec MM. les citoyens de couleur.

L'AN mil sept cent quatre-vingt-onze, et le onze du mois de Septembre.

Les commissaires de la garde nationale des citoyens blancs du Port-au-Prince, d'une part;

Et les commissaires de la garde nationale des citoyens de couleur, d'autre part; et ceux fondés de pouvoir par arrêté de ce jour, et du neuf Septembre présent mois.

Assemblés sur la place d'armes du bourg de la Croix-des-Bouquets, à l'effet de délibérer sur les moyens les plus capables d'opérer la réunion des citoyens de toutes les classes, et d'arrêter les progrès et les suites d'une insurrection qui menace également toutes les parties de la colonie,

L'assemblée ainsi composée s'étant transportée dans l'église paroissiale du dit bourg de la Croix-des-Bouquets, pour éviter l'ardeur du soleil, il a été procédé de suite, des deux côtés, à la nomination d'un président et d'un secrétaire.

Les commissaires de la garde nationale du Port-au-Prince ont nommé pour leur président M. Gamot, et pour leur secrétaire M. Hacquet; et les commissaires de la garde nationale des citoyens de couleur ont nommé pour leur président M. Pinchinat, et secrétaire M. Daguin fils.

Lesquels présidens et secrétaires ont respectivement accepté les dites charges, et ont promis de bien et fidèlement s'en acquitter.

Après quoi il a été dit de la part des citoyens de couleur, que la loi faite en leur faveur en 1685, avoit été méprisée et violée par les progrès d'un préjugé ridicule, et par l'usage abusif et le despotisme ministériel de l'ancien régime, ils n'ont jamais joui que très-imparfaitement du bénéfice de cette loi.

Qu'au moment où ils ont vu l'assemblée des représentans de la nation se former, ils ont pressenti que les principes qui ont dicté la loi constitutionnelle de l'état, entraîneroit nécessairement la reconnaissance de leurs droits qui, pour avoir été long-temps méconnus, n'en étoient pas moins sacrés.

Que cette reconnaissance a été consacrée par les décrets et instructions des 8 et 28 Mars 1790, et par plusieurs autres rendus depuis; mais qu'ils ont vu avec la plus vive douleur que les citoyens blancs des colonies leur refusoient avec obstination l'exécution de ces décrets, pour ce qui les y concerne, par l'interprétation injuste qu'ils en ont faite.

Qu'outre la privation du bénéfice des dits décrets, lorsqu'ils ont voulu les réclamer, on les a sacrifiés à l'idole du préjugé, en exerçant contre eux un abus incroyable des lois et de l'autorité du gouvernement, au point de les forcer d'abandonner leurs foyers.

Qu'enfin, ne pouvant plus supporter leur existence malheureuse, et étant résolus de l'exposer à tous les évènements, pour se procurer l'exercice des droits qu'ils tiennent de la nature et qui sont consacrés par les lois civiles et politiques, ils se sont réunis sur la montagne de la Char-

bonnière, où ils ont pris les armes, le 31 Août dernier, pour se mettre dans le cas d'une juste défense.

Que l'envie d'opérer la réunion de tous les citoyens indistinctement leur fait accueillir favorablement la députation de MM. les commissaires Blancs de la garde nationale du Port-au-Prince ; qu'ils voyent avec une satisfaction difficile à exprimer le retour des citoyens blancs aux vrais principes de la raison, de la justice, de l'humanité et de la saine politique, qu'ayant tout lieu de croire à la sincérité de ce retour ils se réuniront de cœur, d'esprit et d'intention aux citoyens blancs, pourvu que la précieuse et sainte égalité soit la base et le résultat de toutes opérations, qu'il n'y ait entre-eux et les citoyens blancs, d'autre différence que celle qu'entraînent nécessairement le mérite et la vertu, et que la fraternité, la sincérité, l'harmonie et la concorde, cimentent à jamais les liens qui doivent les attacher réciproquement : en conséquence, ils ont demandé l'exécution des articles suivans, auxquels les sus dits commissaires blancs ont répondu, ainsi qu'il est mentionné en la colonne parallèle à celle des demandes.

Demandes des commissaires de la garde nationale des citoyens de couleur.

Article Premier. Les citoyens blancs feront cause commune avec les citoyens de couleur, et contribueront de toutes leurs forces et de tous leurs moyens à l'exécution littérale de tous les points et articles des décrets et instructions de l'assemblée nationale, sanctionnés par le roi, et ce, sans restriction et sans se permettre aucune interprétation, conformément à ce qui est prescrit par l'assemblée nationale qui défend d'interpréter ses décrets. — Accepté.

II. Les citoyens blancs promettent et s'obligent de ne jamais s'opposer directement ni indirectement à l'exécution du décret du 15 Mai dernier, qui dit-on n'est pas encore parvenu officiellement dans cette colonie ; de protester même contre toutes protestations et réclamations contraires aux dispositions du sus dit décret, ainsi que contre toutes addresses à l'assemblée nationale, au roi, aux quatre-vingt-trois départemens et aux différentes chambres de commerce de France, pour obtenir la révocation de ce décret bienfaisant. — Accepté.

III. Ont demandé les sus dits citoyens de couleur, la convocation prochaine et l'ouverture des assemblées primaires et coloniales, par

tous les citoyens actifs, aux termes de l'article IV des instructions de l'assemblée nationale, du 28 Mars 1790.—Accepté.

IV. De députer directement à l'assemblée coloniale, et de nommer des députés choisis parmi les citoyens de couleur, qui auront, comme ceux des citoyens blancs, voix consultative et délibérative.—Accepté.

V. Déclarent les sus dits citoyens blancs et de couleur protester contre toute municipalité provisoire ou non, de même contre toutes assemblées provinciales et coloniales; les dites municipalités assemblées provinciales et coloniales n'étant point formées sur le mode prescrit par les décrets et instructions des 3 et 28 Mars 1790.—Accepté.

VI. Demandent les citoyens de couleur qu'il soit reconnu par les citoyens blancs, que leur organisation présente, leurs opérations récentes et leur prise d'armes, n'ont eu pour but et pour motif, que leur sûreté individuelle, l'exécution des décrets de l'assemblée nationale, la réclamation de leurs droits méconnus et violés et le désir de parvenir par ce moyen à la tranquillité publique, qu'en conséquence ils soient déclarés inculpables pour les événemens qui ont résulté de cette prise d'armes et qu'on ne puisse dans aucun cas exercer contre-eux collectivement ou individuellement, aucune action directe ou indirecte pour raison de ces mêmes événemens, qu'il soit en outre reconnu que leur prise d'armes tiendra jusqu'au moment où les décrets de l'assemblée nationale seront ponctuellement et formellement exécutés; qu'en conséquence, les armes, canons et munitions de guerre enlevés pendant les combats qui ont eu lieu, resteront en la possession de ceux qui ont eu le honneur d'être vainqueurs; que cependant les prisonniers [si toutefois il en est] soient remis en liberté de part et d'autre.—Accepté.

VII. Demandent les dits citoyens de couleur, que conformément à la loi du 11 Février dernier et pour ne laisser aucun doute sur la sincérité de la réunion prête à s'opérer, toutes proscriptions cessent et soient révoquées dès ce moment, que toutes les personnes prosrites, décrétées, et contre lesquelles il seroit intervenu des jugemens ou condamnations quelconques pour raison des troubles survenus dans la colonie depuis le commencement de la révolution, soient de suite rapelés et mis sous la protection sacrée et immédiate de tous les citoyens, que réparation solennelle et authentique soit faite à leur honneur, qu'il soit pourvu par des moyens convenables, aux indemnités que nécessitent

leur exil, leurs proscriptions et les décrets décernés contre-eux ; que toutes confiscations de leurs biens soient levées et que restitution leur soit faite de tous les objets qui leur ont été enlevés, soit en exécution des jugemens prononcés contre-eux, soit à main armée. Demandant que le présent article soit strictement et religieusement observé par tous les citoyens du ressort du conseil supérieur de Saint-Domingue, et surtout à l'égard des sieurs Poisson, Desmares, les frères Regnauld et autres compris au même jugement que ceux-ci, tous les habitans de la paroisse de la Croix-des-Bouquets, de même qu'à l'égard du sieur Jean-Baptiste la Pointe habitant de l'Arcahaye, contre lequel il n'est intervenu un jugement sévère que par une suite de persécutions exercées contre les citoyens de couleur, et qui proscriit par les citoyens de Saint-Marc et de l'Arcahaye n'a pu se dispenser d'employer une juste défense contre quelqu'un qui vouloit l'assassiner et qui l'assassinait en effet, se réservant les citoyens de couleur de faire dans un autre moment et envers qui il appartiendra, toutes protestations et réclamations relatives aux jugemens prononcés contre les sieurs Oger, Chavannes et autres compris dans les dits jugemens, regardant dès à présent les arrêts prononcés contre les sus dits sieurs, par le conseil supérieur du Cap, comme infâmes, dignes d'être voués à l'exécration contemporaine et future, et comme la cause fatale de tous les malheurs qui affligent la province du nord.—Accepté, en ce qui nous concerne.

VIII. Que le secret des lettres et correspondance soit sacré et inviolable, conformément aux décrets nationaux.—Accepté.

IX. Liberté de la presse, sauf la responsabilité dans les cas déterminés par la loi.—Accepté.

X. Demandent en-outré les citoyens de couleur, qu'en attendant l'exécution ponctuelle et littérale des décrets de l'assemblée nationale, et jusqu'au moment où ils pourront se retirer dans leurs foyers, Messieurs les citoyens blancs de la garde nationale du Port-au-Prince s'obligent de contribuer à l'approvisionnement de l'armée des citoyens de couleur pendant tout le tems que durera son activité contre les ennemis communs et du bien public, et de faciliter la libre circulation des vivres dans les différens quartiers de la partie de l'ouest.—Accepté.

XI. Observent en-outré les sus dits citoyens de couleur, que la sincérité dont les citoyens blancs viennent de leur donner une preuve authentique, ne leur permet pas de garder le silence sur les craintes dont

ils sont agités; en conséquence ils déclarent qu'ils ne perdront jamais de vue la reconnaissance de tous droits et de ceux de leurs frères des autres quartiers; qu'ils verroient avec beaucoup de peine et de douleur la réunion prête à s'opérer au Port-au-Prince et autres lieux de la dépendance souffrir des difficultés dans les autres endroits de la colonie, auquel cas ils déclarent que rien au monde ne sauroit les empêcher de se réunir à ceux des leurs qui par une suite des anciens abus, du régime colonial, éprouveroient des obstacles à la reconnaissance de leurs droits et par conséquent à leur félicité.—Accepté.

Après quoi l'assemblée revenue à la place d'armes, la matière mise en délibération, mûrement examinée et discutée, l'assemblée considérant qu'il est d'une nécessité indispensable de mettre en usage tous les moyens qui peuvent contribuer au bonheur de tous les citoyens qui sont égaux en droits.

Que la réunion des citoyens de toutes les classes peut seule ramener le calme et la tranquillité si nécessaires à la prospérité de cette colonie qui se trouve aujourd'hui menacée des plus grands malheurs.

Que l'exécution ponctuelle et littérale de tous les articles de l'assemblée nationale sanctionnés par le roi, seule opérera cette réunion désirable sous quelque point de vue de l'envisage.

Il a été arrêté, savoir: de la part des citoyens blancs, qu'ils acceptent tous les articles insérés au présent concordat.

Et de la part des citoyens de couleur, que, vu l'acceptation de tous les articles sans restriction insérés au présent concordat, ils se réuniront et se réunissent en effet de cœur, d'esprit et d'intention aux citoyens blancs, pour ramener le calme et la tranquillité, pour travailler de concert à l'exécution ponctuelle des décrets de l'assemblée nationale sanctionnés par le roi, et pour employer toutes leurs forces et tous leurs moyens contre l'ennemi commun.

A été arrêté par Messieurs les citoyens blancs et Messieurs les citoyens de couleur, que ce jour doit éteindre toute espèce de haine et de division entre les citoyens de la colonie en général, les citoyens de couleur du Port-au-Prince qui, par une fausse pusillanimité, ne se sont pas réunis

à leurs frères de armes, seront compris dans l'amnistie générale; qui jamais aucun reproche ne leur sera fait de leur conduite; entendant qu'ils participent également aux avantages que promet notre heureuse réunion entre toutes les personnes et tous les citoyens indistinctement.

De plus, que protection, égale doit être accordée au sexe en général, les femmes et filles de couleur en jouiront de même que les femmes et filles blanches, et que mêmes précautions et soins seront pris pour leur sûreté respective.

Arrêté que le présent concordat sera signé par l'état major de la garde nationale du Port-au-Prince.

Il a été arrêté que le présent concordat sera rendu public par la voie de l'impression, que copies collationnées d'y celui seront envoyées à l'assemblée nationale, au roi, aux quatre-vingt-trois départemens, à toutes les chambres de commerce de France, à Monsieur le lieutenant-général au gouvernement, et à tous autres qu'il appartiendra.

Arrêté que mercredi prochain quatorze du présent mois M. M. les citoyens blancs du Port-au-Prince se réuniront à l'armée de M. M. les citoyens de couleur en la paroisse de la Croix-des-Bouquets, qu'il sera chanté dans l'église de cette paroisse à dix heures du matin un *Te Deum* en action de grace de notre heureuse réunion; que MM. des bataillons de Normandie et d'Artois, et des corps d'artillerie, de la marine royale et marchande, seront invités à s'y faire représenter par des députations particulières, que de même les citoyens en général de la Croix-des-Bouquets, du Mirebalais et autres endroits circonvoisins seront invités à s'y rendre, afin d'unir leurs vœux aux nôtres pour le bonheur commun.

Arrêté en outre que le présent concordat sera passé en triple minute dont la première sera déposée aux archives de la municipalité future, la seconde entre les mains des chefs de l'armée des citoyens de couleur, et la troisième dans les archives de la garde nationale du Port-au-Prince.

Faite triple entre nous et de bonne foi, le jour, mois et an que dessus.
Signé, &c.

HISTORY OF THE

Discours de M. Gamot, président des commissaires représentant les citoyens blancs du Port-au-Prince, à MM. les commissaires représentant l'armée des citoyens de couleur.

MESSIEURS,

NOUS vous apportons enfin des paroles de paix. Nous ne venons plus *traiter avec vous* ; nous ne venons plus vous *accorder des demandes*, nous venons, animés de l'esprit de justice, reconnoître authentiquement vos droits, vous engager à ne plus voir dans les citoyens blancs que des amis, des frères, auxquels la patrie en danger vous invite, vous sollicite de vous réunir pour lui porter un prompt secours.

Nous acceptons entièrement et sans aucune réserve, le concordat que vous nous proposez. Des circonstances malheureuses que vous connoissez sans doute, nous ont fait hésiter un instant ; mais notre courage a franchi tous les obstacles ; nous avons imposé silence aux petits préjugés, au petit esprit de domination.

Que le jour où le flambeau de la raison nous éclaire tous, soit à jamais mémorable ! qu'il soit un jour d'oubli pour toutes les erreurs, de pardon pour toutes les injures, et ne disputons désormais que d'amour et de zèle pour le bien de la chose publique.

CHAPTER V. p. 61.

Mauduit started back, &c.—while not a single hand was lifted up in his defence.

In this last particular I was misinformed, and rejoice that I have an opportunity of correcting my mistake. The following detail of that bloody transaction has been transmitted to me from St. Domingo, since the first sheets were printed : “ Les grenadiers du regiment de Mauduit, et d'autres voix parties de la foule, demandent que le Colonel fasse réparation à la garde nationale. On exige qu'il fasse des excuses pour l'insulte qu'il lui a faite. Il prononce les excuses qu'on lui demande ;

ses grenadiers ne sont points satisfaits, ils veulent qu'il les fasse à genoux. Une rumeur terrible se fait entendre : ce fut alors que plusieurs citoyens, même de ceux que Mauduit avoit le plus vexé, fendent la foule, et cherchent à le soustraire au mouvement qui se préparoit. On a vu dans ce moment le brave *Beausoleil*, après avoir été atteint d'un coup de feu à l'affaire du 29 au 30 Juillet, en défendant le comité (*see page 34.*) recevoir un coup de sabre en protégeant les jours de Mauduit. On peut rendre justice aussi à deux officiers de Mauduit : *Galeseau* et *Germain* n'ayant pas abandonné leur Colonel jusqu'au dernier moment ; mais l'indignation des soldats étoit à son comble, et il n'étoit plus temps.

Mauduit pressé par ses grenadiers, de s'agenouiller pour demander pardon à la garde nationale, et refusant constamment de s'y soumettre, reçut un coup de sabre à la figure, qui le terrassa ; un autre grenadier lui coupa à l'instant la tête, qui fut portée au bout d'une bayonnette. Alors le ressentiment des soldats et des matelots livrés à eux mêmes, n'eut plus de bornes : ils se transporterent chez Mauduit, où ils traînèrent son corps, tout y fut brisé, rompu, meubles &c. on décarrela même la maison, &c. &c.

CHAPTER X. p. 146.

They declared by proclamation all manner of slavery abolished, &c.—
This proceeding was ratified in February, followed by the National Convention in a Decree, of which follows a Copy.

Decret de la Convention Nationale, du 16 Jour de Pluviôse ; an second de la Republique Française, une et indivisible.

LA Convention Nationale déclare que l'esclavage des Nègres dans toutes les Colonies est aboli ; en conséquence elle décrète que tous les hommes, sans distinction de couleur, domiciliés dans les Colonies, sont citoyens François, et jouiront de tous les droits assurés par la constitution.

Elle renvoie au comité de salut public, pour lui faire incessamment un rapport sur les mesures à prendre pour assurer l'exécution du présent décret.

Visé par les inspecteurs. *Signé*

Auger,
Cordier,
S. E. Monnel.

Collationné à l'original, par nous président et secrétaires de la Convention Nationale, à Paris le 22 Germinal, an second de la République Française une et indivisible. *Signé*, Amar, *Président*. A. M. Baudot. Monnot. Ch. Pottier, et Peyssard, *Secrétaires*.

As most of the French islands fell into possession of the English soon after this extraordinary decree was promulgated, the only place where it was attempted to be enforced was in the Southern province of St. Domingo, and the mode of enforcing it, as I have heard, was as singular as the decree itself. The negroes of the several plantations were called together, and informed *that they were all a free people*, and at liberty to quit the service of their masters whenever they thought proper. They were told, however, at the same time, that as the Republic wanted soldiers, and the state allowed no man to be idle, such of them as left their masters would be compelled to enlist in one or other of the black regiments then forming. At first, many of the negroes accepted the alternative, and enlisted accordingly; but the reports they soon gave of the rigid discipline and hard fare to which they were subject, operated in a surprising manner on the rest, in keeping them more than usually quiet and industrious, and they requested that no change might be made in their condition.

CHAPTER X. p. 147.

Of the revolted negroes in the Northern province, many had perished of disease and famine, &c.

FROM the vast number of negroes that had fallen in battle, and the still greater number that perished from the causes above mentioned, it

was computed in the year 1793 that this class of people at that period had sustained a diminution of more than one hundred thousand. (*Réflexions sur la Colonie, &c.* tom. ii. p. 217.) Since that time the mortality has been still more rapid, and, including the loss of whites, by sickness and emigration, I do not believe that St. Domingo at this juncture (June 1796), contains more than two-fifths of the whole number of inhabitants (white and black), which it possessed in the beginning of 1791.—According to this calculation upwards of 300,000 human beings have miserably perished in this devoted country within the last six years

CHAPTER XI. p. 173.

The same fate awaited Lieutenant-Colonel Markham, &c.

I cannot deny myself the melancholy satisfaction of preserving in this work the following honourable tribute to the memory of this amiable officer, which was given out in general orders after his death by the Commander in Chief.

Head Quarters, 28 March 1795.

Brigadier General Horneck begs the officers, non-commissioned officers, and privates of the detachment, which on the 26th inst. proceeded under the command of Lieutenant Colonel Markham on a party of observation, to receive his very sincere thanks for their gallant behaviour at the attack of the enemy's advanced post, taking their colours and cannon, and destroying their stores.

At the same time he cannot sufficiently express his feelings on the late afflicting loss that has been sustained in lieutenant-colonel Markham, who, equally excellent and meritorious as an officer and a man, lived universally respected and beloved, and died leaving a bright example of military, social, and private virtue.

The Brigadier General likewise requests Captains Martin and Wilkinson, of the Royal Navy, to receive his acknowledgments and thanks

for the important assistance they have afforded; not only on this occasion alone, but on every other, wherein his majesty's service has required their co-operation. He also begs captain Martin to do him the favour to impart the like acknowledgments to the officers of the royal navy, and to the respective ships' companies under his command, for the zeal and good conduct they have shewn whenever employed.

POSTSCRIPT

TO THE

HISTORICAL SURVEY OF ST. DOMINGO.

Containing a brief Review of the Transaction and Condition of the British Army there, during the Years 1795, 6, 7, and 8, until the final Evacuation of the Country.

FOUR years have elapsed since I closed the details of the military operations of the British army in St. Domingo, and I grieve to say, that what was then prophetic apprehension, is now become historical fact. This once opulent and beautiful colony, the boast of France, and the glory of the new hemisphere, is expunged from the chart of the civilized world! The prospect of such lamentable ruin might give occasion for many observations and reflections, and I shall present to my readers, in the following very imperfect sketch, (for such it is in every sense), a few that occur to me: more than this I dare not attempt. Were it in my power (as in truth it is not), to continue, in a regular series, the history of those sad events which have led to this miserable catastrophe, I should indeed decline a task which would be equally disgusting to my readers, and painful to myself. In a climate where every gale was fraught with poison, and in a contest with uncounted hosts of barbarians, what could the best efforts of our gallant countrymen effect? Their enemies indeed fled before them, but the arrows of pestilence pursued and arrested the victors, in their career of conquest! Scenes like these, while they afford but small cause of gratulation to the actors themselves, furnish no topics to animate the page of the

historian; who would have little else to display but a repetition of the same disasters—delusive promises, unrealized hopes, unavailing exertions; producing a complication of miseries, disease, distraction, contagion, and death!

At the same time, (although I know not that the reader will derive any great degree of consolation from the circumstance), it is incumbent on me to observe, that, during the disastrous period of which I treat, I have not heard that any misconduct or neglect was ever fairly imputed to those persons who had the direction of the enterprize, either in the public departments of Great Britain, or in the scene of action itself. The names of Williamson, Forbes, Simcoe, Whyte, and Maitland, carry with them a demonstration that neither courage, nor energy, nor military talents, was at any time wanting in the principal department. Reinforcements of troops too, were sent by the British government with a more liberal hand than in former years. Towards the latter end of April 1795, the 31st and 96th regiments (consisting together of 1,700 men), arrived from Ireland; the 82d, from Gibraltar, landed 980 men in August; and in April 1796, the 66th and 69th regiments, consisting of 1,000 men each, with 150 artillery, arrived from the same place, under the command of General Bowyer; so that the whole number of effective men which had landed in St. Domingo, down to this period, (including some small detachments sent up at different times from Jamaica), amounted to 9,800. In June following, four regiments of infantry, and a part of two others,* arrived from Cork, under the command of General Whyte. These were soon afterwards followed by seven regiments of British,† together with three regiments of foreign cavalry;‡ besides two companies of British, and a detachment of Dutch artillery; making in the whole a further reinforcement of about 7,900.§

* The 17th, 32d, 56th, and 67th, with part of the 93d and 99th.

† The 13th, 14th, 17th, 18th, 21st, 26th, and 29th.

‡ The York, Hompesch, and Rouen Hussars.

§ Out of this number are however to be deducted the 32d infantry and

But what avail the best concerted schemes of human policy against the dispensations of Divine Providence! A great part of these gallant troops, most of them in the bloom of youth, were conveyed, with little intermission, from the ships to the hospital; from the hospital to the grave! Of the 82d regiment, no less than 630 became victims to the climate, within the short space of ten weeks after their landing. In one of its companies, no more than three rank and file were fit for duty. Hompesch's regiment of hussars were reduced, in little more than two months, from 1,000 to 300, *and the 96th regiment perished to a man!* By the 30th of September, 1796, the registers of mortality displayed a mournful diminution of no less than 7,530 of the British forces only; and towards the latter end of 1797, out of the whole number of troops, British and foreign, which had landed and were detained in this devoted country, during that and the two preceding years, (certainly not far short of 15,000 men), I am assured that not more than 3,000 were left alive and in a condition for service.*

During this dreadful sacrifice of human life, the necessary operations in the colony were productive of such an expenditure of treasure to the British government, as excited the utmost astonishment in the minds of the king's ministers; who ought however to have foreseen, that the cost of raising, feeding, arming, clothing, and paying colonial regiments, both black and white, in a country where every article was three times as dear as in Europe, and the expense of fitting out armed vessels to transport troops and stores from one part of the colony to another part, (both of them measures of absolute necessity), must unavoidably be very great.† The charges

the 26th dragoons; the former of which were sent from St. Domingo to Bahama, and the latter to the Windward Islands.

* The loss of seamen in the ships employed on the coast are not included. It may be stated very moderately at 5,000 men.

† The colonial troops, black and white, embodied by General Williamson, amounted at the end of 1795 to 8,170.

attending the hospital service, were alone found to amount to 10s. a day for each invalid. For the payment of these, and other services, the Governor was authorized to draw bills of exchange on the British treasury; and the bills thus drawn, to the first of May, amounted to £4,333,596 8s. 2d. sterling.

But, notwithstanding this enormous expense, both of blood and treasure, the prospect of subduing the whole of this great island, and annexing it, in a profitable condition, to the British dominion, was more distant than ever. The weakness and diminution of our troops inspired the enemy with renewed confidence: They were not unobservant of our situation, and took advantage of it. Those among the white inhabitants who were secretly disaffected, became encouraged and confirmed in their hostile purposes, and were easily prevailed upon to declare openly against a cause, which they plainly foresaw must, in a short time, work its own destruction.

It is not however to be understood that the British army was suffered to remain, during this time, in desponding inactivity. The case was far otherwise. Every man who was in a condition for service had full employment assigned to him, and undoubtedly very vigorous efforts were made to distress the enemy, and extend our footing in the country, until, unhappily, every succeeding exertion, like the labours of Sisyphus, terminated in new disappointment.

At one period very sanguine expectations prevailed from the co-operation and services of the colonial corps which General Williamson had caused to be organized. Their knowledge of the country, and their habitude to the climate, were supposed to render them a useful and formidable body. They had been formed in a great degree under the Baron de Montalembert, (an officer of whose military merit it is not easy to speak in terms too favourable), and, immediately after the arrival of the 82d regiment from Gibraltar, such of them as were brought to a sufficient state of discipline, commenced operations, under that officer's command, in the western province:

being reinforced by the Barons's own regiment, and a detachment from the British 82d, they proceeded for a time very successfully, driving the enemy out of many fortified posts, and taking possession of a great extent of country, even as far as the Spanish frontiers. Nothing could exceed the noble spirit of emulation which animated their conduct. Unhappily, the want of a sufficient number of men to garrison the posts which the enemy had abandoned, rendered all their successes ultimately abortive. Their progress, therefore, was productive of no lasting impression: it was like that of a vessel traversing the ocean;—the waves yielded indeed for the moment, but united again as the vessel passed.

In the meanwhile, a very considerable body of the revolted negroes (the whole of whom had now separated themselves altogether from the people of colour) continued to maintain their position in a strong post, on the heights which overlook Port au Prince towards the south. This party of brigands were commanded by a negro named Dudonait, who had contrived to cut off the streams by which the town was usually supplied with fresh water. The distress to which the garrison was reduced by this measure, and the disgrace of suffering the insults of such an enemy to remain unpunished, induced the General, in the month of December, to make formidable preparations for attacking Dudonait in his camp; when an extraordinary circumstance occurred, which, as it displays the state of parties among the revolted, deserves recital. On the first of January 1796, this negro chief sent a flag to the General, signifying, that it was his intention to present the British with a supply of water, by way of a new-year's gift; and accordingly the springs were cleared, and the streams suffered to run in their usual channel, to the great relief of the town and the garrison. This measure, on the part of the enemy, was followed by overtures for a negotiation; and Dudonait soon afterwards transmitted the heads of a treaty in writing, offering therein to bring the chief part of his army over to the English, on certain conditions; one of which was, that the English troops should co-operate with their new negro allies, *utterly*

to cut off and extirpate the people of colour throughout St. Domingo.

As it was impossible that General Williamson could listen to propositions of this nature, although he had no reason to doubt the sincerity of Dudonait, the preparations for driving the enemy from his position were continued. Light artillery was provided to be carried up the mountains on mules. The enterprise however was attended with so many difficulties, that it was not until the 28th of February the attack was made; when the British had the satisfaction, in the course of a few hours, to see the brigands, who had so long hemmed in and insulted them, fly from their chain of formidable posts in all directions. General Bowyer was at the head of the column, at the place where the chief attack was made, and he carried the lines by storm.*

Had I the means of resounding in detail the many other enterprises, in the prosecution of which the honour of the British flag was ably maintained and supported, notwithstanding the cruel ravages which the diseases of the climate hourly made among the troops, the recital of them should not be omitted.—I should dwell with infinite satisfaction on the merits of the generals Churchill, Boyer, Montalembert; the colonels Spencer, Stuart, Dessource, and other officers in high command. It is universally acknowledged, that the services of all these gentlemen that I have mentioned were eminently conspicuous; and I regret that my information is not sufficiently minute and particular, to enable me to bestow that distinct and appropriate tribute of applause on the conduct of each, which justice and gratitude would otherwise demand. This general acknowledgment therefore is all that I can offer; but my regret is heightened by the mournfully reflecting, that such exertions and talents were employed in so

* The negro commander, Dudonait, was soon afterwards surprised by the Mulatto General Rigaud, who had heard of his negotiation with the English, and ordered him to immediate execution.

unprofitable a service; a warfare in which all human efforts were unavailing, and success itself unattended with lasting advantage or renown.

In the month of March 1796, Sir Adam Williamson embarked for Great Britain, having resigned the command of the troops to general Forbes, who was himself superseded by the arrival of general Simcoe, as chief governor, in March 1797. One great object the king's ministers had in view, by the appointment last mentioned, was, as I have heard, to obtain a full and accurate representation of the state of the colony, the actual situation of the British army there, and the prospects which remained of the ultimate success to the enterprise. No man was better qualified to form a correct, comprehensive, and unbiassed opinion on those points, than General Simcoe. He was instructed, withal, to carry into effect a plan of reform and retrenchment in the disposal and application of the public money. Abuses under this head were loudly, and I believe, very justly, complained of, the correction of which, it was said, could be effected only by a proper exertion of firmness, energy, and decision in the commander in chief; qualities which eminently distinguish that officer's character. It is unpleasant to relate, but it is too notorious to be denied, that among the French colonists, our allies, many of the principal men, in return for the tender of their services, had stipulated for, and obtained very extraordinary salaries and appointments. Some of these gentlemen, without doubt, had acquired a just claim to liberal remuneration; but there were others among them, who set, I am afraid, a very exaggerated value on their own merits. In the present forlorn and sad condition of the army, however, the measure of retrenching expenses and allowances, of what nature soever, proved a painful and perilous undertaking. The whole body of our allies were alarmed and discontented in consequence of it. Their efforts became every where palsied; and it is alleged, that some important posts were surrendered to the enemy, without an effort being made to save them. It is certain that officers of high rank resigned their commissions

and quitted the country. Thus, whilst disease was rapidly thinning the ranks, disgust and disaffection spread with equal rapidity among the survivors. The prospect, on every side, was gloomy; and the mournful exclamation, *tout est perdu*, resounded equally from disappointed selfishness, and desponding loyalty.

General Simcoe, by the moderation and firmness of his conduct, succeeded in restoring order and subordination; and, in some degree, in reviving confidence; but the state of affairs was irretrievably desperate, and the general probably thought, that the greatest service he could render his country, was to return to Great Britain, fully and faithfully to represent in person to the king's ministers, the result of his experience and observations. For this purpose (as it is supposed) he embarked for Europe in July.

What report the general made, on his arrival in London, to the British administration, is not known to me but by conjecture. It is certain that government soon afterwards came to the determination of reducing the number of British posts in St. Domingo, (by ordering the most distant and less important ones to be abandoned), and of concentrating and directing all our force to the maintenance of certain places only, the permanent possession of which might afford security to our navigation and commerce, and deter the enemy from attempting predatory excursions against the British settlements in the neighbourhood.

This determination appears to me to have been suggested by wisdom, or rather it was founded on necessity; and in order to carry it into full effect, suitable instructions were prepared for general Nesbitt, who was appointed successor to general Simcoe in December 1797.

The command of the troops in the meanwhile had devolved on general Whyte, an officer of great experience, local knowledge, and approved bravery; but neither experience nor

courage in the commander, could enable the army to do more than to maintain itself within the garrison. The war was no longer a war of conquest, but of self-preservation. The rebel negroes were at the gates, and no alternative remained but to stand on the defensive, until general Nesbit's arrival.

Respecting the forces of the enemy, and the interior state of the colony, at the period of general Simcoe's departure, it was known, that the men in arms were become divided into two principal factions, under different leaders. The republican troops which had been sent at different times from France, having been reduced by sickness and famine to about 700, had made a sort of junction with the revolted negroes of the northern province; reserving to themselves only the privilege of forming a distinct regiment, and of being commanded by white officers; but the general or commander in chief of the whole of this northern army, white and black, was a negro named Toussaint L'Ouverture. This man, at the commencement of the revolt in 1791, was a slave to Monsieur Noé, a considerable planter in the neighbourhood of Cape François, now residing in London. Having taken an active part in the rebellion, Toussaint had acquired, in a short time, great weight among the negroes, and at length obtained such an ascendancy among his adherents, as invested him with absolute and undisputed authority over them. His attachment however to the French government was thought extremely doubtful: and in truth he seemed to have no other immediate object in view, than that of consolidating his own power, and securing the freedom of his fellow negroes. His black army in 1797 was estimated at 18,000 infantry, and a troop of horse of about 1,000.

The other principal body was composed chiefly of mulattoes, collected from different parts of the colony, and negro slaves whom they had compelled to join them. The mulattoes, spurning the idea of serving under a negro general, had resorted to the southern province, and enrolled themselves, with

their brethren of colour in that part of the country, under Andrew Rigaud, a general of their own cast, of whom mention has already been made. His army, (comprehending also such of the lower class of white inhabitants of the southern and western provinces, as found it necessary, either for their daily support, or personal protection, to enlist under his banner), was said to amount to about 12,000; and they declared themselves in the interest of the republican government established under the French directory.

Between these two bodies, however, as the reader must have perceived, there existed the most inveterate and rancorous animosity, which had already manifested itself in many conflicts; and nothing but the presence of an invading enemy in the country restrained it, in any degree, from proceeding to that extremity of civil contest—a war of utter extermination—in which mercy is neither to be given nor accepted. On the departure of the English, Toussaint made a public declaration, signifying, that it was his intention not to leave a mulatto man alive in the country; and, with respect to such of these unhappy people as have since fallen into his hands, I am assured that he has kept his word; not an individual of them has been spared.

But although these great factions were the two most considerable, they were not the only bodies of armed men that associated in this unfortunate country, and acted without any co-operation with each other. Separate hordes, composed of revolted slaves, and ruffians of every description, appeared in different parts, (chiefly in the northern and western provinces), supporting themselves by depredation and plunder. Against the cruelties and enormities committed by these parties, the few remaining whites had no means of safety, but by purchasing the protection of Toussaint: and thus an extraordinary revolution had taken place;—the very chief whose original intent was the total extirpation of the whites, had checked his career of massacre, and was now become their defender and protector. In the southern province were parties of brigands

of a similar description, some of which made piratical excursions at sea in canoes, and captured many small vessels, both American and English, which were found near the coast. On these occasions, the savages put all the white seamen to instant death; but where any women were unhappily found on board, these they carried away with them in a state of captivity, for purposes which perhaps made them envy the more immediate fate of the murdered seamen. It must not be omitted, however, that Rigaud published an indignant proclamation against these pirates, and hanged up all such of them as were apprehended under it.

Such was the state of affairs in St. Domingo, during the latter part of 1795, and the whole of the years 1796 and 1797, until the mortality among the British forces was so great, as in truth to leave no alternative to the sad survivors, but to retire from a contest, in which victory itself was disappointment and defeat!

On the 22d of April 1798, therefore, brigadier Maitland, (who in consequence of general Whyte's return to Europe, and the death of general Nesbit in his voyage outwards, had succeeded to the chief command), came to the resolution of evacuating the towns of Port au Prince and St. Marc, with their respective dependencies, together with the parish of Arcahay; a measure which, by a judicious negotiation with Toussaint, he happily effected without loss, and withdrew with the troops to Mole St. Nicholas,

The whole number of white troops, English and foreign, at this period in the British service, under general Maitland's command, did not exceed 2,500, including even the sick and convalescent. Of the British, not more than 1,100 were left alive. Part of these held possession of Grand Ance under brigadier-general Spencer, the remainder embarked with general Maitland for the Mole.

The great importance of the post at Mole St. Nicholas, to which our troops now retreated, has been pointed out on a former occasion;* but it was also remarked that the fortifications there, however defensive they might prove in the case of a maritime attack, (for which alone they were constructed), could not easily be maintained against an attempt on the side of the land, being completely commanded by the hills adjacent. This circumstance could not possibly have escaped general Maitland's notice; for the same observation occurred to myself, and must have occurred to every other man who has visited the place. Very serious apprehensions must therefore have been felt, that the British forces would, at no distant period, be compelled to abandon this post, as they had abandoned the others.

It is probable, that considerations of this nature induced general Maitland to form the design of repossessing the no less important post of Cape Tiburon; which, as the reader has already been told, was taken from the British by a force under Rigaud, on the 25th of December 1794. It was thought that, with the neighbouring port of Jeremie, and the bay of Irois, already in our possession, the capture of Tiburon would not only command the district of Grand Ance, and secure the navigation of the windward passage, equally with the Mole St. Nicholas, but afford also, in a very considerable degree, protection to Jamaica, in case the enemy should meditate attempts on the coasts of that island. At the same time, it was not intended, I presume, to evacuate the Mole, but under circumstances of imperious necessity.

In the beginning of June 1798, such of the troops as could be spared for the intended expedition against Tiburon, assembled in the bay of Irois. The first brigade was commanded by colonels Spencer and Grant, and the second by colonel Stuart; a third brigade, under the command of colonel Dessource, consisting of colonial troops, moved for-

wards by land on the 11th; the other brigades embarked, at the same time, in the squadron appointed to co-operate with them, consisting of the York, Adventure, Tourterelle, Rafter, and Drake, under the command of captain Ferrier.

So far the whole business seems to have been judiciously conducted, and to have promised a successful termination; but the issues of war are in the hands of the Almighty. Owing to the prevalence of strong south-easterly winds, it was found impossible, after many unavailing attempts for that purpose, to effect a landing of the troops; and the general, not from the resistance of the enemy, but from the rage of the elements, was ultimately obliged to relinquish the attack, and return with the troops to Mole St. Nicholas.

The failure of this attempt on Tiburon, was soon afterwards followed by a design of the enemy on the Mole itself. Towards the summit of one of the hills commanding the fort, the British had established a post of 60 men, chiefly colonial troops. On the 21st of July this post was attacked by a horde of brigands, and (to the great astonishment of the garrison below), was carried; without much resistance, the major part of the detachment stationed there having deserted to the enemy. The few British among them, however, by keeping up a well-directed retreating fire, reached the garrison in safety.

But the triumph of the brigands on this occasion was of short duration; for the mortars of the garrison having been brought to play against the spot, the enemy was soon driven from the post, and a detachment of British, under Colonel Stuart, again took possession of it.

A more daring attempt however was made, about the same time, at another post called the Gorge; where the brigands appeared in great force; and although by the gallantry and good conduct of the troops sent against them, they were finally repulsed, their defeat was not effected without an obstinate resistance on their part, and considerable loss on ours.

It was now evident to every man, that, unless possession could be obtained of the surrounding hills, and a chain of strong posts, with lines of great extent, established on their summits, it was not within the reach of human skill, or human courage, to preserve the garrison itself from destruction, in the event of a still more formidable attack from the enemy, of which the garrison was in hourly expectation.

For the erection of such works and defences, General Maitland, whatever might have been his wishes, certainly did not possess the necessary means; neither had he troops enough to man them, even if the means had been within his reach.

It is plain, therefore, that no sort of alternative remained to General Maitland on this occasion, but to consider of a speedy and secure retreat for the wreck of his worn-out veterans, and to abandon for ever a country which, after five bloody years of hopeless warfare within its borders, has furnished its invaders with just space enough, and no more, for the graves of about 20,000 brave soldiers and seamen; sacrificed to the vain project of seizing on a territory, which, after obtaining it, we must have newly peopled, to render it productive!

Such a retreat General Maitland, in the month of October 1798, happily effected.* Of the means by which it was ac-

* The troops at the Mole and those at the Grand Ance under Colonel Spencer, were removed to Jamaica. They did not amount altogether to one thousand. The negro regiments embodied by General Williamson were disbanded, and the men left to dispose of themselves as they thought proper. This measure was, I believe, unavoidable; nevertheless, it was a mortifying circumstance to behold this fine body of men turned adrift, and compelled by necessity to join the enemy. They were purchased originally at a prodigious expense; had been trained up to arms with surprising success; were proud of their character as soldiers; and, without doubt, when kept in constant employment, were troops the best suited of any in the world for the country and climate. Whether any great dependance might be placed on the proper subordination and loyalty of such a body of men in time of peace, or on their fidelity in time

complished, and the arrangements which it is believed were made, about the same time, with the negro chief Toussaint, for the future safety of the British trade, and the security of the British possessions in this part of the world, I can give no certain information to my readers. On those points the king's ministers have hitherto withheld all manner of communication. Enough is known, however, (and more than enough), to demonstrate to every unprejudiced mind, that the final evacuation of most parts of St. Domingo, was not a matter of mere prudence and discretion, but of absolute and uncontrollable necessity. To have attempted the further prosecution of offensive war in this devoted country, (after such experience as five years had already furnished), would have argued, not merely an unwarrantable excess of mistaken zeal in the minds of its conductors, but the pitiable and impotent rage of incurable insanity!

And thus terminated this most disastrous enterprise against St. Domingo. Nevertheless, dreadful as the consequences of it have proved, I am persuaded, that no human being was ever actuated, on any occasion, by motives more pure and patriotic, than was general Williamson on this. Certainly it was on his recommendation and advice that the project was originally adopted by government; and if, in this case, he erred in his judgment, concerning persons and circumstances, even his errors proceeded from his virtues. Unsuspicious in his nature, and incapable of deception himself, he mistrusted not the fraudulent views and arrogant pretensions of others. Here indeed he failed. It was his misfortune to place too great reliance on the venal and unfounded assurances of a few adventurers from St. Domingo; men who had neither property nor consideration in that island, nor any sort of authority from the resident planters, to invite a British invasion. It was this ill-placed confidence that

of war, with people of their own cast, (and in cases where no white troops could be brought to co-operate with them), I will not venture to decide.

induced general Williamson to recommend the measure to the king's ministers; and afterwards, on receiving their sanction, to undertake the conduct of it himself, with means so infinitely disproportioned to the end, that disappointment and discomfiture were its necessary and natural consequences! Let me add, at the same time, that instead of procuring any pecuniary advantage to himself, general Williamson injured his private fortune in the prosecution of this very service. His health was the sacrifice, and poverty his reward!

The history of this unfortunate experiment will hereafter, it is hoped, furnish a profitable lesson to men in power. They may learn from it the extreme danger of giving a willing ear, in time of war, to the representations of designing foreigners, concerning the disposition and principles of the great body of their countrymen; and the state of the country from which (whether unjustly or not is nothing to the purpose) they have probably been driven. To expect a fair and impartial report from such men, in such a case, were to suppose that the human mind has changed its character. This unhappy credulity has been a distinguished feature in the conduct of the present war, and the case of St. Domingo affords a melancholy proof of its effects.

The account which I have given will likewise furnish additional confirmation to the cases already recorded in history, demonstrating the fatal folly of prosecuting aggressive war, for the acquisition of territory, in the climate of the West Indies. The dreadful expense of human life in such enterprises, is beyond all the compensation that the most splendid victory can afford: The hand of Omnipotence is uplifted against the measure, and no one nation on earth has ever made the attempt, without having had occasion afterwards to lament its commencement, and to deplore its consequences!*

* "In these adventures, observes Mr. Burke, it is not an enemy we have to vanquish, but a cemetery to acquire. In carrying on war in the West Indies, the hostile sword is merciful: The country itself is the

Such are the reflections and observations which have occurred to me on this painful topic. With a few remarks of a less general, but, perhaps, of no less interesting a nature, I shall quit the subject.

So long as the two great parties which now exist in St. Domingo, shall continue the prosecution of civil warfare against each other, there is not, I suppose, much danger to be apprehended, that either of them will have leisure to make many depredations on the British shipping trading in that part of the world, or any very serious attempts on the coasts of the neighbouring islands. This state of things cannot, however, be of extensive duration. The war is of too violent a nature to last many years; and it is probable, the first general conflict will decide the fate of one of the two contending factions,

dreadful enemy :—there the European conqueror finds a cruel defeat in the very fruits of his success. Every advantage is but a new demand for recruits to the West Indian grave." Let us hear also on this subject the poet of the Seasons :

*" Then wasteful forth
Walks the dire power of pestilent disease;
Sick nature blasting; and to heartless woe
And feeble desolation, casting down
The towering hopes, and all the pride of man!
Such as of late at Carthagea quenched
The British fire.—"*

*————Gallant Vernon saw
The miserable scene, ———
Heard nightly plung'd amid the sullen waves
The frequent corse!"*

THOMPSON.

This miserable scene, however, has been frequently repeated since the siege of Carthagea. It was exhibited at the Havanna in 1762; at the river St. Juan; and lately in the Windward Islands; but no where I believe with greater force and effect than in St. Domingo.

By the last accounts, Toussaint appears to have at present the superiority. His army is undoubtedly more numerous than that of Rigaud; but I suspect it is worse appointed and provided. The mulattoes too have infinitely the advantage of the blacks in point of general knowledge and military discipline. Rigaud himself is a man of sagacity and experience; but above all, there is this circumstance attending the mulattoes, (which I think must ultimately turn the scale in their favour), that they have no possibility of retreat, and are well assured they must either subdue their enemies, *or perish themselves to a man*. My opinion therefore is, that the mulattoes will finally become masters of all the sea coast, and the cultivatable parts of the country; and the fugitive negroes seek a refuge in the mountainous and interior districts. If such shall be the termination of the present civil contest in St. Domingo, the island of Jamaica must have a vigilant eye to its own safety. Its trade, both outwards and homewards, will be exposed to capture; and such devastation may be spread over the windward parishes by hordes of banditti, coming thither in open canoes from the southern parts of St. Domingo, as may destroy the labour of years, before the squadron at Port Royal can give the smallest assistance to the inhabitants. Of this impending danger to Jamaica, the British government is without doubt sufficiently apprized, and I believe that measures are in contemplation how best to avert the threatened evil. I will venture however to pronounce, from circumstances within my own knowledge, that nothing can afford solid and permanent security to Jamaica but tranquillity at home. Let peace be re-established between England and France, and all apprehensions from St. Domingo will vanish. The mulattoes having, after a long and bloody struggle, established their claim to all the rights of French citizens, have now nothing to desire but to be considered and acknowledged as faithful subjects of France; and if the French government, whatever form it may hereafter assume, entertains the most distant hope of restoring, in any degree, order and subordination in the country, and of deriving any advantage from it as a colony, it will receive them as such, and

avail itself of their services in suppressing the remains of revolt and rebellion throughout the island. Peace, therefore, between England and France, will convert the mulattoes of St. Domingo from formidable enemies, into harmless and inoffensive neighbours to the British West Indies; for it will not then be any longer the business of our fleets and armies to heighten and extend the miseries of war on this theatre of bloodshed, and thus invite retaliation on our own possessions. If indeed Great Britain judges rightly, she will consider the restoration of order in St. Domingo, as the only certain pledge of future security to her West Indian colonies.

A TOUR

THROUGH THE SEVERAL ISLANDS OF

*BARBADOES, St. VINCENT, ANTIGUA,
TOBAGO, and GRENADA,*

IN THE YEARS 1791 & 1792:

By SIR WILLIAM YOUNG, BART, M. P. F. R. S.

&c. &c.

A TOUR, &c.

ON Sunday October 30, 1791, Sir William Young embarked in the ship *Delaford* at Spithead, which sailed the same evening, and, after a pleasant voyage of thirty-eight days, came in sight of the island of Barbadoes. Here then the Tour may be said to commence; and the following extracts are, by favour of Sir William Young, transcribed literally from a rough journal, in which he entered such observations as occurred to him from the impressions of the moment. They may be considered therefore as a picture drawn from the life; and the reader must be a bad judge of human nature, and have a very indifferent taste, who does not perceive that it is faithfully drawn, and by the hand of a master.—For the few notes at foot I am accountable.

B. E.

TUESDAY, December 6.—Early in the morning Barbadoes appeared in sight, bearing on the starboard bow W. N. W. At two o'clock P. M. the passengers landed in the six-oared pinnace. We went to a noted tavern, formerly Rachel's, now kept by Nancy Clark, a mulatto woman, where I first

tasted avocado-pear, a mawkish fruit.* Walking about the streets of Bridge-Town, my impressions gave me far from a disagreeable sensation as to the negroes. The town is extensive, and crowded with people, mostly negroes; but the negroes, with few exceptions, seemed dressed in a style much above even our common artizans, the women especially, and there was such a swagger of importance in the gait of those (and many there were) who had gold ear-rings and necklaces, that I told my friend Mr. O, on his pressing me for my opinion of what struck me on first landing in the West Indies, *That the negro women seemed to me the proudest mortals I had ever seen.* A Guinea ship was then in the harbour, and had lain there some time; but none of the disgusting sights of ulcerated and deserted seamen appeared in the streets. Nor did I see any thing relative to the conduct of the slaves that implied the situation of abject acquiescence, and dread of cruel superiority, attributed to them in Great Britain. Many pressed their services on our first landing; and some first begged, and then joked with us, in the stile of a *Davus* of Terence, with great freedom of speech, and some humour. I had a higher opinion of their minds, and a better opinion of their masters and government, than before I set my foot on shore.—Such are my first impressions, written this evening on returning aboard: furthermore, the squares or broader streets are crowded with negroes; their wrangles and conversation forcibly struck me, as analogous to what might have been looked for from the slaves in the Forum of Rome. Said a negro boy about twelve years of age to a young mulatto: *You damn my soul? I wish you were older and bigger, I would make you change some blows with me.*—*Upon my honour!* said an old negro.—*I'll bet you a joe, (johannes),* answered

* There is no disputing about tastes. In Jamaica this fruit is very highly esteemed by all classes of people. It is usually eaten with pepper and salt, and has something of the flavour of the Jerusalem artichoke, but is richer and more delicate: It is sometimes called *vegetable marrow*, and it is remarkable that animals both granivorous and carnivorous, eat it with relish,

another, who had nothing but canvass trowsers on. I gave him no credit for possessing a six-and-thirty shilling piece, but I gave him full credit for a language which characterizes a presumption of self-importance. Perhaps, however, liberty of speech is more freely allowed, where license can most promptly be suppressed. The *liberti* of the Roman emperors, as we find in Tacitus, and the domestic slaves of the Roman people, as we deduce from scenes of Plautus and Terence, sometimes talked a language, and took liberties, with their lords and masters, which in free servants and citizens would not have been allowed. Liberty of the press is a proof of political freedom, but liberty of tongue is rather a proof of individual slavery. The feast of the *Saturnalia* allowed to slaves freedom of speech for the day, without control. In my estimate of human nature, I should say, that such freedom could not be used but moderately indeed; for the slave knew, that if he abused *his* power on the Thursday, the master might abuse *his* power on the Friday. His best security was on those days, when every word might be forbidden, and therefore every word might be forgotten or forgiven. In qualification of all inference from my first view of negroes I should observe, that they were *town* negroes, many of them probably *free* negroes, and many, or most of them, if not all, *domestic* or *house* negroes. One small country cart drawn by twelve oxen, and with three carters, gave me no favourable idea of the owner's feeding, of either beasts or men. But accounts of distress, and objects of distress in the streets, are exaggerations. I saw as little of either, as in any market town in England.

At six in the evening we returned on board; Captain and Mrs. W. of the 60th regiment, and their little girl, joining us on the passage to St. Vincent's, for which island we immediately bore away.

Barbadoes is an island rising with gentle ascent to the interior parts, called the Highlands of Scotland. As we sailed along the coast from East to West, it appeared wonderfully

inhabited; dotted with houses as thick as on the declivities in the neighbourhood of London or Bristol, but with no woods, and with very few trees, even on the summits of the hills;—two or three straggling cocoas near each dwelling-house were all the trees to be seen.

Wednesday, December 7, at day-break, St. Vincent's in sight. At 3 P. M. the ship came to an anchor in Nanton's Harbour, off Calliaqua. Mr. H. came immediately on board, and in half an hour we went on shore in the pinnace; horses were ready to carry us up to the villa, or mansion-house of my estate, distant about half a mile: A number of my negroes met me on the road, and stopped my horse, and I had to shake hands with every individual of them. Their joy was expressed in the most lively manner, and there was an ease and familiarity in their address, which implied no habits of apprehension or restraint: the circumstance does the highest honour to my brother-in-law, Mr. H. who has the management of them. On arriving at my house, I had a succession of visitors. The old negro nurse brought the grass gang, of twenty or thirty children, from five to ten years old, looking as well and lively as possible. The old people came one by one to have some chat with *Massa* (Master), and among the rest "*Granny* Sarah*," who is a curiosity. She was born in Africa, and had a child before she was carried from thence to Antigua. Whilst in Antigua she remembers perfectly well the rejoicing on the *Bacra's* (white men's) being let out of goal, who had killed Governor Park. Now this happened on the death of Queen Anne, in 1713-4; which gives, to Christmas 1791-2, Years 78 Add two years in Antigua, for passage, &c. - - - 2 Suppose her to have had a child at fourteen, and to have been sold the year after, - - - - - 15

The least probable age of *Granny Sarah* is - - - 95

and she is the heartiest old woman I ever saw. She danced

* Grandmother.

at a negro-ball last Christmas; and I am to be her partner, and dance with her, next Christmas.—She has a garden, or provision-ground, to herself, in which, with a great-grand child, about six years old, she works some hours every day, and is thereby rich. She hath been exempted from all labour, except on her own account, for many years.

The villa at Calliaqua is an excellent house for the climate: it hath ten large bed-chambers, and it accommodated all our party from the ship, with great ease.

Thursday, December 8. This morning I rode over the estate, which seems in the most flourishing condition: the negroes seem under a most mild discipline, and are a very cheerful people. This day again I had repeated visits from my black friends: Granny Sarah was with me at least half a dozen times, telling me, “*Me see you, Massa; now me go die!*”* (I behold you, my Master; now let me die!)

“Friday, December 9. We mounted our horses at one o’clock to ride to Kingston, where a negro boy had carried our cloaths to dress: the distance is about three miles of very hilly road. I particularly noticed every negro whom I met or overtook on the road: of these I counted eleven, who were dressed as field negroes, with only trowsers on; and adverting to the evidence on the Slave Trade, I particularly remarked that not one of the eleven had a single mark or scar of the whip. We met or overtook a great many other negroes, but

* This is a stroke of nature. The sight of her master was a blessing to old Sarah, beyond all expectation; and not having any thing further to hope for in life, she desires to be released from the burthen of existence. A similar circumstance occurred to myself in Jamaica; but human nature is the same in all countries and ages.—“And Joseph made ready his chariot, and went up to meet Israel his father, to Goshen;” and presented himself unto him; and he fell on his neck, and wept on his neck a good while.—And Israel said unto Joseph, *Now let me die, since I have seen thy face.*” &c. Genesis, chap. xlv. v. 29. 30.

they were dressed. Passing through Mr. Greatheed's large estate, I observed in the gang one well-looking negro woman, who had two or three wheals on her shoulders, which seemed the effect of an old punishment.*

A free mulatto woman, named Burton, came this day to complain before Mr. H. of her negro slave, a lad of about seventeen. The boy was confronted, and seemed in truth a bad subject, having absented himself the three last days. The only threat the woman used to her slave, was that she would sell him. Mr. H. advised her to do it; and it ended in ordering the boy to *look out himself for a master, who would purchase him.*

Kingston is a small and scattered, but very neat and well-built town. We dressed ourselves there, and proceeded at three to the government house, about a mile up the country. It is a good house, hired from the Alexander estate. The governor gave me a most polite reception. Riding home, I had the company and conversation of Mr. L. speaker of the assembly, who told me that a new slave act was prepared, and under consideration of the legislature, which he himself had drawn up; and, above all, had studied to frame such clauses and provisions as might ensure the execution and full effect of the law in favour of the negroes.—*Nous verrons.*—We had likewise some talk on the subject of building a church at Kingston; he said, if moved in the assembly he had not a doubt of unanimity. I promised, in addition to my quota of tax for such purpose, to subscribe £.200 towards ornamental architecture or additional expense, which the conservators of the

* In the West Indies the punishment of whipping is commonly inflicted, not on the *backs* of the negroes, (as practised in the discipline of the British soldiers) but more humanely, and with much less danger, on *partes posteriores*. It is therefore no proof that the negroes whom Sir William Young inspected had escaped flagellation, because their shoulders bore no impression of the whip. This acknowledgement I owe to truth and candour.

public purse might not think themselves warranted to admit in their plan and estimate; he promised to set the business on foot.

Saturday, December 10.—This day (as usual) a half-holiday from twelve o'clock, for the negroes.

Friday, December 16.—Three Guinea ships being in the harbour, full of slaves from Africa, I testified a wish to visit the ships previous to the sale. I would have visited them privately and unexpectedly, but it was not practicable. Every thing was prepared for our visit, as the least observing eye might have discovered: In particular I was disgusted with a general jumping or dancing of the negroes on the deck, which some, and perhaps many of them, did voluntarily, but some under force or control; for I saw a sailor, more than once, catch those rudely by the arm who had ceased dancing, and by gesture menace them to repeat their motion, to clap their hands, and shout their song of *Yah! Yah!* which I understood to mean "Friends."—Independent of this, and when I insisted on the dance being stopped, I must say that the people, with exception to one single woman (perhaps ill) seemed under no apprehensions, and were even cheerful for the most part, and all anxious to go ashore, being fully apprised of what would be their situation and employment, when landed, by some of their countrymen, who were permitted to visit them from the plantations for that purpose.

Never were there ships or cargoes better suited for the ground of general observation; for the ships came from distant districts, and with people of different nations on board: The Pilgrim of Bristol, with 370 Eboes from Bonny. The Eolus of Liverpool, with 300 Windward negroes from Bassa. The Anne of Liverpool, with 210 Gold Coast negroes from Whydah.

The Pilgrim (Taylor, commander) was in the best possible order; she was six feet in height between decks, without

shelves or double tier in the men's apartments, and as clean as a Dutch cabinet. We visited every part of the ship; in the hospital there was not one sick, and the slaves mustered on the deck, were to all appearance, and uniformly, not only with clean skins, but with their eyes bright, and every mark of health: This Captain Taylor must be among the best sort of men in such an employment; having in three voyages, and with full cargoes, lost on the whole but eight slaves, and not one seaman. In general, I should give a favourable account too of the *Eolus*, but the *Pilgrim* had not a scent that would offend, and was indeed sweeter than I should have supposed possible, in a crowd of any people of the same number, in any climate. One circumstance in all the three was particularly striking, in relation to the evidence on the Slave Trade: A full half of either cargo consisted of children (and generally as fine children as I ever saw) from six to fourteen years of age; and, on inquiry, I found but very few indeed of these were connected with the grown people on board. I could not but suppose, then, that these little folks were stolen from their parents, and perhaps (in some instances) sold by their parents.* I again remark, that these slaves were from Bonny and from Bassa.

The *Anne* was from the Gold Coast, a small vessel, scarcely clean, disagreeably offensive in smell, with only three feet six inches between the main decks, yet apparently with no sick on board. These Gold Coast negroes were in themselves a

* Nothing is more common in all parts of Africa, than the circumstance of parents of free condition selling their children in times of scarcity, which frequently happen, for a supply of food. Mr. Park has recorded many instances of it among the Mandingoes, (vide his *Travels*, p. 248, and again, p. 295.) "Perhaps by a philosophic and reflecting mind (observes Mr. Park) death itself would scarcely be considered as a greater calamity than slavery; but the poor negro, when fainting with hunger, exclaims, like Esau of old, *Behold I am at the point to die, and what profit shall this birthright do to me?* These are dreadful evils; ordained, without doubt, for wise and good purposes, but, concerning the causes of them, human wisdom is doomed to silence."

worse looking people, but they bore too a sickly complexion and heaviness of mien and mind which the others did not; and it was remarkable in the contrast of the cargoes, that among the last there was not even a common proportion of children or young people: I should suppose not above 20 in the 210.

Mr. B. of the custom-house, told me that at St. Vincent's more certificates for bounties were given than at all the other islands, and that the reason was, because it was situated next to Barbadoes, the most windward of the islands, and the Guinea ships arriving thus far in health, the masters, to avail themselves of the parliamentary bounty, took up their certificates before proceeding on to Jamaica or elsewhere, inasmuch as every day, at the close of a long voyage, might be marked by disease or death, and thus eventually preclude them from the benefit of the law. This should be rectified.

Mr. B. allowed, in conversation with me, that the regulations of tonnage proportioned to numbers, on which such outcry had been raised, had ultimately proved advantageous to the trader, as well as to the poor slave. The preservation of the slaves had well and fully repaid for the diminution in freight.

Saturday, December 17. At ten this morning all my negroes were mustered at the works, and had ten barrels of herrings distributed among them: afterwards, such of the women as had reared children, came to the villa, and each received, as a present, five yards of fine cotton, at 2s. 6d. per yard, of the gayest pattern, to make a petticoat.

Sunday, 18. Mr. H. read prayers to a congregation of my negroes.

Tuesday, 20. Went to Kingston to attend the sale of the Eboe, Windward, and Gold Coast slaves, in all 880. The slaves were seated on the floor in two large galleries, divided into lots of ten each. Those purchasers who, by

previous application, had gained a title of pre-emption, (for there was a demand for three times the number imported), drew for the lots in succession, until each had his number agreed for. In lotting the slaves, some broken numbers occurred, and a little lot of four (two girls and two boys) of about twelve years old, were purchased for me. The slaves did not seem under any apprehension, nor did they express any uneasiness, with exception to the Gold Coast negroes, who gave many a look of sullen displeasure. Returning home in the evening, I found my four little folks in old Mrs. H——'s room, where they eat a hearty supper, had some of their country folks got round them, and went to sleep as much at their ease as if born in the country. These children were unconnected with any on board the ship. The girls were remarkably straight, and with finer features than negroes ordinarily have. They had each a bead necklace, and small cotton petticoat of their country make, and must I think have been kidnapped or stolen from their parents. I cannot think that any parents would have sold such children.

Friday, 23. This morning I passed an hour or more, observing the process of sugar making in the boiling house. Of the best cane juice, a gallon of liquor gives one lb. of sugar, of the middling-rich, 20 gallons give 16 lbs. of the watery canes, 24 gallons give 16 lbs.

This afternoon Anselm, chief of the Charaibes in the quarter of Morne-Young; and Brunau, chief of Grand Sable; at the head of about twenty, came into the parlour after dinner, and laid a *don d'amitié* at my feet of Charaibe baskets, and of fowls and pine apples. We treated them with *wine*, and afterwards about a dozen of their ladies were introduced, who preferred *rum*. I had much courteous conversation with Anselm, accepted a basket, and a couple of pines, and bought some baskets of the other Charaibes. They were all invited to sleep on the estate, and a keg

of rum was ordered in return for Anselm's present, and for Brunau's, &c.

La Lime, one of the chiefs who had signed the treaty in 1773, and a dozen others, had before visited me at different times, but this was a formal address of ceremony, and all in their best attire, that is, the men, and perhaps the women too, for though they had no cloaths, saving a petticoat resembling two children's pocket handkerchiefs sewed at the corners, and hanging one before and one behind, yet they had their faces painted red, pins through their under lips, and bracelets; and about their ancles strings of leather and beads.

December 25. About ten in the forenoon the negroes of my estate, both men and women, exceedingly well dressed, came to wish us a merry Christmas: soon after came two negro fiddlers and a tamborine, when we had an hour's dancing, and carpenter Jack, with Phillis, danced an excellent minuet, and then four of them began a dance not unlike a Scotch reel. After distributing among them different Christmas boxes, to the number of about fifty, we attended prayers in a large room; myself read select parts of the service, and Mr. H—— closed our church attendance with a chapter from our Saviour's sermon on the mount, and a dialogue of practical christianity on the heads of resignation towards God, and peace towards men. This day, and almost every day, I had many Charaibe visitors tendering presents. I laid down a rule to receive no presents but from the chiefs, for the person presenting expects double the value in return, and the Charaibes are too numerous for a general dealing on such terms, either with views to privacy or economy. I should not omit that yesterday morning the chiefs, Anselm and Brunau, who had visited me the evening before, came to see me, and politely having observed that they would not intermingle, in their first visit of congratulation, on my coming to St. Vincent's, any matter of another nature, proceeded to demand *quelles nouvelles de la France*, and then

quelles nouvelles de l'Angleterre; and thus proceeded gradually to open the tendency of the question, as relating to the designs of government touching themselves. It seems that some persons of this colony, travelling into their country, and looking over the delightful plains of Grand Sable from Morne-Young, had exclaimed, "*what a pity this country yet belongs to the savage Charaibes!*" and this kind of language repeated among them, had awakened jealousies and apprehensions, and some French discontented fugitives from Martinico, and elsewhere, had (as had been heard from the Charaibes at Kingston) given a rumour, that I was come out with some project for dispossessing them by the English government. To remove these jealousies, I told them, "That private a man as I was, and come merely to look at my estate, and settle my private affairs, I would venture, on personal knowledge of the minister, and character of our common king, and unalterable principles of our government, to assure them, that whilst they continued their allegiance, and adhered to the terms of the treaty of 1773, no one dare touch their lands, and that Grand Sable was as safe to them as was Calliaqua to me: it was treason to suppose that the king would not keep his word, according to the conditions of that treaty; and if any subjects ventured to trespass on them, they would, on proper representations, be punished. For myself, I assumed a mien of anger, that they should forget their national principle in exception of me. If friendships and enmities descended from father to son, they must know me for their steadiest friend, and incapable of any injustice towards them." They seemed very much pleased with this sort of language, and assured me of their strongest regard and confidence, and would hear no more lies or tales to the prejudice of myself, or of the designs of government. They invited me to come and taste their hospitality, and I promised to do so, and we parted as I could wish—the best friends in the world.

December 26. This was a day of Christmas gambols. In the morning we rode out, and in the town of Calliaqua

saw many negroes attending high mass at the popish chapel. The town was like a very gay fair, with booths, furnished with every thing good to eat and fine to wear. The negroes (with a very few exceptions) were all dressed in pattern cottons and muslins, and the young girls with petticoat on petticoat; and all had handkerchiefs, put on with fancy and taste, about their heads. Returning to the villa, we were greeted by a party which frightened the boys. It was the *Moco Jumbo* and his suite.* The *Jumbo* was on stilts, with a head, mounted on the actor's head, which was concealed: the music was from two baskets, like strawberry baskets, with little bells within, shook in time. The swordsmen danced with an air of menace, the musician was comical, and *Jumbo* assumed the "antic terrible," and was very active on his stilts. We had a large company to dinner; and in the evening I opened the ball in the great court, with a minuet, with black Phillis, Granny Sarah being indisposed: our music consisted of two excellent fiddles *Johnny* and *Fisher*, from my Pembroke estate, and *Grandison*, tamborin of the villa; there stood up about eighteen couple; the men negroes were dressed in the highest beauism, with muslin frills, high capes, and white hats; and one beau had a large fan. The negro girls were all dressed gay and fine, with handkerchiefs folded tastefully about their heads, and gold ear-rings and necklaces: the girls were nearly all field negroes; there are but four female slaves as domestics in the villa. In England, no idea of "jolly Christmas" can be imagined, in comparison with the three days of Christmas in St. Vincent's. In every place is seen a gaiety of colours and dress, and a corresponding gaiety of mind and spirits; fun and finery are general. This moment a new party of musicians are arrived with an African *Balugo*, an instrument composed of pieces of hard wood of different diameters, laid on a row over a sort of box: they beat on one or the other so as to strike out a good musical tune. They played two or

* Without doubt the *Mumbo Jumbo* of the Mandingoes. Vide Park's Travels, c. iii. p. 39.

three African tunes; and about a dozen girls, hearing the sound, came from the huts to the great court, and began a curious and most lascivious dance, with much grace as well as action; of the last, plenty in truth.

Sunday, January 1, 1792. Rode over to my Pembroke estate in the valley of Buccament, about six miles distant, to the leeward of Kingston. The road is over the most rugged and towering hills, with occasional precipices of rock of a reddish dark hue, and for the rest covered with bushes and some fine trees. In the vales, between the ridges, and on every practicable ascent, are cultivated grounds, and the whole is a mixture of the rich and the romantic. The road winds much, to avoid the deep ravines and gullies. The flight of a bird cannot be more than three miles from Kingston to Buccament. We entered the valley of Buccament by a ravine, called Keil-lan's land, belonging to me.

The vale of Buccament brings to mind the happy and secluded valley of Rasselas, prince of Abyssinia. The valley, containing about 3,000 acres, is hemmed on each side by towering hills, whose steep ascents have in parts peeled off or split in the storm, and now are left precipices of bare rock, appearing between streaks of the highest verdure, from which occasionally shoots the *mountain cabbage-tree*.* In the centre of the valley stands an insulated mountain, whose height, through an interstice in the rugged boundary of the vale, looks down on the garrison of Berkshire hill, and Berkshire hill is 627 feet above the sea. The hills or rocks that shut in the valley, again command the hill in the centre. Down the vale runs a fine and rapid river, abounding with the finest mullet and other fish; its bed is obstructed with fragments of rocks from the skirting mountains. Its murmurs fill the vale. It winds round the centre hill, and then pours straight into the

* Called also the *Palmeto-Royal*. See it described at large, vol. i. p. 16.

sea. The valley, as it coasts the sea, is about one mile over. It stretches inland about five miles; its greatest breadth, half-way from the sea, is two miles. From the mount, in the centre, it forms a most luxuriant picture of cultivation, contrasted with romantic views, and seems wholly secluded from all the world. My Pembroke estate takes in the hill in the centre, and thence runs along the river side, comprehending all the valley on one side, to within a quarter of a mile of the sea.

A negro gave signal of my approach to the house, and all the negroes came forth to greet me, and with a welcome as warm as that at Calliaqua. They caught hold of my bridle, my feet, and my coat; every one anxious for a share in leading me up to the house; and indeed they attempted to take me off my horse and carry me, but I begged them to desist.

Friday, January 6. I visited Berkshire hill, and went over the fortifications. The hill itself is a rock, and, from its precipices, is scarcely assailable; where it is so, parts have been cut away, and, take art and nature together, the place may be deemed impregnable. The point above hath been flatted off, so as to admit room on its surface for most commodious barracks for a complete regiment, stores, reservoirs, &c. all bomb-proof. In my different excursions, I continued to inspect the persons of the negroes, and I can assert, that not one in fifty of those I have seen has been marked with the whip, with exception to the gang employed at the public works on Berkshire hill. This gang may be supposed to consist for the most part of reprobate and bad negroes, who have been sold from estates for riddance of their practices and examples. They chiefly belong, as an entire gang, to the overseer of the works, who may be supposed to pick them up cheap, being bad characters, though competent to their business, under the control of the military. The inhabitants, not willing to send their able men to the public works, for fear of evil communication, commute their quota of labourers, by paying the overseer a certain sum to find others in their room.

Friday, January 13, 1792. The Charaibe chief of all, *Chatoyer*, with his brother *du Vallee*, and six of their sons, came to pay me a visit, and brought their presents; a stool of Charaibe workmanship, and a very large cock turkey of the wild breed, which with a hen, I mean for England. *Chatoyer* and *du Vallee* were well dressed; as a mark of respect, they came without arms. We had much conversation with them, and I gave in return a silver mounted hanger to *Chatoyer*, and a powder horn to *du Vallee*. The latter is possessed of nine negro slaves, and has a cotton plantation. He is the most enlightened of the Charaibes, and may be termed the founder of civilization among them. *Chatoyer* and his sons dined at the villa, and drank each a bottle of Claret. In the evening they departed in high glee, with many expressions of friendship.

January 17. I visited the king's botanic garden; Dr. *Anderson* went round the garden with me. It consists of about thirty acres, of which sixteen are in high garden cultivation. The variety, beauty, growth, and health of the plants, from all quarters of the globe, is most striking. It is a scene for a painter as well as a botanist. The quickness of vegetation is astonishing: some English oak of three years growth are above seven feet high. The Indian teak wood, full eighteen feet high, and six inches diameter, of only four years growth. This being a remarkable hard and durable wood, leads me to note the general remark of Dr. *Anderson*, "that in this country, "where vegetation never stops or is checked, the hardest "woods are of growth as quick as the most pulpous or soft "texture." Dr. *Anderson* is multiplying to a great extent all the useful trees; the Chinese tallow tree, the gum Arabic, the Peruvian bark, the balsam of Capiri, the cinnamon, &c. &c. *N. B.* I name them from their produce.

January 23. Never passing a slave without observing his back, either in the field or on the road, or wenches washing in the rivers, I have seen not one back marked, besides that of the woman observed before on Mr. Greatheed's estate (in whom I may be mistaken as to the cause) and one new negro.

unsold at Kingston, who found means to explain to me that he was fufummed (flogged) by the surgeon of the ship; and he seemed to have had two or three strokes with a cat. I note it in the language of one accustomed to attend military punishments.—At my estate, and I believe on most others, confinement is the usual punishment. Three have been punished at Calliaqua, since my arrival; Sampson has received ten lashes, and two men were put into the stocks, of whom Indian Will was one, for getting drunk and cutting a negro lad's head open in his passion; he was released the next morning. The other was a watchman at the mill, from which the sails had been stolen; he was confined for two nights in terrorem, and then, no discovery being made of the theft, he was released.

January 26. Sailed from Nanton's harbour in the Maria schooner of 28 tons, took our departure at ten in the forenoon, coasted to leeward, and came off St. Lucia in the evening.

Friday, 27. Off Dominica in the morning, becalmed. In the evening a breeze sprung up; and,

Saturday, 28. Came at day-break off Bassatterre, in Guadeloupe; hailed a fishing boat and bought some fish; the people said all was quiet; *tout va bien a la Guadeloupe*.

Saw a very large spermaceti whale spouting and playing close a-head in the channel between Guadeloupe and Antigua. Came to an anchor at 5 P. M. in *Old Road bay*, Antigua. Walked up an excellent level coach road half a mile, to the Old-road plantation house. A mulatto boy getting before, gave notice of *Massa* being on the way. Every hoe was now thrown down, and a general huzza followed; and my good creoles, man, woman, and child, ran to meet me with such ecstasy of welcome, embracing my knees, catching my hands, cloaths, &c. &c. that I thought I should never have reached the house. At length, in joyous procession, with handkerchiefs for flags, I was conveyed to the old mansion of my

ancestors, and gave my good people a treat of rum, and all was dance and song.

Sunday, 29. Inquiring into the condition of the estate and situation of the negroes, I found the latter generally dissatisfied with their manager, Mr. R——. Their complaints were directed chiefly to his curtailing the allowance of the old people, and such others as were incapable of labour; add his frequency and severity of punishments. The first complaint I removed instantly, by ordering the full allowance of industrious youth to meritorious age. For the second (on examining into the grounds of allegation, and finding them just) I immediately discharged Mr. R. and appointed Mr. H——, who had been two years on the estate, and much liked by the negroes to be their manager. Their satisfaction on both accounts seemed complete and general.

Monday, 30. Went to St. John's, a large, and in many parts a well built town, and the church an excellent building, as is likewise the town or court house; but the town itself has the appearance of ruined trade and deserted habitancy. The country for twelve miles, from the Old-road plantation to St. John's, is open, with very few trees or even shrubs, but beautiful in its swells of ground, scarcely to be called hills, spotted with buildings, and varied with inlets of the sea opening in different points of view; high but infructuous cultivation cover every acre. The roads excellent, and every thing speaking the civilization, art, and toil of man; but nature answers not. Under the drought all fails; heat, with little or no moisture, generates nothing. Partial rains have this year, as often before, given hopes to the planter for his canes, and to the negro for his provisions; but the season has again failed, and their hopes are blasted. The whole is a picture of disappointment, in land, beast, and man. The negro houses are excellent, and many of them of stone; but no in-doors can give the face of comfort and contentment, if all is wanting beyond the threshold. The negroes having little or no provisions from their grounds, are fed by allowance from the planters, many themselves in

distress, which scants that allowance. On estates in good condition, it is twelve quarts of corn, with two or three pounds of salt provision *per* week.

Thursday, February 2. Being a day which I had allotted for a holiday to the negroes, we went early to the valley of the Old-road. In the morning I distributed ten barrels of herrings amongst the negroes, and in the evening we had a very smart well-dressed negro ball in the hall of my old mansion. Mr. L—— and myself both impartially allowed the negroes, young men and girls, to dance better in step, in grace, and correctness of figure, than our fashionable, or indeed any couples at any ball in England; taking that ball generally, there is no one negro dances ill, I danced a country dance with old Hannah, and a minuet with long Nanny. Not a complaint remains at the Old-road.

Friday, February 3. Returning from Old-road to Dr. Fairbairn's, I there saw Mr. Hoffman the Moravian missionary, *whose blameless life still answers to his song*. The Moravian missionaries are of the highest character for moral example, as well as gentle manners; and they preach the doctrines of *peace and good will* to all men, and to all governments. They assimilate in simplicity best with the minds of the negroes, and in their assiduity and goodness, have, I fear, but few equals amongst the regular clergy in the West Indies. It was with difficulty I prevailed on the good, mild, and disinterested Mr. Hoffman, to receive annually for his domestic use a small barrel of sugar, and a quarter cask of rum, as a token of my regard for his attention to my negroes on the Old-road estate.

Sunday, February 5. In the evening embarked for Martinique.

Monday, 6. Becalmed off Guadaloupe.

Tuesday, 7. At seven in the evening came into St. Pierre's bay, and passing under the stern of an 18 gun sloop of war, she

hailed us to come on board. I went on board with the captain of our schooner. The French officer commanding the sloop, on my stating that our vessel was not commercial, but merely having on board Englishmen, passengers, told me that the schooner must immediately come to an anchor under his stern, but that myself and other gentlemen might go on shore. Returning to the schooner, a serjeant of the national guards followed us in a shallop, and said he was come by orders to conduct us on shore; we went with him. On landing, he told us we must proceed to the *hotel de l'intendant*, Monsieur le Chevalier de Menerad. He marched us above a mile to the hotel, and passing within the centinel at entrance of the court, asked for the governor, who was out, and only a black boy in the house, who knew not where the governor was to be found. The national serjeant talked in a high tone of brutal command, and said we must stay all night in the open air, or until the governor was found. I used every kind of language, but all in vain. I was afterwards told that I had omitted the essential argument with these liberty-corps, to wit, '*a johannes*.' About ten o'clock a Monsieur *De la Cour*, lieutenant of police, arrived, apparently on other business; I told him my name and situation. He behaved most politely, and told the serjeant he should take us to the *hotel des Americains*, the best tavern in St. Pierre, giving himself security for our forthcoming next morning. Whilst the receipt for our bodies was writing, the governor, Chevalier de Menerad, arrived: on my name being mentioned, he behaved most politely, asked my whole party to supper, and offered me a bed. Having complained of the serjeant's conduct, he immediately told him to leave the room, and made a general apology, giving me plainly to understand that there was scarcely the appearance of law, government, or any authority at Martinique.

The national regiments had arrived a year before. The inhabitants were of a different party. The old corps on duty there of an uncertain or undecided character, and the constitution of the mother country being unsettled, and no persons in

Martinique knowing who were finally to be uppermost, all were afraid to assume a responsibility.

I thanked the governor for his polite invitation, but declined accepting what the state of his house, and having no domestics, proved to be a mere invitation of compliment. His wife and family were at Guadaloupe.

Monsieur De la Cour conducted us, at near eleven at night, to the American hotel, where, finding an excellent house and a truly Parisian cook, we laughed over our difficulties.

Monsieur De la Cour and Monsieur Penan, our banker, next morning confirmed the state of government in Martinique, as before mentioned: all was a calm, but it was such a calm as generally precedes a hurricane. With respect to the slaves, they are perfectly quiet. For the free mulattoes and *gens de couleur* (who are twice as numerous as the white inhabitants), they too are waiting the result of ascendant parties in old France. For the whites, they are generally, as far as I can find, friends to the old government, and they declare themselves most openly; hence the new acts of the national assembly are yet unexecuted. The church remains on its ancient footing, and the convents are filled with the same people, Capuchins and Ursulines, but the Capuchins appear not in the open streets.

In this state of political diffidence, commerce has lost its activity, and credit is gone; yet money seems to be plenty; but there is little or no trade in this great and once commercial town. Instead of fifty or more large sugar ships, which should at this season be seen in the bay, there are only nine; and even these seem in general to be small. American vessels (schooners and sloops) are numerous; perhaps there may be forty.

Wednesday, February 8. We amused ourselves in walking about the town and purchasing presents for our friends; *bijou-*

terie of Madame Gentier, *embroiderie* of Madame Nodau, and *liqueurs* of Grandmaison.

The town of St. Pierre extends along on the beach. It is above two miles in length, and in breadth about half a mile. The buildings are of stone, and handsome. The shops are many of them well decorated. The jeweller and silversmith's shop (Goutier's) is as brilliant as any in London or Paris. Trade being nearly extinguished in the harbour, the embers of what it has been glimmer in the shops.

Thursday, February 9. In the evening we embarked for St. Vincent's.

Friday, February 10. Early this morning were in sight of St. Vincent's, off the Sugar Loaves of St. Lucie, and there close in with the land. A fine breeze springing up, we run over the channel of seven leagues in three hours, and then coasted down to windward of St. Vincent's, a beautiful and rich country, mostly in possession of the Charaibes. At four in the afternoon we anchored in Young's Bay, landed, and once more found ourselves in the comfortable mansion of Calliaqua. My voyage to Antigua has put me in full possession of the question concerning the best mode of feeding negroes. I am speaking of the difference in their situation in regard to plenty and comfort, when fed by allowance from the master, as in Antigua; or when supported by provision grounds of their own, as in St. Vincent's. In the first case, oppression may, and certainly in some instances and in different degrees doth, actually exist, either as to quantity or quality of food; besides the circumstance of food for himself, the negro suffers too in his poultry and little stock, which are his wealth. The maintenance of his pigs, turkies, or chickens, must often subtract from his own dinner, and that perhaps a scanty one, or he cannot keep stock at all; and a negro without stock, and means to purchase tobacco and other little conveniencies, and some finery too for his wife, is miserable.

In the second case, of the negro feeding himself with his own provisions, assisted only with salt provisions from his master (three pounds of salt fish, or an adequate quantity of herrings, per week, as in St. Vincent's), the situation of the negro is in proportion to his industry; but generally speaking it affords him a plenty that amounts to comparative wealth, viewing any peasantry in Europe. On my estate at Calliaqua, forty-six acres of the richest ground are set apart for the negro gardens, where they work voluntarily in the two hours they have every noon to themselves, on the half holiday in the week, and Sundays; and their returns are such that in my negro village, containing eighty-five huts, there is scarcely one but has a goat and kids, two or three pigs, and some poultry running about it. All this stock is plentifully fed from the negro's garden, and how plentifully the garden supplies him will appear from the following fact. From the late Guinea sales, I have purchased altogether twenty boys and girls, from ten to thirteen years old. It is the practice, on bringing them to the estate, to distribute them in the huts of Creole negroes, under their direction and care, who are to feed them, train them to work, and teach them their new language. For this care of feeding and bringing up the young African, the Creole negro receives no allowance of provisions whatever. He receives only a knife, a calabash to eat from, and an iron boiling pot for each. On first view of this it looks like oppression, and putting the burthen of supporting another on the negro who receives him; but the reverse is the fact. When the new negroes arrived on the estate, I thought the manager would have been torn to pieces by the number and earnestness of the applicants to have an inmate from among them. The competition was violent, and troublesome in the extreme. The fact is, that every negro in his garden, and at his leisure hours, earning much more than what is necessary to feed him, these young inmates are the wealth of the negro who entertains them, and for whom they work; their work finding plenty for the little household, and a surplus for sale at market, and for feeding his stock. This fact was in proof to me from the solicitations of the Creole negroes in general (and who had large

families of their own), to take another inmate, on conditions of feeding him, and with a right to the benefit of his work.* As soon as the young negro has passed his apprenticeship, and is fit for work in the field, he has a hut of his own, and works a garden on his own account. Of the salt provisions given out to the negroes, the finest sort are the mackarel salted from America, and the negroes are remarkably fond of them. My brother H—— (who is a manager at once properly strict, and most kind, and who is both feared and beloved by all the negroes), indulges them by studying to give a variety in their provisions; pork, beef, and fish of different sorts. A negro prefers pork to beef; one pound of pork will go as far as two pounds of beef in his mess-pot. This little attention of Mr. H—— to the negroes' wishes, shews how much of their comfort must even depend on the master's regard to them.

Wednesday, February 22. The 66th regiment reviewed by general Cuyler. The men well-looking, the manual in proper time and exact, the firing close, and the level good. The review in a word shewed this regiment to be well disciplined, and nothing hurt by a residence of near seven years in the West Indies.

Monday, March 5. Embarked in the Fairy sloop of war for Tobago. Got under way at twelve.

Tuesday, March 6. At four P. M. Tobago in sight, our course close to the wind, making for the body of the island.

Wednesday, March 7. Close in with the land, and most of the day beating to windward with a strong lee current. In the afternoon were off *Man o'war* bay.

Thursday, March 8. The wind E. S. E. and a strong lee current against us the whole night. At day-break, we found

* Compare this with what is said on the same subject, vol. ii. p. 341. It was impossible that two persons, writing in different islands, could agree so very precisely, unless their observations were founded in truth.

our ship nearly where she was the preceding sun-set. In the evening we weathered St. Giles's rocks and little Tobago on the N. E. end of the island. Lay to during the night.

Friday, March 9. At sun-rise, were off Queen's bay, on the leeward coast, whence we ran down, with both wind and current in our favour, and anchored in Rockly-bay about twelve o'clock.

Saturday, March 10. Went to Rise-land, or Sandy Point, in the S. W. part of the island, a country almost flat, but beautifully spotted with mountain cabbages, and various trees. Trinidad, at eighteen miles distance, appearing plain to the eye.

Sunday, March 11. This morning early, I rode five miles across the island from Rise-land to Adventure estate, in Courland bay-division. In traversing the country, and on my return, I was much struck with its beauty, from the Flat at Sandy Point gently breaking into hills, till ultimately at the N. E. end it becomes a scene of mountains and woods. I particularly noticed the great extent of provision grounds, and the fine healthy looks of the negroes in general, arising from the plenty around them. I saw no marks of the whip on their backs, at least not here nor at St. Vincent's. The punishments are either so unfrequent or so little severe, as to leave no traces for any length of time.

Sunday, March 15. Early in the morning set out, and in the afternoon reached the *Louis d'or* estate. Twenty-two miles from Port Louis, from the very point of the Town of Port Louis, the country becomes hilly; and as you farther advance, the hills rise into mountains not broken and rugged as the convulsed country of St. Vincent's, but regular though steep, and on a large-scale of regular ascent and descent. The scene of nature is on an extensive scale, and gives the idea of a continent rather than an island. It is not alone its vicinity to the Spanish main that suggests this idea. The appearance of the island fully warrants the assumption, and the contiguity of

South America, only more fully marks its being torn therefrom, and of its being, in old times, the southern point or bold promontory of the vast bay of Mexico.

Friday, March 16. This day I rode over my estate, but previous to any remarks thereon, I must notice the radical words and language of the Indian red Charaibe (Louis.) There are three families of red Charaibes, settled in a corner of my Louis d'or estate, and their history is briefly this.—Louis was five years old when his father and family fled (about fifty years past) from the persecutions of the Africans or black Charaibes of St. Vincent's. The family has since divided into three distinct ones, by increase of numbers. Louis the chief, is a very sensible man, and in his traffic for fish and other articles, has obtained some knowledge of the French language.

The following words I took from sound, and with accuracy; for on reading over the Charaibe words to Louis, he repeated them back in French to me.

* God—naketi, i. e. <i>Grandmere</i> .	Wind—crazabai.	- -	Father—baba.
The Sun—vèhu.	- - - -	Rain—cenob.	- - Mother—chéco.
Moon—mònt.	- - - -	Thunder—warawiaraw.	Son—wica.
Earth—hoang.	- - - -	Mountain—wèib.	- Daughter—hania
Sea—balané.	- - - -	Tree—wewee.	- Life—nee.
Fire—wat-ho'.	- - - -	Bird—fuss.	- - Death—hela'hal.
Water—tona.	- - - -	Fish—oto'.	- - Devil—qualeva.

I interrogated Louis as to religion: he is now a catholic, but says the Charaibe belief was always in a future state.—Formerly, they used to bury the defunct *sitting*†, with his bow, arrows, &c. “But now,” says Louis, “we bury *au long et droit*,” which is better; for when sitting, the body got *retreci* (this was his expression), and could not easily

* I questioned particularly on the signification of the word *naketi*.

† This is a curious and remarkable illustration of what is related in the appendix to book i. vol. i. p. 123.

"start up and fly to heaven, but being buried *long and strait*, "it can fly up directly when called." This argument was possibly suggested by the catholic missionaries, to make the poor Charaibes leave the old practice. Louis's belief in a future state is however ascertained.

But now to remarks on the estate. On the beach at Queen's-bay, are brick and stone pillars, not unlike the great gate of an English park, whence the eye is directed up an avenue of cocoa-nut trees, and from thence, in the same strait line, through a broad and regular street of negro houses, at a mile from the gate, to the works, which terminates the avenue, and have the appearance of a church built in form of the letter T, with a tower raised on the centre. Over the works rises a precipice, on which stands the mansion-house, nobly commanding the whole vale. A fine river winds from the back mountains, under the point of the great ridge on which the house stands, and then pours in a direct line, nearly by the east of the negro village, into the sea. In its course it supplies a canal for turning the water-mill.

The negroes on this estate are a most quiet and contented people; some asked me for little trifles of money for different purposes, which I gave them, but there was not one complaint, for old Castalio came to me as a kind of deputation from the rest, to tell me that "massa Hamilton was good manager, and good massa." Indeed the negroes are generally treated as favourite children, by their masters in Tobago.

The necessities of the island have demanded the residence of the planter, and the critical state of French government, and the wild notions and conduct of the French people in the colonies, have brought the old English settlers in Tobago, and their negroes, to a system of reciprocal regard and mutual determination to resist particular wrongs or a general attack. The planters here talk of their negroes as their resort, to be depended on against either a licentious garrison, an arbitrary governor, or the mad democracy of French hucksters.

The negro houses throughout Tobago are much superior to those in St. Vincent's, or even in Antigua. Mr. Franklin, junior, informs me that each of his negro's houses has cost him 23 jolliannes, or above forty pounds sterling, including the negro's labour. These houses are built of boards, uniform throughout the estate, are about 26 feet long by 14 feet wide, consisting each of two apartments, besides a portico or covered walk with a seat in front, off which a closet at the end is taken from the portico to form a small kitchen or store-room. The roof is of shingles. In St. Vincent's the negro houses are of no fixed dimensions; some are very large and some very small, according to the fancy or ability of the negroes, who are however generally assisted by their masters with posts and main timbers, and occasionally supplied with boards. Thus the village is irregular, some houses boarded, some of them stone and part boards, and most of them wattled or thatched. Within, the houses are as comfortable as those at Tobago, but not so durable; and the portico of the Tobago house is a superior comfort.

Saturday, March 17. I passed the morning in seeing various of my negroes, particularly the women and their Creole children. This last year I have had an increase of thirteen children, of whom only one has died. I ordered, as at St. Vincent's, five yards of fine printed cotton to every woman who had reared a child, and gave ten barrels of pork among the negroes in general. Riding out, I paid a visit of some length to the red Charaibe families, of whom Louis is the head; two of the young women were really handsome. The old Indian dress is lost, and they wore handkerchiefs, cotton petticoats, and jackets like the negroes. The huts were scarcely weather tight, being wattled and thatched, crowded with all their filth and all their wealth. The latter consisting of great variety of nets for fishing, hammocks for sleeping in, and different sorts of provisions, stores, &c. &c. Beasts, stores, and people all in one room.

At two o'clock we set out for Mr. Clarke's, five miles from Louis-d'or, on the road to Port Louis. Mr. Clarke's house is an excellent building, framed in England, and placed on the very pinnacle of the highest mountain in Tobago, with garden and shrubberies, abounding with birds of most splendid plumage. The variety, beauty, and number of the feathered tribes in Tobago, are indeed at once delightful and astonishing. I must observe further, on the country of Tobago, that although it is not a twentieth part cultivated, yet it is all, or for the most part, improveable. Mr. Hamilton, who has passed many successive nights in the woods, and in traversing the country, assures me, there is no where a rock, or scarcely a large stone, to be found, except upon the coasts and beach. Though the season is now dry, I observed in many parts large spots or fields of Guinea grass, which would fatten cattle of the largest breed. As a timber and a victualling country, it seems valuable in an imperial, as well as commercial point of view; a resource to armies and fleets, as well as to the merchant and planter.

Wednesday, March 21. At 6 in the evening I embarked in the Lively schooner for Grenada.

Thursday, 22. At 6 in the evening we anchored in the carenage of St. George's town, Grenada, and immediately landed.

Sunday, 25. In the forenoon we went to church, the governor, speaker of the assembly, officers, &c. attending, with a respectable congregation of people of all colours. In the gallery was an assemblage of girls and boys under a mulatto school-master, who sung psalms very well to the accompaniment of an excellent organ. The clergyman, Mr. Dent, read prayers, and preached, with great devotion. The service was in every respect most creditable to the island. The church is plain, with a handsome steeple, and a clock given by the present governor Matthews.

St. George's is a handsome town, built chiefly of brick, and consists of many good houses. It is divided by a ridge, which, running into the sea, forms on one side the carenage, and on

the other the bay. Thus there is the bay town, where there is a handsome square and market place, and the carenage town, where the chief mercantile houses are situated, the ships lying land-locked, and in deep water close to the wharf. On the ridge, just above the road of communication between the towns, stands the church; and on the promontory or bluff head of the ridge, stands a large old fort, built by the Spaniards when in possession of Grenada. It is built of free-stone, is very substantially, if not scientifically constructed, and contains the entire 45th regiment. The 67th regiment is quartered in the new barracks, and does duty on the new fortifications of Richmond-hill; a very strong situation to the east or north-east of the town.

Tuesday, March 27. *Louis la Granade*, chief of the Gens de couleur, and captain of a militia company, came to the government house. He seems a fine spirited, athletic fellow, and wears a large gold medal about his neck, being a gift from the colony, in reward for his various services and experienced fidelity on all occasions. The mulattoes have presented a most loyal address to the governor, stating their strong attachment to the King and the British constitution, and their abhorrence of all innovation.

Friday, 29. At ten in the morning we sailed from Grenada in the Fanfan schooner, coasted the leeward side of the island from south to north; it seems well peopled, and in general it appears to be a rich sugar country; with less variety of ground indeed than St. Vincent's, and less verdure. Its mountains are but hills in comparison with those of St. Vincent. A waving surface, hills gently rising and falling, characterize Grenada. Deep valleys shaded with abrupt precipices characterize St. Vincent's.

Saturday, March 30. At three in the morning anchored in Kingston-bay, St. Vincent's, and thence rode to the villa. From Grenada to St. Vincent's, our schooner hugged the land of the Grenadines under their leeward side, with very small intervals of channel. The Grenadine isles and detached rocks, are supposed to be about 120 in number. Twelve of these little isles are said to produce cotton.

April 19. Had much conversation this day about the Charaibes.

The windward estates, quite to the Charaibe boundary of Bayaraw, are of the richest land in the island, but the surf on the shore is at all times so heavy, that no European vessel can continue on any part twenty-four hours with safety, and no European boat can come on shore without the danger of being swamped. Hence, until lately, the supposed impracticability of landing stores and taking off sugars, prevented the cultivation of the lands; but since the Charaibes in their canoes, have been found to accomplish what Europeans cannot effect with their boats, these lands have risen to £.60 sterling an acre, and every settler is growing rich. A sloop lays off and on as near as she may to the shore, and in one morning, from day-break to noon, a canoe manned by ten Charaibes, will make forty trips to the sloop, carrying each time a hogshead of sugar, &c. &c. and the expense for the morning amounts to ten dollars, being a dollar for each Charaibe.—The Charaibes thus begin to taste of money, and are already become very industrious at this work. Moreover, they plant tobacco, and want nothing but a market to encourage them to plant more. Chatoyer's brother (Du Vallee) has nine negroes, and plants cotton. Money civilizes in the first instance, as it corrupts in the last; the savage labouring for himself, soon ceases to be a savage; the slave to money becomes a subject to government, and he becomes a useful subject.*

* This must be admitted with some limitation. Before a negro places such a value on money as is here supposed, he must have acquired many of the refinements and artificial necessities of civilized life. He must have found uses for money, which in his savage state, he had no conception of. It is not therefore the possession of money alone; it is the new desires springing up in his mind, from the prospects and examples before him, that have awakened his powers, and called the energies of his mind into action. I have thought it necessary to observe thus much, because the doctrine of my amiable friend, without some qualification, seems to sanctify an assertion which has been maintained by speculative writers, with some plausibility; namely, "that if the negro slaves were allowed wages for their labour, coercion would become unnecessary." What effect a system of gradual encouragement, by means of wages, operating slowly and progressively, might produce in a long course of time, I will

Mr. B. acting collector of the customs, informed me, that the value of British manufactures exported from St. Vincent to the Spanish and French settlements, was upwards of £.200,000 annually. From the superior advantages of Grenada, with respect to situation, &c. the export trade of that island to the Spanish main, must be much more considerable. That of Jamaica out of comparison greater. These circumstances are to be taken into the general account of the importance of the West India Islands to Great Britain.

April 24. Went on board a Guinea ship, the *Active*, from Sierra Leone. On board this ship is a black boy, called Bunc, about ten years old, the son of an African chief; he is going to England for his education, and has two slaves sent with him by his father, to pay his passage by their sale. Captain Williams has another boy on board, who was sent to England two years ago for the same purpose. This voyage he was to take him back to Annamaboe; but the boy absolutely refused landing again in Africa, and he waits on Captain Williams as a free servant, and is going back to England with him. The slaves were in high health; captain Williams is a superior man in this trade; as a fundamental trait of his character I notice, that last year (1791), on receiving the parliamentary bounty for the good condition in which his people arrived, he gave out of his own pocket £.50 as a gratuity to the surgeon of his ship.

Monday, April 30. This day Dufond, Chatoyer's brother, and next to him in authority, particularly on the Grand Sable side of the country, made me a visit: he had been twice before when I was absent in the other islands, and on his first visit had left his own bow and arrows for me. I gave him in return a pair of handsome brass barrelled pistols. He seems a very polite and sensible man, and speaks good French.

May 8. Embarked on board the *Delaforde*, and at 5 P. M. sailed for England.

not presume to say; but I am persuaded, that an attempt to introduce such a system among the labouring negroes in general, without great caution and due preparation, would be productive of the greatest of evils.

HISTORY
OF THE
WAR IN THE WEST INDIES,

FROM ITS COMMENCEMENT IN FEBRUARY 1793.

HISTORY
OF THE
WAR IN THE WEST INDIES,
FROM ITS COMMENCEMENT IN FEBRUARY 1793.

CHAPTER I.

Preliminary Observations.—Commencement of the War.—Capture of Tobago.—Fruitless Attempt against Martinico.—Determination of the British Ministry thereon, and consequent Preparations for a large Armament to be sent to the West Indies.—Sir CHARLES GREY appointed to the Command of the Land Forces, and Sir JOHN JERVIS to the Command of the Fleet.—New Arrangement.

WHOEVER has made himself acquainted with the history of the West Indian Islands, cannot fail to have observed that, whenever the nations of Europe are engaged, from whatever cause, in war with each other, those unhappy countries are constantly made the theatre of its operations. Thither the combatants repair, as to the arena, to decide their differences; and the miserable planters, who are never the cause, are always the victims of the contest!

When, at the pacification of 1763, the claims of Great Britain and France to the neutral Islands of St. Lucia, Tobago, St. Vincent, and Dominica, were adjusted by a division of the spoil, many circumstances concurred to induce a hope, that the contending parties would remain satisfied with their booty, and not hastily involve the world again in devastation and bloodshed. One of the causes of former contests between France and England (the claim to those islands) having been removed, there was certainly reason to suppose, that the remembrance of recent calamities, the pressure of poverty, and the various other distresses which the war had brought on all the belligerent powers, were circumstances highly favourable to a continuance of the peace. The short experience of ten years proved the fallacy of this expectation. The martial spirit of Great Britain sickened for employment; and pretences being wanting for directing it towards her ancient enemies, it was turned, in an evil hour, against her own subjects in North America. Wise men foresaw and predicted, that the restless and intriguing genius of France would not allow that kingdom to continue an indifferent spectator of such a contest. Accordingly, in the year 1778, she rushed into another war with England, without even affecting to have sustained the shadow of provocation; and the consequence of her injustice, and our insanity, was the loss, not only of those of the sugar islands which had been assigned to us in 1763, but of almost all the rest; the dismemberment of the empire, and a combination of dangers from which, at one moment, death seemed our only refuge.

Of the capture of the sugar islands in that war, and their restoration to Great Britain at the peace of 1783, I have sufficiently treated elsewhere. America alone derived advantage from the contest. As the French had engaged in the war without provocation, so they retired from the field, not only without benefit, but with manifest loss. They contracted an enormous debt, to the payment of which their ordinary revenues were inadequate; and perhaps to this circumstance, more than to any other, the ruin of their ancient government must

immediately be attributed. So true is the observation of our great dramatic Poet (and it is equally applicable to nations and to individuals) that

————Even handed justice
Commends th' ingredients of our poison'd chalice,
To our own lips. SHAKESPEARE.

To a philosopher, speculating in his closet, it might seem that such an event could not fail to operate both as a terrible example, and a profitable lesson, to the nations of the earth; but above all, to those few envied states who have every thing to lose, and nothing to gain, by a change in their situation. Posterity will either mourn over that page of our history, or doubt its fidelity, which shall record the melancholy truth, that, in the year 1792, the government of Great Britain (too proud to learn wisdom from the misfortunes of others) adopted towards France the same infatuated line of conduct, which, a few years before, the French government, nearly under the same circumstances, had pursued towards Great Britain. Our conduct was similar; may the mercy of Divine Providence avert from us a similar issue!

WAR being thus renewed, (first proclaimed, I admit, on the part of France, but provoked undoubtedly by the rash councils and imperious language of the British administration), the West Indies became, as usual, the scene of military enterprize; and Great Britain had the advantage (if an advantage it might be called) of making the first onset. On the 10th of February 1793, a few days only after notice had been received of the French declaration of war, directions were transmitted to Major General Cuyler, the commander in chief of the British troops in the Windward Islands, and to Sir John Laforey, who commanded in the naval department, to attempt the reduction of Tobago. As most of the proprietors in that island were English, it was supposed that an English armament would be favourably received by the inhabitants: and the event justified

this expectation. The island surrendered, without any great struggle, on the 17th of April.

Of the territory thus re-annexed to the British dominion, I shall give the best account I am able to collect in a subsequent chapter. At present, I am unwilling to interrupt the narrative of military transactions, by disquisitions either on its past history, or its present importance; and shall, therefore, proceed to the next attempt of the British forces in this part of the world, which I am sorry to observe had a less favourable termination.

It was an attack on Martinico; an enterprize of great magnitude; for the labours and ingenuity of man had co-operated with the hand of nature, in rendering that island one of the strongest countries in the world. In 1759, it had successfully resisted a formidable British armament of ten ships of the line, besides frigates and bomb ketches, having on board 5,800 regular troops; and although the island surrendered, three years afterwards, to a much superior force, yet the gallant and vigorous resistance which the garrison was enabled to make on that occasion, for upwards of three weeks, ought surely to have induced great caution and consideration, with regard to future expeditions against a country so amply provided, both by nature and art, with the means of defence.

In the present conjecture, the whole of the British force in the Windward Islands, was known and allowed to be, of itself, vastly inadequate to the object in view; but such representations had been spread throughout the army, concerning the disaffection of the greater part of the inhabitants of all the French islands towards the republican government, recently established on the ruins of their monarchy, as to create a very general belief, that the appearance of a British armament before the capital of Martinico, would alone produce an immediate surrender. General Bruce, on whom the chief command of our troops had devolved in the interim, was indeed assured, by a deputation from the principal planters of the island, that

"a body of 800 regular troops, would be more than sufficient to overcome all possible resistance."

These representations (as the General himself informed the king's ministers) induced him, in conjunction with admiral Gardner, to undertake the expedition; and the land forces having been embarked in the ships of war, the armament arrived off Cape Navire on the 11th of June 1793. On the 16th the British troops, in number eleven hundred, made good their landing; and having been joined by a body of about eight hundred French royalists, took possession of a very strong post within five miles of St. Pierre, it being the General's intention to attack the two forts which defended that town. The plan however did not succeed, and I regret, that I am unable to furnish a satisfactory account of the causes of its failure. Whatever information might have been contained in the despatches from the commander in chief to government, all that has been communicated to the public lies in a narrow compass, and I shall repeat the substantial part in the General's own words: "The morning of the 18th (he observes) was the time fixed for the attack, and we were to move forward in two columns, the one consisting of the British troops, the other of the French Royalists; and for this purpose, the troops were put in motion before day-break; but unfortunately, some alarm having taken place amongst the royalists, they began, in a mistake, firing on one another, and their commander being severely wounded on the occasion, his troops were disconcerted, and instantly retired to the post from which they had marched." "This conduct (continues the General) strongly proved, that no dependance could be placed on the royalists, and that the attack against St. Pierre, must have been carried on solely by the British troops, to which their numbers were not equal. They were therefore ordered to return to their former posts, from whence they re-embarked;" &c.

This is the whole, or nearly the whole, of what the British administration thought proper to furnish for the gratification of the public curiosity, concerning the conduct and failure

of this unfortunate expedition; and indeed it is sufficient to demonstrate, that the strong assurances which had been given, and the sanguine expectations which had been formed, of support and assistance from the greater part of the French inhabitants, consisting in the whole of upwards of 10,000 whites, were not justified by the event. It reflects therefore great honour on the liberal and humane disposition of the British commanders, that they did not suffer the disappointment, which they must have felt on this occasion, to operate to the disadvantage of those of the French planters, by whom such assurances were held forth, and who, though mistaken as to their countrymen, manifested the sincerity of their own professions by their subsequent conduct. "As they would certainly have fallen victims," observes general Bruce, "to the implacable malignity of the republican party, as soon as we quitted the island, it became in a manner incumbent on us, in support of the national character, to use our utmost exertions to bring these unhappy people from the shore; and although the necessity of impressing such vessels as could be found, and the purchasing provisions from the merchant vessels, will incur a great expense, I have nevertheless ventured upon it, trusting for my justification to the generous and humane disposition exhibited by the British nation on similar occasions. We were therefore employed in embarking these people, from the 19th to the 21st;" &c.

Notwithstanding this discouraging account, the British ministers, on receiving intelligence of General Bruce's miscarriage, considered themselves imperiously called upon to vindicate the honour of the English arms, by enterprises of greater magnitude in the same quarter. They resolved to send thither, forthwith, such an armament, as, in addition to the British force already in the West Indies, should be sufficient not only for the conquest of Martinico, but even "to dislodge the enemy from every one of their possessions in that part of the world:" Such was their declaration.

The necessity of despatching to that part of the king's dominions a considerable reinforcement, could not indeed admit

of doubt or delay. The preservation of many of our sugar islands rendered such a measure indispensable; but the question whether it was consistent with prudence and good policy to prosecute offensive war in that quarter, rather than confine our attention solely to the defence of the British territories there, involves in it many great and weighty considerations. A few reflections which have occurred to me on this head will be found towards the conclusion of my narrative.

Such, however, whether wisely or not, was the system approved by the British ministers; and it must I think be admitted that, if a war of conquest in the West Indies was, at all hazards, a proper and justifiable measure, the comprehensive plan, which embraced the whole possessions of the French in the Windward Islands, originated in sound policy: certainly it was wise, either to attempt the conquest of all of them, or to leave all of them unmolested. Every man who is acquainted with the relative situation of the French and British colonies in those islands, the condition of each, and their affinity to each other, will allow that, in this case, there was no medium.

It must likewise be admitted, that the preparations which the ministers caused to be made, in consequence of this determination, corresponded to the magnitude and extent of their views. Orders were issued for the immediate embarkation of fourteen regiments of infantry, consisting of near eleven thousand men; a fleet composed of four first-rate ships of war and nine frigates, besides sloops, bomb ketches, and transports, was appointed to convey them to the scene of action, and act in conjunction with them. And that no possible doubt might arise in the public mind, concerning the judicious application of this great armament to its proper object, the whole was placed under the direction of two of the most distinguished officers which any age or nation has produced; the chief command being assigned to Sir CHARLES GREY, General of the land forces; and the naval department to vice admiral Sir JOHN Jervis. Neither must it pass unobserved, in justice to the different public offices of this kingdom, that the whole was

ready for its departure in less than three months after the receipt of General Bruce's despatches.

How much it is to be lamented that this great and decisive plan was not persisted in to the last, the circumstances which I shall hereafter record, will mournfully demonstrate. It is with pain I relate, that a few days only before Sir Charles Grey expected to sail, a new arrangement was made, by which no less than 4,600 of the troops that had been placed under his orders, were detached from the rest, and employed on another service; the ministers apologizing to the General, by intimating that it was not expected of him to accomplish all the objects for which the most extensive armament had been judged necessary.

Although it cannot easily be supposed that this unexpected diminution of his army, any more than the apology which was made for it (by which it was evident that the original plan was abandoned by government) could be matter of satisfaction to the commander in chief, yet he silently acquiesced in the measure; and, as the secretary of state afterwards very honourably and handsomely observed in the House of Commons, "did nevertheless complete all the conquests which were in contemplation before any reduction of his force had taken place."

The reader's first impression therefore will naturally be, that, although a less force was actually employed than was allotted for this expedition, the deficiency was abundantly supplied by the spirit and energy of the army and navy, and the wisdom and decision of the commanders; that the objects in view being fully obtained, though with less means than were at first suggested, the original system was in truth carried into full effect; and of course the reduction of the army, justified by subsequent events.

How far this reasoning can be supported, the sequel will shew. I shall proceed in the next chapter with a detail of military transactions in the order they occurred.

CHAPTER II.*

Sir Charles Grey arrives at Barbadoes, and sails for the Attack of Martinico.—Proceedings of the Army and Navy, until the Surrender of that Island.

ON the 26th of November 1793, the armament, reduced as was stated in the latter part of the preceding chapter, sailed from St. Helen's, and on the 6th of January, 1794, the squadron cast anchor in Carlisle Bay, in the island of Barbadoes: It was afterwards reinforced by the *Asia*, of 64 guns, and some additional frigates.

After a month's stay at Barbadoes (an interval which was usefully employed in preparing gun-boats, in training the seamen for land service, and in attendance on the sick) the squadron sailed for the attack of Martinico; having on board, of land forces (including a detachment of negro dragoons) 6,085 effective men.

* It is proper to observe, that most of what is related in this chapter, concerning the proceedings of the army and navy, in the attack and conquest of Martinico, is copied from the public despatches of the respective commanders. The few particulars which I have interwoven in some places, and added in others, are derived partly from the comprehensive and circumstantial account which was published by the Rev. Cooper Willyams; and partly from private communications from officers who were in actual service in this campaign. I have arranged the whole after my own manner, in the view (as I hoped) of giving the detail greater clearness and perspicuity, than can be expected from despatches written commonly in great haste on the spur of the moment.

On Wednesday, the 5th of February, the fleet approached the south-eastern coast of that island, and the General (having previously made the necessary arrangements with Sir John Jervis) divided the army into three detachments, with a view to land them at three separate and distinct quarters. These were Gallion Bay on the northern coast, Case de Navires nearly opposite, on the south, and Trois Rivières towards the south-east. The first detachment was commanded by Major General Dundas, the second by Colonel Sir Charles Gordon, and the third by the General himself, assisted by Lieutenant General Prescott. The measure was well concerted; for by inducing the enemy to divide his force, it enabled the British to effect their landing at each place, with very little loss.

On the evening of the same day, Major General Dundas, with his detachment, escorted by Commodore Thompson and his division, arrived off the bay of Gallion: Capt. Faulkner in the Zebra led, and immediately drove the enemy from a battery on Point a'Chaux. The troops then disembarked without further opposition, about three miles from the town of Trinité, and halted for the night. Early the next morning they began their march, but were somewhat annoyed in their progress by a fire of musketry from the cane-fields, where a body of the enemy lay concealed. The aim of the Major General was to take Morne Le Brun, a strong post, situated on an eminence immediately over the town. This he happily effected, and instantly detaching Lieut. Col. Craddock with the second battalion of grenadiers, and Major Evatt with three companies of light infantry, to attack Trinité Fort, the enemy fled, and our troops took possession of it, with the cannon and stores. Commodore Thompson possessed himself at the same time of the vessels in the harbour, but the town itself was destroyed by the enemy; for Bellegarde, the popular leader of the mulattoes, being obliged to evacuate a fort bearing his own name, maliciously set fire to Trinité as he retired, and the best part of the houses, with a quantity of stores of all kinds, were consumed by the flames.

On the evening of the 7th, Major Gen. Dundas, leaving Major Skirrett and a party of marines to command at Trinité Fort, proceeded with his brigade to Gros Morne, a situation of great importance, commanding the principal pass between the northern and southern parts of the island; but although the fortifications were strong and extensive, the Major Gen. found the place entirely evacuated, the enemy having retired at his approach. Pushing forward again, the Major Gen. on the 9th, took possession of a strong situation called Bruneau, about two leagues north of Fort Bourbon, the enemy retreating as before. From thence, Major Gen. Dundas detached Lieut. Col. Craddock with three companies of grenadiers to seize Fort Matilde, which covered a good landing within two miles of his left, and where the enemy appeared in considerable force; but on Lieut. Col. Craddock's approach, they evacuated the place. Of this post the British troops, being reinforced with a company of grenadiers, held quiet possession that night, and the whole of the ensuing day; but in the night between the 10th and 11th, they were attacked by 800 of the enemy, under the command of Bellegarde, the Mulatto General. Our troops were rather taken by surprise; but recovering themselves, the enemy were totally repulsed; and compelled to take shelter in Fort Bourbon. In this action Capt. M'Ewen of the 38th, and seven privates, were killed, and nineteen wounded.

Col. Sir Charles Gordon, with the brigade under his command, was not able to make good his landing at Case de Navires; but on the morning of the 8th he landed at Case Pilotte; when, finding that the enemy were masters of the great road and the heights above it, he made a circuitous movement through the mountains, and ascended until, by day break of the 9th, he had gained, unmolested by the enemy, the most commanding post in that part of the country: Col. Myers, descending from the heights, took possession of La Chapelle, and a post established by the enemy above it. On his return the column proceeded, through very difficult ground, to the heights of Berne, above Ance La Haye; the enemy keeping a constant fire in the meantime from the batteries of St. Catha-

rine. Sir Charles Gordon had now a position which gave him an easy communication with the transports; when on the 12th, observing that the battery and works at St. Catharine, and the posts which guarded the first ravine, were abandoned by the enemy, he took possession of them, while Col. Myers, with five companies of grenadiers, and the forty-third regiment, crossed four ravines higher up, and seized all the batteries by which they were defended. The enemy now fled on every side, and our troops were soon in possession of the five batteries between Cas de Navires and Fort Royal. They then proceeded and occupied the posts of Gentilly, La Coste, and La Archet, within a league of Fort Bourbon.

In the meanwhile, the commander in chief, with Lieut. Gen. Prescott, and that part of the army which had landed at Trois Rivières, had marched from thence across a very difficult country, to the river Saleé, and entered the town of the same name, situated on the banks of the river. On the march, Brigadier Gen. Whyte was detached with the second battalion of light-infantry, to force the batteries of Cape Solomon and Point a Burgos, in order to obtain possession of Islet aux Ramieres, or Pigeon Island, an important object, the attainment of which was necessary to enable our ships to get into the harbour of Fort Royal. Those batteries were accordingly stormed, and the Brigadier Gen. being reinforced with a detachment of Royal and Irish artillery, and 200 seamen, sent Col. Symes with the seamen, and two companies of the 15th regiment, to ascend the heights, and take possession of Mount Matharine, which commanded Pigeon Island at the distance of 400 yards. This was happily accomplished on the 9th, and batteries erected on it. These were completed during the night of the 10th, and on Tuesday morning, the 11th, they were opened, and so well pointed, and incessant a fire was kept up, under the direction of Capt. Pratt of the Irish artillery, that in two hours the garrison struck their colours, and surrendered at discretion, with the loss of 15 men killed and 25 wounded.

The Islet aux Ramieres, or Pigeon Island, is situated on the south side of the bay of Fort Royal, about two hundred yards

from the shore. It is in itself a steep and barren rock, inaccessible except in one place only, where the ascent is by a ladder, fixed against a perpendicular wall; and the summit is 90 feet above the level of the sea. There were found on it, 11 forty-two pounders, 6 thirty-two pounders, 14 thirteen-inch mortars, and one howitzer, with an immense quantity of stores and ammunition of all kinds, and a stove for heating shot.

On the capture of this fortress, the squadron immediately took possession of the bay and harbour of Fort Royal; and most of the transports and store-ships got up to Cohee, a harbour at the north-east end of the bay, from whence they had a communication by a chain of posts, with the troops at Bruneau; and the next object of attention was St. Pierre, the capital of the island, in the attack of which, the co-operation of the forces, both by sea and land, was indispensably necessary.

In consequence of an arrangement for this enterprise, Col. Symes, with three light companies, and Major Maitland, with the 50th regiment, embarked on board a detachment of the squadron, which were ordered for the bay of St. Pierre.

On the 14th the commander in chief moved forward with his army to Bruneau, where he left Major Gen. Dundas, and on the evening of the same day the Major General marched from thence to Gros Morne with the 2d battalion of grenadiers, the 33d and 40th light companies, and the 65th regiment. From Gros Morne he detached Col. Campbell through the woods by Bois le Bue, with the two light companies and the 65th regiment, to the attack of Montigne, proceeding himself towards the heights of Capot and Callebasse, from both which the enemy retired: From the latter the Major General had a distant view of Col. Campbell's detachment, and the mortification to see them attacked by a great body of the enemy, strongly posted about half a mile short of Montigne. The Major General immediately pushed forward his advanced guard under the

command of the Hon. Capt. Ramsay, who, by extraordinary exertions, came up with the enemy while engaged with Col. Campbell's detachment, and silenced their fire, but the Colonel himself had unfortunately fallen early in the engagement. Capt. Ramsay being joined by the second battalion of grenadiers, now took possession of Montigne, and the Major General took post on Morne Rouge. The same evening, the Major General observing several bodies of the enemy moving towards his front, and forming under a small redoubt, ordered four companies of grenadiers to advance, and a smart engagement ensued; the enemy was covered by a brisk fire, from two field pieces on Morne Bellevieur. The action continued for about half an hour, when the enemy retreated, and during the night abandoned the fort on Morne Bellevieur, of which our troops immediately took possession.

Our army had now arrived within two leagues of St. Pierre, from whence at day-break, on the 16th, the enemy sent a flag, requiring three days to consider of a capitulation. The Major General returned for answer, that instead of three days he would allow them only three hours; and leaving a company of grenadiers in possession of Bellevieur, he immediately moved on towards St. Pierre. At this juncture, the detachment of the squadron arrived in the bay, and began their operations. Colonel Symes, with the troops and seamen who were to land with him, had, previous to their entering the bay, embarked on board the Zebra and Nautilus sloops, which drawing little water could land them without difficulty. In the evening of the 16th, these vessels approached the north part of the bay, the other men of war standing in to cover them from the fire of the enemy. Capt. Hervey, in the Santa Margarita, perceiving the troops were likely to be much annoyed by two batteries with heated shot, steered close under the guns of the most considerable of them, and effectually silenced it. About four in the morning of the 17th, the troops made good their landing, and immediately advanced towards St. Pierre; but the conflict was at an end, for the enemy seeing the British approach both by sea and by land, evacuated the

town, leaving their colours flying, which were immediately hauled down, and the British colours placed in their room. By ten o'clock the whole of Colonel Symes's detachment had marched into the town, and were soon afterwards joined by General Dundas and his army.

No injury was done, nor outrage offered, to the inhabitants; the women and children sat at their doors to see the soldiers march in, as peaceably and cheerfully as the inhabitants of an English village behold a regiment pass through their streets. One instance only occurred, an attempt to pillage; for which the offender was immediately hung up by the Provost Marshal, at the gate of the Jesuits College.

The town of St. Pierre being thus captured,* and many important posts in different parts of the country already in possession of the British troops, it might have been supposed that the surrender of the island was speedily to have followed; but so great was the natural and artificial strength of the country, and so obstinately was it defended on this occasion by the inhabitants, that much remained to be done before this event took place. The two great forts of Bourbon and Fort Royal (the former commanded by Rochambeau the Governor of the Island) were still to be conquered; and it was impossible closely to invest Fort Bourbon, without first possessing the heights of Surié or Sourier, a situation eminently strong and difficult, and defended by a large body of the enemy, under the command of the mulatto General Bellegarde. The commander in chief therefore proposed to attack this post from his camp at Bruneau, on the night of the 18th, and to depend for success solely on a vigorous use of the bayonet; but, a few hours previous to the time he had fixed for the enterprize, Belle-

* Lieut. Malcolm of the 41st grenadiers was appointed Town Major, in consideration of his distinguished conduct and active services at the head of a body of riflemen, which was composed of two men selected from each company of the first battalion of grenadiers. We shall have occasion to mention this officer hereafter.

garde himself, with part of his troops, descended the heights, and attacked the General's left. His intention was, if possible, to cut off the communication between the British army and navy. The attempt was bold, but it was ruinous. The General immediately perceived the advantage to be derived from it, and seized it in the moment; for, directing Lieut. Gen. Prescott to keep the enemy in check, he ordered from his right Lieut. Col. Buckeridge, with the third battalion of grenadiers, and Lieut. Colonels Coote and Blundell, with the 1st and 2d battalions of light infantry, to attack Bellegarde's camp on the left. In this service this detachment displayed such spirit and impetuosity as proved irresistible, and possession being taken of Bellegarde's camp, his own cannon were turned against him. This unfortunate man and his second in command, with about 300 of their followers, surrendered themselves to the General a few days afterwards, the two leaders desiring to be sent to North America, on condition of never serving against his majesty; and in this request they were gratified. Their followers were sent on board the king's ships as prisoners of war.

From the 20th of February, Forts Bourbon and Louis, with the town of Fort Royal, were completely invested, and the General was busily employed in erecting batteries on his first parallel. On the north east side, the army under General Prescott broke ground on the 25th of February, and on the west side towards La Caste, fascine batteries for mortars and cannon were erecting with all possible expedition. In this business the seamen eminently distinguished themselves; and the siege was carried on with unremitting exertion by night and day; the most perfect co-operation prevailing between the army and navy; the exertions of both being animated by the presence and approbation of his Royal Highness Prince Edward, who arrived from Quebec the 4th of March, and taking the command of Sir Charles Gordon's brigade, set an admirable example of discipline and good conduct to the whole army, by his behaviour, during the remainder of the campaign. The advanced batteries were at length brought within five

hundred yards of Fort Bourbon, and not more than two hundred from the redoubt; when on the 17th of March, the General concerted measures with the Admiral for a combined assault, by the naval and land forces, upon the fort and town of Fort Royal. Scaling ladders being provided, and the necessary arrangements settled, the ships destined for the service took their stations on the morning of the 20th of March. The Asia, and the Zebra sloop, with Captain Rogers, and a body of seamen in flat boats (the whole under the command of Commodore Thompson), composed the naval force; the land force consisted of the first battalion of grenadiers, the first and third light infantry, with the third grenadiers.

About 10 o'clock the Asia and Zebra got under way. The Zebra led in, towards the mouth of the harbour, receiving the enemy's fire, without returning a shot. The Asia had got within the range of grape shot, when, to the surprise of the whole fleet, she wore and made sail from the fort. She stood in a second time, and again put about.* Now then it was that Captain Faulkner of the Zebra acquired immortal honour; for perceiving that he could not expect any assistance from the Asia (a ship of the line) he determined to undertake the service alone in his small sloop of 16 guns, and he executed this design with matchless intrepidity and good conduct; for running the Zebra close to the walls, and leaping overboard at the head of his sloop's company, he scaled the ramparts, and drove the enemy from the fort. "No language of mine (says Admiral Jervis) " can express the merit of Capt. Faulkner on this occasion; but as every man in the army and " squadron bears testimony to it, this incomparable action. " cannot fail of being recorded in the page of history." Col. Symes, in the same triumphant moment, entered and took possession of the town.

* It is said that a French loyalist, named Toureller, who had formerly been lieutenant of Fort Louis, was employed by Capt. Brown as pilot on this occasion, and that this man, under pretence of shoals, refused to carry the ship any farther.

This signal success determined the fate of the Island; for General Rochambeau, perceiving that all was lost, immediately sent a flag from Fort Bourbon, offering to surrender on capitulation. The terms were accordingly adjusted on the 23d, and on the 25th, the garrison, reduced to 900 men, marched out prisoners of war. To the gallantry with which this fortress was defended, General Grey bore an honourable testimony, by observing, that "the British troops, on entering the place, could scarcely find an inch of ground which had not been touched by their shot or their shells."

Thus was achieved the conquest of Martinico, with the loss on the part of the British of 71 men killed, 193 wounded, and of three that were missing. The limits I have prescribed to myself will not allow me to enumerate the particular merits of all those gallant men, whose services, both by sea and land, were conspicuous on this occasion. History will not fail to record them, and above all to give due honour to that zealous co-operation, to that admirable spirit of unanimity and concord between the sea and land service, which were particularly observable during the whole siege; and for want of which, in other cases, both numbers and courage have oftentimes proved unavailing.

. Immediately on the surrender of the island, the following proclamation was issued in General Orders:

Head Quarters, Fort Royal,
25th March 1794.

Parole, FORT GEORGE.

C. S. FORT EDWARD.

Field Officer, COLONEL COOTE.

The Commander in Chief orders Fort Bourbon now to bear the name of Fort George, and Fort Louis to bear the name of Fort Edward: and to be called so in future. The commander in chief, with heartfelt satisfaction, congratulates the Army on the complete conquest of the Island of Martinico, a most important acquisition to his Majesty's crown. He begs permission to return the Army in general his warmest thanks for their zeal, perseverance, gallantry, and spirit, so eminently distinguished, and never before exceeded, by every rank, from the general to the soldier, throughout this service; and this justice he cannot fail to do them in the strongest language to his Majesty.

CHAPTER III.

Conquest of St. Lucia.—Description of Guadaloupe.—Proceedings against that Island.—Its Surrender completes the Conquest of the French West India Colonies.—Cause of the subsequent Reverses.—Mortality among the British.—Arrival of a French Squadron with Troops at Guadaloupe.—Their Successes: followed by the Reduction of the whole Island.—Inhuman Barbarity of Victor Hugues to the Royalists.—Sir C. Grey and Sir J. Jervis, succeeded by Sir J. Vaughan and Admiral Caldwell.

VICTORY having thus far crowned the British arms, General Grey determined, without loss of time, to persevere in his career of glory; wherefore, leaving five regiments under the command of General Prescott, for the protection of Martinico, he and the brave Admiral proceeded, on the morning of the 31st of March, to the attack of St. Lucia. This island had not the means of a formidable defence; and on the 4th of April, his Royal Highness Prince Edward, after a fatiguing march of fourteen hours from the landing place, hoisted the British colours on its chief fortress Morne Fortuné; the garrison, consisting of 300 men, having surrendered on the same terms of capitulation as those that had been granted to General Rochambeau. Ricard, the officer commanding in St. Lucia, desired and obtained permission, as Rochambeau had done before him, to embark for North America; but the garrisons of both, of St. Lucia and Martinico, were sent to France immediately on their surrender.*

* So rapid were the movements of the British army, that his Royal Highness Prince Edward reembarked in the Boyne at the end of 58 hours after he had landed at St. Lucia. It is impossible to mention this island without lamenting that it has proved in every war a grave to thousands of brave men! On the present occasion a circumstance occurred which demonstrates, in a very striking manner, the extreme unwholesomeness

After the completion of this service, General Grey, having left the sixth and ninth regiments, with detachments of artillery and engineers, as a garrison for St. Lucia, and appointed Sir Charles Gordon governor of that island, returned to Martinico; and the spirit of enterprise among the soldiers being thus kept alive and encouraged, the General turned his attention in the next place to the large and fertile colony of Guadaloupe.

It is necessary the reader should be apprized in this place, that Guadaloupe consists in fact of two islands, divided from each other by a narrow arm of the sea, called La Riviere Salee, (Salt River), which is navigable for vessels of 50 tons; the eastern island, or division, being called Grande Terre, and the western, Basse Terre. Adjoining the former, is a small island called Desirade, and near to the latter a cluster of little islands called Les Saintes. At some distance from these, towards the east, is another island called Marie Gallante; all these were dependencies on Guadaloupe, and comprised in its government.

On Tuesday the 8th of April, such of the troops as remained after the necessary garrisons for the conquered islands were formed, embarked in transports, and the fleet sailed from the bay of Fort Royal. A detachment of the squadron having been sent in the first place to attack the little islands above mentioned, called Les Saintes, that service was executed with much spirit and gallantry by a party of seamen and marines; and about noon on the 10th, the Boyne and Veteran cast anchor in the Bay of Point a Petre, in the division of Grande Terre; a fresh wind and lee current preventing many of the transports from getting in until the day following.

Without waiting however for the arrival of all the troops, the General effected the landing of a considerable detachment,

of the climate. The night after the troops had landed, the first battalion of grenadiers took possession of some negro huts: the second battalion had no such accommodation, or rather chose to remain in the open air. The consequence was, that while the former continued healthy, 40 of the best men of the latter were returned the next morning on the sick list.

with the addition of 500 marines at Groser Bay, at one o'clock in the morning of the 11th, under cover of the *Winchelsea* man of war, the Captain of which, Lord Viscount Garlies, being the only person that was wounded on the occasion. "He received a bad contusion (observes Admiral Jervis), from the fire of a battery against which he had placed his ship, *in the good old way*, within half musket shot." The battery however was soon silenced, and early on the morning of the 12th, the Fort of La Fleur d'Epée was carried by assault, and the greatest part of the garrison put to the sword. Fort St. Louis, the town of Point a Petre, and the new battery upon Islet a Cochon, being afterwards abandoned, and the inhabitants flying in all directions, the possession of Grande Terre was complete.

The reduction of Basse Terrè was effected the 21st of the same month; for the strong post of Palmiste being carried by the gallantry of Prince Edward and Col. Symes, and that of Houelmont by Major Gen. Dundas, the French governor (Collot) immediately capitulated; surrendering the whole of Guadaloupe and all its dependencies to the king of Great Britain, on the same terms that were allowed to Rochambeau at Martinique, and Ricard at Lucia. It is pleasing to add, that this conquest was happily effected with the loss on the part of the British of only 17 men killed, and about 50 wounded.*

This gallant and successful enterprise completed the entire conquest of the French possessions in the West Indian Islands; and the primary views and declarations of the British ministers were thus wonderfully, and I believe unexpectedly, realized by British energy and valour. Happy, if the scene had shut at this period, and no envious cloud overcast the close of a campaign, the opening and progress of which had shone with so bright a lustre in the eyes of all Europe!

But now it was, that the measure of reducing the army at the outset of the expedition, began to manifest those unhappy

* From a return found among General Collot's papers, it appeared that the number of French troops in Guadaloupe was 5877.

consequences, which it was then predicted would ensue from it. In allotting garrisons for the security of the several islands, which had surrendered, the deficiency of troops for that purpose, was at once obvious and alarming. It was discovered that the mortality had been so great (more from sickness, the never failing effect of extraordinary exertion in tropical climates, than the sword of the enemy) as to have reduced the ranks to nearly one half their original numbers; and of the troops which remained alive, a very large proportion were so worn down by unremitting fatigue, as to be rendered absolutely incapable of efficient service. Unfortunately, the numerous enterprises in which the British forces were engaged, and especially the fatal, and never-enough to be lamented, attempt on St. Domingo, left it not in the power of the king's ministers to send such a reinforcement to the Windward Islands as the occasion required.

So early, however, as the 22d of March, four regiments, consisting of 2,377 men, had sailed from Cork for Barbadoes. They were intended indeed for St. Domingo, but authority was given to General Sir Charles Grey, to detain two of them, if circumstances should render it necessary, to serve under his own command in the Windward Islands.

These regiments arrived at Barbadoes on the 5th of May, and the General detained the eight battalion companies of the 35th, one of the four regiments, but observing the extreme anxiety which the British minister expressed in his despatches for prosecuting the enterprise against St. Domingo, and trusting (as he writes) "that effectual care would be taken at home to prevent the enemy in the conquered islands receiving assistance from Europe," he replaced those battalion companies with eight flank companies from his own army, which was thus rather diminished than augmented by the exchange.*

* These flank companies proceeded first to Jamaica, and from thence to Port au Prince; and nothing can afford a more striking demonstration of the sad consequence of tropical warfare, than the account which has been given of this reinforcement on its arrival at the place of its destination. "On the 8th of June, eight flank companies belonging to the

From this period, the tide which had hitherto flowed with so rapid and prosperous a current, began to run in a contrary direction. The sickness which had for some time prevailed in the army, was become exasperated to pestilence. The troops sunk under it in great numbers, and among its most distinguished victims, was major general Dundas, the governor of Guadaloupe. On the 4th of June the commander in chief (being at that time with the admiral, inspecting the state of St. Christopher's) received the melancholy account of this gallant officer's death, and early on the morning of the 5th further intelligence arrived, which rendered his loss at that juncture doubly afflicting. This was nothing less than the very unexpected information, that a French armament of considerable force was, at that moment, off Point a Petre!

On receipt of this intelligence, the admiral made immediate sail for Guadaloupe, and arrived there on the afternoon of the 7th; and having put the commander in chief ashore at Basse Terre, he proceeded with the ships to Point a Petre; but found that the enemy had not only made good their landing; but had also forced fort Fleur d'Épée on the preceding day, and were actually in possession of the town, and the forts by which it was

“ 22d, 24th, 35th, and 41st regiments, arrived at Port au Prince, under the command of Lieutenant Colonel Lenox. They consisted, on their embarkation, of about seventy men each, but the aggregate number, when landed, was not quite three hundred. The four grenadier companies, in particular, were nearly annihilated. The frigate in which they were conveyed, became a house of pestilence. Upwards of one hundred of their number were buried in the deep, in the short passage between Guadaloupe and Jamaica, and one hundred and fifty more were left in a dying state at Port Royal. The wretched remains of the whole detachment discovered, on their landing at Port au Prince, that they came not to participate in the glories of conquest, but to perish themselves within the walls of an hospital! So rapid was the mortality in the British army, after their arrival, that no less than forty officers, and upwards of six hundred rank and file, met an untimely death, without a contest with any other enemy than sickness, in the short space of two months after the surrender of the town.”

Historical Survey of St. Domingo, Chap. xi. p. 167.

defended. They had likewise secured their shipping at safe anchorage in the harbour. It was now discovered that this armament consisted of two frigates, a corvette, two large ships armed *en flûte*, and two other vessels; having brought with them 1500 regular troops.*

The success of the French on this occasion was the more surprising, as there was at this time in Guadaloupe a larger proportion of British troops than in either of the other conquered islands: it is asserted by a respectable author,† who collected his observations on the scene of action, that the progress of the enemy was greatly accelerated by the misconduct of several of the French royalists then in the fort, a party of whom (misinformed perhaps as to the real number of the invaders) offered their services to sally on the besiegers, and marched out for that purpose, under the command of Captain M'Dowall of the 43d, but on approaching the enemy they were panic struck, and deserted to the town. Thirty of them only out of 140 returned to Fleur d'Épée with Captain M'Dowall. The British merchants and sailors from the town of Point a Petre, had thrown themselves into this fort to co-operate with the garrison. This little band, under the command of Lieutenant Colonel Drummond of the forty-third regiment, did all that gallant men could do; twice they repulsed the assailants; but the French royalists who remained in the fort, conceiving the vain hope of obtaining mercy for themselves by a surrender, insisted at length, that the gates should be thrown open. This was no sooner done, than the enemy poured in from all sides, and the few surviving British soldiers (not more than 40 in number) were obliged to make the best retreat they could to Fort Louis. This place not being tenable after the loss of Fleur d'Épée, was soon abandoned by them, and they crossed over to Basse Terre.‡

* This armament sailed from Rochfort on the 25th of April.

† Rev. Cooper Willyams, chaplain to the Boyne.

‡ The celebrated Brigadier General Arnold, being on business of a mercantile nature at Point a Petre, was captured at the time the place fell into the hands of the republicans, and, being apprehensive of ill treatment, changed his name to Anderson. He was put on board a prison-ship in

The commander in chief, the moment the strength of the enemy was ascertained, had transmitted orders to the commanders in the different islands to send from thence whatever force could be spared ; and the legislature of St. Christopher, immediately on receiving notice of the enemy's appearance, raised a considerable body of volunteers at the expense of the colony, and despatched them, with great expedition, to co-operate in this important service.

- All the force that could be thus obtained, being at length collected at Basse Terre, detachments were landed on the side of Fort Fleur d'Epée, and many skirmishes took place with the enemy, between the 19th of June and the beginning of July, the particulars of which it is not necessary to relate. The weather was now become insupportably hot, and the tropical rains being already set in, the Général determined to make an effort to finish the campaign at a blow. It was planned that a large body of troops, under Brigadier General Symes, should march during the night, and make themselves masters of Morne government and the other commanding heights round the town of Point a Petre; the General himself, at the head of the rest of his army remaining in readiness on the heights of Mascot, to storm fort Fleur d'Epée, on receiving a signal from the brigadier; the failure of this enterprise was a fatal circumstance; and

the harbour, and had considerable property in cash with him, of which, it is supposed, Fremont and Victor Hugues were informed, as he received an intimation from one of the French sentries, that he was known, and would soon be guillotined. On this alarming intelligence, he determined to attempt an escape, which he effected in the following manner: At night he lowered into the sea a cask containing clothes and valuables, with a direction on it, that if it floated, to the shore of our camp at Berville, it might be known, and restored to him; he then lowered down his cloak bag to a small raft which he had prepared, on which also he got himself, and proceeded to a small canoe, in which he pushed for the British fleet, directed by the admiral's lights. On his making towards the mouth of the harbour, he was challenged by the French row-guard, but by the darkness of the night escaped from them, and arrived on board the Boyne by four o'clock on Monday morning, the 30th of June. See the Rev. Cooper Willyams's Account of the Campaign in the West Indies.

many animadversions having been made on the conduct of it ; I shall recite the particulars in General Grey's own words :
 " On the evening of the 1st instant Brigadier General Symes
 " marched from Morne Mascot with the 1st battalion of
 " grenadiers, the 1st and 2d battalions of light infantry, and
 " the 1st battalion of seamen commanded by Captain Robert-
 " son, to attack the town of Point a Petre before daybreak
 " on the 2d instant ; but being misled by their guides, the
 " troops entered the town at the part where they were most
 " exposed to the enemy's cannon and small arms, and where
 " it was not possible to scale the walls of the fort ; in conse-
 " quence of which, they suffered considerably from round
 " and grape shot, together with small arms fired from the
 " houses, &c. and a retreat became unavoidable." It gives
 me great concern, observes the General, to add, that Brigadier
 General Symes was wounded ; and that Lieutenant Colonel
 Gomm, and some other meritorious officers, were killed on this
 attack, as was also Captain Robertson of the navy, a valuable
 officer, and whose death was a great loss to the service.*

The meditated attack on Fort Fleur d'Épée, being thus rendered abortive, and the British troops so reduced or debilitated as to be absolutely unfit for further exertion, (exposed as they were to the sun and the rains) it was resolved, at a consultation held on the 3d, between the commander in chief and the admiral, to relinquish all further attempts for the present on Grande Terre ; and to remove the artillery and stores, and to reinforce, with the troops, the posts in Basse Terre. This determination, dictated by a necessity which left no alternative, was carried into effect without loss, on the night of the 5th. " I now,"

† Brigadier General Symes died of his wounds a short time afterwards ; exclusive of whom, the total loss of the British in this unfortunate affair, and some preceding attacks, is stated as follows :

1 lieutenant colonel, 4 captains, 7 lieutenants, 7 serjeants, 2 drummers, 91 rank and file, *killed* ; 1 major, 3 captains, 7 lieutenants, 13 serjeants, 8 drummers, 298 rank and file, *wounded* ; 1 serjeant, 3 drummers, 52 rank and file, *missing*. One of the French frigates in the harbour did great execution, killing 3 officers and 36 privates of the light infantry, by a single discharge of grape shot. They were unfortunately drawn up in a street, which was effectually commanded by her guns.

said the general in his letter of the 8th, "occupy with my whole force, the ground between St. John's Point and Bay Mahault, and having erected batteries with 24 pounders, and mortar batteries, at Point Saron and Point St. John, opposite to the town of Point a Petre, my situation gives perfect security to Basse Terre."

Many arrangements, however, were yet to be made for the maintenance of this position during the approaching hurricane months, and until a reinforcement should arrive from Great Britain. These being at length completed, the general embarked on board the *Boyne*, and sailed for St. Pierre in the island of Martinique, where he established his head-quarters, leaving Brigadier Graham to command in his absence at Basse Terre.

The head-quarters of the British army in Guadeloupe were at camp Berville, which was placed on commanding ground; flanked by the sea on one side, and on the other by an impassable morass. About a mile on the rear was a narrow pass, by which alone the camp could be approached, and in front was the river Sallée, on the furthestmost banks of which stands the town of Point a Petre; but the situation of this encampment, so favourable in other respects, proved to be, in the highest degree, unhealthful. The baneful effects of the climate at this season of the year were aggravated by putrid exhalations from the neighbouring swamps, and a dreadful mortality ensued among the troops. By the middle of August, the numbers on the sick list constituted the majority of the camp. During the month of September, the army was inadequate to the supply of guards for the different batteries. Several companies could not produce a single man fit for duty; and the 43d regiment could not even afford a corporal and three men for the protection of their own camp in the night.

In order, therefore, to keep up the appearance of force in front of the enemy, the different islands were completely drained of troops, and a body of French loyalists were selected to perform military duty at the post of Gabarre; where they conducted themselves with much spirit and fidelity.

The commissioner from the French convention, and now commander in chief of the French troops in Guadeloupe, was Victor Hugues, a man of whom I shall hereafter have frequent occasion to speak. It is sufficient in this place to observe, that though his name has since become proverbial for every species of outrage and cruelty, he was not deficient either in courage or capacity. Observing how severely his own troops, as well as ours, suffered from the climate, he conceived the project of arming in his service, as many blacks and mulattoes as he could collect. These men, inured to the climate, and having nothing to lose, flocked to his standard in great numbers, and were soon brought into some degree of order and discipline. With the co-operation of these auxillaries, apprised at the same time of the debilitated state of the British army, the French commissioner determined to attack the British camp at Berville. For this purpose on Saturday the 26th of September, he embarked a large body of troops in small vessels, which passing our ships of war unperceived, under cover of a dark night, made good their landing in two detachments; the one at Goyave, the other at Bay Mahault. The detachment which took possession of the place last mentioned, immediately marched to Gabarre, in the view of surrounding the French royalists stationed there, and it was with great difficulty that they escaped to Berville. The other detachment which had landed at Goyave, began its march to Petit Bourg. Lieut. Col. Drummond, of the 43d regiment, with some convalescents from the hospital, and a party of royalists, advanced to meet them, but perceiving their great superiority, found it advisable to retreat; and they took post at a battery upon the shore, called Point Bacchus, where however they were soon surrounded, and the whole party made prisoners. By the possession of this post, the enemy entirely cut off all communication between the British camp and shipping. They then proceeded to possess themselves of the neighbouring heights, and formed a junction with the other detachment which had landed at Bay Mahault: by this means the camp at Berville was completely invested by land; its whole strength, including the sick and convalescent, consisted of no more than two hundred and fifty regular troops, and three hundred royalists. All that

courage, perseverance, and despair could effect, was performed by the united exertions of this gallant band. In the first attack on the morning of the 29th, after a conflict of three hours, the republicans were defeated with great loss. They were again repulsed in two subsequent attacks, on the 30th of the same month, and the 4th of October. But their numbers continually increasing, and the manifest impossibility of opening a communication with the British fleet, depriving the garrison of all proper succour, General Graham, on the representation of his officers, consented on the 6th of October, to send a flag to the French commissioner, offering to capitulate. Towards the British, the terms granted by the enemy were sufficiently liberal, but the condition demanded for the French royalists, that they should be treated as British subjects, was declared inadmissible; all the favour that could be obtained for them, was the sanction of a covered boat, in which twenty-five of their officers escaped to the Boyne. The rest of the miserable royalists, upwards of 300 in number, were left a sacrifice to the vengeance of their republican enemies. Finding themselves excluded from the capitulation, they solicited permission to endeavour to cut their way through the enemy, an attempt which must have ended only in the destruction both of themselves and the British. There was a faint hope entertained, however, that Victor Hugues (whose character was not at that time sufficiently developed), would relent on their surrender. In this expectation, however, these unfortunate people were cruelly disappointed, and their sad fate cannot be recorded without indignation and horror. The republicans erected a guillotine, with which they struck off the heads of fifty of them in the short space of an hour. This mode of proceeding, however, proving too tedious for their impatient revenge; the remainder of these unhappy men were fettered to each other, and placed on the brink of one of the trenches which they had so gallantly defended: the republicans then drew up some of their undisciplined recruits in front, who firing an irregular volley at their miserable victims, killed some and wounded others; leaving many, in all probability, untouched: the weight however of the former, dragged the rest into the ditch, where the living, the wounded, and the dead,

shared the same grave; the soil being instantly thrown in upon them.*

Thus was the whole of this fertile country (the single fortress of Matilda excepted) restored to the power of France, and placed under the domination of a revengeful and remorseless democracy. General Prescott, who commanded the Matilda Fort, sustained a long and most harassing siege, from the 14th of October to the 10th of December. His conduct throughout, as well as that of the officers and men under his command, was above all praise. He maintained his position until the fort was no longer tenable, and having no other means of saving his reduced and exhausted garrison from the sword, he was obliged at length to abandon it by silent evacuation. Three line of battle ships had indeed arrived in the interim from Great Britain, but they came only to behold the triumph of the enemy. With this adverse stroke of fortune, closed the campaign of 1794: its career for a while was glorious beyond example; and if the very unhappy measure of reducing the number of the troops at the outset, had not taken effect, or if, as soon as the news of the capture of Martinico had reached England, a strong reinforcement had been sent to the scene of action, it cannot be doubted that Guadaloupe would have still continued in possession of the English, and the page of history remained undefiled with those dreadful recitals of revolt, devastation, and massacre, which I shall soon have the painful task of recording, to the shame and everlasting dishonour of the French character, and the disgrace of human nature. Our gallant commanders were fortunate, in being allowed to withdraw in time from an atmosphere polluted by such enormities. Worn down by constant exertion both of body and mind, assailed by an unprincipled faction with the basest calumnies, and oppressed by the melancholy and daily prospect of a gallant army perishing of disease, they were happily relieved from infinite anxiety by the appearance of the reinforcement before mentioned, in which arrived Gen. Sir John Vaughan and Vice Adml. Caldwell; to the former of whom Sir Charles Grey, and to the latter Sir John Jervis, surrendered their respective commands, and on the 27th of November sailed for Great Britain.

* Rev. Cooper Willyams's account of the campaign, &c.

CHAPTER IV.

Savage Indignities of Victor Hugues to the remains of General Dundas.—His unprecedented Cruelty to his British Prisoners.—Meditates Hostilities against the other Islands.

THE first measure of the French commissioner, on taking possession of Fort Matilda, displayed in the strongest manner the baseness and ferocity of his character. The body of Major General Dundas had been buried within the walls of that fortress, and a stone placed over it with a suitable inscription. This humble memorial, which a generous enemy, in every civilized part of the earth, would have held sacred, was immediately destroyed by orders of this savage despot, and the remains of the deceased hero dug up and thrown into the river Gallion. This mean and cowardly display of ineffectual vengeance, was made the subject of boasting and triumph in a public proclamation, worthy only of its author.*

The miseries of war seem, indeed, to have been wantonly aggravated by this man, to an extent never known among the rudest and most barbarous nations. In the village of Petit Bourg lay many sick and wounded British soldiers, who had

* So much has been heard of Victor Hugues, that it may be agreeable to the reader to be informed of his origin and early pursuits. He was born of mean parents in some part of old France, and was placed out when a boy, as an apprentice to a hair dresser. In that occupation he went originally to Guadaloupe, where he was afterwards known as a petty innkeeper at Basse Terre. Failing in that pursuit, he became master of a small trading vessel, and at length was promoted to a lieutenancy in the French navy. Being distinguished for his activity in the French Revolution, he was afterwards deputed, through the influence of Robespierre, to whose party he was strongly attached, to the National Assembly. In 1794 he obtained the appointment of Commissioner at Guadaloupe, with controlling powers over the commanders of the army and navy; and proved himself in every respect worthy of his great patron and exemplar, being nearly as savage, remorseless, and bloody, as Robespierre himself.

been taken prisoners with Colonel Drummond at Point Bacchus. These unhappy men made an humble application to Victor Hugues for medical assistance and fresh provisions. Their petition was answered by a death warrant. The vindictive conqueror, instead of considering them as objects of mercy and relief, caused the whole number in the hospital, and among them it is said "many women and some children," to be indiscriminately murdered by the bayonet; a proceeding so enormously wicked, is, I believe, without a precedent in the annals of human depravity.*

After such conduct towards men who were incapable of making either resistance or escape, it may well be supposed that revenge was not tardy in the pursuit of its victims among the inhabitants of the country. To be accused of actions, or suspected of principles, hostile towards the new government, was to be convicted of treason. Accordingly, persons of all conditions, without respect to sex or age, were sent daily to the guillotine by this inexorable tyrant, and their execution was commonly performed in sight of the British prisoners.

Victor Hugues, having taken these and other measures for securing the quiet possession of Guadaloupe, determined in the next place (his force being inadequate to a regular attempt against any of the other islands) to adopt a system of hostility against some of them, which, though well suited to his character and disposition, was not less outrageous and sanguinary than unprecedented among civilized states. To this end he directed his first attention towards Grenada and St. Vincent's, expecting to find in each of those islands, adherents fit for the project which he meditated. * * * * *

* I am unwilling to give this anecdote to the public, without quoting my authority. I relate it on the testimony of the Rev. Cooper Willyams, chaplain of the Boyne, who quotes Col. Drummond himself, and it is confirmed by a declaration drawn up by General Vaughan and Vice-Admiral Caldwell. Col. Drummond himself was confined to a prison ship, and by particular orders from Victor Hugues, to swab the decks like the meanest seaman.

† N. B. At this interesting period the history closes.—Death abruptly terminates the author's labours.

HORTUS EASTENSIS:

OR

A CATALOGUE OF EXOTIC PLANTS,

**In the Garden of HINTON EAST, Esq; in the Mountains of Liguanea,
in the Island of Jamaica, at the Time of his Decease.**

By ARTHUR BROUGHTON, M. D.

N. B. This Garden is now the Property of the Public.

HORTUS EASTENSIS.

Classis I. MONANDRIA. MONOGYNIA.

Canna	<i>Indica var. lutea</i>	Yellow Indian Shot	East Indies	Mr. Shakespear, 1780
Amomum	<i>Gran. paradisi*</i>	Guinea Pepper	Guinea	T. Hibbert, esq. 1785
	<i>Zingiber</i>	Common Ginger	East Indies	
Curcuma	<i>longa</i>	Turmeric	East Indies	Z. B. Edwards, esq. 1783
Kæmpferia	<i>Galanga</i>	Galangale	East Indies	Dr. T. Clarke, 1775.
Thalia	<i>geniculata</i>	Indian Arrow-root	South America	

Classis II. DIANDRIA. MONOGYNIA.

Nyctanthes	<i>Sambac</i>	Arabian Jasmine		
	<i>var. fl. pleno</i>	Double Arab. Jasmine	East Indies	H. East, esq. 1775
Jasminum	<i>officinale</i>	Common Jasmine		
	<i>lanceolatum ?</i>	Narrow-leaved Jasmine	East Indies	H. East, esq. 1787
	<i>Azoricum</i>	Azorian Jasmine	Madeira	H. East, esq. 1787
	<i>odoratissimum</i>	Yellow Indian Jasmine	Madeira	M. Wallen, esq. 1787
Olea	<i>Europæa</i>	European Olive	Europe	M. Wallen, esq. 1783
	<i>fragrans</i>	Sweet scented Olive	China	H. East, esq. 1783
Syringa	<i>vulgaris</i>	Common Lilac	Persia	M. Wallen, esq. 1774
	<i>Persica</i>	Persian Lilac	Persia	M. Wallen, esq. 1785
Justicia	<i>sp. nov. arborea</i>		Italy	Tho. Hibbert, esq. 1787

* Botanist to the French king at Hispaniola.

† This Plant was brought here in a slave ship from the coast of Africa, and now grows very luxuriant, producing every year large quantities of fruit; several gentlemen are encouraging the propagation of it. I do not know that it has hitherto been described; its characters are as follows:

CAL. Perianthium pentaphyllum inferum, foliolis ovatis acutis concavis, persistentibus villosis.

COR. Petala quinque oblongo-lanceolata, acuta, villosa, ad basin sursum flexa et receptaculo adpressa, calyce alterna et eo longiora.

STAM. Filamenta octo brevissima, pilosa, ad basin germinis receptaculo glanduloso inserta. Antheræ oblongæ in orbem circa germen dispositæ et ejusdem fere longitudinis.

PIST. Germen subovatum triquetrum pilosum. Stylus longitudine germinis, cylindricus, pilosus. Stigma obtusum.

PER. Capsulæ carnea, oblonga, utrinque obtusa, trigona, trilocularis, trivalvis, apice dehiscens.

SEM. Tria, orbicularia, nitida, appendice aucta.

Arbor hæc quinquaginta pedes altitudine plerumque superat; Truncus cortice subfusco scabro tegitur ramis numerosis longis irregularibus, inferioribus ad terram ferè dependentibus. Folia habet pinnata, foliolis ovato-lanceolatis venosis integerrimis oppositis lævibus superne nitidis, spithamæis, utrinque quatuor vel quinque, petiolis brevibus tumidis. Racemi simplices stricti, multiflori axillares, longitudine fere pinnarum, pedunculis propriis unifloris, stipulis lanceolatis, rufo-tomentosis, persistentibus. Flores parvi albi inodori. Fructus magnitudinis ovi anserini, colore flavo, rubro, aurantiaco, vel ex utrisque mixto. Semina tria nitida nigra magnitudinis Nucis moschatæ, quorum unum sæpissime abortit. Semini singulo adnascitur materies albidæ (Semen magnitudine excedens) consistentiæ pinguedinis bovinæ et aqua leniter cocta Medullæ haud abaimilis. Ab Incollis in Guinea ad mensas apponitur vel per se vel Jusculo vel Pulmento elixa.

* This Tree will, doubtless, in a few years, become a very valuable acquisition to the Island: some samples of the Bark lately sent to England prove it to be the true Ceylon cinnamon, and of the best kind. It is now cultivated with great attention in many parts of the Island.

† This Tree has hitherto been generally considered as a species of the genus *Guilandina*, but very erroneously, as will appear from the following characters:

CAL. Perianthium pentaphyllum, foliolis oblongis obtusis concavis, tribus superioribus reflexis, duobus inferioribus patentibus.

COR. Petala quinque. Petala duo superiora magnitudine foliolorum calycis, plana obtusa reflexa obovata; lateralia duo paulo majora concava obovata lunata minus reflexa; inferius spatulato-obovatum obtusum concavum, lateralibus majus, et genitalibus approximatum, patens.

STAM. Filamenta novem, quorum quinque tantum fertilia, ad basin crassa villosa, versus apices contorta, longitudine inæqualia, antheræ quinque bicapsulares subrotundæ, Sterilia quatuor minora longitudine etiam inæqualia, antheris minimis vel nullis, omnia petalis fere dimidio breviora.

PIST. Germen oblongum. Stylus filiformis leviter curvatus, petalis et staminibus longior. Stigma acutum.

PER. Longum triangulare trivalve, utrinque acutum.

SEM. Trialatum, alie lineis oblongis sibi invicem junctis. Nux fragilis rotunda. Nucleo rotundo trisulcato.

Arbor viginti pedalis, cortice cinereo; Rami patentes numerosi. Folia tri vel quadriplinata sesquipedalia, foliolis ovalibus obtusis tri-linearibus teneris integerrimis pedicellatis; glandula parva pedicellata intra singulas foliolorum divisiones. Racemi axillares semipedales, calycis foliola subcarnea, petalis albis ad basin leviter purpureis. Pericarpium pedale sulcatum, angulis acutis. Calycis foliola et petala sæpe irregulariter reflexa et numero varia, sed Petalum inferius semper rectum et genitalibus approximatum.

--------	----------------	------------	-------	----------------------

* This Shrub has been introduced into our Gardens here from England under the above Title, but I do not know on what Authority; the following are it's Characters, as nearly as I have been able to ascertain them:

CAL. Perianthium pentaphyllum inferum, foliolis parvis ovatis erectis.

COR. Petala quinque, lacinis ovatis vel subrotundis, erectis inferis, calyce duplo longioribus.

STAM. Filamenta decem circa Germen compressa, erecta, longitudine Corollæ. Antheræ parvæ simplices.

PIST. Germen subrotundum. Stylus vix ullus. Stigma compressum.

PER. Bacca lucida membrano tenui oblecta, pulpa paucissima.

SEM. Duo, membrano proprio tecta, striata, pisi magnitudine, ita ut duo applicata sphaerum constituent, et sorte semen unicum in duo fissile.

Frutex quatuor pedalis inordinate ramosa, folia petiolata lanceolata-ovata alterna glabra integerrima; flores axillares congesti subsessiles. Corolla alba. Germen facie æmulat fructum juniorem Citri Aurantii.

† This Tree was at first supposed to be the true Mangostein, but having perfected its fruit, on comparison with the description given of the true Mangostein, we judge it to be the *G. cornea*. Male and Hermaphrodite flowers are found on the same Tree.

Arbor inelegans ramosa, cortice subfusco truncus tegitur; folia habet alterna pedicellata integra oblonga venosa glabra acuminata, margine undulato, sicca, laurina, ad extremitatem ramulorum congesta; pedicellis utrinque tumidis vel ganglionosis. Racemi compositi breves, plerumque è ramis majoribus orti. Corolla lutea, laciniæ singulæ striis tribus purpureis intus notatæ; odor valde ingratus. A nigritis in Jamaica vocatur Bichy vel Celu, et ibi semina per se vel cum Sale et Capsico commista ad dolores ventriculi pro remedio habentur.

A
GENERAL DESCRIPTION
OF THE
BAHAMA ISLANDS.

By DANIEL M'KINNEN, Esq.

CHAPTER I.

General Description of the Bahama Islands.

THE Bahama Islands, which may be said to be connected by Porto Rico and Saint Domingo with the series of Charaibbean Islands, lie at a considerable distance to leeward of them, in a diagonal line, running south-east and north-west, nearly seven hundred miles in extent, between the seventy-first and eighty-first degrees of west longitude, and the twenty-first and twenty-eighth degrees of north latitude. From the names given by the aborigines to the two largest islands situated at the north-western extremity of the range, they have been sometimes called the *Lucayas*,* or more generally *Bahamas*. The greater islands, or rather groupes of islands, may be esteemed fourteen in number. The smaller, it has been computed, amount to at least seven hundred; though I suspect an exact enumeration of them, from the intricacy and subdivision of many of the islands comprehending rocks and sand-banks, would be an undertaking scarcely worth the labour.

* Or Lucayos. The Spanish geographers, speaking of the Lucayos in the earliest accounts, confine them to three different clusters, lying east of the Florida stream, and admitting three distinct entrances into it, at present called the Providence, the Santareen, and the Nicholas Channels. Under this subdivision the Lucayos were described as the *Babamar*, the *Organos*, and the Islands of the Martyrs. Herrera, vol. ii. chap. 5. —It occurred to me, on recollecting the *Leucadia* of the ancients, that these islands, which are also remarkable for a white calcareous rock, might have derived their name from the same quality. *Lucaya* or *Yucaya*, however, is an Indian word; and it is said the islands were generally called *Lucayas* by the natives.

Although the geographical divisions of the globe are generally founded on some analogy between the component parts, as the Charaibbean Islands, which may be classed together from their volcanic appearance, and the similarity of their climate and natural productions, it occurred to me, before I visited the Bahama Islands, that on passing the north tropic, and traversing so great an extent of ocean as they occupy, some marked and essential differences would be found between the islands at the two extremities of the chain: but in this I was deceived; for, I believe, there are strong characteristic resemblances in climate, figure, soil, and in the animal, vegetable, and fossil kingdoms, which may properly serve to unite them in the same family. Lying, as they do, in one of the most serene, genial, and (through a great part of the year) delightful climates in the world, and yielding by cultivation most of the vegetable productions of the temperate as well as of the torrid zone, it might seem strange that they have not hitherto become generally settled. But from the intricacy of the navigation between them, as well as the unproductive nature, or rather deficiency, of the soil, they have attracted, perhaps, less notice than any other parts of the British empire: I therefore determined to see as much of them as time and circumstances would admit, though with little other incentive or qualification than curiosity to direct my inquiries.

These small oblong bodies of land, bounding the Atlantic Ocean on the north-east of the large island of Cuba, and reaching over an extent of ocean commensurate with its length, rise almost perpendicularly from an immense depth of water, and seem to have been formed, if external appearances may be trusted, from an accumulation of shells or small calcareous grains of sand. The land generally seems low, and its surface and figure throughout the islands is very nearly the same. At the utmost depths to which the inhabitants have penetrated, nothing has been found but calcareous rock, and sometimes an intermixture of shells. At a small distance from the shores a reef of rocks in many of the islands is observed to follow the direction of the land, and form the boundary of the soundings:

without this rampart the ocean is often immediately unfathomable; within it, the bottom is either of a beautiful white sand, or chequered with heads (as they are termed) of rocks covered with sea-weed.

The principal is lands, or clusters of islands; to enumerate them in their longitudinal inclination from south-east to north-west, are:

1. Turks Islands.
2. The Caucus or Caicos.
3. The Heneagas.
4. Mayaguana.
5. Crooked Island Groupe.
6. Long Island.
7. Watlings.
8. The Exumas.
9. St. Salvador.
10. Eleuthera and Harbour Island.
11. Providence.
12. Andros.
13. Lucaya or Abaco.
14. Bahama.

Besides these islands, there are two extensive sandbanks which underlay a wide expanse of ocean, called the Great and Little Bahama Banks, the boundaries of which are in many places marked by an indefinite number of quays* and islets.

* Quays are described as "small sandy islands appearing a little above the surf of the water, with only a few bushes or weeds upon them, and abounding (especially at any distance from the main) with turtle and amphibious animals. Turtle choose the quietest and most unfrequented places for laying their eggs, which are to a vast number in the season, and the quays would be seldom seen but for this, except by pirates. Vessels from Jamaica and the other governments make voyages to them, called Turtling. Some quays which have been in continual view, as those nigh Jamaica, are observed within our time to be entirely washed away and lost, and others daily wasting." Introduction to a General History of the Pirates, by Capt. Johnson, page 24.

The Bahamas will be ever remarkable in the history of the New World, from having been first discovered by Columbus, on an expedition of the greatest enterprise and importance that was ever undertaken on the seas. At that time they were filled with inhabitants, who welcomed his arrival on their humble shores with pleasure and hospitality. But in a few years, as I shall have occasion to mention more particularly in the sequel, these islands were completely depopulated, and forsaken till the conclusion of the American war; since which they have afforded many of the distressed royalists a precarious and, perhaps, temporary settlement.

The principal produce of the islands consists of cotton, salt, turtle, different species of fruit, mahogany, dying and other woods or barks. A considerable source of profit is found by the maritime part of the community, in administering to the distresses of those who are wrecked upon the numerous rocks and shoals with which these islands are beset.

Providence, being the present seat of government, concentrates all the trade and consequence of the islands; and to this place I naturally directed my course, as the principal object of curiosity and source of information: but the want of any immediate communication, which detained me some considerable time in the out islands, afforded as well the opportunity of examining what occurred most worthy of observation where I remained, as of collecting information near at hand, respecting the islands which I passed without personal observation. Of one or two of these islands my tour will furnish a particular account; and, I believe, from the great analogy they bear each other, a pretty correct general idea of them all. But I will notice the principal islands before enumerated, and a few of the others as they engaged my attention in sailing through them towards Florida, beginning at the south-eastern extremity, where they approach St. Domingo.

CHAPTER II.

Turks Islands.—Origin of this name.—The process of making salt.—Dispute relative to the colonial government of these islands.

IT may be said with respect to many of the Bahama Islands, that you have your choice of three names, given to them at different periods of time, by the English, the natives, and the Spaniards. The *natives* generally described them by some peculiarities which at present cannot always be learnt; for their language has almost perished with their race. The denominations of the *Spaniards*, which appear in the older charts, seem to have been arbitrary, and, like their dominion over them, but transitory. The few English names which may be traced are founded on some natural allusion made by our sailors, to whose roving and intrepid spirit we are indebted for this colony; its sands and rocky shores, abandoned and avoided by other nations, affording them for many years a favourite and congenial retreat. To them we may ascribe the present denomination of this small cluster of islands. In the old charts they are called *Las Amanas* by the Spaniards, who derived that name, I believe, from the natives. They abound with a dwarfish species of the cactus, (*cactus coronatus* or *cactus nobilis* of the botanists), vulgarly called the *Turk's head*, from a most striking and singular resemblance the plant bears to a Turkish cap; which circumstance must have given rise to the present appellation.* One otherwise would be as little likely to guess at their proper location, as a post-master in England,

* In the French charts they are called *Les Isles Turques*; and perhaps the French may be the authors of their present name.

who, not having heard of any colony of the Grand Seignior in the West Indies, sent off a letter directed, some years ago, to a person in the *Turks Islands*, to Constantinople.

These small islands are of some consequence in this government, from the quantity of salt they produce in natural ponds. The calcareous rock, of which the land is composed, lies generally in horizontal layers. From the violent action of the sea, which has evidently, and perhaps recently, beaten over them, the surface every where appears worn, fretted, and broken into holes, or often deep excavations: hence the ocean water finds a passage, and has formed in many parts of the interior extensive *salinas* or ponds. Although the inhabitants of the other islands, perhaps, amongst other causes, owing to a more northern position, have not hitherto much attended to the great natural advantage of their salt ponds, little doubt seems at present entertained of their becoming a source of considerable profit, from the quantity of salt produced, and the facility with which it may be obtained. For early in the year, when the power of the sun begins to increase, accompanied with dry weather, the salt every where in these natural ponds begins to crystallize and subside in solid cakes. It remains then only to break the crystals, and rake the salt on shore; and by this easy mode a single labourer may rake from forty to sixty bushels of salt in a day. The process, however, is facilitated by making small pans, which as the salt is taken out may be replenished with brine from the pond. The two principal ponds from whence the salt is obtained in this cluster of islands lie at that which is called the *Grand Turk*, and at a smaller island called *Salt Key*, on the south side of it.

The island called Grand Turk may be about twelve miles long, and, at a mean, two miles broad from east to west. The soil which is sandy, admits but of little cultivation, and produces only a small quantity of Guinea corn, an agreeable and nutritious grain, which is universally cultivated throughout the Bahamas.

The principal pond on the island is considerably more than a mile in length. There are also some of less note, and particularly one near a harbour on the east side of the *Grand Turk*, from whence some small quantity of salt is obtained.

The resident inhabitants are few in number. Before the American war they amounted to about eighteen white heads of families and forty slaves; since which period there probably has been little increase. I mention the *resident* inhabitants; for in the early part of the year, when the salt begins to make, a number of periodical visitants, from the *Bermudas*, come over for the purpose of raking it. All those who are present on the tenth of February being enumerated, allotments of the ponds are made, and staked off to each person in proportion to the number of hands given in to be employed in raking salt for the ensuing season. The amount of these annual visitors cannot be calculated with precision. Early this year two hundred had arrived; and I was informed they sometimes number between one and two thousand. The pans which the salt-rakers generally lay out are not all of equal dimensions, but depend on each individual's judgment or experience. I saw, elsewhere, some nearly sixty feet square; from whence it was calculated; I do not know with what exactness, that at least five hundred bushels of salt might be raked in a good season. But in *Turks Islands* the pans are generally smaller: they are filled with the brine about six inches deep, or so as to cover a man's ancles, and a moveable machine, like the wheel of a water-mill, but turned by a handle, throws the water from the pond into a gutter, from which the pan is conveniently and readily supplied.*

The Spaniards, who first discovered these islands, more intent on the search of gold than of salt, passed on to *Cuba* and *Hispaniola* without effecting any settlement. It is little more than a century since they have been first visited or claimed by

* The salt now (March 1803) sells at one shilling and eight pence sterling per bushel on the spot.

the English. The only Europeans who ever contested our pretension to the possession were the French: they attacked it some years ago without success. The right was afterwards discussed by the courts of the respective countries, and the claims of the possessors admitted and sanctioned by the French government.

A free port is established at the Turks Islands, which admits the Americans, their principal customers, to carry away the salt in their own bottoms, subject to a duty of two shillings and sixpence Bahama currency (eight shillings to the dollar) per ton, payable to the crown. The receipts of the last year, at the office of the customs, amounted to two thousand two hundred and thirty pounds sterling. The colonial government has also imposed a further duty on all salt exported: but an exemption is strenuously claimed by the inhabitants; who disavow any connection with the Bahamas, and, although called upon by a law of the colony to delegate a representative to the assembly of the Legislature at Providence, have totally refused to recognise its authority. The circumstance of the annual migration of most of the inhabitants, the distance from the seat of the Bahamas' government, and the trade wind, which, though favourable to reach Providence, renders the reciprocal communication both difficult and tedious, are reasons urged in favour of the convenience of attaching them to the colony of the Bermudas. It is also insisted that his Majesty has sanctioned them in a sort of palatinate government, by appointing a person to reside there in the character of an agent of the crown. On the other side it is strongly contended, that this is merely a factious attempt to call in question a legitimate authority from motives of private convenience, which has eternally disgraced and embroiled our infant colonies. The question (which cannot be of very difficult solution if the right is merely precarious) is submitted to the proper tribunal, the King in council, and a speedy decision will probably put an end to this political dispute.

CHAPTER III.

The Caicos.

IN proceeding towards Providence, the next collection of islands that you meet with, lying in a north-westerly direction from the Turks Islands, are called *The Caicos*, or, as our sailors more familiarly pronounce them, *The Caucus*. Their name, I believe, is of Indian origin, and may be derived from a species of native plum-tree. They lie in the form of a crescent opening to the south, and are separated from each other by narrow passages. Besides the Keys, or smaller islands, lying south, they are distinguished by the names of the West, the East, the Grand, and Middle Caucus. The soil of the middle islands, which have principally invited settlement, (and particularly some spots of clay), is the most esteemed of any in the Bahamas. There are two sugar plantations recently established at the Caicos; but the staple commodity produced is cotton. Of the general state of the agriculture of these and the other islands I shall be enabled to furnish a correct idea, when speaking more particularly on the subject hereafter, from authentic documents in the proceedings of the legislature of the Bahamas, on a recent investigation of the subject.

The different West India fruits come to perfection in these islands. I tasted some oranges produced at the Caicos of excellent flavour. Horned cattle, on a comparison with the adjacent islands, succeed well: and I saw some very good hogs bred there; a species of stock which thrives most remarkably in all warm climates.

Previous to the peace of Paris, in the year 1783, when many royalists removed to the Bahamas, there were not more than

thirty acres of land cleared in all the Caicos. But in the course of five years succeeding, twelve heads of families, and between two and three hundred slaves, were enumerated on the islands; since which period I have not learnt the exact amount of the population. One gentleman alone, it is said, has six hundred negroes employed on his different plantations. But there is too much reason at present to anticipate a diminution rather than an increase of numbers. A port of entry is established at the Caicos, but they have not as yet sent any delegate to the General Assembly at Providence. Although the land is rocky and much broken, the indefatigable inhabitants have made roads adapted for carriages; and if nature would smile on their meritorious efforts, it would soon become a populous and flourishing country: but, I am sorry to say, the prospect of the future is wrapt in a gloomy despondence.

Various traces of the aborigines (who in numbers much exceeded any population likely to ensue) have been discovered at the Caicos: amongst others, utensils formed of clay, and a hatchet of stone curiously embossed with a dolphin's head. In a cave some skulls, I was informed, had been recently taken up, which, on being touched, immediately mouldered to dust. An old road traversing one of the islands was also found by the first settlers, which they ascribed to the Indians; for the Spaniards, although they exterminated the inhabitants, were indifferent about their country, which they deemed not worth the possession.

CHAPTER IV.

Heneagas.

IN a south-westerly direction from the Caicos lie the two islands of Great and Little *Inagua*, or, as, to accommodate them to an English pronunciation, they are now generally called, *Heneauga* or *Heneaga*. The original is a Spanish compound word, signifying that '*water is to be found there*;' which, to those who frequent the neighbouring scenes of flat and desert keys and sands, is an object of no small consequence.

Great Heneaga has been hitherto but little known from any other circumstance than the number of shipwrecks which it has occasioned, by its position at the mouth of the windward passage, the frequented straits between Cuba and Saint Domingo. A dangerous reef lies at some distance off the shore; and, from the strength and uncertainty of the currents, vessels are continually and unexpectedly driven upon it. In the month of August, in the year 1800, the *Lowestoffe* man-of-war, and eight Jamaica ships under her convoy, were unfortunately cast away and destroyed on this treacherous coast.

I passed the Great Heneaga on a very boisterous evening in February, towards dusk, and, being carried considerably to the westward of the strait course by a current from the east, had no opportunity of distinctly observing the land, which was low and at some distance. A few days afterwards I was informed that two square-rigged vessels were just cast away on the reef; and it was supposed by the captain of a small wrecking vessel, who gave me the information, and had seen their boats upset, that the crews must have perished in attempting

to land. He had endeavoured to approach the wrecks, but was prevented by the violence of the wind, and the breakers on the reef intercepting the shore. Little hospitality at that time could have been expected on the island, as it was inhabited by only one fugitive outlaw from *Long Island*, accused of having committed there a wanton murder on his innocent slaves. Some few families, it was said, were on the point of removing this year to Heneaga: for the Bahama Islands constitute as it were a large family; and though dispersed over an extended and thinly-peopled space, their individual projects and concerns are easily known to each other from water communication, and the wreckers frequenting their harbours. The new settlers are invited to *Heneaga* principally by the salt-ponds, to which object the inhabitants of the Bahama Islands have this year (1803) very generally turned their attention.

CHAPTER V.

The Hogsties.—Ragged Island.—Mayaguana.—The French Keys.

THE HOGSTIES.—At the distance of about ten or twelve leagues to the northward or north north-west from Heneaga, are some small keys, with wings or reefs of rocks on each side in form of a horse-shoe, which admit a passage from the east, and form a sort of harbour. They are styled in the French charts "*Les Etoiles*;" and by us, perhaps through reproach, "*The Hogsties*." Lying as they do in a very frequented part of this sea, I was surprised to find that neither Heneaga nor the Hogsties had as yet been correctly surveyed. They are minutely known only to those persons called wreckers, who are licensed by the Governor of the Bahamas, and cruise amongst these islands for the benefit of salvage, which they receive on all property they may chance

to rescue from the waves. Some cocoa-nut trees have lately been planted on one of these keys, as a warning to mariners; but it is doubted whether the wreckers, whose business it is to prey on the disasters of the unwary, will suffer them to grow up, even should the soil permit. Perhaps, however, this may be a surmise, originating in the prejudices and feelings of many of those who have been unfortunate sufferers by shipwreck, and who generally inveigh against the rapacity of the wreckers.* The merit and utility of a set of men, however,

* Happening in the course of one of my passages through the Bahamas to fall in with a wrecker, I held as long a conversation with him as his haste would permit, and was inquisitive on the subject of his occupation. I will set down the dialogue as it took place.

Q. From whence came you?

A. (As it caught my ear) From Providence—last from *Philimingo Bay* in *Icumey* (a familiar way of pronouncing *Flamingo Bay* in *Exuma*).

Q. Where are you bound to?

A. On a *racking* voyage to *Quby* (Cuba) and the westward.

Q. Are there many of you in this quarter?

A. Morgan, I, and *Phinander* (Fernandez):—parted company awhile ago.

Q. What success in cruising?

A. Middling—but middling.

Q. We have seen very few wreckers to the eastward—are there many to the westward?

A. We lay with forty sail four months along *Floriday* shore.

Q. Forty sail? Then certainly you must have had many opportunities of being essentially serviceable to vessels passing the Gulf stream, by directing them to keep off from places of danger, with which you made it your business to become acquainted?

A. Not much of that—they went on generally in the night.

Q. But then you might have afforded them timely notice, by making beacons on shore, or showing your lights?

A. No, no, (laughing): we always put them out for a better chance by night.

Q. But would there not have been more humanity in showing them their danger?

A. I did not go there for humanity: I went *racking*. (In truth, as strong an apology as any that can be suggested for it.)

cannot be denied, who, whatever may be their motive, with alacrity and courage continually encounter the hardships of a dangerous sea, to preserve the property, and often the lives, of their fellow-creatures from destruction. The inhabitants of the Bahama Islands, previous to the American war, when the loyalists from the southern part of the United States removed to them, and introduced the general cultivation of cotton, were principally engaged in a sea-faring life; and, from a lively allusion to the large and beautiful species of shells with which their shores abound, by their visitors were nick-named *Conchs*. These are the persons generally employed, with their slaves, in the occupation of wrecking; and, if the many amusing stories related of them are true, they possess a distinguished share of the address and enterprise of British sailors. It would be a little credulous to pay attention to all the marvellous occurrences, which come to us often exaggerated by the imaginations and vanity of the relators; but I heard a singular adventure from the person to whom it happened, attested by many present who were acquainted with some of the circumstances, which may be worth repeating, as it serves to illustrate as well the hardships and dangers to which the *Conchs* are often exposed, as the resources with which they are enabled to surmount them.—A fisherman at anchor in a boat, while attentively employed in casting his nets at a small distance from the shore of an adjacent island, towards the dusk of the evening was surprised by a sudden gust of wind coming off the land. His boat, notwithstanding all his exertions, was soon driven from her mooring, and, drifting before the wind out of sight of land, was exposed to the swell of an increasing sea, which overtopped and threatened to overwhelm her every instant as it passed. The boat continued, however, to float till the night was somewhat advanced; and, in the awful expectation of his fate, the fisherman, who now had scarcely any thoughts of relief, heard the sound of breakers at a distance. This, which at another time would have excited the greatest alarm, afforded him at that desperate crisis a ray of hope. Scarcely had he begun to distinguish their foam in the darkness of the night, when he found himself plunged into the midst of them, and

his boat dashed upon the rocks on the eastern edge of the Great Bahama Bank. At a small distance from these rocks lay a key or bank called *Ragged Island*; and, floating almost senseless on the water, he was flung upon this desolate island. Though now preserved from the waves, there was neither water nor food to be found on the key, which produced only a few fruitless shrubs. But as he had been accustomed to dive for conchs, which abound in many places on the coasts of the Bahamas, he swam to some distance from the shore, and fortunately, on searching the bottom, discovered a sufficient quantity of these shell-fish for his subsistence. For nearly six weeks he lived entirely on conchs, their liquor supplying the place of water. During that time, having erected a signal on shore, he observed several vessels pass without noticing it: but so well reconciled had this Crusoe become to his desert island, that he declared, when taken off, had his wife been with him he could have lived very happily there for life.

Mayaguana.—The next island, proceeding in a north-west course from Turks Islands, which from its size would attract one's notice, is Mayaguana. Its south-west point lies west-north-west twenty-five leagues from the West Caicos, and eighteen leagues north-east by east from the Hogsties. As yet it is uninhabited, and known only to mariners. I met with two or three sailors, part of the crew of a brigantine, which had just been cast away on its eastern point, who rejoiced in effecting an immediate escape in a wrecking-vessel from this wild and inhospitable spot. The Indian name which it bears seems derived from some qualification of the word *Guanu*, an animal of the lizard tribe, found in the holes of the rocks, in, I believe, all these islands. In the cultivated parts the guanas soon disappear, as they are easily taken, and their flesh is much esteemed by the negroes.

The French Keys.—North-west by north, eight leagues from the south-west point of Mayaguana, lie some dangerous islets called *The French Keys*, which I have noticed, from the extreme inaccuracy with which they are laid down in most of

the charts. I am not certain how far the bearing, which I have mentioned on the information of an intelligent observer, may be correct; but their actual position, it is to be hoped, will be soon made known by a gentleman* of one of the neighbouring islands, who, from taste as well as local and scientific knowledge, is likely soon to render an essential service to the world, in publishing an accurate survey of these frequented passages through the Bahama Islands.

The winter is not the most agreeable time to navigate these seas; for although the season is not so uniformly boisterous as in the northern latitudes, and the trade-wind, with some tendency to the north, for the most part continues to blow, yet there is great inconstancy in the weather and uncertainty in the currents. I had the fortune in the first part of my voyage to be at sea in a good ship with able seamen; but I was surprised to find, that the intricate navigation of these islands is very often undertaken by those who have never visited them before, and who, therefore, must in a great measure trust to charts and sailing-instructions to find their way. Such is particularly the case with the Americans; and, in consequence of their temerity, the dangerous passages are strewn with wrecks of their vessels. Nor will the most experienced, from the great variation at this season in the strength and setting of the currents, place their chief reliance on any thing but a *good look-out*, which awakens every one to personal observation,

* Colonel Douglas, of Crooked Island.

CHAPTER VI.

Crooked Island.—Castle Island.—The author lands at Portland Harbour.—Description of the beach and salt-pond.—General view of the country.—Pitt's Town.—Journey across Crooked Island.—Some account of its natural productions.

CASTLE ISLAND.—Having spent a restless night in partaking of the vigilance and solicitude of the pilot, and poring over our inaccurate charts, I was rejoiced at the sight of some low land, which proved to be Castle Island, about fifteen or sixteen leagues south-west from the French Keys. As the sun rose we discovered at no great distance a large white rock, which appeared not unlike an old castle, and justly gave its present appellation to the key or island lying west of it. It was highly gratifying as we came within a mile or two of the shore to be relieved from a tossing sea; and the bright sand which surrounded Castle Island had a beautiful effect over the surface of the smooth water, which now became green as we approached the shore. It is extremely satisfactory to the mariner when some natural feature, such as the Castle rock, can be found to denote the land; for by that circumstance alone, persons ignorant, as we were, of the general figure of the island, can distinguish it with certainty from some smaller islands lying to the west, and named by the Spaniards *Mira per vos*, signifying in their language ‘take care of yourselves,’ an injunction, though necessary amongst these islands in general, yet more applicable to the *French Keys*, the *Hogsties*, and *Mayaguana*.

Crooked Island.—To the north, adjoining Castle Island, lies Crooked Island, described in different charts as Fernan-

dez,* *Sumana*,† Fortune Island,‡ and more recently, I apprehend, Crooked Island. At first the great body of the land was supposed to form one connected island; but, though since discovered to be separated by a narrow channel, it still retains a name descriptive of a part instead of the whole.

I landed at a beach on the north part of Crooked Island, near a situation designated for a town to be named after Mr. Pitt. At a distance we observed the waving palmettos along the strand of an open bay, the white bottom of which, as we came in, was visible at many fathom's depth through the transparent ocean. Indeed, so remarkably is this the case, that sometimes the captains of strange vessels can hardly be prevailed upon to stand in and anchor as near the shore as a just caution would allow them. I walked over the sandy beach to a large pond, on which I was so fortunate as to meet a worthy and respectable planter of these islands, occupied, with his negroes, in laying out the salt-pans for the ensuing season's raking. On my way I passed by a great number of vegetable productions entirely new to me, of which the scientific world, perhaps, needs no description; but the names and properties of which I afterwards took considerable, but often unsuccessful, pains to learn. I observed amongst those I knew particularly, an abundance of the wild lemon, which shot its tendrils creeping along the ground so as to intercept my passage; also a number of bushes (*Gardenia*) described by Catesby, loaded with the seven-year apples, which derive that name from the tedious length of time, near eight months, which the fruit requires to ripen; and the red mangrove, or sea-side grape, as it is commonly called in the West Indies. The beauty and

* This name, I heard, was given to it from the circumstance of a sailor of that name having been wrecked on the coast, who continued for some months alone on the island.

† *Atwood's Keys*, a barren strip of land lying twelve leagues east-north-east from the Bird Rock, is more generally described by this Indian name in the French charts, but it is very probably the true original name of Crooked Island.

‡ This name is applicable to the adjacent key, called *Long Key*.

variety of many of these new acquaintances of delicate foliage very much gratified my eyes. I proceeded along the level shore of the pond from whence the inhabitants were then, for the first time, attempting to make salt. It was fringed with button-wood or the limbs of mangroves* interwoven and over-arching the entrance into the adjoining wood. I observed the shells of an amazing number of land-crabs, abounding in most or all of these islands on the first settlement. These *exuviae* I had suspected were deposited there by the animals at the time of spawning, when they pay their periodical visits to the sea-side and change their shells; but my intelligent companion understood that they had destroyed themselves by drinking the brine. Towards the head of the pond, at that time dry, we perceived the spring from whence it was supplied with water from the sea, insinuating itself at high tides through the rocky bottom.

From the discovery of Columbus for nearly three hundred years these islands had continued almost in a desert state, till at the conclusion of the American war, many of the fugitive loyalists from Georgia and South Carolina, who had first taken refuge in East Florida, from the cession of that country to the Spaniards, and the constancy of their attachment to Great Britain, were constrained to emigrate to the Bahamas. The land, being rocky, with a light vegetable dust or mould and small timber, was easily cleared to its wood, and found apparently well suited to the cultivation of cotton. In the course of fourteen or fifteen years from this period, forty plantations, with between two and three thousand acres of cotton fields, and one thousand negroes, were enumerated on Crooked Island.

* This mangrove is described by Dr. Bancroft, who gives a correct idea of the tree. It arises from several strong ligneous roots which emerge above the surface of the earth two or three yards before they unite at the trunk. From hence several tough shoots germinate, and, descending, take root. As the tree increases in height they become more numerous, and are seen in great numbers descending, not only from the trunk but from its more elevated branches, like so many ropes.
—Natural History of Guiana.

The next day I crossed the salt pond to the dwelling house and negro huts of a plantation situated on an adjoining hill. From this spot the prospect, though wild, was extremely agreeable, commanding a pretty extensive view of the salt-pond, the beach covered with nodding palmettos, and the green bay, called Portiand Harbour, on which I landed. A mild and serene sky spread a genial influence over the land, which was clothed with verdure, whilst the agitated ocean at a distance broke over the reef that presented a barrier to its fury along the northern coast. Turning to the east, and perceiving scarcely any trace of population through the expanse of country before me, I was content for some time to gaze on the wild magnificence of nature's works, no less delightful from their novelty than variety. Descending then to the plain below, and proceeding over a broken surface of rocks into the interior of the country, I beheld some extensive fields originally planted with cotton, but which, from the failure of crops, were now abandoned, and had become covered with a luxuriant growth of indigenous shrubs and plants, of which the most numerous appeared to be the sage tree (*Lantana*), and the wild tobacco (*Solanum*); and here and there the wild coffee (*Psychotria*). They were frequented only by a small and lively species of the humming bird and the ground dove of the Charaibean Islands (*Turtur passerina*), whose complaining and tender notes were well adapted to the solemnity of a deserted country. The moderation of the heat, and the beauty of many natural productions, are circumstances which undoubtedly tend to make these islands a more agreeable abode to an European than any other part of the West Indies. But it was impossible to behold without regret many amiable and industrious planters, who, having been twice driven from their homes, and deluded by a deceitful prospect of prosperity, were now sinking into ruin from which no exertion on the spot could effectually relieve them. Although nature in all these islands spontaneously brings forth many vegetables, both curious and beautiful, she has hitherto refused to resign herself to continued cultivation. The exotics which are introduced seem feebly and unsuccessfully to struggle with cold winds, the droughts, and unfriendly seasons; whilst a crop of here-

ditary and worthless weeds take possession of the soil prepared for cultivation, and extract all its nourishment to administer fertility, as they decay, to the native and unprofitable forest trees succeeding them, the elemi, silver-leaved palmettos, and hungry aborigines of the rocks.

The north division of Crooked Island is an oblong body of land, running about thirty miles eastward or east by south from Pitt's Town to the channel near Acklin's Key, which, stretching something more than the same distance southerly, forms almost a right angle with the northern division of the colony. The breadth of the Bahama Islands, in general, is very inconsiderable compared with their length. I should suppose the mean breadth of Crooked Island is about one-eighth of its length: but the figure is too irregular to admit of any precise admeasurement, being divided on the southern side by a considerable inlet. A bridle road runs along the north shore of Crooked Island from the site of Pitt's Town to *Acklin's Straits*, and a ridge of hills extends in its longitudinal direction through the centre of the island. The best land is found on the top or on the slope of the yoke of hills, and the planters' houses are mostly situated there, with avenues communicating in direct lines with the road.

The west point of North Crooked Island is extremely well known to all who have taken this passage, from a small bank called the Bird Rock projected at a little distance from the shore, and lying, according to late and exact observations, in latitude twenty-two forty-eight north, and longitude seventy-three fifty-five west. *Pitt's Town*, which has been laid out nearly opposite to the Bird Rock by a worthy and indefatigable gentleman of Providence, the principal planter on this island, is expected from its situation to become a place of some note. One cannot sufficiently applaud the enthusiasm with which plans are projected, and the facility with which the inhabitants of this part of the world can turn their views to new objects of profitable experiment. They measure an extent of country embracing many hundred miles in their speculations, and are as much alive to all its means and relations

as professed directors of state affairs. Information is therefore easily obtained; and it remains only to exercise a good share of caution in admitting what may turn out to be erroneous. From present appearances there is every reason to hope that *Pitt's Town* will become a station of some importance in the Bahamas. The passage is much frequented by the Americans and Jamaica-men. The packet on her return from Kingston to England touches here with a monthly mail from Europe and Jamaica; and vessels are often seen passing and repassing along its white and sylvan coast, though, from its hitherto uncultivated resources, it scarcely ever happened, during my stay near Pitt's Town, that they were tempted to come to anchor or send a boat on shore. Remote as this situation is from Providence, so much is the distance abridged by the convenience of water-communication, and the locomotive habits of the planters, that they talk of *going to town*, as they often term a voyage to Providence, with the same familiarity as an inhabitant of Greenwich or Hampstead, of paying his daily visit to London. Indeed, with the assistance of a good trade-wind, which is rarely wanting, it may be done in less than forty-eight hours; *sed revocare gradum—hoc opus, hic labor est*; and many arduous days may be required to surmount the winds and currents which oppose a return.

To the south of North Crooked Island runs a long slip of uncultivated land, called *Long Key*, containing some extensive salt-ponds, from whence one gentleman, with the assistance of a gang of forty negroes, raked thirty-five thousand bushels of salt during the last season in the space of a few months. This successful beginning had very much excited the emulation of the other planters on Crooked Island when I visited it, and they had lined the shore of the pond near Pitt's Town with pans for the purpose of making a similar attempt in that quarter during the ensuing season, although some apprehensions were entertained of their success to the extent at least, of the hopes of many individuals who had embarked in the experiment.

I found the plantations on Crooked Island for the most part deserted; and the proprietors whom I visited were generally in a state of despondence, in an agricultural point of view, as to the future. Some expectations were still entertained of the other part of the colony: whether it is that we are always disposed to prefer what we last see, or "trust most to what we know the least,"* according to the opinion of a profound observer of human nature, the planters have either all removed, or talk of removing, to Acklin's Key.

Being detained some weeks at Crooked Island for want of an opportunity to proceed towards Providence, I was glad to embrace an offer which was obligingly made me, of accompanying a gentleman to his plantation on Acklin's Island, of which I had heard so much; and I was the more pleased, as in so doing it was necessary to traverse the whole extent of the northern island.

Previous to my departure I took occasion to visit a great natural curiosity, an extensive excavation of the rocks, which, from the singular resemblance of its interior to some old dilapidated structure, very much reminded me of one of Mrs. Radcliff's ruinous and mysterious castles. At the base of a cliff facing the shore, the rock, which is of a loose and friable texture, appears to have been exposed to the violent action of the breakers, and the cavities have been shaped in grotesque figures, and embossed or wrought into holes, every where smoothed by the lambent water. The principal cave is at some few paces from this beautiful grotto, with which it has apparently no communication, and you are obliged to enter it by descending from an aperture in the rock above. Within this cave the devastation of the water, evident in various places throughout the island, has left more remarkable traces. In some spots the top appears as if completely demolished, in others it is worn and fretted into regular cavities and shapes, giving it an air of Gothic ceiling, and the stalac-

* *Super invisis et incognitis rebus magis confidamus, &c.*—Cæsar de Bello Gallico.

tites and incrustations on the side walls (if they may be so called) have a damp and mouldy appearance, tinged with occasional hues of green and light blue. In various parts the wild fig-trees, which are particularly fond of moisture, have penetrated into the recesses, and shot their bearded roots like clusters of columns on the sides or through the holes in the roof, which admit the light, and in some places the sun's rays. It extends in a variety of capricious and romantic figures to a distance which has never been yet traced; and the imagination, prone to the marvellous, has led some persons to believe that it runs nearly across the island. The bottom was covered with a concretion, many feet deep, of some elastic substance resembling mould, but which is not possessed of any vegetative power. A philosophic gentleman conceived it was an accumulation for many ages of the dung of the bats which swarm in the dark recesses of this singular cave. Perhaps it might be going too far back for a cause, to ascribe it to a deposit of marine substances at some very remote period by the sea.

After spending a few days in the vicinity of Pitt's Town, I proceeded over the remainder of the island on my way to Acklin's. Few objects occur, however, in a country so recently brought into cultivation, to excite much curiosity by the description or interest in the detail. In a general survey of the natural state of the islands, the most curious and interesting part of the subject would require the observation of a botanist; though a great proportion of the native plants are, I believe, specifically the same as those of the southern islands. In its fossil productions little appears to deserve the attention of the mineralogist but a calcareous rock, at times of the hardness and consistency of Portland stone, but sometimes exhibiting small, loose, and rounded grains on the fracture, and often a concretion of shells preserving part of their organic forms entire. Every where the surface has strong apparent traces of the action of water.

The woods through which I passed were of so small a growth as to appear like one continued and beautiful shrub-

bery, extending, with little intermission, from the place of my departure to the verge of Acklin's channel. These diminutive forest trees, which, from the rocky nature of the soil, are mostly of a knotty and stunted growth, are not only remarkable for their delicate foliage but strong aromatic odour, often combined (if I did not mistake the cause) with some rank exhalation from the rocks, similar to what I had remarked amongst large fragments of coral recently taken from a quarry at Barbadoes. In many parts of the country I passed by successive heaps of loose stones thrown together by the aborigines, who, it is supposed, had begun pretty extensively to cultivate the ground. The population of these islands at the time of their discovery, more than double to what it is now, affords the strongest reason to justify that presumption; since they were not suspected, like their southern neighbours, of subsisting by war, or on the flesh of their own species; and the wild animals in these islands are no where very numerous.*

I saw many heads of their axes, wrought from a siliceous stone not met with in the Bahamas, which had been found among the rocks; but the memorials of their race are too scanty and unsatisfactory to admit of much speculation, as for a long succession of years no individual inhabited this island to preserve even by oral tradition the memory of the past.

On passing over the island I was entertained by a very intelligent gentleman, (Colonel Douglas), whose house, on the top of the ridge of hills, commands a fine view of the sea. Nothing could surpass the beauty and serenity of the morning after my arrival, and I beheld with great pleasure, the many curiosities in the vegetable kingdom which Colonel Douglas pointed out to me. In his garden was the *cactus cochinifer*, one of the species of plants sent over by Dr. Anderson from the botanic garden at St. Vincent's, which he judiciously

* The only tame animals they possessed were, it is said, parrots, and dogs which did not bark. They cultivated some species of grain, probably maize.

conceived might be found worthy the attention of the inhabitants of the Bahamas. The prickly pear grows luxuriantly all over the island; and every appearance would justify an expectation that this plant of the same species might be propagated with success. The cochenille, which subsists upon the fruit, has not however been introduced, and there are as yet no sufficient grounds to pronounce on the probable result of the experiment. The wild pimento, a species of the allspice of Jamaica, is seen in abundance all over the island, and Colonel Douglas shewed me the *canella alba*, or wild cinnamon, which is also a native shrub, though not so common on this island, perhaps from the avidity with which at some former period it was sought after. But the speculative and intelligent planters have not found any of their native shrubs, as yet, objects worthy of their attention; although they seem generally conscious that experiments determining their possible value have not been fully or extensively made. Notwithstanding the unprofitable nature of the before-mentioned productions, the inhabitants on their first settlement were by no means destitute of some valuable resources in the vegetable kingdom. There being no fresh water streams in the island before they had provided themselves with wells, which it is found necessary to dig at a considerable depth in the high situations on the ridge, a sort of the *anana* (*viscum caryophylloides maximum*, of the family of misletoe, described by Sir Hans Sloane), growing on the limbs of various trees, and from that circumstance the French have fancifully called it the *anana perroquet*), afforded the early visitors, as it did the Indians in Jamaica, and the Maroons their successors in the woods, a supply of rain water, which this plant retains in the compact cluster of its leaves. The small palmetto,* which covers the shores and all the sandy tracts of land in their vicinity, supplied them with an abundant and convenient thatching for their houses, still generally used as a covering for the negro huts.

* There is another kind of the *palm-tree* common in the low and moist parts of the island, which I believe is called the hog-palmetto, although it does not possess so decidedly the *fan-leaf* or distinctive character of the palmetto.

The torch, or *candlewood* of the islands, as it is called, from a strong bituminous quality of the wood, answered the purpose, in some respects, of candles. The *butter-bough*, another indigenous shrub, and so named from the gloss or greasy surface of its leaf, was found a very nutritious food for cattle. The *cork-wood* afforded a substitute for cork, used by the negroes principally in setting their nets; and, what was of no small importance to persons exposed in clearing the land to a tropical sun, the *croton cascarilla** was found almost as effectual in the intermittent fever as Jesuit's bark.

In riding over his grounds, Colonel Douglas showed me a spot where he was encamped with two or three negroes when first surveying the island, before any settlements had been effected on it. He remained for some days totally alone in the wilderness, without a vessel, in case of emergency, to carry him off; yet he felt, as he assured me, not the least apprehension for the fidelity of his slaves, who must have been conscious of his helpless situation. This sense of security at least argued the courage and humanity of the master; but, in these solitary regions, that superiority of faculties which the negro perceives in the white man overcomes every thought of independence, and, destitute of the means of subsistence by his own unassisted efforts, induces him to look up to his master for security and support. Colonel Douglas had been constantly employed with his whole gang during the early part of the day in destroying the insects which very much affected his cotton this year. After the dangers and difficulties of effecting a settlement in a new country have been surmounted, and the planter has just begun to reap the fruits of his labours, it must be extremely mortifying to find, that nature presents obstacles not only unlooked for but insuperable; whilst, having vested his whole capital in a fallacious speculation, he feels himself deprived of the means even of transporting himself and his family from the scene of this unmerited ruin and disappointment. In the years 1788 and 1794 the *chenille* destroyed, it is computed, two-thirds of the crop of cotton on this island: and the red bug,

* Or *Eleutheria*, described in chap. xii.

an insect no less destructive, notwithstanding every exertion has been made to remove it, has stained the cotton so much in some places this year as to render it of little or no value. Indeed so discouraging are appearances, that it is difficult at present to surmise, by what intervention of fortune or change of circumstances, many of these islands will be prevented from becoming a second time depopulated.

Of the curious and medicinal plants which are natives of Crooked Island, the following were pointed out to me; viz. the *Palma Christi*, hore-hound, vervains, China root, squills, milk wood (efficacious in the cure of worms), and capillair; also a plant which they call *Tea*, besides various others the names of which were unknown. On an inlet on the south side of this island I visited a ship-yard lately established, where one small vessel has been constructed and another is now on the stocks. The ribs and beams of these vessels are of the timber of the country (in that which was building principally mahogany); but there are no trees of such quality and dimensions as will afford a supply of boards and sheathing, which must be imported from North America. The head carpenter was a negro; and two of his young apprentices, negro boys, had entered with such zeal and emulation into the employment, that, stealing at their leisure hours into a secret part of the wood, they had laid the plan of a boat, and nearly finished it in a very good style, before the master had entertained any suspicion of their employment. Indeed the negroes in the Bahama Islands discover, in general, more spirit and exertion than in the southern parts of the West Indies. Something perhaps may be attributed to a more invigorating climate as a physical cause; but I believe more is due to the circumstances in which they are placed. Their labour is allotted to them daily and individually, according to their strength; and if they are so diligent as to have finished it at an early hour, the rest of the day is allowed to them for amusement or their private concerns. The master also frequently superintends them himself; and therefore it rarely happens, that they are so much subject to the discipline of the whip as where the gangs are large, and directed by agents or overseers.

On the summit of a steep hill overlooking the inlet, the gentleman who is the proprietor of this ship-yard has erected a dwelling-house with cotton-works, and laid out a plantation at a very considerable expense. He has two gardens also near the water, on which the greatest labour has been bestowed. But the unfriendly nature of the climate has rendered them hitherto, I believe, a matter of curiosity and amusement to him, rather than of profit; though I saw some orange-trees, limes, and shaddocks, in bearing, which promised to become of value hereafter under the vigilance and protection of an indefatigable superintendent. Almost all the soil of these gardens (such is the impracticable nature of this country for most agricultural purposes) was culled from adjacent spots, or the holes and interstices of rocks. But in addition to the difficulties which the land and climate present to horticulture (perhaps the most profitable mode of dealing with this rich but delicate soil), there is another very formidable obstacle to success. No sooner have the young trees attained a certain growth than they are attacked by swarms of innumerable ants, which cover and consume the leaves and blacken the barks. Various remedies have been attempted for this evil, but none seem to afford effectual relief.

We rode along on the white strand of the bays, inclining sometimes, as the road directed, into the interior of the country; we then were generally enveloped in the shades of a thick coppice of mahogany, tamarind, *lignumvitæ*, wild pimento, gum elemi, and some other forest-trees peculiar to this island. But the eye was occasionally relieved by an open scene, where the broken and rocky surface of the land had been cleared by cultivation. The mahogany (or *Madeira* as it is frequently called, from a resemblance, I was informed, to a tree of this sort produced in the island of Madeira), has been found remarkable for its good quality; but from the hard and knotty growth of the wood, it is extremely difficult to work. The grain of that kind called the horse-flesh is the most esteemed. Mahogany constitutes one of the few articles of occasional export from this island.

Another tree which less frequently occurs, although generally the growth of the Bahamas, is the *braziletto*, affording a beautiful scarlet dye. These islands, for many years before they had attracted permanent settlement, were resorted to on account of this wood, which is still no less valuable and sought after; though few of the full-grown trees are now seen in the woods. *The leaf of the braziletto* is small and ovated, and the twig is extremely delicate. A third tree of particular note in this forest, and remarkable for its durability and hardness, is the mastick (*Pistacia lentiscus*). The engineer who constructed Fort Nassau at Providence, about sixty years ago, and made use of the mastick for palisadoes, describes the wood as resisting a swivel shot, and lasting a century in the ground. Other sorts of trees partaking of the same qualities, such as the *lignumvitæ*, iron-wood, bullet-wood, &c. abound in this island in common with the rest of the West Indies.

In advancing east we passed through several deserted plantations, particularly a neighbourhood of planters from Grenada, who had removed, with many of their negroes, from that colony, and vested their fortunes in the deceitful speculation of planting cotton. On the east side of a spacious and beautiful bay, which designates their settlement, where the land swells into an elevated cape called *Mount Pisga*, we entered into another romantic cave of the same character and formation as that which I have already described. From the semblance of arched ceiling in ruins, and clusters of columns in relief on the sides, it has been called *The Abbey*. After amusing ourselves for some time in the cool and refreshing shade of this extraordinary grotto, we proceeded to a plantation on the extremity of the island and on the verge of *Acklin's Key*.

CHAPTER VII.

Acklin's Island.—Description of the country.—A cotton plantation.—Mr. Eve's new gin.—Birds on Acklin's Island.—The flamingo.—Temperature of the climate.—Departure from Acklin's.

THE first European navigators, who surveying this coast looked in over a dangerous reef, impassable for the most part even to boats, and forming their conjecture from the appearance of the distant land, represented it as one connected island; as which till within these few years it has been described: but although a succession of banks projected from Acklin's, where the land is much broken into islets, almost unites it with Crooked Island, they are separated by a channel perfectly distinct, but fordable in the narrowest part. It is scarcely eight years since the gentleman to whom I was indebted for my visit to this island, who had served for some years as an officer in the army during the American war, first set his foot on Acklin's Key, which was then an entire and unsurveyed wilderness. The hardships he encountered during some solitary years on his first settlement, from occasional sickness, and the want of those assistances which an inhabited neighbourhood affords, can be surmounted only by a spirit ardent in the pursuit of an object, and firm to its purpose. His dwelling-house and works were situated near an inlet on the shore, commanding an agreeable view of the green straits which separated the islands, in some parts above a league across. Considering the rough and difficult track we had hitherto followed, and calculating the extent of his improvements from the time bestowed upon them, I was not a little surprised on landing at *Acklin's Key* to find a carriage in waiting to

convey us to his house, about a mile from the ferry, to which a road, of his own making, conducted us at our ease. Before entering his grounds we passed through a shrubbery, which seemed to announce a stronger power of vegetation in the soil than that which we had just left. It was composed of many ornamental and useful trees, amongst which I noticed sapa-dillas in bearing, the *Cascarella* (*Croton Eleutheria* of Swartz) exhibiting its delicate bark and leaf with a light reverse, and a beautiful species of the *Mimosa*, remarkable for its small globular leaves and pods of a ruddy brown, which lined each side of the road. I was very much pleased with the neatness of the approach to the house, which afforded an admirable proof of the owner's superior industry, and attention to those exterior comforts, which constitute half the enjoyment of civilized life. The road winding up the hill from the inlet was a wide and level grass-plot with orange-trees planted on each side, some of which had attained a perfect growth; but unluckily the greater part had become victims to an insuperable malignity in the climate. In front of his house this indefatigable gentleman had cleared a large piece of ground intended for his lawn, surrounded by a margin or fringe of woods, which separated it from the adjacent fields, (a judicious mode of plantership adopted lately to protect the cotton shrubs from the cold winds); and near the centre of the expanse of cleared ground was a cool excavation in the rocks, overhung by two or three branching wild fig-trees. These cavities on the rocky surface of the land often occur in this part of Acklin's Key, and sometimes of such a depth, that it has been found extremely difficult and painful to extricate horses which, browsing in the woods and pastures, have accidentally fallen in. Here and there I observed patches of soil of a promising aspect, but totally barren, similar to what they called "yellow spots" in the Charaibean Islands: in some places it appeared to consist entirely of the dust of the decayed *Cactus Peruvianus*. The cotton-fields at this time were in full blow; the white down, or wool, which envelopes the seeds, just beginning to appear. This is the moment at which it is necessary to gather in the pods before their contents become dishevelled and scattered by the wind. Various species and varieties of the cotton shrub, imported from

Georgia (whence the planters in the Bahamas generally emigrated), and the eastern and more southern parts of the West Indies, are cultivated promiscuously here; but that which has been brought from *Anguilla* seems more generally, I believe, in use, and is raised with the least labour. It is generally supposed, by good planters, that about five or six acres of land may be employed in the culture of the *Anguilla* cotton to each working slave or taskable hand: but in the Georgian (or as it is properly called Persian) cotton, not more than four. This estimate of the quantity of labour which the plantation requires, comprehends that part of it in provisions and pasture, or appropriated to the margins of the fields, which may be about one half of the whole. I amused myself in passing over the shrubberies at the time of gathering in the crop, which was performed with much more dexterity by the women than the men, although their utmost exertions were stimulated and put forth by the hope of a reward. One lusty female slave, with a child upon her back, gathered in between forty and fifty pounds for each day's work. The greatest quantity of cotton is usually found on bushes in the more elevated and exposed situations; and it has been said, that in some estates half, and even three-fourths, of a ton of clean wool has been produced to every working slave. This, however, would be to calculate on very rare fortune. Most planters would feel themselves at present well satisfied with one-sixth of the greater quantity. In Jamaica, Mr. Edwards considers a hundred and twelve pounds to each acre a just allowance. At the time of gathering in the crop (in the month of March) I observed many of the bushes yet in blossom, and an after-crop was expected in the summer ensuing; but it is usually accounted rather deceitful and precarious.

When the pods have been collected from the fields and deposited in the store-rooms, it is then necessary to extract the seeds, and clean the wool previous to its being shipped for England. A simple instrument, composed of two parallel rollers, turned in opposite directions, which suffer the staple to pass, but exclude the seeds, has been heretofore generally used for this purpose throughout the West Indies: but an

ingenious gentleman of Providence (Mr. Joseph Eve) has greatly improved upon the mechanism of this common cotton gin, and enlarged its dimensions; an invention for which he has been rewarded by the legislature of the Islands. As there are very few situations in the Bahamas in which the power of water can be applied, they are constructed with vanes to be turned by the wind.

The animals which frequent the woods and shores of Acklin's Key appear in much greater numbers, and I found them more tame, than the same species in South Crooked Island, which has been longer inhabited. In the fields and neighbourhood of the plantations are seen many of the bald-headed pigeons of Jamaica and Carolina, described by Catesby, and of the small green parrot: the flesh of the latter animal, of a dark brown, is by no means so tender or agreeable to the taste as that of the wild pigeon; although they are both generally sought after for the table. But the bird more remarkable for its size and brilliancy of colour than any perhaps in the western world, and which is seen now principally on the most retired shores and swamps of these islands is the *Flamingo*. For several successive mornings I observed an extended flock of flamingoes, from an eminence, feeding with their heads under water in the shoal part of a distant bay; but so great was their watchfulness and timidity, that it was impossible to approach them. Their colour at a remote view appears of a lively pink. The young birds, when taken, are found to be nearly white; and the feathers on the pinions and on the necks of the old ones are of a deep scarlet. The quill feathers of some of the birds I found tipped with black. As I saw them at a considerable distance, their glowing plumage contrasted with the green surface of the water was extremely beautiful. The naturalists describe this bird, called *phœnicopteros* (a species of crane), as remarkable for its gentleness and mansuetude. Columbus and his followers observed a great number of what they called *tall red birds* perfectly tame in all the Indian villages on the south side of Cuba, similar to those which the early voyagers found domesticated amongst the negroes on the coast of Africa. They were often seen (ac-

cordova to some of the old inhabitants) in the Windward Islands: but as those parts have become more frequented, their native shyness has driven them to the tranquil and solitary shores of the Bahamas; though in the more cultivated islands even here they begin to disappear. Towards dusk they generally paid a visit to a morass in the interior of Acklin's Island, in the neighbourhood of which it was supposed they roosted. I succeeded, after much trouble, in procuring one or two of them to be taken alive. When young they have been often reared by the inhabitants, for their nature is extraordinarily tractable and mild. The flesh of this bird is extremely rich, much like that of the wild duck, but with a strong fishy taste. The tongue is certainly delicate; but I did not find it worthy of the high encomiums bestowed on it by the ancients; by whom a dish of flamingoes' tongues was esteemed one of the greatest delicacies in their luxurious feasts.

On the key in the inlet, opposite to the house of the gentleman whom I visited, he had placed a number of guanas to breed. Alligators were sometimes brought in for the table; but it required considerable address and some courage to destroy them. The negroes, however, never display so much ingenuity or patience as in pursuit of prey. The flesh of an alligator which I tasted was hard, white, and very much resembled the sturgeon's.

Towards the middle of March, after a succession of strong gales from the north and north-east, during which we heard of several wrecks in our neighbourhood, the weather became more genial; and from the notes of the mocking-birds, and an appearance of quicker vegetation in the trees, which are never totally stripped of their leaves in the winter of this climate, the influence of spring was now evident.

In February and March I found the thermometer ranged between seventy and eighty. From a register, very accurately kept in Crooked Island for several years, it appeared that the greatest heat in summer has seldom exceeded ninety on Fahrenheit's scale, and the greatest depression in winter has

rarely been below fifty. The medium temperature of the summer at the hottest part of the day may be about eighty-six, in winter seventy-two or rather more.

An opportunity now offering to the westward, on the 16th of March I quitted Acklin's Key, and on the 18th arrived at the site of Pitt's Town. A small sloop of thirty tons burthen, built on this island, was ready to sail. This vessel had been employed as a *drogher*, in collecting cotton from the different plantations in the two islands for a large merchant ship which had just completed her loading, and lay in the bay, or Portland Harbour, with two or three small vessels, giving this nascent town an appearance of some trade. I embarked with a strong wind at south-east, and before sunset we could distinguish the end of *Long Island*, which lies nearly west from the Bird Rock: midway, the land was visible from the mast-head on both sides of the channel.

CHAPTER VIII.

The author leaves Crooked Island, and passes by Long Island and Exuma; of which islands, as also of Rum Key and Watling Island, a short account is given.

LONG ISLAND, as far as I could judge from a distinct view of it in passing along the northern coast, bears a very strong resemblance to that which I had just left. It was our original intention to have kept on the south side, which is more broken into keys, and affords, I believe, some convenient harbours; but the wind inclining to the south, we apprehended a shift to the westward, and, what is termed by

the sailors in this climate, a round-about, which might have greatly embarrassed us in the shoal water of the Bahama Bank, and upon a lee-shore. This island is so named from the great length of its figure, near 100 miles, compared with its breadth, which at a mean scarcely can exceed three miles. It was called *Yuma* by the Indians; of the import of which name in their language I can form no conjecture: but two islands, the one *Exuma*, lying on the west, and the other Atwood's Keys, or *Samana*, on the east, are probably derivatives from it: also some islets lying south-east on the margin of the Great Bahama Bank are called by the name of the *Yumettas*.

As Long Island was settled at an earlier period than Crooked Island, the improvements on the former have been more advanced, but the soil at the same time is probably more exhausted. At a very early period Long Island was resorted to by vessels from the Bermudas and New York for salt.* Before the American war some inconsiderable plantations had been made; and a few years after the peace of 1783 it was computed that near four thousand acres of land were in cultivation, and about eight hundred slaves employed on them. Of the present state of its population, from the desertions which have lately taken place, it would be a difficult and unpleasing office to form an exact estimate. Amongst its natural productions, this island is remarkable for the number and luxuriance, it is said, of its mountain cabbage-trees. It has been found, I believe, as productive in the culture of cotton as any part of the Bahamas: but a considerable quantity of the land in every plantation has remained uncleared from its natural sterility; and that which has been under cultivation is now for the most part likely to be abandoned. Three years ago it was positively asserted that eight or ten plantations were entirely quitted, and thirteen others partially given up, on *Long Island*. Yet this does not absolutely imply a total loss of property; for the soil, after a few years being left to nature, will recover itself, if not burnt in the previous clearing,

* Appendix to the Lives of the Pirates.

or injudiciously exhausted. It is thought, however, that one-half of the cotton land would not be fit for renewed tillage by any mode of treatment in less than twenty years to come. Upon the question being put to a very intelligent gentleman,* who was for some years a planter on this island, whether the worn-out lands could not be restored to their original fertility by manure? he answered, "Without doubt, manure will have the same effect on our lands as on those of other countries. Did this require proof, our gardens would afford it; but it is impossible for our planters to manure to any extent at present, owing to the want of cattle. These islands, however, are heaps of lime-stones and shells, covered (more or less) with a very rich vegetable mould; and the two former of these substances may easily be made to produce a sufficiency of the latter; for I have seen no other country in which the progress of vegetation is more rapid than in these islands, and that even in situations where it is hardly possible to discover any thing like soil. In woods which are so dense as to be scarce penetrable (which is generally the case with us), vegetable mould cannot fail to accumulate very fast; and a mixture of that with calcareous substances must necessarily form a fertile soil, extremely well adapted to the production of cotton."

A good carriage road runs nearly one hundred miles along the south-eastern coast of the island, and on the margin of the plantations. The ridge of hills sloping towards the sea appeared to follow the inclination of its length; and the plantations are laid out, I was informed, with the division lines generally traversing the island in its breadth from north-east to south-west. There are two large salt-ponds also here, from whence the inhabitants are employed in raking salt. After passing the north-western extremity of *Long Island* we altered our course, steering more to the west, with a view to observe the land of Great Stocking Island, which extends along the north-east side of Exuma, and forms its principal harbour.

* Wm. Wyllly, Esq. Attorney-general of the Bahamas.

The Exumas.—My notice of Great and Little Exuma, which, to my disappointment, we passed unseen, must be very summary. From all that I could learn, they bear the strongest affinity to the foregoing in almost every circumstance to which my attention in describing them has been confined. Their soil is fertile, but the same fatality attends the cultivation of cotton as in the rest of the Bahamas. The number of slaves, according to an enumeration of them in 1788, was found, I believe, nearly equal to that of the slaves on Long Island. A port of entry is established at the principal harbour, which, though one of the best in the Bahamas, is not accessible to ships of any considerable draught of water.

Rum Key and Watlings.—To the north-east of Exuma, two islands will be observed on the map which are now, or have lately been, in cultivation, named *Rum Key* and *Watlings Island*. *Rum Key*, sometimes named *Triangulo*, I hear, is almost entirely deserted, one settlement alone remaining there at present.* *Watlings*, having been more recently brought into cultivation, attracts some attention; and, though of little consequence from its size, is perhaps one of the most thriving spots in the Bahamas.

* A very estimable and intelligent gentleman, Mr. John Kelsall of Exuma, mentioned that he had lately removed his slaves to this island from Little Exuma.

CHAPTER IX.

St. Salvador.—Landing of Columbus.—Present state of the Island.—The Author proceeds by the Keys (on one of which he lands), and over the Great Bahama Bank, to New Providence.

STEERING about ten or eleven leagues in a northern direction from Long Island, you fall in with the south-east end of St. Salvador, memorable, according to the allusion of its name, for the preservation of Columbus. On the 11th of October, in the year 1492, that illustrious navigator first struck soundings to the westward of this island, and, laying-to in the night, observed a light on shore at the distance of two leagues. The next morning he landed in his boat somewhere on the eastern or the southern coast, and rowed on the ensuing day to a harbour, supposed to be the same as that which at present bears the name of *Port Howe*. Although within a few leagues of St. Salvador, I could not discover the land at the south-east point, which is low, and surrounded by a reef of rocks. The Spanish historiographer Herrera, upon the authority of all the narratives of this voyage (which are not always perfectly accurate), describes the harbour which Columbus first entered, as large, spacious, and, from the circumstance of its being on a crook of land almost encompassed by the sea, susceptible of an easy defence. A small Indian village, consisting of six houses, then stood near the landing-place, surrounded with trees, exhibiting the appearance of gardens. A country-house belonging to *Mr. Lyford*, and called *Columbia* in honour of the great navigator, is now situated near this supposed spot.

If we consider the position of two adjacent islands (Watlings and Little Island), and the undeviating western course pursued

by Columbus, (for Dr. Robertson observes, that in the whole extent of his voyage he scarcely advanced four degrees to the southward of his point of departure), it would seem probable that he must have passed within sight of one or other of those islands, unless he had landed further northward on the eastern coast of St. Salvador than is generally supposed. The circumstance may perhaps be explained by making a great allowance for the strength and setting of the current; and its irregularity will warrant almost any supposition: yet one cannot but admire the fortune and skill of this accomplished admiral in effecting a passage, at present never heard of, through this part of the Bahamas to Cuba; for probably nine out of ten strange vessels attempting it without the assistance of some chart, even in our present improved state of navigation, would be wrecked; and although it might be said the natives afterwards piloted the Spanish ships, they were unused to the draft of water of any thing bigger than a canoe.

The Indian name of this island was *Guanahani*; and though changed by Columbus to St. Salvador, so little respect was paid to his memory, that till very lately it has been commonly called *Cat Island*:—It is supposed, from the number of domestic cats which, left on shore, have multiplied prodigiously on this and most of the Bahamas.

From the ruins of a chapel and some few other buildings which are yet seen, it is evident that the Spaniards, although they afterwards abandoned the island, effected some slight settlement after its discovery. For many years afterwards it continued without inhabitants; and no settlement of any note was ever effected on it till the emigration of the loyalists from America after the cession of Florida in 1783. Amongst others, the family of a distinguished officer (Lieutenant-colonel Devaux), whose achievement I shall have occasion to notice in a short historical account of the colony, became settled on this island. St. Salvador, in 1788, contained forty heads of families, sixteen planters, and 458 slaves—at which time 2000 acres of land were found to be in cultivation. The soil is esteemed good: but the crops of cotton suddenly failed a few

years ago; which would have occasioned the total desertion of the island, if a seasonable relief had not been afforded by the introduction of a new species of the plant from Georgia.

After passing the tropic near the islands of Great and Little Exuma, which lie stretched to leeward, or on the south-west side of Long Island and Stocking Island, from which, as from each other, they are separated only by guts or narrow channels, we stood in towards the Exuma Keys with an intention of getting upon the white water of the Bank, as it is descriptively styled by the sailors. That immense accumulation of sand, called the Great Bahama Bank, offers a matter of curious speculation to the geological observer. Like the shores of the Bahama Islands in general, I believe it consists in a great measure of the relics of sea shells in the form of sand, more or less worn and rounded by the action of water. The Bank, which occupies an expanse of some hundred leagues in circumference, is bounded southerly and westerly by Cuba, and on the north-east by a broken range of innumerable little islands called the Keys, which immediately separate it from the unfathomable sea of Exuma Sound. The water on the Bank in this quarter was supposed to be from fourteen to eighteen feet deep. It did not appear from any thing I could learn, that the soundings have either increased or diminished for many years past. At a certain depth, probably, the sand is underlaid by calcareous rocks, from the heads or fragments of it which in many places, on approaching the islands, appear at the bottom; and which, as you coast the Keys, require the expertness of a vigilant pilot to prevent the vessel, in a tossing sea, from striking herself against their protruded heads in the shoals, which often occur. But the light colour of the sand, and the transparency of the water, render the passage neither difficult nor dangerous, with a proper degree of attention.

Through the Keys there are several cuts or passages from Exuma Sound to the Bank; and as we found a considerable swell in the deep water, and continual lightnings in the north-east gave us reason to apprehend an equinoctial gale, we were

anxious to get upon the Bank under the lee of the Keys, with the expectation of a more smooth and secure navigation. With this view, in the afternoon of the day after passing Exuma, we steered towards a passage named *Conch Cut*, from a prodigious quantity of conch shells which have been rolled from the Bank or adjoining shores, and thrown together near the mouth of this narrow pass. On making up to it with a fair wind, such a powerful tide set out from the Bank that we were compelled to abandon the passage for the present. Continuing therefore our former course, we passed an endless succession of small islands, stretching nearly in a north-western and south-eastern line. They were covered with small trees or shrubs, and on one or two of them we discovered some traces of inhabitants. After running about a hundred miles in the same parallel, the chain of islands assumes a different inclination, forming what is termed their *elbow*, at a settlement begun by *Colonel Deveaux*, after his brilliant achievement in this quarter of the world (to which I have just before alluded), towards the conclusion of the American war. In tacking out on the Bank in a short and fretful sea, a number of the dark heads of rocks were visible at times in the white sandy bottom, and we were obliged to avoid them by a sinuous course. Our captain, an expert and intelligent *Conch*, could judge with admirable precision, within a few inches, of the depth that his vessel would reach at every plunge: but being engaged a few minutes in examining the bearings of the distant land, and trusting in the mean time to the observation of a negro, we passed inadvertently over the tail of one of the rocks; and, if the helm had not been shifted, by a passenger's direction, in the twinkling of an eye, with the next wave our bottom must have felt a severer shock than any other timber than the mahogany of Crooked Island could have well resisted. From the apparent indifference of most of the crew at this crisis, I should presume, that they trust to their expertness in swimming on such occasions, like the aborigines: yet, although very near the bottom, we were at the distance of some miles from the Keys, and I confess, I should have been somewhat at a loss to have found my way there without the assistance of a vessel.

The weather proving unfavourable after we had effected the passage, we came to, and lay in a small harbour which sheltered us from the wind, and afforded me an opportunity of examining the shore.

One of the islands on which I landed, and which seemed to bear a characteristic resemblance in its appearance to all the rest, was composed of calcareous rock, much worn by the action of the sea, and fretted into holes like honey-combs. It was covered with silver-leaved palmettos, a dwarfish sort of mountain cabbage, wild fig-trees, sapadillas, and many of the vegetable productions which I observed at Crooked Island, but with very little soil to invite cultivation. The animals I particularly noticed were the *mocking birds*, which enliven the solitary shores with their own unborrowed and delightful melodies. From the holes and interstices of the rocks I frequently started lizards, which often in complexion seem to partake of the colour of the stone amongst which they lurk; and their full grown brethren the guanas, being unmolested in these desert islands, appeared in great abundance; but so watchful and evasive that I found it extremely difficult to shoot them. The bay was replete with various kinds of fish, which were easily taken, some of them remarkable for the lustre and variety of their colour; such as the grunt with azure and golden streaks on its nose, and the hynde spotted with brilliant red, and various others, correctly represented in the drawings of Catesby.*

Approaching towards the continent of North America, we now for the first time experienced a north-west wind, which induced us to continue at anchor, till, the north-east trade recurring, we got under weigh, and soon ran out of sight of the islands, proceeding over the Bank towards New Providence. The reflection from the white sand of the Great Bank rendered the sky almost of a livid colour. It was a novel situation, to

* Of the fish common to the Windward Islands the following are found here: sword fish, king fish, jew fish, hog fish, angel fish, bill fish, hound fish, parrot fish, trumpet fish, gar fish, bream, ten pounder, and some others.

behold an expanse of sea unbounded by any land, and the bottom at the same time distinctly visible at the depth of a few feet. Although the day was cloudless and the atmosphere uncommonly pure, the azure of the horizontal sky seemed flushed with an infusion of pink colour, producing an effect as beautiful as it was singular. We now drew near to New Providence.

The tops of the trees on *Rose Island*,* lying to the north-east of it, which were first visible as we approached the land, had exactly the appearance of a wood elevated in the air; an optical phænomenon which, though common in the northern latitudes, particularly in the autumn, I had never before observed in the West Indies.

It was a reviving change, after having been so long in the solitude and silence of the out-islands, either totally or partially uninhabited, to observe the numerous sails that appeared in every quarter steering to one point, while we heard at a distance the hum and activity of a populous town.

* On *Rose Island* I observed two or three houses and some improvements: but it was principally spoken of on account of its salt-pond.

CHAPTER X.

Description of the harbour and town of Nassau—its Trade.—Government of the Bahama Island.—Judicial establishment.—Agricultural Society of the Bahamas.—Causes of the failure of cotton.—General description of the country.

NEW PROVIDENCE.—The harbour of New Providence, to which the early settlement and present consequence of this island may be attributed, is formed, like that of Exuma, by a long key or slip of land running in front of the town of Nassau, nearly parallel with its length, from east-south-east to west-north-west. In entering through the eastern channel I passed by a small key, which formed a boundary on that side, whilst two or three corresponding islands appeared in the opposite quarter between the extremity of Hog Island (or the principal key) and the shore of Providence, rendering the enclosed position, if not completely land-locked, yet inaccessible in every direction to the unbroken violence of the sea. The body of the town is on the southern side of the harbour, and extends on a pretty steep acclivity to the summit of a ridge, which runs, as I observed of the other islands, for the most part in the direction of the general line of coast.

The view of the town, comprehending on the west a large fortress (on the same eminence), and the barracks for the troops overlooking the sea, is extremely striking from the mouth of the harbour. The general aspect of the place has something in it fresh and lively. The streets are regularly disposed, and in some parts remarkable for their unparalleled smoothness, being nothing more than the solid surface of a stone quarry, which has afforded of late abundant materials for building on the spot: I say of late, for singular as it may appear, when

spoken of a town as well built as any I saw in the West Indies, and which promises to become distinguished for its beauty, the durable buildings in Nassau were originally composed of stone imported from the Bermudas, at the distance of more than two hundred leagues. But the rock of the native quarries has been discovered to answer effectually every purpose of masonry, by a wash of lime, which gives both consistency and beauty to the exterior. A considerable square, or quadrangle, susceptible of much future embellishment, now occupies a large space in the western division of the town. The north side of this open space, near the water, is bounded by palisadoes, enclosing the works of a neglected fortress, from whence the town is named, constructed about the year 1740 by an engineer of the name of Bruce. The present residence of the Governor of the Bahamas is at some distance from this square, and towards the upper end of one of the streets, has a pleasing command of view, which includes the lower part of the town, Hog Island, the harbour intervening, and the more distant sea.

The ample materials furnished by nature, and the taste as well as circumstances of the inhabitants, ameliorated by the late war, have disposed them to the extension of their public buildings. The court-house now erecting, a new jail, and work-house in its vicinity, and the eastern parish church,* for which more than five thousand pounds was voted during one session by the Legislature, are instances of simultaneous and liberal expense by a small community in the improvement of its metropolis, which, if persisted in, must soon render it highly attractive and ornamental. Indeed one would suppose Nassau at present a very agreeable winters's residence for the valetudinarians of the southern part of the West Indies, particularly of the Windward Islands, from which the voyage is short and easy. It affords a medium temperature of climate between the heat of those islands and the keen air of North America, and the greater part of the year is extremely healthy.

* This building, erected by Mr. Joseph Eve (who informed me that he had made the roof low to avoid hurricanes), has a modern air; but it is not yet apparently finished.

The governor's dwelling is provided for him at the expense of the colonial government, which pays a rent of three hundred and twenty pounds per annum for his present house. But it is proposed to erect a new one on a more elegant and improved plan, for which the sum of ten thousand pounds has been already voted by the Assembly. The opulence of this small island is derived from other sources than the soil; for I believe it can scarcely boast of a single cotton plantation, and remains in a great measure clothed in its native wood. Many of the principal planters, however, on the other islands, who are concerned in the administration of the government, or in trade, have fixed their residence at Nassau. It is also the principal military and naval station in the Bahamas. But on subjects at all connected with its defence, or the means it may possess of annoying the enemy at a period of hostilities, I shall forbear to speak.

The town of Nassau is divided into two parishes, each of which is provided with a church and rector liberally supported by public contribution, or the eleemosynary bounty of the English society for propagating the gospel.*

The principal trade carried on at present is with England, the Southern Islands in the West Indies, and the United States of America, from whence the island derives continual supplies of live stock and provisions. Like most other parts of the prosperous empire of which it constitutes a part, Nassau has had reason of late years to boast of an increasing commerce, in proof of which it is said† that while the exports in 1773

* But those who fill the clerical offices in the West Indies are not all exact likenesses of Cowper's portrait of the preacher whom "Paul, were he himself on earth, would most approve."

† I refer to an intelligent pamphlet, known at Nassau by name of the "*Blue Book*," published by the present Attorney-General (Mr. W. Wylley), when advocating the claims of the planters removed from North America, to an extension in their favour of the representation in the colonial Legislature. It contains an able survey of the comparative state of the colony before and after the American war.

and 1774 amounted only to 5216*l.* 8*s.* 10*d.* and the imports during the same period to 3592*l.* in 1786 and 1787 the former were augmented to 58,707*l.* 10*s.* 1*d.* sterling (exclusive of a great deal of bullion, of which no account was kept), and the latter to 136,359*l.* 14*s.* 11*d.* During the succeeding years of war, without any diminution of their increasing prosperity, the attention of the inhabitants of Nassau has been diverted from a regular trade. It appeared to be visited often whilst I remained there by African slave-ships, some of which disposed of their cargoes on the island, but the major part proceeded to the Havannah.

I was witness to the sale of a pretty numerous cargo, which was conducted with more decorum, with respect to the slaves, than I had expected. They were distributed mostly in lots from five to twenty in each; but some of the boys and girls were disposed of separately. On the neck of each slave was slung a label specifying the price which the owner demanded, and varying between two and three hundred dollars, according to age, strength, sex, &c. This cargo was composed, as generally happens, of slaves from different nations, and speaking languages unintelligible to each other. Some apprehensions prevailed, notwithstanding all the expedients which had been used to convince them to the contrary, that they were brought over to be fatted and *eaten*. I had an opportunity of observing two or three the day after the sale in the hands of benevolent masters purchased for domestic servants, who seemed much delighted with their kind treatment as well as change of situation. Instead of being naked, they were clothed (in this climate as usual) in woollens; their food was much superior to what they had ever known before; they found themselves lodged in habitations abounding in comforts, some of them indeed superior to their comprehension; and in the streets they beheld many of their own colour, whose appearance, friendship, and hilarity had the most powerful influence in rendering them contented and happy in their new scene of life. I shall not presume to touch upon a subject of so much gravity and importance as the slave-trade, which has engaged all the eloquence, and almost exhausted the

attention of parliament: but whilst I applaud the philanthropy which still advocates the abolition of this traffic, I must remark, that I have found the opinion of many liberal and enlightened strangers in the West Indies undergo some relaxation on becoming acquainted with the actual situation and character of the negroes. Whether most of the persons of this description with whom I conversed, felt the bias of some personal interest, or the contagion of an opposite opinion by associating with the proprietors of slaves, or whether on a familiar view of what is vicious it becomes less obnoxious to our feelings, I cannot pronounce. But with respect to myself, I must frankly confess, that at times I found an inclination to pardon something of the supposed criminality of transporting them from Africa, on comparing their destitute and wretched state when first imported, with their condition under the treatment of good masters. Still it was at a moment when I forgot the unfeeling and often capricious cruelties exercised by superintendants and people of colour (their worst domestic tyrants), instances of which cannot be controverted or ever excused by those who have seen them and felt "*les angoisses que fait éprouver à une ame fiere et sensible le spectacle d'une injustice.*"* Yet, whatever may be the horror we justly feel at the idea of their perpetual bondage, it will be recollected, that they are not often endowed with that spirit of independence and dignity of sentiment which render it insupportable to a generous mind. On this principle *Las Casas* felt justified, it is said, in relieving the slavery of the high-spirited Indian nations by promoting the introduction of negroes. The cause of humanity, however, has been very little indebted to him by this expedient: for the Indians in the islands have nearly perished, and the negroes continue slaves.

The constitution of the Bahamas, upon the model of all our colonial governments in the West Indies, preserves in the distribution of the legislative, executive, and judicial powers, an exact resemblance to the system of the parent country.

* Condorcet.

The governor, as representative of the king, exercises the principal executive authority. He is commander in chief of the militia, institutes and determines the sessions of the legislature, and possesses a negative on their proceedings, subject to the approbation of the crown. His annual income, at this time, is estimated at something less than 3000*l.* sterling, including with a home salary, the colonial perquisites derived principally, I believe, from licensing vessels, and a small proportion of the wrecked property. In his judicial character he presides in the court of chancery, and the court of errors or appeals from the principal common-law tribunal.*

The council, which consists of twelve members appointed by the crown, and in case of vacancy during the governor's administration usually filled up at his recommendation, constitutes the upper house of the legislature, and participates with him in the judicial powers of the chancery and court of errors.

The house of assembly at present consists of twenty-six members, returned by the several islands in this government comprehended in districts. In the last sessions the town of Nassau, and the eastern and western districts of New Providence were represented by eight members, Harbour Island by three, Eleuthera three, Abaco three, St. Salvador one, Long Island two, Exuma three, Andros two, and Crooked Island one. The qualification of a representative, generally speaking, is either property of the value of 2000*l.* currency, or specifically 200 acres of cultivated land. In the choice, every free male white inhabitant, twenty-one years of age, resident twelve months within the government, and having been six months previously a householder or a freeholder, or having paid duties to the amount of 50*l.* in the preceding year, is entitled to a vote.

The judicial branch of the government is composed, in addition to the courts before mentioned, of a general (or su-

* He is vested also with the judicial power of the Ordinary.

preme) court for the province, exercising the consolidated powers of the courts of common-law in Westminster-Hall, and holding its sessions in terms of three weeks, at stated periods, beginning in the months of January, April, and July. The practice of this court is modeled upon that of the king's bench. The chief justice receives a salary of 500*l.* sterling from the crown; and, besides his perquisites of office, computed annually at about 400*l.* sterling, a colonial compensation for his services of 500*l.* currency per annum. The two puisne judges receive a home salary of 200*l.* sterling, and usually 250*l.* currency from the colonial government.

An inferior court of common pleas, taking cognizance of all causes where the subject in dispute does not exceed the sum of 20*l.* is held every three months at Nassau, from whence an appeal lies to the general court. If the matter in controversy exceeds 300*l.* in the superior court, it may be revised by the court of errors; and if beyond 500*l.* an appeal may be made in the last resort to the king in council. There is also a court of vice-admiralty at Nassau. The business, however, at the time of my visit to New Providence was so confined, that the functions of the judges presiding in these several courts (except the chancery and court of errors), were in fact performed singly by Mr. P. Edwards, an amiable and very estimable gentleman of the profession. Happy, indeed, were that country which could boast of a total exemption from juridical strife! This, however, would argue a degree of perfection to which our nature and social institutions have made but slight advances. The attorney-general of the Bahamas receives from the crown and colonial government about 500*l.* sterling per annum. But no provision is made for the solicitor-general.

The rate of interest for money in this colony has been lately fixed at 6 per cent. The damages allowed on protested bills of exchange returned from Europe are 20 per cent. and from America 15.

An agricultural society has been recently established under the patronage of the legislature of the Bahamas; an institution from whence the most beneficial consequences might be expected to ensue. Among its proceedings already published is a communication from Dr. Anderson of St. Vincents, describing a number of West Indian plants transmitted from the botanic garden under his superintendence in that island. Several kinds of the bread-fruit tree, which succeeds as well as most exotics in this climate, are particularly recommended to the attention of the society. But a subject properly falling under its notice, of greater public interest, the causes of the late failure of cotton, has been taken up and fully investigated by the government itself. Questions have been proposed by the house of assembly to the most intelligent and experienced planters* in the different islands; and from their unanimous opinion it appears, that no reasonable expectation can be entertained of any success, at least for some years, in the cultivation of cotton. Amongst the causes assigned for this severe and general disappointment, one of the most prominent is the destruction committed by those baneful insects the red bug and chenille, which I before noticed. Injudicious planting, and clearing the land, either by burning the soil, exposing it too much to the rigour of cold winds, or exhausting it by unremitted tillage, have been considered as fatal as the destructive agency of the insects. How these obstacles may be in part, or totally removed, is a topic which affords some conjecture and speculation: but it seems by all the gentlemen to be considered as a work only of time, which admits scarcely any prospect of relief from intermediate ruin or distress.

The greater part of the island of New Providence, as I have before observed, yet remains uncultivated. The exceptions to this general description, to be found in the environs of the town and along the margin of the northern coast, consist principally of gardens, pasture grounds, pineries and orange groves. Situated near the line of the tropic, Providence can

* Messrs. Kelsall, Hall, W. Wylley, Eve, Anderson, T. B. McKinnen, J. Moss, and nine other gentlemen.

boast of a climate admitting the cultivation in the natural ground of the vegetables of both zones, though perhaps not favourable to the peculiar productions of either. In the town of Nassau and in its neighbourhood, I saw two gardens formed and kept up with great labour and expense. In that which I visited, west of the town, strawberries and many of the northern fruits were associated with some of the most delicate inmates of the English hot-house.

The roads leading some miles along the shore on each side of the town are extremely good. In the eastern direction the landscape is picturesque, and embellished with rural improvements and some country houses, particularly a small seat called the Hermitage, formed with no inconsiderable labour by the late Governor, Lord Dunmore. In the opposite quarter, at a small distance from the town, I visited an extensive pinery. The plants were irregularly scattered amongst the rocks (which every where appear on the surface), and seemed to be in a thriving condition, although very little attention was bestowed on them—at least little attention proportioned to our ideas of their value: but the apples, I was informed, are sold at Nassau sometimes as low as a dollar the hundred. Whilst walking through the pinery, and admiring a profusion of this rich and beautiful fruit, I was surprised to find myself insensibly led among the stems of a grove of pitch pine trees, and to observe from a singular coincidence of circumstances apples lying promiscuously together, which bear the same name, though as remote in their nature as the positions of the countries to which they respectively appertain. This is the most southern situation in which I have observed the pitch pine* a native of the North American forest; and I felt highly gratified at meeting unexpectedly an old acquaintance, which informed me, that I was on the confines of a climate more congenial with my nature.

* A species of pine which perhaps resembles this, is found on the mountains of Cuba. See the splendid and truly magnificent work on Pine Trees, lately published by the Vice-president of the Linnæan Society.

From my observations of the thermometer at Nassau (although the spring was advancing) there was a difference of two or three degrees in the temperature of this climate in favour of its coolness, compared with that of Crooked Island; and the northerly winds were more fresh and invigorating. I have incidentally suggested that Nassau is at times visited by *hurricanes*. Whether, strictly speaking, that term may be properly applied or not to certain gales of wind in this quarter, during the hurricane months in the West Indies very destructive tempests have been sometimes experienced in the Bahamas. Two or three years ago, in the harbour of Nassau, protected as I have described, I believe one hundred vessels were driven on shore. The wind commenced at north-east, and shifted to the opposite point of the compass, from whence it blew with increased fury.

On descending the hill in a southerly direction from Nassau, the country appears totally uncultivated; and from the summit of a ridge running parallel with that on which the town extends, at about two miles distance from Nassau, the southern boundaries of the island are nearly visible. The general figure of New Providence is that of a parallelogram with acute angles projecting east and west. The diagonal is about twenty-seven miles in length. In 1801 Nassau contained 1599 white inhabitants, 752 free people of colour, and 3861 slaves.

With respect to the inhabitants, generally speaking, I can have very little to say. The minute shades of difference, which characterize the English settlers in the different latitudes on this side of the Atlantic, are scarcely perceptible, or worthy of description. Local causes have not as yet had a sufficient influence on their nature, customs, or manners, to produce any very striking peculiarities.

But were I on a slight impression to judge, from the present and former characters of the natives, I should be almost tempted to attribute something to an assimilating influence in the climate; for I certainly did in some striking instances observe that amiable and beneficent disposition which accords with the

representation of the ancient *Lucayans*. Their regularity of features also is not imperceptible in some modern faces. Perhaps there are few countries more favourable to female beauty than this and the adjacent parts of the continent. I have nowhere observed more delicacy united with a spirited expression of countenance.

CHAPTER XI.

Historical account of New Providence.—Black Beard the pirate.—Governor Woodes Rogers.—Colonel De Veaux's conquest of the island from the Spaniards in 1783.

THE early part of the history of this colony consists in a great measure of the desultory transactions of a daring body of pirates, who fixed on the harbour of Nassau as the rendezvous of their shipping and the depot of their spoil. The shoal water on the banks, and the numerous keys inaccessible to large ships, and difficult of approach to all, afforded them for many years, in prosecuting their depredations in the West Indies and remoter seas, a secure and convenient retreat.

New Providence was visited by Columbus on the 17th of October in the year 1492, and named *Fernandina* in honour of Ferdinand king of Spain.* But so much was the public attention engrossed by the valuable countries to which he afterwards directed his course, that the discovery of the island was attributed to an English navigator (Captain William Sayle), driven there in the year 1667 on his passage to Carolina. From the fortunate preservation which on that or a subsequent voyage he experienced in this island from shipwreck, Captain

* The particulars of Columbus's voyage through the Bahamas are related in the next chapter.

Sayle was induced to call it Providence. As the same name, however, had been given to a district of country on the coast of our northern settlements in America, this, as the latest discovery, was probably distinguished by the description of *New** Providence. From the representation which this gentleman made on his return home to the proprietors of Carolina (of which colony he was afterwards Governor), Providence with the other Bahama Islands was granted by Charles II. to the Duke of Albemarle and five other proprietary lords. Shortly after its location some emigrants from England, and the colonies in America having settled or proposing to form a settlement on the island, in the year 1672, Mr. Collingworth was sent out to superintend the infant colony at Nassau. Some misunderstanding, however, taking place, he was afterwards seized by the licentious inhabitants (probably for the most part pirates), and transported to Jamaica. Although the proprietary lords some years afterwards sent out a successor to Mr. Collingworth, they do not appear to have made any energetic efforts to repress such audacities in future: but the Spaniards, who were more interested to inflict an exemplary vengeance on a colony which, in the neighbourhood of one of their valuable possessions, committed incessant depredations on its commerce, made frequent and ineffectual attempts to exterminate the settlement at Nassau. From this motive, combined with the jealousy they always entertained of the colonization of any other nation in a part of the globe which they considered exclusively as their own, in one of their descents on Nassau, it is said, they actually *roasted* Mr. Clarke the Governor. But the pirates, whose loss of property was easily replaced by the means by which it was originally acquired, were no sooner dispersed than they returned to their favourite asylum: and the only permanent effect produced by these attacks was a more malignant hatred against their invaders, cherished even to this day; for no where in the West Indies have I remarked, that the Spaniards are so much dreaded and detested as in the Bahamas.

* This epithet *New*, however, was perhaps applied to this island, to distinguish it from the little island of *Old Providence*, lying west of the Musquito shore.

In a course of years several Governors were successively appointed; but I have found little either interesting or curious in the detail of their proceedings. On arriving at this remote government, they were either intimidated by the licentious colonists, or suffered with them the vengeance, which the cruel and exasperated Spaniards were invited to inflict on this settlement by the symptoms of its growing prosperity. In the last attack, in the year 1708, the French united with the Spaniards. The negroes were taken off; and the inhabitants, who had secreted themselves in the woods, afterwards retired to Carolina. Previous to this epoch the settlers amounted to about 1000 in number on the islands, and some promising attempts had been made to cultivate provisions, sugar, and tobacco. Mr. Birch, the succeeding Governor, who visited Providence, found it totally uninhabited, and, having encamped for some time in the woods, returned to England.

The pirates, however, who had become at this period more numerous and formidable than ever, finding the place deserted, returned, after their successful voyages, to riot at Nassau in every species of debauchery and excess. The History of their lives* is replete with those instances of enterprise, ferociousness, and generosity, which characterize the actions of brave, uneducated, and thoughtless men. *Hastis humani generis*, they attacked and plundered the vessels of every nation which they met, without excepting at all their own. At length the impudence and success of one, amongst other notorious leaders, had so much attracted the public attention, that his Majesty King George I. at the solicitation of the merchants of London and Liverpool, was induced to send out a respectable armament under the intrepid navigator Captain Woodes Rogers, with a determination to reduce the colony to obedience. The Governor, however, did not arrive before the death of John Teach, the noted pirate before alluded to, nicknamed *Black Beard*. As his name is still familiar to the inhabitants of Nassau,† I was induced to make myself acquainted with his

* Written by Captain Johnson.

† A person, I believe, now living there, recollects him.

story on this the principal scene of his actions. This extraordinary man had united in his fortunes a desperate and formidable gang of pirates, styling himself their Commodore, and assuming the authority of a legitimate chief. Under a wild fig-tree, the trunk of which still remains, and was shown to me in the eastern part of the town, he used to sit in council amongst his banditti, concerting or promulgating his plans, and exercising the authority of a magistrate. His piracies were often carried on near the English settlements on the coast of North America, where he met with extraordinary success. Perhaps, in the history of human depravity it would be difficult to select, actions more brutal and extravagant than Black Beard's biographer has recorded of him. As the narrative to which I allude is generally credited, and bears strong internal evidence of truth, it may be amusing to mention a few particulars of a man who was for some time considered as sovereign of this island.

In person as well as disposition this desperado, who was a native of England, seems to have been qualified for the chief of a gang of thieves. The effect of his beard, which gave a natural ferocity to his countenance, he was always solicitous to heighten, by suffering it to grow to an immoderate length, and twisting it about in small tails like a Ramillies wig; whence he derived the name of Black Beard. His portrait in time of action is described as that of a complete fury; with three brace of pistols in holsters slung over his shoulders like bandoliers, and lighted matches under his hat, sticking out over each of his ears. All authority as well as administration amongst the pirates was conferred on those who, committing every outrage on humanity, displayed the greatest audacity and extravagance. Black Beard's pretensions to an elevated rank in the estimation of his associates may be conceived from the character of his jokes. Having often exhibited himself before them as a demon, he determined once to show them a hell of his own creation. For this purpose he collected a quantity of sulphur and combustible materials between the decks of his vessel; when, kindling a flame, and shutting down the hatches upon his crew, he involved himself with them, literally, in fire and

brimstone. With oaths and frantic gestures he then acted the part of the devil, as little affected by the smoke as if he had been born in the infernal regions; till his companions, nearly suffocated and fainting, compelled him to release them. His convivial humour was of a similar cast. In one of his ecstasies, whilst heated with liquor and sitting in his cabin, he took a pistol in each hand; then, cocking them under the table, blew out the candles, and, crossing his hands, fired on each side at his companions: * one of them received a shot which maimed him for life. His gallantry also was of the same complexion as this vein of humour. He had fourteen wives, if they may be so called. But his conduct towards one of them appears to have been too unfeeling and unmanly to admit of description.

The English government, having determined to clear the sea of these ruffians, directed some ships of war to effect that purpose in the early part of last century. Black Beard at that time was lurking in a small vessel in the creeks and shallows of an inlet near Cape Hatteras, in North Carolina. But the chief magistrate of that province having long connived at his robberies, the sufferers gave information to the governor of Virginia, and the naval force on that station directed to assist in the extermination of the pirates. The intrepidity displayed in this service by a lieutenant of the name of Maynard, at least equal to that of the rover, and in a better cause, deserves a circumstantial relation.

From the nature of Black Beard's position, in a sloop of little draught of water, on a coast abounding with creeks, and remarkable for the number and intricacy of its shoals, with which he had made himself intimately acquainted, it was deemed impossible to approach him in vessels of any force. Two hired sloops were therefore manned from the Pearl and Lime frigates in the Chesapeake, and put under the command of the gallant officer before named, with instructions to hunt

* One of the guests, who related this anecdote, perceiving what was likely to happen, adroitly took himself off.

down and destroy this pirate wherever he should be found. On the 17th of November in the year 1718, this force sailed from James River, and in the evening of the 21st, came to an inlet in North Carolina, where Black Beard was discovered at a distance lying in wait for his prey. The sudden appearance of an enemy preparing to attack him occasioned some surprise; but his sloop mounting several guns, and being manned with twenty-five of his desperate followers, he determined to make a resolute defence; and, having prepared his vessel over night for action, sat down to his bottle, stimulating his spirits to that pitch of frenzy by which only he could rescue himself in a contest for his life. The navigation of the inlet* was so difficult, that Maynard's sloops were repeatedly grounded in their approach; and the pirate, with his experience of the soundings, possessed considerable advantage in manœuvring, which enabled him for some time to maintain a running fight. His vessel, however, in her turn, having at length grounded, and the close engagement becoming now inevitable, he reserved her guns to pour in a destructive fire on the sloops as they advanced to board him. This he so successfully executed, that twenty-nine men of Maynard's small number were either killed or wounded by the first broadside, and one of the sloops for a time disabled. But notwithstanding this severe loss, the lieutenant persevered in his resolution to grapple with his enemy, or perish in the attempt. Observing that his own sloop, which was still fit for action, drew more water than the pirate's, he ordered all her ballast to be thrown out, and, directing his men to conceal themselves between decks, took the helm in person, and steered directly aboard of his antagonist, who continued inextricably fixed on the shoal. This desperate wretch, previously aware of his danger, and determined never to expiate his crimes by the hands of justice, had posted one of his banditti with a lighted match over his powder magazine to blow up his vessel in the last extremity. Luckily in this design he was disappointed by his own ardour and want of circumspection: for, as Maynard approached, having begun the encounter at

* Ocracoke inlet, a little south of Cape Hatteras.

close quarters, by throwing upon his antagonist a number of hand-grenadoes of his own composition, which produced only a thick smoke, and conceiving that from their destructive agency the sloop's deck had been completely cleared, he leaped over her bows, followed by twelve of his men, and advanced upon the lieutenant, who was the only person then in view. But the men instantly springing up to the relief of their commander, who was now furiously beset, and in imminent danger of his life, a violent contest ensued. Black Beard, after seeing the greater part of his men destroyed at his side, and receiving himself repeated wounds, at length, stepping back to cock a pistol, fainted with the loss of blood, and expired on the spot. Maynard completed his victory by securing the remainder of these desperate wretches, who were compelled to sue for mercy, and a short respite from a less honourable death at the hands of the executioner.

From this and other successful efforts of the royal navy, as well as his own formidable squadron, governor Rogers on his arrival at Providence found very little resistance to his authority. Vane, one of the pirates, who was then in the harbour, after making some shew of resistance, set fire to his ship, and retired in a small vessel with about fifty of his men. The rest of the inhabitants cheerfully united in promoting the governor's views for the interest and defence of the colony, by surrounding the dilapidated fortress with palisadoes, clearing the public roads, and rebuilding the town, which a few years before had been laid waste. Sensible, however, that persons of the description of these colonists would find their most natural and useful occupation on the sea, he encouraged them to adventure in small vessels on trading voyages. Some of them at first discovered a hankering after their old profession, and in one or two instances ran away with their vessels, but were afterwards constrained to return and submit. Many families were now induced to settle at Nassau, and amongst others, for some time, a body of Germans from the Palatinate. A council of twelve persons was nominated by the governor, to assist in the transaction and arrangement of public concerns, and a regular militia was established for the

defence of the island. The population of Nassau at this time did not exceed 1000 souls.

After the departure of governor Rogers, the history of this island affords nothing but the detail of a variety of local disputes and inquietudes under his successors, which have almost uniformly disfigured the earlier annals of our colonial establishments. In the year 1740 Mr. Bruce, (in whose Memoirs many of the principal facts respecting the colony are mentioned), was sent out as an engineer to fortify the town and harbour of Nassau. But for several succeeding years I have found nothing particularly deserving notice.

During the earlier part of the American war the island was taken by a small force under commodore Hopkins, and abandoned as untenable. But it was retaken afterwards in the year 1781 by the Spaniards, assisted by the Americans, and retained during the remainder of the war. But previous to the notification of the treaty, an enterprising young officer, lieutenant-colonel Deveaux of the South Carolina militia, had undertaken, with a body of about fifty volunteers, to recover the possession of the island, at that time garrisoned by seven hundred Spanish regular troops. He sailed on this desperate attempt in two armed brigantines, commanded by captains Dowd and Fennel, from St. Augustine in East Florida; and after picking up a few recruits, principally negroes, at Eleuthera and the adjacent island, appeared off the key which forms the harbour of Nassau on the east of the town, towards night. The conquest of a fortified island by so disproportionate a body of men could only be effected by consummate ingenuity and address. The men were landed, without opposition, to the east of Fort Montagu, which guards the entrance of the harbour in that quarter; and so great was the supineness of the garrison, that, when the invaders had reached the ramparts, the sentinel only was awake to defend them. He appeared with a lighted match in his hand, ready to blow up the fortress in case of extremity. But colonel Deveaux, who headed the attack, before he could recover from his surprise, sprang upon him, and, frustrating his in-

tention, made him a prisoner with the sleeping garrison. Having thus easily possessed himself of Fort Montagu, colonel Deveaux immediately proceeded to the top of the ridge, and took a position in front of the governor's house in the upper part of the town. Every artifice was used to deceive the Spaniards, both as to the number and description of the enemy they had to contend with. A show of boats was made, continually rowing from the vessels, filled with men, who apparently landed, but in fact concealed themselves by lying down as they returned to the vessels, and afterwards made their appearance as a fresh supply of troops proceeding to disembark. Men of straw, it is said, were dressed out to increase the apparent number on the heights; and some of the troops, to intimidate the Spaniards, were painted and disguised as their inveterate foes, the Indians. One or two galleys in the harbour had been captured; and, trusting to the circumstances in his favour, colonel Deveaux summoned the governor to surrender, with a pompous description of his formidable force. Some hesitation being at first discovered, the colonel seconded his overtures with a well-directed shot at the governor's house from a field-piece, during his deliberation, which produced an immediate capitulation. The Spanish troops, in laying down their arms, it is said, could not refrain from expressing the utmost mortification and confusion as they surveyed their conquerors, not only so inferior in point of numbers, but ludicrous in their dress and military appearance.

After this period, New Providence being restored to Great Britain, has increased in wealth and consequence, and the proprietary lords have relinquished their title in favour of the crown.

CHAPTER XII.

The Author proceeds from New Providence—passes the Berry Islands.—Short description of Andros.—Bimini Islands.—Eleuthera and Harbour Islands.—Their discovery and settlement.—The course taken by Columbus through the Bahama Islands.—Abaco.—Great Bahama Islands.—Some account of the Aborigines.—The Florida Stream—Arrival at Charleston in North America.

ON leaving the harbour of Nassau, and proceeding to the westward, the first land which appeared in view, after a night's sail, was the South Bluff on one of the Berry Islands. These uninhabited keys are projected a little to the north of the island of Andros, which lies about ten leagues to the west of New Providence.

Andros, although rocky, and possessing a light soil, has invited some cultivation. In the year 1788, 813 acres upon it were cleared, and there were twenty-two white heads of families, and seven planters, with 132 slaves. It is probably the island called *Suomoto* by the Indians, which was denominated *Isabella* by Columbus, in honour of the queen of Spain.

The mahogany of *Andros* is spoken of as comparatively large, and it is said to abound with the species of pitch pine which I observed at New Providence. At some distance to the westward of the Berry Islands, and east of the Florida Stream, lies a cluster of small islands called the *Bimini*, celebrated amongst the natives for the extraordinary virtue of a fabulous spring, which, it was said, restored old people to youth.—The Spaniards, giving credit to this idle tradition, anxiously went in pursuit of it.

Eleuthera and Harbour Island.—In the same parallel of latitude as Andros, and nearly at an equal distance from Providence, lies an island known at a very early period in Europe, from the medicinal virtue of a shrub which it produces of the name of eleuthera or ilathera (Croton). The bark of this shrub, possessing less astringency, has been sometimes preferred, in the practice of physic, to the Peruvian bark.* But the island is principally valued for the provisions and fruit, especially pines, which it yields, and from whence the market of Providence is supplied. It was cultivated at a very early period, and considerable settlements were formed there under the government of captain Woodes Rogers. Many of the proprietors reside on the adjacent island, called Harbour Island;—originally sea-faring people, who, at first attracted by the convenience of a harbour, in process of time, probably, like the small proprietors in the neighbourhood of Nassau, residing near the harbour which they had before frequented, when tired of the sea, bestowed their labour on gardens and provision grounds. But as the soil on Harbour Island was unproductive, they formed their principal plantations on Eleuthera. Hence, at a period of time when the contiguous islands continued uninhabited, or nearly so, previous to the American war, in Eleuthera were settled 119 white heads of families, and in Harbour Island 94; besides about 350 slaves. At the same time 725 acres of land were in cultivation at Eleuthera.

One of these islands, from some white rocks † laid down on the eastern coast, has been sometimes called Alabaster Island. Not having visited either of the islands, I have confined myself to the detail of a few particulars, which I hope will be found as accurate as the nature of these inquiries will generally admit. I shall not dwell upon other particulars,

* It is usually exported in pieces curled, or rolled up in short quills. There are two sorts of the Croton which are found in the Bahamas, the Croton Cascarella (or ricinoides eleagni folio of Catesby) and Croton Eleuteria; which latter, *ex vi termini*, imports the species peculiar to this island.

† Jefferys' American Atlas.

in which I believe they nearly correspond with the rest of the islands: but having before touched on the first voyage of Columbus, and finding that many of the original names of these islands, from the uncertainty of the descriptions, have been often very much misplaced, I shall attempt, as nearly as possible, to trace the remainder of his course through the Bahamas.

From Port Howe, on the south side of St. Salvador, it is related, that Columbus proceeded, with seven of the natives who acted as pilots, to the examination of other islands *in sight* (probably Little St. Salvador and the Keys adjoining); "above a hundred of them," according to the words of Herrera, "appearing plain, green, and inhabited." Suppose, however, what is not impossible, that the Exuma Keys might have been seen by one of his vessels, and here alluded to, the trade-wind would have naturally directed him in an eastern course. No other land can therefore be intended than Eleuthera by the large island which it is said he saw on the 15th, and named *St. Mary of the Conception*. The south part of St. Mary, running east and west, he coasted to its north-western point, on which he landed. The natives flocked in great abundance round Columbus on his arrival at this island; but finding nothing to distinguish their country from that of St. Salvador, he proceeded the next day to the *westward*, and in the evening of the 17th, after ranging along the north-eastern coast of New Providence, came to an anchor without the harbour, near the present situation of the eastern fort. He was deterred from proceeding further by the shallowness of the water, and preferred this position from an Indian town or village on the shore more populous and extensive than any which he had previously seen on the adjacent islands. The natives were apparently of the same nation, and kept up an intercourse with those on St. Salvador; for on their way from Eleuthera the Spaniards fell in with an inhabitant of the latter island in his canoe, who had been despatched to communicate intelligence of the arrival of these extraordinary visitors to their neighbours at Providence. Two or three of the presents distributed by Columbus at St. Salvador were found in the canoe, with a

provision of Indian bread, water in a gourd, and some of the Eleuthera bark. The navigators described this island as abounding with fresh water, lakes, meadows and groves agreeably interspersed, with hills more elevated than they had seen in the preceding islands. Columbus therefore honoured it with the name of *Fernandina*, after the King of Spain.

He then proceeded to Andros, which he explored, and thence continued his voyage; touched at the *Holy Ghost* Keys, and those named Del Arena, on the edge of the Salt Key Bank, and crossing the Santareen channel which separates them in a west-south-west course, on the 27th of October in the evening arrived off Cuba.

If, by the powerful tendency of a current setting eastward through the Santareen channel, he had been carried on the Florida shore, a circumstance under the influence of a south-east wind not unlikely to have happened, the discovery of the American continent would not then have been contested with him by a quibble, and his illustrious name would have been stamped, as a memento of the glorious discovery, on one half of the habitable globe.

On looking at the map, and observing amongst innumerable keys two large islands which have given their former and present denomination to the rest of the Bahamas, one might naturally have expected them to afford a subject of some interest on the examination. But the *Great Bahama* is absolutely uninhabited, and there seems nothing remarkably flourishing in the circumstances of Abaco.

This latter island, called sometimes *Yucaya*, *Lucayæ*, or *Lucayoneque*, lies in a north-westerly direction from ten to fifteen leagues distant from Eleuthera and Harbour Island, and its southern point is situated at about the same distance from *The Berry Islands*. In a topographical view it may be compared with Crooked Island; that part of it described by the name of *Lucaya** representing, in its position with respect to

* Referring to the description in the American Atlas, by Jefferys.

the points of the compass, North Crooked Island, Abaco or Lucayoneque, Acklin's Key, and the little islet *La Desconocida*, near the hole in the rock, forming a southern boundary to the colony like Castle Island. If this part of the colony has not attracted so much attention from the cultivator as the southern islands, it appears to have been much more indebted to the nautical surveyor; and the descriptions in some modern charts will be found, I believe, pretty exact.

Little Harbour, on the eastern coast of Abaco, is esteemed one of the best in the Bahamas. With respect to the interior of the islands I have very little to say. Fourteen years ago about two thousand acres had been cleared, and several settlers had established themselves there, who at this period I fear have removed, or are on the point of seeking some more promising region on the immense continent in their vicinity, which, whilst it affords a various choice, encourages a perpetual spirit of emigration.

In a vessel of a small draught of water we were enabled to stand close in with the Great Bahama, and coasted it for some distance to the west of the *Roud Rocks* towards *Wood Key*, within a distinct view of the shore. There was not the least appearance of any cultivation on the island; but I could not behold the beautiful and fragrant woods over the white strand, without recurring to the fate of that innocent race of people whose name it bears, but who have long since been dragged from their native shores by the merciless ambition and avarice of their European visitors. A passage in Herrera came forcibly to my recollection whilst meditating on the subject, in which he says, that on the first arrival of the Spaniards this unsuspecting but devoted people were never satisfied with looking at them: they knelt down, lifted up their hands and gave thanks to God, inviting one another to admire the *heavenly men*. Twenty years, however, had scarcely elapsed before these heavenly men found it convenient to transport them, by force or artifice, to dig in the means of Hispaniola; a measure to which the court of Spain was tempted to give its assent by the plausible suggestion that it would be the most effectual

mode of civilizing and instructing them in the Christian religion. Upon this pretence 40,000 souls (probably the whole population of the islands) were transported to Hispaniola. So exalted was the opinion which this simple people entertained of their destroyers, and so strong and universal is the persuasion of the human mind that a destiny awaits it beyond the miseries and disappointments of its present bounded existence, that many of the Lucayans were induced with cheerfulness to abandon their homes, under a persuasion that they should meet in a happier country the spirits of their deceased friends, with whom the Spaniards represented themselves as living in a state of society. As the situation of these islands with respect to each other invited a continual intercourse amongst the inhabitants, who probably subsisted in a great measure on fish, one may justly presume they were principally devoted to a maritime life. Some of their canoes were large enough to carry between forty and fifty persons. Indeed many convincing proofs of their intrepidity and expertness in the water occurred after their transportation to St. Domingo; when, finding the delusion which had been practised to decoy them from their native country, they made every effort to regain it. Some few effected their escape, although many were frustrated in the design. Two men and one woman had constructed a raft; and having laid in a stock of Indian corn, and water in gourds, in the hollow of a tree attached to the bottom of the raft, they put to sea, proceeding in a northern course towards New Providence. As might be expected they were often washed from the deck of their precarious vessel: but being admirable swimmers, and accustomed to struggle with the waves, they regained the raft; and working their way with paddles, they had actually proceeded one hundred and fifty miles on this long and perilous voyage, when, intercepted by a Spanish ship, it was their cruel fortune to be carried back again to the country which they so much detested, and where they were doomed to eternal slavery. There are very few particulars in which the inhabitants of these islands will be found to differ from the natives of Cuba, or of the North American continent whence in all likelihood they originally emigrated. In person they were of a middle stature, well shaped, but rather fleshy, of an

olive colour, with high foreheads, open countenances and regular features. Their hair was black, lank, and thick, sometimes cut short over their ears, and sometimes tied in tresses. They were for the most part naked and their bodies or faces, like those of the North American warriors, were painted generally red, but sometimes black or white. They were totally ignorant of the use of iron; and the only articles of any value discovered amongst them were cotton and gold. Although averse to war, they sometimes found it necessary to arm themselves in self-defence; and on such occasions they made use of javelins pointed with fish-bones. The principal talent they possessed, and which the Spaniards found of value, was their extraordinary expertness in diving, having been probably accustomed to subsist on conchs obtained in this manner in the Bahamas. On this account they were generally transported by the Spaniards still further south, and employed in the pearl-fishery on the island of Cubagua, on the coast of Cumana in South America. It is said that one hundred and fifty ducats, at that time a large price, were often given at Hispaniola for a diver of the Bahamas. They survived, however, but a few years under the dominion of their oppressors.

From the Great Bahama we followed the course of the Gulph stream, in which although the wind was contrary, accompanied with a heavy swell of the sea, our progress to the northward along the Florida coast was extraordinarily rapid. There is no part of the seas, I believe, in which the navigation is more difficult and deceitful than near the south shore of Florida, where the currents, setting from the westward through the channels of the Bahamas, mingle with that impetuous tide which issues from the Gulph of Mexico. That forty sail of wrecking-vessels, as I before mentioned, should have kept their station at one inlet on this coast, is a pretty convincing proof of the numerous victims continually thrown on its shoals. The well-known American traveller, Charlevoix, many years ago was wrecked in this quarter, and he gives a pretty exact picture of what almost daily occurs. So very fallacious and irresistible are the cross currents and eddies, that it often happens whilst vessels are steering in one course they are carried

nearly in an opposite direction; and till the crews behold the breakers, or the wrecking-vessels hovering round them, they can hardly persuade themselves of their desperate situation. It also unfortunately happens that the Land is low on the whole extent of this coast, and the trade-wind sets directly upon it. The limits of the Gulph stream, as some intelligent sailors assert, may be almost exactly defined by observations on the temperature of the water. The thermometer, when immersed to a certain depth, denotes a higher temperature than that of the sea on either side of the current; a circumstance which will be naturally expected from a vast body of water flowing continually from the south. Those who frequent these seas are apt to attribute the inconstancy of climate, and flurries of wind, often experienced on the coast of America, to some magic in the Gulph stream; and perhaps a just philosophy will admit that it may have an influence on the atmosphere. It is not improbable that some assistance to navigation may result from a more studious attention to the phænomena it presents.

In a short time we entered the latitude of the variable winds; and a mild breeze from the south-west, which generally prevails through the summer on the American coast, carried us into the bay of Charleston. The country about this large town is flat and sandy; yet the banks of the rivers present some scenes of singular interest and beauty. I was particularly delighted with the novelty and endless variety of the vegetable productions of nature. But of the many interesting objects which present themselves in this part of North America to the observation of a stranger, it is not my intention to attempt any description, as they do not fall within the limits of my undertaking. Indeed, the publication of a late distinguished traveller, has left little of any general importance to be added at this moment to what he has written. I cannot say, from the opinions expressed by some respectable inhabitants, that he has always given satisfaction. But it rarely happens, that the information of a traveller is as exact as that of many persons resident in the countries he presumes to describe. Hasty impressions are too often received, which time and deliberate inquiry might correct; and the novelty of objects, while it

- prompts and animates description, is too often unfriendly to that reflection and patient discrimination which alone can render our observations useful. If, with such amongst other disqualifications, the author of this little performance shall be found too often personally reprehensible, the originality of his principal subject, which gave rise to the undertaking, will be admitted with the candid as some apology for his errors.

THE END.
